[White's multiple alternatives all seem to reach the same kind of positions: -- a) 11.cxd6 Bxd6 12.Nxd6 (White picks up the bishop pair, but no advantage) Qxd6 leaves Black ahead in development, while White's wobbly d-pawn doesn't appear so secure. ]

[b) 11.Bc4 a6 (forcing a resolution of the central tension) 12.Nxd6 Bxd6 13.cxd6 Qxd6 14.0-0 b5 15.Bb3 Bb7 16.f4 Nd7 17.fxe5 Nxe5 , when the isolani is blockaded and Black stands no worse, B.Vymazal-L.Klima, Havlickuv Brod 2005. ]

[c) 11.Be2 Na6! 12.cxd6 Bxd6 13.0-0 Nc7 14.Qb3 Nxb5 15.Qxb5 f5 16.f4 Qe7 17.Kh1 Bd7 18.Qb3 *( 18.Qxb7? Rfb8 19.Qa6 Rb6 20.Qd3 exf4* favours Black, who threatens ...Bb5 *)* 18...Kh8 19.Bd3 b6 20.fxe5 Bxe5 21.Bf4 Bxf4 22.Rxf4 Qd6 and the d5-pawn feels more like a liability than a promise of good fortune, so I slightly prefer Black, A. Berelovich-A.Shariyazdanov, Swidnica (rapid) 1997. ]

[d) 11.Be3 Na6! 12.cxd6 Bxd6 13.Nxd6 Qxd6 14.Qd2 Rd8 15.Bc4 Nc7 16.0-0 *( 16.Rd1* can be met by *b5 17.Bb3 Bb7 )* 16...Nxd5 17.Bxd5 Qxd5 18.Qxd5 Rxd5 and the extra pawn gives Black excellent winning chances despite opposite-coloured bishops, P. Blehm-J.M.Degraeve, Cappelle la Grande 1995. ]

**11...Na6!** This is Black's standard way to nudge White into taking on d6. We only play 11...a6 against 11 Bc4 because the later ...b7-b5 then hits the bishop. **12.cxd6 Bxd6** Some view an isolani as an opportunity, while others see it as a tiresome obligation. To me here, it feels like White's isolated d-pawn edges closer to the latter interpretation. **13.0-0**

[An earlier game by White went 13.Nxd6 Qxd6 14.0-0 Nb4 15.Be2? *( 15.Be4 f5 16.a3! fxe4 17.axb4* should be okay, since Black has weak pawns too *)* 15...Bf5 0-1 R.Hofer-J.Zidu, correspondence 2005. It seems White withdrew from the tournament at this point. He can of course play on here, but he'll soon be a pawn

down for nothing. ]

**13...Nb4** Hitting both d3 and d5.

[ After 13...Nb4 , if the bishop leaves the b1-h7 diagonal, 14.Be2 *(* or *14.Bc4 )* , Black plays 14...Bf5 , intending 15.a3 Nc2 16.Ra2 a6 with advantage. ]

**14.Bb1 Qd7!** The queen puts the question to White's knight, now that it is no longer defended by the bishop. --- QUESTION: Why did Black block his own queenside development? --- ANSWER: The clogging is just temporary. Black's bishop emerges on b7 after a future ...b7-b6 or ... b7-b5. **15.Nc3** White decides he doesn't want the d6-bishop after all, since taking it would quickly drop the d-pawn. **15...f5** Black's kingside majority is fluid, whereas White's isolated d-pawn is both blockaded and a source of anxiety for its continued safety. **16.a3**

[ Seeking to improve on an earlier game, which saw 16.Qh5 e4 17.Rd1 a5 18.a3 Na6 19.Be3 Nc5 20.Bxc5 Bxc5 21.d6 e3! *(* not yet *21...Ra6??* due to *22.Nxe4! )* 22.fxe3 Ra6 23.Rd5 Bxe3+ 24.Kh1 1/2-1/2 R.Hofer-A.Ciborowski, correspondence 2004, when I prefer Black after Rxd6 25.Bxf5 Rxf5 26.Rxf5 Qxf5 27.Qe8+ Qf8 28.Qxe3 Bd7 . ]

[ Instead, 16.f3 b6 17.a3 Na6 18.Kh1 Nc7 19.Be3 Nb5 20.Nxb5 Qxb5 21.Bd3 is just equal, since taking on b2 leads to a draw, J.Wharrier-T.Runting, correspondence 2011. ]

**16...Na6** QUESTION: What is Black's plan now? --- ANSWER: He will play for ... Nc7, ...b7-b5 and ...Bb7, or else ...a6-a5 and ... b5-b4, aiming to undermine White's defence of the d5-isolani. **17.Qh5**

[ Hofer later tried 17.Be3 , but didn't get anything in that game either: Nc7 18.f3 b6 *( 18...b5!?* is still possible *)* 19.Bd3 Bb7 20.Qe2 Kh8 21.Rad1 Rf6 22.Bc4 Raf8 with an even position, R.Hofer-M.Wojnar, correspondence 2011. ]

**17...b5! 18.Be3 Nc7 19.Bc2 a5!** All as planned. Now White must worry about future ...b5-b4 ideas. **20.Rfd1 Rf6** Seeing that White currently has d5 well protected, Black switches his attention to the kingside. **21.Rac1 Rg6 22.Kh1 Qf7 23.Bb6** Threatening Bxc7 and Nxb5, so Black defends the b5-pawn. **23...Bd7 24.Bxc7?!** The preparatory stage makes way for the active. When we launch a deductive theory, we must be correct regarding the clues, otherwise our hypothesis is just an unsubstantiated whim. This is the prelude to an ambitious/dubious forcing line which, I believe, is based upon a misevaluation of the resulting position. On the other hand, if he doesn't chop on c7, I don't see an active plan for White, whereas Black can keep building on the kingside. **24...Bxc7 25.Nxb5?!** Whenever a person goes on a homicidal spree, he always blames the devil. This is White's idea: he picks up a couple of pawns and then menaces Black's g6-rook and c7-bishop, in the end getting a rook and two pawns for two bishops - not such a great deal for White in this very open position, conducive to bishops. Also critical to the evaluation is the fact that his rooks lack easy entry points into Black's camp.

[ I would just admit that my previous move was wrong and endure 25.Qe2 with an inferior position, when White's game may be off life support, though it clearly isn't breathing normally either. ]

**25...Bxb5 26.Bxf5 Bd6**

[ If Black wants to keep the white queen off the h3-c8 diagonal, he can force the issue with 26...Bd7 27.Bxg6 hxg6! and then play ...Bd6. ]

**27.Qh3**

[ 27.Qh3 threatens -- 28.Be6 Rxe6 29.dxe6 , when White is more active than in the game. ]

**27...Re8** Overprotecting the e6-square.

[ 27...Rh6?! 28.Qxh6! gxh6 29.Be6 Re8 30.Bxf7+ Kxf7 could be hard for Black to win, since every remaining pawn is an isolani. ]

**28.Bxg6** White finally takes the exchange.

[ 28.Be6 Rgxe6 29.dxe6 Rxe6 30.Rc8+ Be8 doesn't get him anywhere. ]

**28...hxg6!** QUESTION: Why would Black deliberately damage his structure? --- ANSWER: This way he can play ...Qf5!, challenging the white queen on the h3-c8 diagonal.

[ Black's move looks more accurate than 28...Qxg6 29.Rc8 h6 30.Rxe8+ Bxe8 31.Qc8 Kh7 32.Qe6 , when it won't be easy for Black to make progress. ]

**29.Kg1**

[ After 29.Rc8 Qf5! 30.Rxe8+ Bxe8 31.Qe3 e4! (threatening ...Qh5 with a double attack on d1 and h2) 32.h3 *(* not *32.g3? Bc5! 33.Qxc5? Qf3+* and wins *)* 32...Bd7 33.Kg1 Qe5 , White is in deep trouble. ]

**29...Qf5!** Now that c8 is cut off, White's rooks are the 97-pound weaklings, who are destined to get sand kicked in their faces by Black's bully bishops. **30.Qe3** Heading for Qb6, with attacks on a5, b5 and d6. **30...e4!?** Black's dark-squared bishop decides to exercise its influence down the h2-b8 diagonal towards the enemy king, ignoring White's threat.

[ This is a sharper idea than simply securing the a-pawn with 30...a4 , when 31.Qb6 is no worry, due to Qd7 . ]

**31.Qb6 Qd7 32.Qxa5?!** Misery loves company - especially when the company is our opponent. It's not easy when our choices are between awful and awfuler. Taking this pawn is similar to the financially strapped person who, on returning from the dentist, gently places an extracted tooth under a pillow and thinks: "The dentist's bill was steep. I hope the tooth fairy will be generous tonight." On the other hand, playing the queen into b6 and not taking the pawn is akin to accepting a friend's dinner party invitation, and refusing to eat even a bite of food when you arrive. If White's chances of survival were low before, then after this move they dip to subzero. He had to prevent Black's next move. **32...Be2!** Black attackers weevil their way into White's camp, square by square. **33.Re1 Qg4!** "No! No! Of course not! Your unannounced visit is no inconvenience at all," lies White's king, as he flashes his most unctuous smile. This move confirms Black's earlier reading of the position. His a-pawn wasn't important. Suddenly, he threatens ...Bf3, followed by ...Qh3, forcing mate. **34.g3**

[ This leaves White with huge light square holes around his king, all of which desperately require plugging; but 34.h3 fails to Qg5! (threatening ... Bf3 again) 35.Rxe2 Qxc1+ 36.Qe1 Qf4 37.g3 Qf5 , picking up another pawn, when White

doesn't have enough for the piece. ]
**34...e3 35.Rxe2** White is well past the point of regrets.
[ He had no choice: 35.fxe3? loses to Bxg3 36.Rxe2 Qxe2 37.hxg3 Qxe3+ and White's rook hangs; ]
[ while 35.Qb6 is met by Kh7! 36.-- with the decisive threat of Qf3! 37.fxe3 Bxg3 38.Rxe2 Qxe2 39.hxg3 Rxe3 and wins, since White has no saving Qxg6 or queen checks. ]
**35...Qxe2 36.Qe1 Qxb2** Black simply wipes out the queenside pawns, with a relatively easy technical task ahead. **37.fxe3 Qxa3 38.Rc3** EXERCISE (combination alert): How did Black force the win of White's d5-pawn? --- ANSWER: Double attack. **38...Qa5!** White must hand over the d-pawn, seeing as ...Bb4 is the greater threat. **39.Qc1 Qxd5** Ever since the opening, the d5-isolani has been a dead fish, bobbing to the surface in a polluted river. **40.Rc8 Rxc8 41.Qxc8+ Kh7** Black's king is quite safe here, since the check on h3 is easily blocked. **42.Qc2 Bc5** Targeting the e3-pawn. **43.Qc3 Bb6 44.Kf2 Qa2+ 45.Kf3**
[ If 45.Kg1 then Qe2 is a game ender. ]
**45...Qxh2 46.Qc4 Qh5+ 47.Kf2 Qg5**
[ White resigned after 47...Qg5 in view of 48.Qe2 Qxe3+ 49.Qxe3 Bxe3+ 50.Kxe3 Kh6 and despite external appearances, the king and pawn ending is actually an easy win; for example, 51.Kf4 Kh5 52.Kf3 g5 53.Kf2 Kg4 54.Kg2 g6 55.Kf2 Kh3 56.Kf3 g4+ 57.Kf2 g5 58.Kf1 Kxg3 59.Kg1 Kf3 60.Kh2 g3+ 61.Kh1 g2+ 62.Kg1 g4 63.Kh2 (has White tricked his way into a draw?) g1Q+! (no, he hasn't) 64.Kxg1 Kg3 65.Kh1 Kf2 66.Kh2 g3+ and the pawn promotes. --- SUMMARY: White's 10 c5!? is a gimmicky idea which isn't really very scary. Our answer is basically to ignore it and continue to develop. If we do so, White will be fortunate to equalize. ]

*[Van Delft]*

ATTACK WITH OPPOSITE-COLOURED BISHOPS The following game was my first win against an IM. Apart from some minor inaccuracies, I'm quite happy with the strategy I followed. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5** The Sveshnikov was a revolutionary opening back in the

1970s. Black weakens the important central square on d5, but often gets dynamic counterplay with his bishop pair and/or central pawn mass. **9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Bb7**

[ 11...Bg5 is the main line. ]

**12.Nc2 0-0**

[ Here 12...Nb8 is the more frequent choice. ]

**13.a4 bxa4 14.Rxa4 Nb8 15.Bc4 Nd7 16.Qe2 a5** Diagram # Question 1 Would you play: A) 17.Ra2 to step out of any N forks; B) 17.Nce3 since e4 is defended tactically; C) 17.0-0 to just keep developing. **17.0-0!** 5 points for simply developing as quickly as possible, keeping everything under control tactically, as will soon become clear.

[ 17.Ra2 is possible, but not really necessary (2 points). ]

[ 17.Nce3 gets 2 points for creativity, since after Nc5 18.Ra3 Nxe4 White has 19.Ng4 with interesting play on the kingside. ]

**17...Bxd5** Black goes for the concrete solution.

[ 17...Bg5 is a plausible alternative. ]

**18.Bxd5 Nb6** Diagram # Question 2 Would you play: A) 19.Ra2 to defend b2 prophylactically; B) 19.Ra3 because the R functions best on the third rank; C) 19. Bxa8 because the tactics work in White's favour. **19.Bxa8!** An importa nt move, keeping the vital d5-square, from which all future operations will be coordinated (5 points).

[ 19.Ra2 and ]

[ 19.Ra3 come down to the same thing: White loses the crucial d5-square, therefore no points. ]

**19...Nxa4 20.Bc6!** The point of White's previous play. **20...Nc5** In the only previous game that reached this position a draw was agreed here. That was a strange decision, since in this typical middlegame position with opposite-coloured bishops White can safely play for more.

[ After 20...Nxb2? 21.Rb1 Qc8 22.Bb5 Qxc3 23.Ne3 the black knight is trapped. ]

**21.Ne3 Qb6 22.Bd5 a4** Diagram # Question 3 Would you play: A) 23.Ra1 to start targetting Black's weaknesses on the queenside; B) 23.g3 with the idea of gaining space on the kingside; C) 23.Ng4 to start piece play on the kingside. **23.g3!**
If you remembered Carlsen-Wang Hao from CVT 1 you had a good chance of finding this key move. This is the start of White's initiative on the kingside (5 points).

[ 23.Ra1 is a decent move in itself (2 points), but sooner or later White needs to start playing on the kingside as well. ]

[ 23.Ng4 doesn't achieve much after the standard reply Bg5 therefore no points. ]

**23...Rb8 24.Nc4 Qc7** Diagram # Question 4 Would you play: A) 25.Rd1 to remind Black of the weakness on d6; B) 25.f4 to open the f-file and attack f7; C) 25.h4 to gain space on the kingside. **25.Rd1!** Forcing Black into passive defence of d6 can't hurt, 5 points.

[ The immediate 25.h4 is of approximately equal strength, 4 points. ]

[ 25.f4 is certainly playable, but wrong in principle, so no points. After exf4 26.Rxf4 *( 26.gxf4 Nd7* followed by Nb6 is completely unclear. *)* 26...Qe7 White has weaknesses of his own. It's much more effective to keep the pawn on f2 at all times (the ultimate K shield) and develop the initiative indifferent ways. ]

**25...Rd8 26.h4 g6** Diagram # Question 5 Would you play: A) 27. Ne3 to make Black worry about a possible Nd5; B) 27.Kg2 to free the way for the R to get to h1; C) 27.h5 to make opening the h-file a constant threat. **27.Ne3** It's generally a very good idea to let the white pieces take turns in using the big outpost on d5 so that Black's defensive pieces constantly have to adjust to new circumstances. Here I got the timing a bit wrong though, therefore 3 points.

[ 27.h5! seems to be the most accurate move at this point (5 points), preventing a black ...h5 for good. ]

[ 27.Kg2 allows h5 and now after 28.g4 Ne6! 29.Bxe6 fxe6 30.gxh5 gxh5 31.Rd3 *( 31.Qxh5* leaves the N hanging. *)* 31...Rd7 Black has full counterplay, therefore no points. ]

**27...Qd7**

[ 27...h5 28.g4 Ne6! 29.Bxe6 *( 29.gxh5 Nf4 30.Qg4 Kh7 31.hxg6+ fxg6* and even though White is still better, Black is fighting back. *)* 29...fxe6 30.gxh5 is admittedly not very attractive for Black, but here he may have more chances of wreaking havoc. ]

**28.Qf3 Bg7 29.Kg2**

[ Again it would have been more accurate to insert 29.h5 ]

**29...Rf8**

[ And once more 29...h5 was the obligatory defensive try. ]

**30.h5 Rb8 31.Nc4 Rf8**

[ Here 31...Ne6 would have been a more stubborn defence. ]

**32.Rh1 Ne6** Diagram # Question 6 Would you play: A) 33.Qd1 to again make Black adjust to new circumstances; B) 33.Qg4 to transfer the Q to the h-file; C) 33.h6 to make Black's B as passive as possible. **33.Qd1** Finalizing White's attacking setup, as all the targets are now under maximum pressure. At least, that's what I thought during the game. 3 points for this natural approach.

[ Fifteen years later the computer suggested the counterintuitive 33.h6! Bh8 34.Ra1 Instead of playing for an attack along the h-file, White has now shut Black's bishop out of play and wants to win on the queenside (5 points). Furthermore, after Ng5 35.Qd1 Qh3+ 36.Kg1 White has no need to be overawed, as after Qxh6 37.Rxa4 Rd8 38.b4 the b-pawn can hardly be stopped. Fascinating stuff! ]

[ 33.Qg4 runs into Nf4+ White is lucky that he still has 34.Kf3 but after Qxg4+ 35.Kxg4 Nxh5 most of the advantage is gone (no points). ]

**33...Nc5?** Diagram # Under continuous pressure, Black starts to break.

[ After 33...Rb8 White still has to find a breakthrough. ]

Question 7 No multiple choice question for a change, but an open question: how would you continue in this position? **34.Nxd6!** Now that White's strategy has worked out nicely, it's time to switch to tactics mode. The white N can't be taken because of

the discovered attack, 5 points. **34...Kh8** Diagram # Question 8 The final question is also an open question: how would you continue White's attack? **35.Nxf7+!** Another powerful blow, crowning White's strategy, 5 points.

[ 35.Bxf7 Rxf7 gets 2 points, but not if you planned 36.hxg6? *( 36.Nxf7+ Qxf7 37.hxg6* wins. *)* because Black has the devilish counter 36...Rxf2+! 37.Kxf2 Qxd6! based on the elegant N fork on e4, and Black is still fighting. ]

[ 35.hxg6 fxg6 gets no points. ]

**35...Rxf7 36.hxg6!** The final point: the black R can't move because of mate on h7. The difference in the power of the two bishops is striking. Black resigned. Conclusion: In the middlegame (and even the endgame) opposite-coloured bishops favour the attacker. Remember: most of the time opposite-coloured bishops have nothing to do with a draw!

*[Winants,Luc]*

**1.e4** Winants Winants Winants Winants Winants Winants: 'Winants, Luc Winants Winants,Luc: 'Winants Winants'' **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.a4!?** Ce coup évite les sentiers battus, mais ne promet pas d'avantage : Les Noirs obtenant, dans la plupart des cas, une position du système Bird (7.Bg5 a6 8.Na3 Be6), avec un temps de plus et la case b4 au profit du Nc6.
**7...Be6** La théorie conseille de refouler le Nb5, qui exerce une forte pression contre d6.
[Un exemple, 7...a6 8.Na3 Be7 *(*On pourrait aussi jouer *8...Be6* Winants: 'Winants''Winants,Luc: 'Winants: 'Winants''' suivi de Rc8 et de Nb4*;* ou d'abord *8...Bg4!? 9.f3 Be6;* On pourrait aussi jouer *8...Be6* Winants suivi de Rc8 et de Nb4*;* On pourrait aussi jouer *8...Be6* suivi de Rc8 et de Nb4*;* On pourrait aussi jouer *8...Be6* suivi de Rc8 et de Nb4*;* On pourrait aussi jouer *8...Be6* suivi de Rc8 et de Nb4 *)* 9.Bc4 *(*Si *9.Bg5 Nxe4!? 10.Nxe4 Bxg5 11.Nxd6+ Ke7 12.Nac4 Be6=* Langier-Kramnik, 1991*;* ou *9.Nc4 Nxe4!= 10.Nxe4 d5 )* 9...0-0 10.0-0 Be6 11.Bg5 Bxc4 12.Nxc4 Nxe4 13.Bxe7 Nxe7 14.Nxe4 d5 Partie nulle, Howell-Nunn, Hastings 1994 ]
**8.Bg5 Be7?** Un coup de développement négatif.
[Il valait mieux essayer 8...Rc8 Winants: 'Winants''Winants,Luc: 'Winants: 'Winants''' ]
[ou 8...Nb4 Winants: 'Winants''Winants,Luc: 'Winants: 'Winants''' ]
[Il valait mieux essayer 8...Rc8 Winants ]
[ou 8...Nb4 Winants ]
[Il valait mieux essayer 8...Rc8 ]
[ou 8...Nb4 ]
[Il valait mieux essayer 8...Rc8 ]
[ou 8...Nb4 ]
[Il valait mieux essayer 8...Rc8 ]
[ou 8...Nb4 ]
**9.Bxf6! gxf6** Le Be7 se trouve désormais enfermé derrière ses propres pions.
**10.Nd5 Rc8 11.Bd3** J'aurais sans doute joué la même chose, mais le livre de Svieshnikov, qui fait autorité sur ce début, recommande le coup 11.c3, avec raison apparemment.
[Supposons : 11.c3

**A)** 11...f5 12.exf5 Bxf5 13.Nf6+!? *( 13.Qf3 Be6 14.Rd1* paraît également très fort. *)* 13...Kf8 14.Qh5 Menaçant le mat sur h6 Bxf6 15.Qxf5 d5 *( 15...a6 16.Nxd6 )* 16.Rd1 d4 17.Bc4 Les Blancs dominent l'échiquier tout entier;
**B)** 11...a6 12.Na3 f5 13.exf5 Bxf5 14.Nc4 Les Blancs contrôlent et menacent tous les points importants (d5, b6, Pd6 etc.) ]

**11...a6**
[ Les Noirs ne pouvaient toujours pas se dégager via 11...f5 à cause de 12.Nxe7 Nxe7 *( 12...Kxe7 13.exf5 )* 13.Nxd6+! Qxd6 14.Bb5+ Gagnant la Dame. ]

**12.Nbc3 h5** Pour empêcher les Blancs de prendre cet avant-poste (Qh5).
[ C'était pourtant l'occasion ou jamais de tenter une percée : 12...f5!? 13.exf5 *(* Le plus fort serait probablement *13.Qh5* Winants: 'Winants''Winants,Luc: 'Winants: 'Winants'''*;* Le plus fort serait probablement *13.Qh5* Winants*;* Le plus fort serait probablement *13.Qh5;* Le plus fort serait probablement *13.Qh5;* Le plus fort serait probablement *13.Qh5 )* 13...Bxd5 14.Nxd5 Qa5+ 15.Nc3 d5 avec un bon contre-jeu pour le pion sacrifié. ]

**13.0-0** Les Noirs ne sont plus en mesure d'entreprendre quoi que ce soit, faute d'un coup de pion efficace. Les Blancs ont la possibilité d'attaquer sur la colonne -f- (f2-f4) ou à l'aile Dame (b4-b5). La partie est stratégiquement gagnée. **13...Bf8** "Passe" dit le Fou fou ! **14.b4!?**
[ Il me semble que 14.f4 Winants: 'Winants''Winants,Luc: 'Winants: 'Winants''' donnait un résultat encore plus rapide. ]
[ Il me semble que 14.f4 Winants donnait un résultat encore plus rapide. ]
[ Il me semble que 14.f4 donnait un résultat encore plus rapide. ]
[ Il me semble que 14.f4 donnait un résultat encore plus rapide. ]
[ Il me semble que 14.f4 donnait un résultat encore plus rapide. ]

**14...Bg7 15.b5 Nb8** Il valait mieux prendre. **16.bxa6 Nxa6 17.Bb5+ Kf8**
[ Si 17...Bd7 18.Bxd7+ Kxd7 *( 18...Qxd7 19.Nb6 )* 19.Rb1 Et les Blancs gagnent. ]

**18.f4** Les Blancs se compliquent la tâche inutilement.
[ Après 18.Bxa6 bxa6 19.Qd3 La Tour de plus à l'aile Dame devait décider de la partie en quelques coups seulement. ]

**18...exf4 19.Rxf4 f5 20.exf5!** Très bien joué. Le Nd5 se révélera plus fort que la malheureuse Rh8. **20...Bxd5 21.Nxd5 Bxa1 22.Qxa1 Rh6** Cette Tour ne peut plus aller nulle part,
[ mais si 22...Rg8 23.Nf6 (vers h7 et d7) Rg7 24.Rf2 Et puis Re2. ]

**23.Qc1** Menaçant 24.Re4 **23...Rh8**
[ 23...Qg5 était simplement contré par 24.h4 ]

**24.Qe3** Centralisation ! **24...Nc5 25.Rf3** Préparant l'assaut final contre g7. **25...Qh4** Plus rien ne pouvait sauver les Noirs :
[ 25...Nd7 26.Bxd7 Qxd7 27.Qd4 Rh6 *( 27...Rg8 28.Qf6! )* 28.Rg3 f6 29.Nb6 Qd8 30.Nxc8 Qxc8 31.Qxd6+ Le mat suit ]
[ 25...h4 26.Qd4 Rh7 27.Rf4 Suivi de Rg4 Si Qg5 28.Rg4 Qxf5 *( 28...Qc1+ 29.Bf1 )* 29.Rg8+! ]

**26.Qc3 Rg8 27.Nf6!** Fabrice joue la fin de partie avec une très grande précision.
**27...Rg4**
[ Ou plus joli : 27...Rg7 28.Rg3 Rxg3 29.hxg3! Et la Dame est prise ! ]
**28.Rh3** Les Noirs abandonnent.
**1-0**

**B33**

**B)** 15...Bg7 This novelty is the right way. Starting an attack with 15. ... Rg8 is probably wrong, as White can create threats on the queenside very quick: 16.a4 e4 17.Be2 0-0 18.axb5 axb5 Frankly speaking when I introduced the move 14. ... Qd7 in the practice back in 1996, I considered this position unpleasant for Black. White has opened the a-file and created a weakness on b5. Also

important is that he got square b4 for his knight. Black must play very imaginative and combine kingside attack with the advance b5-b4. In many cases he must be ready to sac pawn b5.

**B1)** 19.Nb4 Qb7 *( 19...Rxa1 20.Qxa1 Qb7 21.Qa6! )*;

□ **Zor Champ**
■ **Rajlich,Vasik G**
PAL/CSS Freestyle fin 2nd (4) 08.04.2006
*[Krasenkow/Nickel]*

Team Zor_champ: Hydra + verschiedene Engines; Team Rajlich: Rajlich, Radziewicz, Krassenkow + Engines **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.Re1 Bg7 15.c3 0-0 16.Qh5 e4 17.Bf1 Re8 18.Rad1 Ng6** Diagramm # So sehr man davor zurückschrecken mag, in einer computer-

gestützten Partie einen Bauern zu opfern (etwas, das die Engines, auch Rybka, kaum gutheißen) - die menschliche Stelungsbewertung ist meistens zutreffend! Schwarz bringt seine Figuren ins Spiel und erhält gute Chancen für einen Angriff am Königsflügel. **19.Qxf5 Re5 20.Qh3 Nf4 21.Qg3 Qf6 22.c4 b4 23.Nc2 a5 24.Qe3?!** Diagramm # Unterschätzt die schwarze Antwort.

[ 24.Qb3!? ]

**24...Nd3! 25.Bxd3 exd3 26.Qxd3 Rxe1+ 27.Rxe1 Qxb2** Weiß hat einen Bauern mehr, aber die schwarzen Bauern am Damenflügel sind sehr gefährlich. Solche zweischneidigen Stellungen sind sowohl für Menschen als auch für Computer recht schwierig. Für Menschen - wegen der Fülle an Verwicklungen; für Maschinen - da sie kaum die Stärke von Freibauern korrekt bewerten können (es sei denn natürlich, sie sehen diese unaufhaltsam zur Damenumwandlung voranschreiten). **28.Ne3** Diagramm # **28...Qc3?!** Dieser Zug führt zu einem ausgeglichenen Endspiel.

[ Das "menschliche" 28...Re8 stieße auf 29.Qb3 ]

[ 28...Qxa2!? war interessant. Wir trauten uns nicht, es zu spielen, da wir zu keinem klaren Schluß kamen, wie zuverlässig Rybka die Stellung erfaßte. Im nachhinein erscheint mir die Stellung im Gleichgewicht zu bleiben. Ich werde nicht alle komplexen Varianten anführen, sondern nur die bringen, die mir am besten gefällt: 29.Nf5 Qb2 30.Qg3 Diagramm # Rd8 *( 30...Qc3 31.Nh6+ Kh8 32.Nxf7+ Kg8= )* 31.Re8+ *( 31.h3!? a4 32.c5* setzt noch eins obendrauf *)* 31...Rxe8 32.Nh6+ Kh8 33.Nxf7+ Kg8 34.Nh6+ Kf8 35.Qxd6+ Re7 36.Qd8+ Re8 37.Qd6+= ]

[ Jedoch wäre 28...a4! vermutlich viel stärker gewesen (und würde vielleicht gewinnen). Wir verwarfen es wegen 29.Nf5 Qc3 Diagramm #

**A)** 30.Qe4 b3 *( 30...Qe5 31.Qb1 )* 31.a3 b2 ist günstig für Schwarz, da 32.Nxd6 *( 32.Nxg7 Rb8! 33.Rf1 Kxg7-+ )* nicht funktioniert wegen 32...Qe5! 33.Qxe5 Bxe5 34.Ne4 *( 34.Nb5 Rc8-+ )* 34...Rc8 35.c5 f5-+;

**B)** 30.Qe3 , das von Rybka zugunsten von Weiß bewertet wurde. Es ist seltsam, daß Rybka nach 30...Qxe3 31.fxe3 Bc3 *( 31...b3? 32.Nxg7 )* 32.Rb1 *( 32.Rc1 b3! 33.axb3 Bb2 )* 32...b3 33.a3 immer noch Weiß vorzieht und die schwarze Antwort einfach nicht sieht: Bb4! Diagramm # (Rybkas Stellungsbewertung kehrt sich sofort um, wenn es den Zug gezeigt bekommt!) 34.axb4 a3-+ Offensichtlich sollte Rybkas Bewertungsalgorithmus etwas korrigiert werden. ]

**29.Qxc3 Bxc3 30.Rb1** Diagramm # **30...a4?!** Verpaßt eine weitere Chance:

[ 30...Rc8! 31.Rd1 *( 31.Rc1 a4 32.Kf1 a3 33.Ke2 Bb2 34.Rd1 b3 35.axb3 Rb8∓; 31.Kf1 Bd2 32.Ke2 Bxe3 33.Kxe3 Rxc4* mit einem überlegenen Turmendspiel *)* 31...a4 32.Kf1 Rb8 *( 32...a3? 33.Rd3; 32...b3?! 33.axb3 a3 34.Nc2 a2 35.Ke2 Ra8* ist für jede Engine kaum richtig zu evaluieren. *)* 33.Ke2 b3 34.axb3 a3 35.Nc2 Rxb3 36.c5 Kf8 hält Gewinnchancen offen - doch wiederum zu schwierig für einen Computer und zu skrupelös für einen Menschen, um sich "gegen" seine Engine zu entscheiden. Nach dem Textzug erreicht die Partie den sicheren Remishafen. ]

**31.Nd1 Bd2 32.Kf1 Re8 33.Ne3 Re4 34.Ke2 Bxe3 35.Kd3 Rd4+ 36.Kxe3**

**Rxc4** Diagramm # Anders als in dem Endspiel der Variante mit 30.. .Tc8 ist der Bauer b4 hier ohne ausreichenden Schutz.. **37.Kd3 Rc3+ 38.Kd2 Rc4 39.g3 Kg7 40.Rb2 Kf6 41.Kd3 Rc3+ 42.Kd4 a3 43.Rxb4 Rc2 44.Rb6 Rxf2 45.Rxd6+ Ke7 46.Ra6 Rxa2 47.h3 Ra1 48.Kc5 Rc1+**

■ **Rockdoc**
2nd PAL/CSS Freestlye rapid (5) 19.03.2006
*[Mikhail Golubev (www.chesstoday.net)]*

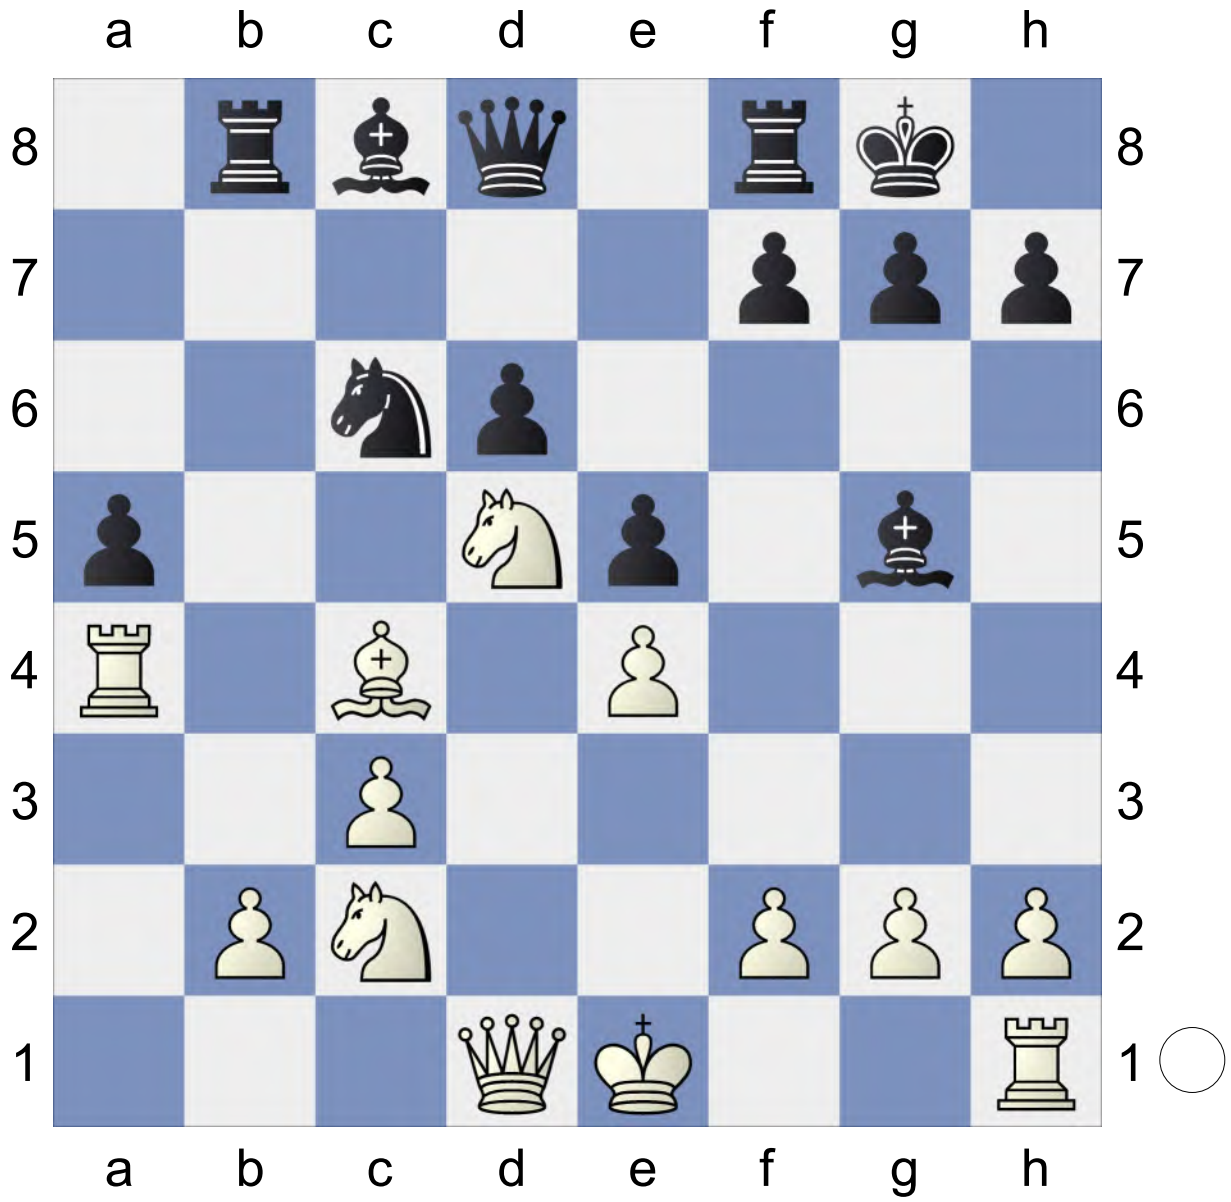
It is hard to judge, what exactly inspires sponsors to invest their money into an online event, where the participants are competing under the names like GM_RaNkS, Spaghetti Chess, Thebrokenking, Wsteinitz and so on. But, one way or another, the 2nd PAL/CSS Freestlye (i.e. "Advanced") tournament produced a large number of interesting games, especially Sicilians. I annotate one of them below, and other selected Freestyle Sicilians by me can be found in today's databases. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8**

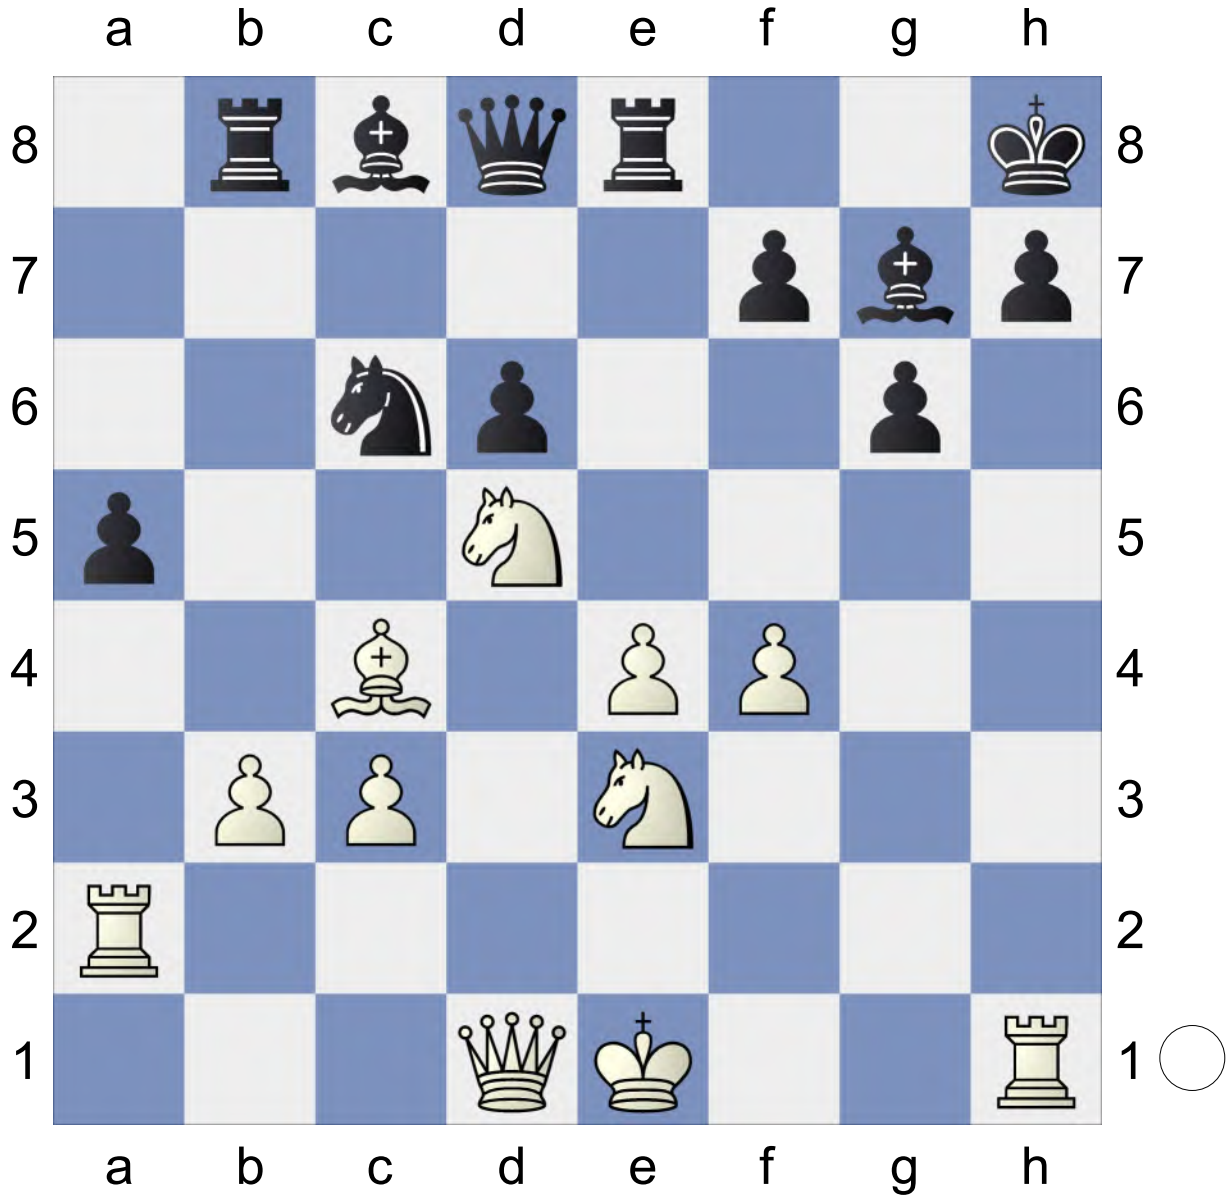
(Diagram)

**16.Ra2**
[ The alternative 16.b3 was recently tested in the game Leko-Radjabov of the Morelia/Linares supertournament (CT-1951) ]
**16...Kh8 17.Nce3 g6**
[ 17...Bxe3 18.Nxe3 Ne7 19.b3! f5 20.exf5 Nxf5 21.Nd5 was Karjakin-Topalov, Wijk aan Zee 2006 (CT-1913). ]
**18.h4 Bxh4 19.g3 Bf6 20.b3 Bg7 21.f4 exf4 22.gxf4 Re8**

(Diagram)

A modern nightmare for Black in the Sveshnikov Sicilian. White has sacrificed a pawn, left his king in the centre and opened all possible diagonals for the black dark squared bishop. But the control over d5 square allows White to keep control of the position. **23.Qf3** Played accordingly to the game Ponomariov-Kramnik, Wijk aan Zee 2005. Still, in their notes to this game at the KRAMNIK.com website, GMs Illescas and Rodriguez have provided the following comment: "A natural move, protecting the pawn on e4. However, stronger was 23.Rah2! h6 (the alternatives seem to lose quickly: 23...h5? 24. Rxh5+; 23...Rxe4 24.Rxh7+ Kg8 25.Qc2) 24.Kf2! (Moving away from the e-file and allowing the queen to communicate with the rooks, creating the



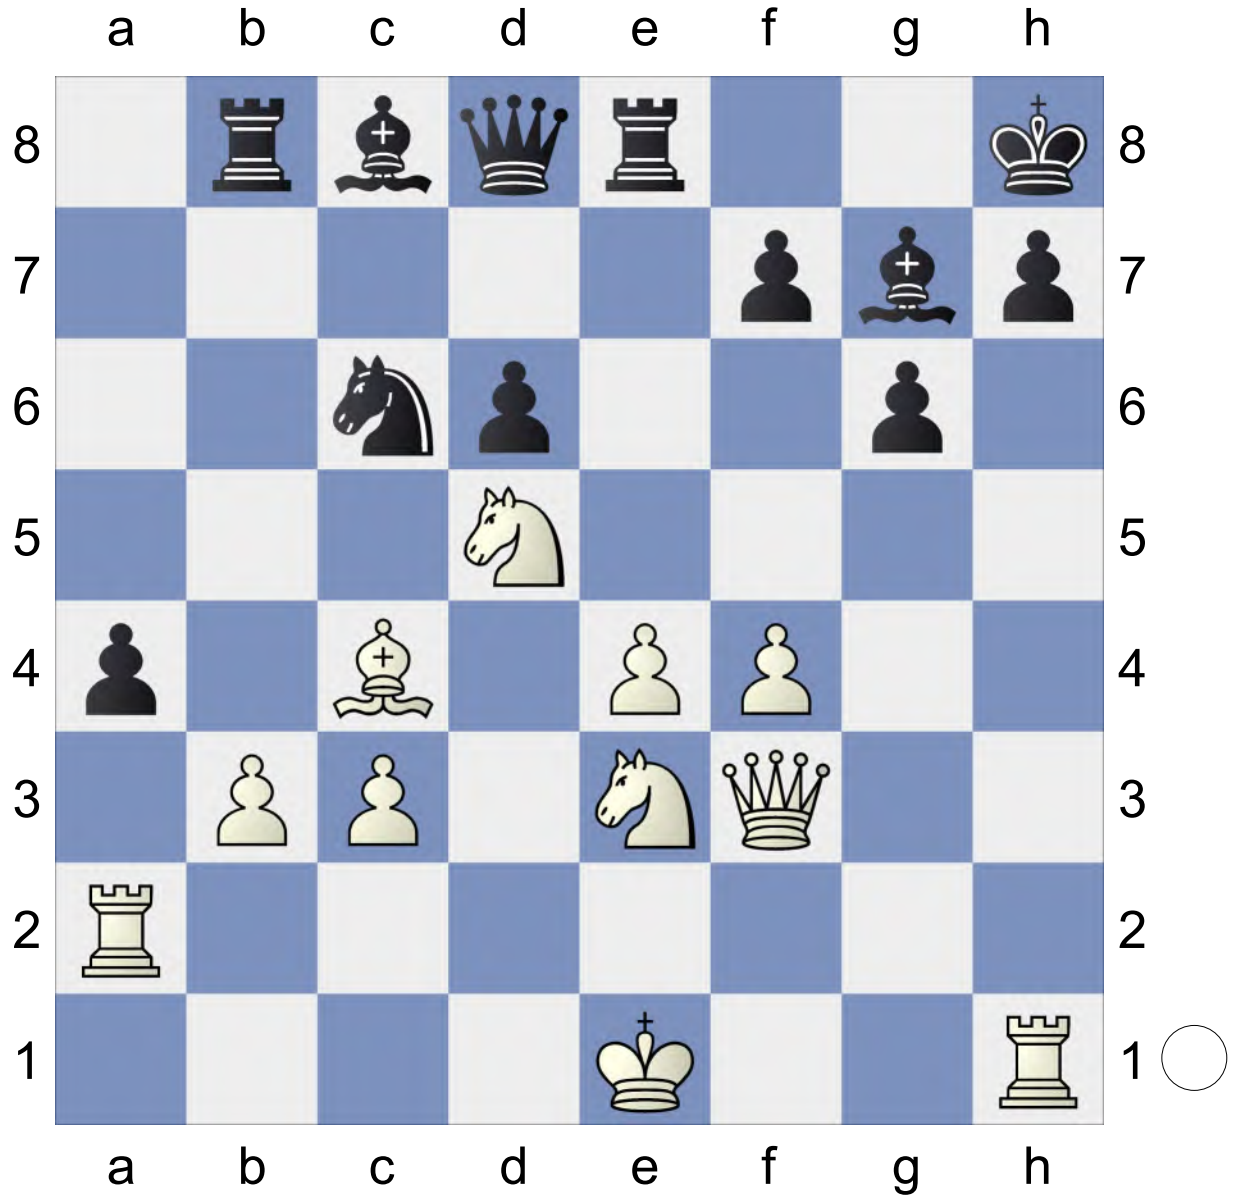


eventual threat to take on h6.) 24...Kh7 (24...Rxe4? 25.Rxh6+ Bxh6 26.Rxh6+ Kg7 27.Qh1 Qg8 28. Qxe4 Kxh6 29.Nf6+- ; 24...Kg8?! 25.Nf5 gxf5 (25...Bxf5 26.exf5±) 26. Rg2 Ne7 (26...Kf8 27.Qh5 Re6 28.exf5) 27.Nf6+ Kf8 28.Nh7+ Kg8 29.Qd4+-). And now after 25.Qf3 (or even 25.Qg1!? Δ26.Rxh6+ Bxh6 27.Qh2) White seems to have a very powerful attack against the black king."

[ In his notes for "Informator", Ponomariov also mentions 23.Rah2!? , but after h6 he gives another line: 24.Qf3 Kg8 25.Qg2 a4 26.b4 , without any assessment in the end. ]

**23...a4!?**

[ GM Rogozenko's suggestion. Ponomariov-Kramnik saw 23...Kg8 , what is probably weaker. Most annotators (including Ponomariov himself) agreed that after 24.Rah2 h5 , White should have played 25.Qg2 with the better chances. Of some interest is the immediate 23...Ne7, which was also suggested by Rogozenko. ]



**24.b4**

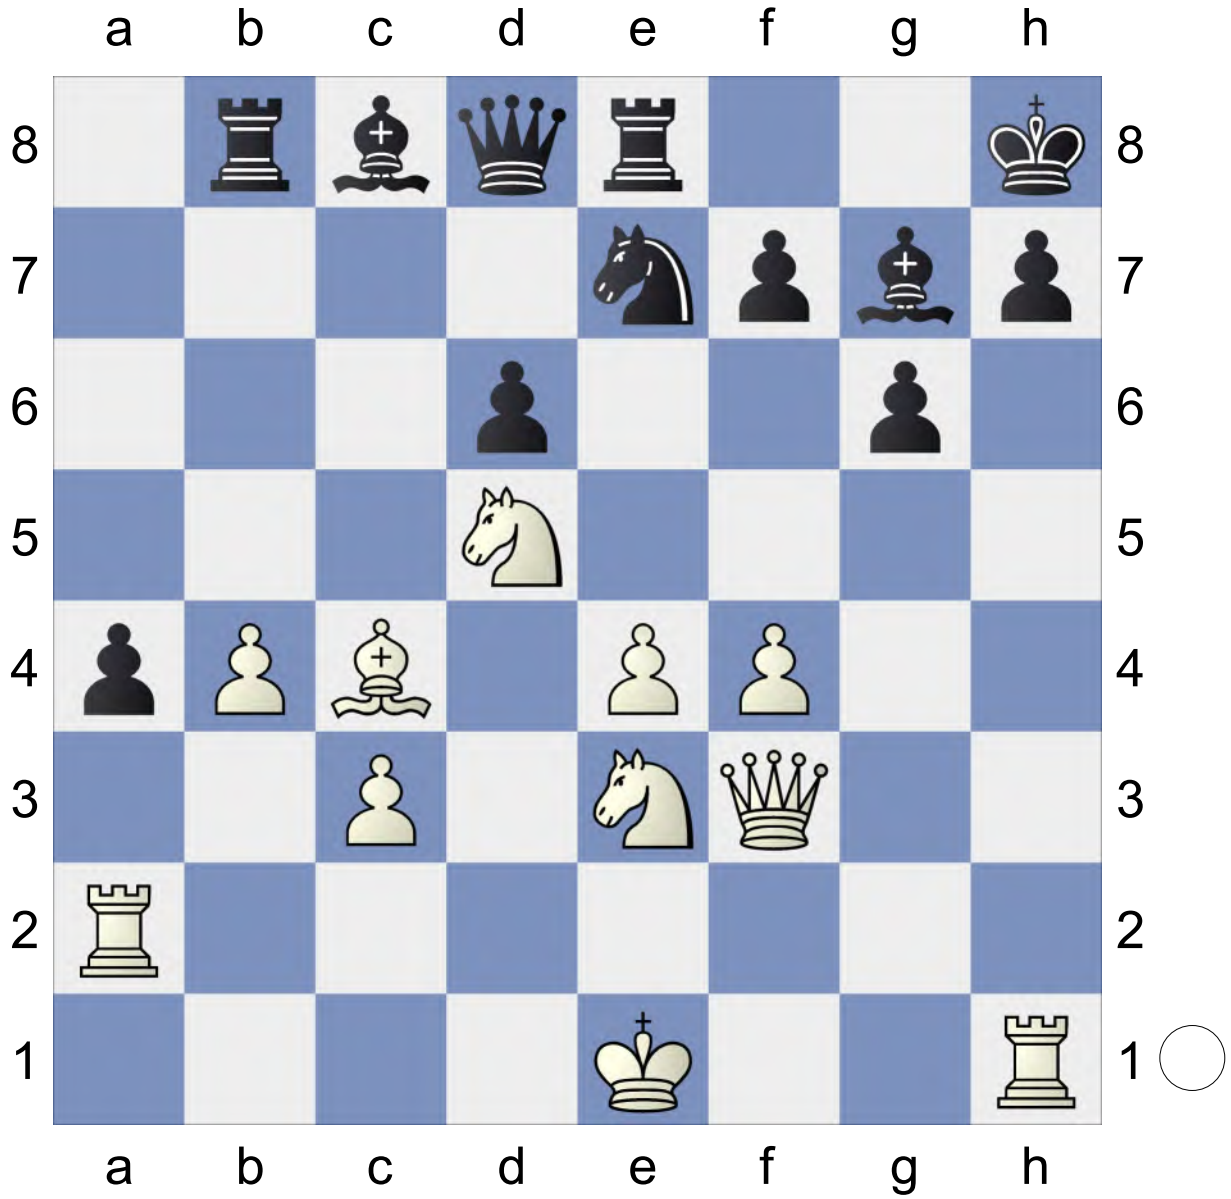
[ In his book "The Sveshnikov Reloaded" (2005) , Rogozenko gives the line 24.Rah2 axb3 25.Rxh7+ Kg8 26.f5 b2 27.f6 b1Q+ 28.Kf2 Rb2+ 29.Kg3 Qg1+! 30.Rxg1 Kxh7 31.Rh1+ Kg8 32.Qf4 Re5! 33.Ne7+ Qxe7! 34.fxe7 Rxe7 35.Nd5 Re6 36.Qc1∞ ]

**24...Ne7**

(Diagram)

Around here the opponents (and their computers!) have began to make their contribution into modern theory. **25.Rah2 Nxd5 26.Bxd5!**

[ 26.Rxh7+ Kg8 27.Nxd5 Bf5! leads to a repetition of moves after 28.Bd3 Be6



29.Bc4 Bf5= ]

**26...Qf6 27.Kf2!**

[ After 27.Rxh7+? Kg8 , 28.Kf2 does not help because of Qxc3∓ ]

**27...h5**

[ 27...Qxc3? here loses to 28.Bxf7 ]

[ While 27...Kg8 , as I guess, could have been answered by 28.Bc6 ]

[ After 27...h6 28.Bc6!? Be6 29.Bxe8 Rxe8 30.f5! the pawn on h6 turns out to be vulnerable: gxf5 31.exf5 with the idea of Ng4. ]

**28.f5**

[ Here 28.Bc6 Be6! 29.Bxe8 Rxe8∞ seems to be OK for Black. ]

**28...Re7**

[ 28...Kg8?! 29.fxg6± ]

[ After 28...a3 White could try 29.fxg6 *( 29.Rxh5+?! gxh5 30.Qxh5+ Kg8 31.Ng4*

*Qe7 32.f6 Bxf6 33.Qg6+ Kf8 34.Qxf6 Qxf6+ 35.Nxf6 Re7∓; 29.Rg2 Rf8! )*
29...Qxf3+ 30.Kxf3 fxg6 31.Rxh5+ gxh5 32.Rxh5+ Bh6 33.Rxh6+ Kg7 34.Rxd6 with a very complex ending where White is possibly better. ]

**29.Rg2!**
[ After 29.fxg6 Qxf3+ 30.Kxf3 fxg6 31.Rxh5+ gxh5 32.Rxh5+ Bh6 33.Rxh6+ Black, in comparison with a line from the previous note, gets the much more promising edition of the endgame. ]

**29...Bd7 30.fxg6 fxg6 31.Qxf6 Bxf6 32.Rxg6 Bxc3**
[ 32...Rf8 could have been answered by 33.Nf5 Rh7 34.Rhg1 Bg7 35.Ke2!? Bxf5 36.exf5 Rxf5 37.Rxd6 with clearly better chances for White. ]

**33.Nf5!**
[ Avoiding the drawish line 33.Rxh5+ Rh7 34.Rgh6 Rxh6 35.Rxh6+ Kg7 36.Rxd6 Bh3= ]

**33...Bxf5 34.exf5↑**

(Diagram)

It is time now to assess the position. White enjoys a pleasant endgame with certain winning chances. **34...Rh7**
[ The b4 pawn was untouchable: capture with a rook is punished by a mate in two while 34...Bxb4? loses by force after 35.f6 Bc5+ 36.Kg3 Re3+ 37.Kh4 Rb4+ 38.Kxh5 Re5+ 39.Rg5+- ]

**35.Ke3**
[ If 35.f6 , then Rf8 36.f7 Rhxf7+ 37.Bxf7 Rxf7+ 38.Ke2 a3 and, as it seems, Black escapes with a draw. ]

**35...Rf8**
[ Not 35...Bxb4? 36.f6! . The advance of White's f-pawn must be prevented. ]

**36.b5**
[ White pushes forward another pawn, but there was an alternative: 36.Kd3 , and after Bxb4 *( 36...Bg7* is probably critical *)* 37.f6 Bc5 38.Rf1! is hard to meet. ]

**36...Re7+**
[ 36...Ba5? 37.f6! ]

**37.Re6** Otherwise 37...Rxf5. **37...Rxe6+** A creative method of defence. Black allows the white pawn to emerge on e6 - but there it is, at least, less dangerous than on f6.

**38.fxe6 Ba5**

(Diagram)

**39.Ke4**
[ With a lesser number of pieces on the board, it does not get easier to comment on the moves. Here White had a choice: he could have eliminated the black pawn on the nother flank by 39.Ra1 ]

(Game 33) Predeal 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.exf5 Bxf5 12.c3 Bg7 13.Nc2 0-0 14.Nce3 Be6 15.Bd3 f5 16.Qh5** By the pressure on f5 and h7 White prevents both ...f4 and also the ...Bh6 of the last game, and he makes ready for Rd1 and Bc2-b3, fighting for d5 without wasting a second for the moment on castling. By keeping his options open with the king he also reserves the option of g4 (which is the reply to 16... Qd7). Nonetheless, despite all these good intentions, according to Rogozenko: 'these days the subject is closed and the verdict leaves little room for doubt: Black's chances are not worse.' **16...e4 17.Bc2 Ne7** Black has tried other ways, but fighting for d5 like this is far the most natural and is now established as best. **18.Nxe7+** This isn't a terribly good move, but in association with the next move it's been played a couple of times recently and I thought I would show this game because it is generally tactically instructive. It's much more natural to fight for d5 with either 18 Rd1 or 18 Bb3, or at least to move the knight to f4 so as to blockade the black pawns: This isn't a terribly good move, but in association with the next move it's been played a couple of times recently and I thought I would show this game because it is generally tactically instructive. It's much more natural to fight for d5 with either 18 Rd1 or 18 Bb3, or at least to move the knight to f4 so as to blockade the black pawns:
[a) 18.Rd1 is the most obvious way to control d5, but Black has a brilliant, thematic and very important reply in b4! . This move is always terribly important in the Sveshnikov whenever this f5/e4 vs b2/c3 structure arises. TIP: ...b4 activates

Black's queen's rook and his dark-squared bishop, and also by spreading the play a little reduces the importance of the outpost on d5. For one thing ...b4 enables Black to attack d5 from the side and perhaps conquer it after all, while if White allows the exchange on c3 then of course the c3-pawn is weak. In this particular position, though, Black has to justify himself tactically if White captures on b4: . This move is always terribly important in the Sveshnikov whenever this f5/e4 vs b2/c3 structure arises. TIP: ...b4 activates Black's queen's rook and his dark-squared bishop, and also by spreading the play a little reduces the importance of the outpost on d5. For one thing ...b4 enables Black to attack d5 from the side and perhaps conquer it after all, while if White allows the exchange on c3 then of course the c3-pawn is weak. In this particular position, though, Black has to justify himself tactically if White captures on b4: 19.Nxb4 *( 19.0-0 bxc3 20.bxc3 Kh8* is no problem *)* 19...a5 20.Nbd5 Nxd5 21.Nxd5 Rb8 (this is the point – White cannot stop this rook becoming horribly active on b2) 22.Bb3 a4 23.Bxa4 Rxb2 24.Bb3 and now Black can choose between taking on d5 and winning back the pawn on c3 with equality, and fighting for the initiative with Kh8 25.0-0 f4 , when according to Gelfand the critical line is 26.Rb1 Rxb3 27.axb3 Rf5 28.Qg4 Re5 29.Qxf4 Bxd5 with a very complicated game. ]

[ b) 18.Nf4 Bf7 19.Bb3 d5 leads to complete equality after 20.Qg5 *( 20.Qh3 d4;* and *20.Qd1 b4* are both promising only for Black *)*

**A)** the move order 20...b4 21.cxb4 Ng6 22.Qxd8 *( 22.Qxf5 d4 )* 22...Raxd8 23.Nexd5 Nxf4 24.Nxf4 Bxb2 deprives White of his Ne6 option, but still neither side can hope for much;

**B)** 20...Ng6 21.Qxd8 Raxd8 22.Nexd5 Nxf4 23.Nxf4 b4 24.Ne6 Bxe6 25.Bxe6+ Kh8 , V. Anand-V.Kramnik, Frankfurt (rapid) 2000. ]

[ c) 18.Bb3 can be met in various ways (for example 18...f4 or 18...Ng6), but one natural way is Kh8 19.Nf4 Bxb3 20.axb3 Qd7 21.0-0 Be5 when it's hard to imagine Black can be worse with such a bishop. ]

**18...Qxe7 19.g4?!**

[ Objectively this is quite a poor move – White can't get away with leaving his king homeless like this, since he can't really contemplate 0-0-0 in view of ...b4 and so on, and he should play something sensible like 19.Bb3 – so the rest of the game can be treated more as tactical instruction than theoretical. ]

**19...b4** Excellent; when White embarks on grandiose schemes like this then Black's counterplay generally lies on the dark squares in the centre, and just as in the last game it turns out White can't hold b4 and d4. **20.gxf5 Bf7 21.Qg4 bxc3 22.bxc3**

[ 22.Rg1 Qf6 23.0-0-0 cxb2+ 24.Kb1 , hiding behind the pawn, was already perhaps the last chance. ]

**22...Kh8 23.Qxe4 Qxe4 24.Bxe4 d5!**

[ Winning material. Instead 24...Bxc3+ 25.Ke2 d5 allows 26.Rac1 . ]

**25.Bd3**

[ 25.Bxd5 Bxc3+ 26.Ke2 Bxd5 27.Nxd5 Bxa1 28.Rxa1 Rxf5 leaves Black with a winning ending. ]

**25...Bxc3+ 26.Ke2 Rae8?**

[Black surely must have felt in his bones this wasn't the right move – it seems so obvious that f5 is defended and that the e-file should be reserved for the king's rook – but I suppose he must have seen the sequence in the game and calculated that he could actually activate a rook along the f-file, and left it at that. Instead there was a nice forced win with 26...Bh5+ 27.f3 Rfe8 28.Kf2 Bd4 29.Rae1 Rab8 30.Re2 Rb2! 31.Rxb2 Rxe3 and Black wins material thematically on the dark squares. I guess Stanculescu just stopped after 30 Re2. TIP: The moral is that, if you have a winning tactic at all, it's much more likely to be in lines where you just put the pieces in their natural places and force your opponent on a narrow path, and that before abandoning such a line you should be absolutely sure there isn't a hidden blow at the end of it. and Black wins material thematically on the dark squares. I guess Stanculescu just stopped after 30 Re2. TIP: The moral is that, if you have a winning tactic at all, it's much more likely to be in lines where you just put the pieces in their natural places and force your opponent on a narrow path, and that before abandoning such a line you should be absolutely sure there isn't a hidden blow at the end of it. ]

**27.Rac1 Bh5+ 28.Kf1**

[This is the difference of course; 28.f3 isn't forced and so to justify the placement of his rooks Black is forced to part with the monster dark-squared bishop. ]

**28...Bd2 29.Rc2?**

[A feeble move showing poor nerves. It's comforting when being attacked to force the opponent to play particular moves, since it reduces the chances of being struck down by some unseen thunderbolt, but it's a weak way to play which has to be resisted. There wasn't any point in attacking the bishop since obviously Black's next is going to be ...Bxe3 anyway. Instead it was preferable to place the rook actively with 29.Rc7 Bxe3 30.f6! Bf7 31.fxe3 Rxe3 32.Bxa6 , when Black is still better but the outcome is now in doubt. ]

**29...Bxe3 30.fxe3 Rxe3 31.Bxa6 d4?**

[A strange move. 31...Rxf5+ 32.Rf2 Bf3 33.Rg1 Rc3 won decisive material at once. Again you feel that Black must have known that this was the right continuation – getting the pieces into natural attacking positions – but I suppose that he missed the last move (possibly because he was distracted by the ineffective 33...Rfe5 34 Rb2). It's more or less the same point again: if a move looks like it puts a piece in a strong attacking position and forces the opponent's reply, be slow to abandon it until you are sure it cannot be followed up, especially if the position is one which seems likely to contain a forced win for you somewhere. ]

**32.Rf2?**

[And in return White again shows a lack of cold-bloodedness. There's no time to defend the f-pawn, although one can see why White found it comforting. Instead 32.Rg1 was essential, with decent chances to resist after Rxf5+ 33.Rf2 . TIP: It is often useful to allow the attacker to execute a minor threat, like 32... Rxf5+ here, if in return you gain the chance to 'threaten' an exchange of material

by an interposition like this and so gain a tempo. Clearly White simply failed to see Black's next move, but even so on general principles he should have been looking to get his undeveloped pieces out where they can play, rather than boxing in the pieces he has developed for the sake of hanging on to a pawn. . TIP: It is often useful to allow the attacker to execute a minor threat, like 32...Rxf5+ here, if in return you gain the chance to 'threaten' an exchange of material by an interposition like this and so gain a tempo. Clearly White simply failed to see Black's next move, but even so on general principles he should have been looking to get his undeveloped pieces out where they can play, rather than boxing in the pieces he has developed for the sake of hanging on to a pawn. ]

**32...Rfe8** Decisive. Since 33 Rg1 Re1+ still wins a rook White loses a stack of material and could resign at once. **33.Bb7 Be2+ 34.Ke1**

[ 34.Kg1 d3 wins easily too. ]

**34...Bf3+ 35.Kd2 Bxb7 36.Rb1 Be4 37.Rb4 Rd3+ 38.Kc1 Rc8+ 39.Kb2 Rd1 40.a4 Rb1+** Points to Remember: 1. The theoretical content of this game is in the note to White's 18th; there's no need to memorize anything, but the lines do contain important themes, especially 18 Rd1 b4!. 2. When under attack it is easy to play 'comforting' moves which attack the opponent's pieces, cover the most obvious threat, and so on. You have to stand the tension better than that, decide which of your opponent's threats are fatal and which are not, and look for opportunities to activate your own pieces. This ability to keep things tense is one of the main things that separates the stronger from the weaker, at any level of the game. 3. If you feel that your position gives you the 'right' to look for a forced win, never abandon a natural forcing sequence in your calculations until you are quite sure it doesn't do the business for you. Points to Remember: 1. The theoretical content of this game is in the note to White's 18th; there's no need to memorize anything, but the lines do contain important themes, especially 18 Rd1 b4!. 2. (Game 13) Leiden 2006
*[John Cox]*

As the reader can see, the participants in this game were not the sort you meet at the local club. This has its perils for the annotator, since it is all too easy to speak anthropomorphically of plans, not to mention the fact that the annotator's own software doesn't convey the usual advantage of allowing him to out-calculate the players. But for all that it's a very interesting game and it would be a shame to leave it out. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Ne7 12.Nxf6+ gxf6 13.Nc2**
This is obviously a move which White needs to play, but he can also develop his king's bishop at this stage. The first two alternatives involve moving it to the long diagonal to try and restrain ... d5, while the last (and probably most poisonous) reckons that it will be best placed on d3 where it both helps to restrain ...f5 and attacks b5:

[a) After 13.g3 Black's commonest approach is to play Bb7 *(*it seems to me that once White points his bishop at the queenside there's a lot to be said for planning on kingside castling, and I like instead *13...f5 14.Bg2 fxe4 15.Bxe4 d5 16.Bg2 Be6 17.0-0 0-0 18.Qe2 f6 19.f4 Qc7* , when Black's centre ought to compensate for his slightly looser position, P.Blehm-J.Novotny, Czech League 2001 *)* 14.Bg2 f5 and follow up by castling queenside; for example, 15.Qe2 Qb6 16.Nc2 h5 17.0-0-0 0-0-0 , but 18.f4 tends to leave White with a slight advantage. ]

[b) 13.Be2 is similar but has the idea that after Bb7 *( 13...f5* is equally possible here *)* 14.Bf3 f5 *( 14...d5* is another try which exploits the slightly artificial placement of the bishop on f3, because after *15.exd5 Bxd5 16.0-0* Black has the important resource *Rg8!* to exchange queens after *17.Re1 Bxf3 18.Qxf3 Qd5 )* 15.exf5 , although it is not obvious to me that the slight gain of time does him any good after d5 16.Nc2 Nxf5 , since he has usually felt he has to go on with 17.g3 anyway, when Black could reasonably aim to castle on either side with a typical position for the line. ]

[c) The sternest test, though, is 13.Bd3 Bb7 14.Qe2 , with the cunning idea to delay castling until Black does so, and perhaps try to arrange castling on opposite sides. Black has two ways against this idea:

**A)** 14...d5 and now White has to commit himself: 15.0-0-0 *(*since otherwise after *15.Nc2* Black has *dxe4 16.Bxe4 Bxe4 17.Qxe4 Qd5* , forcing the helpful exchange of queens *)* 15...Qb6 (it's not easy for Black to castle queenside, which means he has to be content to play with the kings on opposite sides) 16.exd5 Nxd5 17.Be4 Nf4 18.Qf3 Bxe4 19.Qxe4 and Black's shaky king and pawn weaknesses outweigh the offside a3-knight.;
**B)** 14...Qb6 15.Nc2 d5 is the other, but White continues to delay castling and is ready to meet ...0-0-0 with a4; for example, 16.Nb4 0-0-0 17.a4 with advantage for White in S.Tiviakov-N.Sulava, St Vincent 2004.;
**C)** 14...-- ]

**13...Bb7 14.Bd3 d5**

[ WARNING: 14...f5 15.exf5 Bxg2 16.Rg1 is not good; Black activates White's pieces and ensures that his own king will have nowhere safe – the f6-advance is an important resource. ]

**15.exd5**

[ After 15.Qe2 Black could either play dxe4 , as I suggested above, *(*or take advantage of the d3-bishop's straitened circumstances with *15...f5!?* , when *16.f3 dxe4 17.fxe4 f4* is at least equal for Black according to Rogozenko, although I'm not so sure about this. *)*]

**15...Qxd5**

[ 15...Nxd5 16.Be4 f5 17.Bxf5 Nf4 18.Ne3 is possible as well, although White is a little better. ]

**16.Ne3 Qe6 17.a4**

[ It is perhaps a bit surprising that the computer doesn't go for the materialist alternative 17.Qh5 0-0-0 18.Bc2 Kb8 19.Bb3 . Black is meant to have good compensation here after either Qc6 *(*or *19...Qb6* whose main idea is seen in the line *20.Qxf7 Ng6 21.0-0?! Nf4 22.a4? Bxg2! 23.Nxg2 Rhg8 24.Qxg8 Nh3+ 25.Kh1 Rxg8 26.Bxg8 Nxf2+ 27.Rxf2 Qxf2* , when Black's chances are better in this complicated position *)* 20.Bxf7 f5 21.0-0 and now Rd2 (Rogozenko), although after 22.a4 proving Black's compensation against a computer is no easy task at all. Possibly the creatures were still in their openings books. ]

**17...Rd8 18.Qc2 e4 19.Be2 0-0**

[ A forced pawn sacrifice – 19...bxa4 20.Qxa4+ wins the a-pawn anyway – but Black obtains good compensation. ]

**20.axb5 axb5 21.Bxb5 f5 22.g3 Ng6** This had all happened before in H. Stefansson-S.Mamedyarov, European Championship, Antalya 2004. Black's active pieces and pressure against the king give him reasonable compensation, certainly in a human game, although in a computer game it is not so easy actually to get at White's king past the immovable knight on e3. Furthermore, the possibility of White getting organized and eventually advancing the queenside pawns with immaculate tactical control perhaps looms larger than it would if you or I was playing. **23.Be2 f4 24.gxf4 Nxf4 25.Rg1+!** Castling and then putting the king on h1 would open the way for a pawn sacrifice with ...Nd3. In the event of simplification, too, the king is

better where it can support the queenside pawns. **25...Kh8 26.c4 Qh3 27.Rd1 Ra8**
[ 27...Rde8 was a more natural alternative, aiming at the white king. ]
**28.Rg3 Qxh2 29.Qc3+ f6 30.Qb4 Bc6**
[ 30...Nxe2 31.Kxe2 Qh5+ isn't quite perpetual either, since White can hide the rook on f1: 32.Kf1 Qh1+ 33.Rg1 Qh3+ 34.Ke1 Qh2 35.Rf1 and White has ridden the storm and stands better. ]
**31.Bf1 Ng6 32.Qd6 Ba4 33.Rd5 Bb3 34.Rf5 Ra1+**
[ I suspect Black's innards were telling it that it was forcing a draw here, but it isn't. The position is extremely complicated and exactly the sort of thing the machines play better than any human. At first sight the computer loves 34...Qh6 , but in fact White can effect a favourable exchange with 35.Rh3 Ra1+ 36.Ke2 Qg7 37.Rb5 Ba4 and now 38.Rbh5 and Rxh7+. ]
**35.Kd2 Raa8 36.Kc3!** White's active pieces and the pawns now give him a decisive advantage despite the odd-looking king, and as you'd expect the machine finishes with aplomb. **36...Ba4 37.Rxf6 Rfd8 38.Qe6 Bd7 39.Qxe4 Qh5 40.Qd5 Qh6 41.Qd4 Qg7 42.Nd5 Rac8 43.b4 Bc6 44.Rgxg6!** Simplifying in an almost human manner. **44...hxg6 45.Qh4+ Qh7**
[ 45...Kg8 46.Ne7+ Qxe7 47.Rxg6+ is just as bad, of course. ]
**46.Qxh7+ Kxh7 47.Ne7 Be4 48.Nxc8 Rxc8 49.Kd4 Bb1 50.c5 Kg7 51.Rd6 Rf8 52.c6 Rxf2 53.Bc4 Bf5 54.b5 Bc8 55.Be6 Rd2+ 56.Kc5 Rc2+ 57.Kb6 Ba6 58.bxa6** Points to Remember: 1. Black's idea with this line is to win control of d5 at all costs. 2. 'All costs' means losing the dark-squared bishop. 3. That means that Black will always have weaknesses and, in particular, lacks the solid cover for his castled king a bishop on g7 would provide. 4. To make up for this Black usually castles queenside and has a choice of playing with ...f5 or ...d5. He hopes to make up for his weaknesses by activity, although according to theory White can maintain a slight advantage. On the whole, I don't recommend this line.
**1-0**

**B33**

□ **Hracek,Zbynek**
■ **Mista,Aleksander**
3. Czech League 2006
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5** Remember: if you don't want to enter the position we reach below, I have a safe out for you on the 17th move with 17...Be6, which we look at later in the chapter. **6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8 16.b3 Kh8 17.Nce3 g6 18.h4!** Unfortunately for us, this gambit hasn't been consigned to history's dumpster of unsound lines. White's sacrifice is both sound and dangerous. **18...Bxh4 19.g3 Bg5**

[ 19...Bf6 is playable and will be analysed (by transposition) in the next game. ]

**20.f4 exf4 21.gxf4 Bh4+ 22.Kf1** This move is a paradigm-altering idea. This position may be the single most difficult challenge for the Sveshnikov side in the entire book. What is the difference between placing the king on f1, or on d2, as we saw last game? -- 1. On d2, White's king is considerably safer, since it will scurry away to the safety of the queenside. -- 2. The d2 plan is slower, since White's plan of shifting the king across requires a huge investment of time. -- 3. On d2 the king obstructs White's a4-rook, which wants to swing over to h2, via a2. -- 4. White's attack is faster if his king moves to f1. White's only major problem is that Black can easily pry open the centre and kingside with a push of the f-pawn. This means that White's king may end up just as unsafe as Black's. **22...f5 23.Ra2** White's intent becomes obvious: he ignores the opening of the f-file and plans to stick this rook on h2.

[ 23.exf5 is illogical, even though Komodo thinks it's playable. Bxf5 24.Nxf5 Rxf5 25.Qg4 Bg5 26.Kg2?? *( 26.Bd3! Rxd5 27.Bxg6 Rb7* is just an unclear mess, rated at dead even by Komodo *)* 26...Bxf4! 27.Nxf4 Rg5 (there goes White's queen) 28.Nxg6+ Kg7 0-1 was A.Delchev-T.Kotanjian, European Championship, Kusadasi 2006. ]

**23...fxe4!**

[ 23...g5?! scores horribly for Black. For example, 24.Rah2 *(*or *24.Qh5 fxe4 25.Rah2 Ne5 26.Ke2 Nxc4 27.fxg5! Rxb3 28.Rxh4 Rb2+ 29.Nc2! Bf5 30.g6* and White had a winning attack, E.Lobanov-W.Schneider, correspondence 2015 *)* 24...fxe4 25.Qh5 Rb7 , V.Grigoryev-R.Nickel, correspondence 2014. --- We shouldn't follow an IM's or GM's suggestion, simply because they have a couple of letters before their name. If you feel that Black's defence is stretched too thin, you may be close to being right! Objectively, White stands better in this irrational mess. The more booked-up side is going to win this one, so comp this position to death before you enter it. ]

**24.Rah2 g5** This is an amazing move and I use the word "amazing" without any positive connotation! Black must reinforce the h4-bishop. This is obviously a highly double-edged position, where either side can go down in an instant. **25.Ng2** White breaks down the clogging of the h-file. Komodo assesses the position as dead even. Be careful though. The game may be objectively even but I get the feeling that it is easier to play White than Black.

[ Instead, 25.Qh5! Rb7 transposes to the note above. I will repeat my earlier warning: with the comp's help, master every nuance of this position before agreeing to enter it. ]

**25...Rb7 26.Nxh4 gxh4 27.Rxh4 Rg7 28.Qh5?!** This natural move was played in both games to reach this position, yet it may not be best.

[ The untried 28.Ke1! may be White's only path to equality. After Bf5 29.Rh6 it's anybody's game. ]

**28...Bf5!** Black's has turned the position from hell into the position from not-hell. After this move the assessment turns in Black's favour. Once again, theory ends near

move 30. As indicated earlier: this is a theoretically difficult repertoire to master. Now Black gets a Transformer-like deconstruction/reconstruction favourable for his side.

[ Instead, 28...Be6 allows 29.Qxh7+! Rxh7 30.Rxh7+ Kg8 31.Rh8+ Kg7 32.R8h7+ Kg8 33.Rh8+ Kg7 with perpetual check, J. Radulski-V.Spasov, Panagyurishte 2012. ]

**29.Ne3?!**

[ White's best chance lies in 29.Qh6! a4! 30.bxa4 Qb8 31.Bb5 Rff7! 32.Rg1! *(* not *32.Bxc6?? Qb1+ 33.Kf2 Qc2+ 34.Ke1 Rg2* and White is mated *)* 32...Rxg1+ 33.Kxg1 Ne7 34.Nxe7 Qa7+ 35.Kh2 Qxe7 36.Qg5 Qxg5 37.fxg5 Rc7 with the slightly better chances for Black. ]

**29...Bg6 30.Qd5 Ne5!** Remember this trick to activate the knight. **31.Ke2 Nxc4** White should be okay after this exchange.

[ Black can perhaps try 31...Nf3 32.Rg4 Qf6! 33.Qxa5 Ne5! 34.Nd5 Qe6 35.Ne3 d5! with some advantage in the wild complications ahead. ]

**32.Qxc4 Qf6 33.Kd2 d5!** Of course White doesn't dare take the pawn and open lines for the black rooks. **34.Qd4!?** The decision to enter the ending is understandable yet probably not best, since White will be handicapped by broken pawns. Furthermore, Black's bishop may turn out to be worth more than White's knight.

[ Instead, 34.Qc5 Rd8 35.f5 d4 36.cxd4 Qxd4+ 37.Qxd4 Rxd4+ 38.Ke2 Be8 39.Ng4 Bd7 40.Nf6 Bxf5 41.Rh5 Bg6 42.Rh6 should hold the draw. ]

**34...Qxd4+** As you wish. The ending is not going to be all that easy for White to hold.

**35.cxd4 Rb7 36.Rh6?** Threatening 37 Rxg6, which is easily sidestepped.

[ Correct was 36.f5! Bxf5 37.Rf4 Rbf7 38.Ra1 and White should still hold the game with accurate play. ]

**36...Kg8 37.Rf1** This makes matters worse.

[ After 37.Nxd5 Rf5 38.Ne3 Rxf4 White won't hold the game either. ]

[ He should have tried 37.f5! Bxf5 38.Ra6 Bg6 39.Rxa5 Rxb3 40.Nxd5 Rf2+ 41.Ke1 Rfb2 . White is still losing here, but it's his best chance. ]

**37...Rxb3 38.f5 Rd3+ 39.Ke2** EXERCISE (combination alert) : What is Black's strongest continuation? **39...Rb8!** ANSWER: Ignore the hanging bishop on g6 and play for a deadly rook check on b2. **40.Nd1**

[ It isn't easy to maintain our self-esteem when we discover we are the butt of the position's joke. 40.fxg6 is met by Rb2+ 41.Nc2 Rxc2+ 42.Ke1 Rc1+ 43.Ke2 Rxf1 44.gxh7+ Kh8 45.Kxf1 Rxd4 which is an easy win for Black., ]

**40...Bf7** Not the most accurate move.

[ 40...Kg7! 41.Rhh1 Be8 42.f6+ Kg8 is easy for Black. ]

**41.Rg1+ Kh8 42.Rgh1 Bg8 43.Ra6 Rf3**

[ 43...Rxd4 44.f6 Rf8 wins. ]

**44.f6 Rf8 45.Rh6 a4! 46.Rxa4 R8xf6 47.Rxf6 Rxf6** The rest is simple, with two extra pawns. **48.Ne3 h5 49.Ra5 h4 50.Ra1 Be6 51.Rh1 h3**

**0-1**

**B33**

□ **Ivanchuk,Vassily**
■ **Lautier,Joel**
Odessa [rapid] (Game 40) 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.Nc3 Nf6 4.d4 cxd4 5.Nxd4 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.c4 Bg7 15.Rb1 e4 16.Be2 bxc4**

[ 16...0-0 is the major alternative. After 17.cxb5 axb5 18.Bxb5 , Black can either gambit the pawn with *( 18.Nxb5 Rxa2* 15 shows the downside of Rb1 *)* , Black can either gambit the pawn with 18...Ng6 followed by building up on the kingside in one way or another (perhaps after ...Bc6 with ...Ra7-e7-e5 in conjunction with ... f4), *(*or play the more reliable *18...Bxb2* , as Shirov did recently against Areshchenko. The game is worth quoting since it illustrates very sound play by both players: *19.Nc4 Bg7 20.a4 Ng6 21.Qh5 Qf6 22.Ne3 f4 23.Nf5 Ne7 24.Bd7 Ra7 25.Nxe7+ Qxe7 26.Bf5 h6 27.Rb4 Rfa8 28.Qd1 Qe5 29.Bxe4 Qc3 30.Rb3 Qc4 31.Qf3 Rxa4 32.Bb1 Rb4* 1/2-1/2, A.Areshchenko-A.Shirov, Russian Team Championship 2006. *)*]

**17.Nxc4 0-0 18.f4** It looks slightly strange to play this while the knight is still on e7, and this is in fact a new move which, however, Lautier convincingly refutes.

[Instead 18.Qd2 Ng6 *( 18...Rb8 19.b4 Rb5 20.Ne3 f4* is also certainly possible and more ambitious *)* 19.f4 exf3 20.Rxf3 f4 21.Rbf1 is more or less equal; in the game Z.Efimenko-M.Al Sayed, Moscow 2004, Black continued systematically with ...a5-a4, ...Qc7-c5, ...Re8 and ...Ra7-e7, entrenching himself on the dark squares, followed by ...Ne5, only to lose the impressively drawn pure opposite-coloured bishop ending after dropping the front f-pawn. No doubt the inventors of the FIDE time control rejoiced at the sight. *( 21.b4 Ne5* , trading the knights immediately, produced much the same result (except for the optional finale) in A.Areshchenko-Wang Yue, Lausanne 2006. *)*]

[Finally, 18.f3 was Efimenko's later try (he is impressively faithful to this line, which seems to be a bit of a Ukrainian calling card), when a similar set-up with exf3 is certainly possible, *(*but in the 2006 Serbian League Alexander Moiseenko equalized with the other idea: *18...Rb8 19.Kh1 Rb5* . *)*]

**18...Rb8!** As we have seen f4 is usually met by ...exf3 in this variation, but the resulting positions are a little dry, and when as here Black has not yet committed his knight to g6 (much of the point of f4 is in taking away the e5-square from a g6-knight) it makes a lot of sense to adopt the other main plan, playing against d5.

[Another idea is As we have seen f4 is usually met by ...exf3 in this variation, but the resulting positions are a little dry, and when as here Black has not yet committed his knight to g6 (much of the point of f4 is in taking away the e5-square from a g6-knight) it makes a lot of sense to adopt the other main plan, playing against d5. Another idea is 18...a5 followed by 19...Qb8 and 20...Rc8, which

equalized easily in another A.Areshchenko-Wang Yue, Lausanne 2006 game. ]

**19.Kh1**

[ The tactical justification of Black's last move lies in the variation 19.Qd2 Rb5 20.Ne3 Qb6! 21.Bxb5 Bd4 22.Rfe1 Nxd5 23.Kh1 Nxe3 with very strong compensation; for example, 24.Bxa6 Ng4 25.h3 d5! . ]

**19...Rb5 20.Ne3 Rxb2 21.Rxb2 Bxb2 22.Qd2 Bg7 23.Rb1**

[ White could also capture immediately on a6, but understandably didn't care for 23.Bxa6 Qb6 24.Bc4 Bd4 25.Nc2 Rc8 when it's clear that White's opening idea has not worked: he has the a-pawn, but the wonderful e3-knight pressing on f5 has been destabilized by Black's dark square control, and now White's bishop struggles to find a role, while Black's activity at least equalizes the chances. ]

**23...Qc7**

[ It's not at all clear to me why Lautier rejected 23...Qa8 , since after 24.Rb6 Rb8 all White's options appear to allow Black most annoying play on the dark squares and down the open lines; for example, 25.Rxa6 *( 25.Qb4 Rc8;* or *25.Rxd6 Qa7 )* 25...Rb1+ . Possibly he just judged that the text was even more favourable. ]

**24.Bxa6 Rb8 25.Rc1**

[ 25.Rxb8+ Qxb8 is better for Black, who follows with ...Qb6 and ...Bd4. ]

**25...Qa7 26.Bf1 Rb2 27.Qe1 Rxa2** Here, too, Black has all the chances. **28.Nc4 Qf2**

[ 28...Qc5 looks very strong. If Ivanchuk had some idea up his sleeve, I can't imagine what it was; if 29.Ne3 Ra1 30.Rxa1 Bxa1 31.Nxf5 Nxf5 32.Qxa1 Ne3 is winning. ]

**29.Qxf2 Rxf2 30.Nxd6 Bb2**

[ 30...Rxf4 looks like a better try, but this was a rapid game. Lautier must have missed something round about here; possibly White's 33rd. ]

**31.Rb1 Nxd5 32.Nxf5 Rxf4** This doesn't test White,

[ but perhaps there was no longer any way to do so: This doesn't test White, but perhaps there was no longer any way to do so: 32...Nc3 33.Re1 Rxf4 34.g4 leaves more play but still I doubt Black can win. ]

**33.g4! Rf2 34.Bc4 Nc3 35.Rf1 Rxf1+ 36.Bxf1 Ba3 37.Bc4 Bc5 38.Kg2 Kf8 39.g5 Nb1** Points to Remember: 1. 14 c4 tends to result in positions where the b-pawns are exchanged one way or another. Black can always force this with 15 Qb3 (or 15 Qd2) 15...e4 16 Be2 b4 and 15 Rb1 e4 16 Be2 0-0 17 cxb5 axb5 18 Bxb5 Bxb2, although in the latter case the c- and a-pawns go too. This increases Black's control of the dark squares (such as c5 and d4), and hence the drawing effect of the opposite-coloured bishops. --- 2. Alternatively Black can trade his b-pawn for the c-pawn, although this invites the white knight into the game and should be treated with caution. --- 3. After f3 or f4 from White it is often right to exchange and play ...f4 (assuming a knight on g6). The resulting positions are optically better for White but should be defensible. Alternatively, Black can always abandon his queenside and build up on the kingside a pawn down. The resulting positions are complicated and unclear. Points to Remember: 1. 14 c4 tends to result in positions where the b-pawns

are exchanged one way or another. Black can always force this with 15 Qb3 (or 15 Qd2) 15...e4 16 Be2 b4 and 15 Rb1 e4 16 Be2 0-0 17 cxb5 axb5 18 Bxb5 Bxb2, although in the latter case the c- and a-pawns go too. This increases Black's control of the dark squares (such as c5 and d4), and hence the drawing effect of the opposite-coloured bishops. 2. Alternatively Black can trade his b-pawn for the c-pawn, although this invites the white knight into the game and should be treated with caution. 3. After f3 or f4 from White it is often right to exchange and play ...f4 (assuming a knight on g6). The resulting positions are optically better for White but should be defensible. Alternatively, Black can always abandon his queenside and build up on the kingside a pawn down. The resulting positions are complicated and unclear.

□ **Ruiz,S**
■ **Moiseenko,A**
Montreal 2006
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Nb8 9.c4 Be7 10.Be2 0-0 11.0-0 a6**
[Black actually played 11...Nd7 here, reaching our main game after 12.a4!? a6 13.Nc3 . ]
**12.Nc3 Nd7** The value of this move is perhaps seen best in the current game.
[After our usual 12...f5 , White's idea of 13.a4!? creates different problems.
**A)** In particular, if we play 13...a5!? here, White can throw a spanner in the works with 14.c5!? *(*rather than *14.Nb5 Nd7* , transposing below *)* 14...dxc5 15.Nb5 and has good compensation for the pawn, mainly because it is difficult for Black to develop smoothly. The only game in the database which saw this idea continued Bd6 (Black's main problem now is that ...Nd7 leaves the bishop en prise) 16.Bc4 Kh8 17.Re1 b6 18.Qe2 Ba6 19.Nxd6 Qxd6 20.Bxa6 Nxa6 21.Qxe5 Qxe5 22.Rxe5 Rae8 23.Bf4 Rxe5 24.Bxe5 Rd8 and Black survived, H.Rudolf-D.Lampe, German League 2014, but I wouldn't rule out an improvement for White somewhere.;
**B)** If you don't like that, you can always play 13...Nd7 14.a5 (otherwise 14...a5! will follow) Bf6 15.Bd2 *(*if *15.f4* then *b6! 16.axb6 Qxb6+ 17.Kh1 Rb8* and Black is fine *)* 15...e4! 16.Na4 Be5 17.f4 exf3 18.Rxf3 Rb8 19.Be3 Nf6 with a decent reasonable position for Black, S.Kagan-E.Geller, European Team Championship, Skara 1980.;
**C)** 13...b6!? is another option, intending 14.b4 *(*or *14.a5 bxa5 )* 14...a5! . ]
**13.a4!?** QUESTION: What is White's idea? --- ANSWER: He begins to push pawns on his majority side without preamble. The trouble with this move is that it looks a bit

rushed.

[Other moves will probably transpose elsewhere; for example, 13.Qc2 f5 14.f4 Bf6 ]

[and 13.Kh1 f5 14.f4 Bf6 are Sadatnajafi-Shariyazdanov and Bologan-Hamdouchi respectively; ]

[while 13.Be3 f5 14.f3 Bg5 appears in the notes to Rombaldoni-Krasenkow. ]

**13...a5!** QUESTION: I understand that we seize control over c5, but didn't Black just hand his opponent control over b5? --- ANSWER: Correct. But there is another good reason to play 13...a5. By doing so, Black basically takes the flow out of White's queenside majority, leaving him with disjointed pawns. White now experiences almost insurmountable difficulties to achieve a c4-c5 break. Meanwhile, Black's kingside majority remains perfectly healthy. **14.Nb5** Okay, so the knight is back again. **14...f5 15.f4**

[White can also opt for the restraining strategy with 15.f3 Nc5 16.Be3 b6 17.Qc2 Bd7 18.Rae1 , M. Narmontas-J.Papadopoulos, World Junior Championship, Gaziantep 2008; here I like Black's chances after Bg5! , since if White goes for the underbelly with 19.Bxg5 Qxg5 20.Nxd6?! Bxa4 21.Qc3 Qe7 22.Nb5 Bxb5 23.cxb5 Qd6 , Black's remaining knight clearly outguns White's bishop. ]

**15...Bf6**

[Another possibility is 15...Qb6+ 16.Kh1 Bf6 17.Ra3 Nc5 18.Rh3 *(*or *18.g4 g6 19.Rg3 Bg7! )* 18...Bd7 19.b3 g6 20.Qe1 , A.Borzenko-V.Grigoryev, correspondence 2007, and now Bxb5 21.cxb5 Rae8 . If White ever plays Be3 and Bxc5, Black remains with the clearly superior opposite-coloured bishop. ]

**16.Qc2 Nc5 17.Ra3** A new move (supposing White knew that), the idea of which is to activate the queenside rook and transfer it to the kingside via the third rank.

[Previously 17.Be3 was played in E.Formanek-A.Chow, Chicago 1993, when Black should stabilize c5 with b6 18.Rae1 Bd7 with at least even chances. The d6-pawn is safe, since 19.Nxd6?? hangs a piece after Bxa4 . ]

**17...Qe7**

[The comp likes 17...e4?! , which contradicts your human writer's advice to avoid the temptation of securing a passed e-pawn and instead keep your majority fluid. ]

**18.fxe5**

[I would think about 18.g3 so as to be able to recapture on f4 with a pawn. ]

**18...Bxe5 19.Bf4?!** While Black's bishop is powerful, White needs his even more to cover his weak dark squares.

[He should play 19.Be3 , ]

[or first 19.Re3 , though even here I prefer Black after Bd7 . ]

**19...Bd7 20.Bxe5** Consistent, but it only helps Black secure his grip on the dark squares. **20...Qxe5 21.Raf3** EXERCISE (planning): Black has a simple method of securing a lasting strategic advantage. How? --- ANSWER: The swap on b5 gives Black a dominant remaining knight vs. White's bad remaining bishop. **21...Bxb5! 22.axb5 g6 23.Qc3 Rfe8** Now White's bishop really is hanging.

[The grandmaster isn't going to fall for 23...Qxe2?? 24.Re1 Ne4 25.Rxe2 Nxc3

26.Rxc3 , when White is okay again. ]

**24.Bd1 Qxc3 25.Rxc3 Re5** This move wastes time and is inaccurate.

[ Black secures an excellent ending after 25...h5! , preventing g2-g4. Black draws the appropriate conclusions and takes up the necessary countermeasures. The position conforms exactly to what Moiseenko envisioned when he entered this favourable ending, and White's counterplay grows as still as one of those conical capped guards outside Buckingham Palace, who stare intently at nothing all day, without moving a muscle. ]

**26.Ra3!** Worrying Black with b2-b4 tricks. **26...Ree8** The rook feels like it moves in drunkenly random patterns. This wastes more time, but no real harm is done, since White has no way to improve his position.

[ Black can also play 26...Rc8! 27.Rxa5 Ne4! 28.Be2 Nd2 29.Rf2 Nxc4 30.Bxc4 Rxc4 and White will be hard pressed to hold this ending, nursing three weak pawns. ]

**27.Bf3 b6** Securing a5 at last. **28.g4!** White, desperately hoping to activate his bad bishop, decides he has had enough of the idle chit chat and leaps into action. **28...f4! 29.g5** He hopes to one day make use of his bishop via g4, but in doing so White further endangers his g-pawn. **29...Re5?!** Too early. This move allows White queenside counterplay. Black should move his rook off the a-file first. **30.b4! Rxg5+ 31.Kf2 Nb7 32.c5!** Suddenly White's once-clotted pawns flow free on the queenside. White's only chance is to activate his sleeping bishop, so he wrings every drop of blood to alter the previous course of events. **32...dxc5**

[ Not 32...bxc5?? 33.bxa5 Rxa5 34.Rxa5 Nxa5 35.Ra1 Nc4 36.Ra4 Nb6 37.Ra6 Nc4 *(* or *37...Nxd5 38.Bxd5+ )* 38.b6 and wins; ]

[ or 32...Rb8?? 33.c6 axb4 34.Ra7 Nc5 35.Rfa1 Rf5 36.Ra8 Rff8 37.Rxb8 Rxb8 38.Bg4 , when c6-c7 is coming and Black is busted. ]

**33.d6!** This is the "or else!" part of the equation, where White's pieces and pawns arrive in full admonition mode. His play is a reminder of Tartakower's quip about the worst bishop still being better than the best knight. **33...Rb8 34.Bxb7 Rxb7**

[ Not 34...cxb4? 35.Rd3! and White wins a piece, since Rxb7 is met by 36.d7 . ]

White, a club level player, has outplayed a strong GM, whose flabber is completely gasted. Now he has a chance to enter paradise by putting his formidable opponent away. --- EXERCISE (critical decision): White has a choice between taking on a5 or backing up his passed d-pawn with 35 Rd1. Which one should he play? **35.Rd1??** This rook is the employer who offers to pay his employees with wise advice, in lieu of pay. Forcing variations lead us by the hand, sometimes to places we have no wish to visit, and there is a fine distinction between making a threat and actually being able to carry it out. White avoids the business at hand to chase a mirage. Now his passed d-pawn is the newborn calf on wobbly legs, still smeared in its mother's birth fluid. --- It often feels as if our opponent is the clock, rather than the player sitting opposite us. Sometimes I despair when I walk by my meticulously tutored student's board at a tournament and watch, to my chagrin, how they accidentally reverse a long-practiced move order in their game. I think White did the same here, reversing the order of

b4xa5 and Rd1. Chess, the interplay of form and thought, short circuits when we intend to move one piece, but in our time pressure fogged mind, move another. White shifts from winning to losing in a single turn.

[ANSWER: Instead, White should win with 35.bxa5! bxa5 *( 35...Rd5 36.a6 Ra7 37.Raa1 Rxd6 38.Rfd1* is equally hopeless for Black with his a7-rook out of the game *)* 36.Rd1 Rb8 37.d7 Rd8 38.h4! *(*better than *38.b6* straight away *)* 38...Rf5 39.b6 c4 40.Rc3 Rb5 41.Rxc4 Kf7 42.Rxf4+ Ke6 43.Re4+ Kf7 44.Rd6 and Black won't hold the ending. ]

**35...cxb4** When our opponent has us busted and then blunders, giving us the game, part of our own bliss comes from what Germans call "schadenfreude," which is defined as malicious pleasure derived directly from a rival's suffering. **36.Rf3**

[Or 36.d7 Rxd7 37.Rxd7 bxa3 and White can resign. ]

**36...Rd7** You don't need to be an empath to feel White's despair. His once-deadly passed d-pawn now goes nowhere. **37.Rxf4 Rxb5 38.Re4 b3 39.Re7 Rxe7 40.dxe7 Kf7**

[After 40...Kf7 41.Re1 Ke8 , the long-expected delivery of provisions fails to arrive for White. --- SUMMARY: I feel that 13 a4!? gives away more than it receives, since we can create a hole on c5, while reducing the potency of White's majority with ...a6-a5!. But note Black's move order with 12...Nd7 in this game; after 12...f5 13 a4!?, White might answer 13... a5!? with 14 c5!?, so you should consider whether you want to allow that possibility or not. ]

[ Or 15.a3 Be6 16.Nce3 Bxe3 *( 16...Ne7* is also equal *)* 17.Nxe3 Ne7 18.Qe2 Qb6 and Black stood no worse, R.Ramesh-Z.Rahman, Madras 1995. ]

**15...Na7!?** This move hasn't been repeated, probably because most of us subconsciously frown upon decentralization.

[ The alternative 15...b4 is fine for Black; e.g. 16.Bb5 Bd7 17.Rfd1 bxc3 18.Nxc3

*(*or *18.bxc3 Ne7 )*, J.Wallner-A.Lanc, Austrian League 2001, and now 18...Qc7 is approximately equal, as 19.Qd3 can be met by Nb4 20.Nxb4 axb4 21.Nd5 Bxb5 22.Nxc7 Bxd3 23.Rxd3 Rbc8 24.Nd5 Rc2 25.Nxb4 Rxb2 with a balanced ending. ]

**16.Nce3 Be6 17.a4 bxa4** As usual in the Sveshnikov, Black's play down the b-file compensates the weak a5-pawn. **18.Rxa4 Bxe3 19.fxe3!?** I'm not a big fan of voluntary defacement of structure. White seeks to open the f-file.

[ I would prefer the more sober 19.Nxe3 Qb6 20.Rb1 . ]

**19...Nc6**

[ 19...Bxd5!? is a speculative pawn sacrifice. After 20.exd5 Nc8 21.Rfa1 f5 22.Rxa5 Ne7 Black may have full attacking compensation. ]

**20.Bb5**

[ I would play 20.Bc4 to recapture on d5 with a piece. The game looks balanced here. ]

**20...Bxd5!** Don't forget our rule to plug d5 whenever possible. **21.exd5 Ne7 22.Bc4 Qb6**

[ I like this better than the risky pawn sacrifice 22...f5!? 23.Rfa1 Ng6 24.Rxa5 f4 , although it feels like Black has enough for the pawn. ]

**23.b4?!**

[ 23.b3 is met by e4 , intending ...Ng6-e5. After 24.Rfa1 Nf5 25.Rxa5 Qxe3+ 26.Qxe3 Nxe3 27.Kf2 Nxc4 28.bxc4 Rb2+ 29.Ke3 Rxg2 30.c5 dxc5 31.d6 f5 , it's anybody's game. The comp calls it dead even. ]

**23...axb4 24.cxb4** Advantage Black, for several reasons: -- 1. White's pawns are extended and a liability. -- 2. Black's healthy kingside majority is ready to shoot forward, whereas White's b-pawn isn't particularly dangerous. -- 3. White is stuck with a bad bishop versus a potentially good black knight. **24...Ra8 25.Rfa1 Rxa4 26.Rxa4 f5?!**

[ Black should play 26...Nf5! , pressuring f2. After 27.Kf2 Nh6! 28.h3 f5 White's king is looking unhealthy. ]

**27.Qf2! Ng6 28.Bf1 e4 29.Qd2**

[ 29.b5 was a better move, since then Black's e-pawn hangs after ...f5-f4. ]

**29...Ne5**

[ Black should pounce on the chance to play 29...f4! . ]

**30.Qd4!?**

[ White may survive with 30.Ra6 Qc7 31.h3 . ]

**30...Qd8!?** Black avoids an ending in view of the passed b-pawn and intends to swing the queen over to the other side to attack White's king.

[ Indeed, after 30...Qxd4 31.exd4 Ng4 32.b5 Ne3 33.Kf2 f4 White's advanced and passed b-pawn is a tad scary. ]

**31.Ra7?!** A temporary initiative can create an illusion of power. This is a rare case where placing a rook on the seventh rank is a waste of time!

[ White should follow the principle: passed pawns should be pushed and play 31.b5 . ]

**31...Qg5** Threatening 32...Nf3+, forking king and queen. Sometimes we just sense a combination coming, even before it is fully formed. **32.Qc3?**
[White had to try 32.Be2 Rc8 33.Qd2 Nf3+ 34.Bxf3 exf3 35.Ra1 with an inferior yet still about playable position. ]
**32...f4! 33.b5**
[If 33.Rc7 , then Qf5! (preventing the simplifying Rc8) 34.exf4 Qxf4 35.Qe1 Ng4 36.g3 Qf6 37.h3 Qd4+ 38.Kh1 Ne3 and White is busted. ]
**33...fxe3 34.b6** EXERCISE (combination alert): How did Black force mate?
**34...Rxf1+!** ANSWER: Step 1: Attraction. **35.Kxf1** It isn't a "decision" if our opponent makes it on our behalf. White's king is dragged to the centre. **35...Qf4+** Step 2: Give a queen check on the f-file.
[If 35...Qf4+ 36.Ke1 then Qf2+ 37.Kd1 e2+ forces promotion and mate. ]
**0-1**

**B33**

□ **Ivanchuk,Vassily**
■ **Lautier,Joel**
[rapid] (Game 40) 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.Nc3 Nf6 4.d4 cxd4 5.Nxd4 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.c4 Bg7 15.Rb1 e4 16.Be2 bxc4**
[ 16...0-0 is the major alternative. After 17.cxb5 axb5 18.Bxb5 *( 18.Nxb5 Rxa2* 15 shows the downside of Rb1 *)* , Black can either gambit the pawn with 18...Ng6 followed by building up on the kingside in one way or another (perhaps after ...Bc6 with ...Ra7-e7-e5 in conjunction with ...f4), *(*or play the more reliable *18...Bxb2* , as Shirov did recently against Areshchenko. The game is worth quoting since it illustrates very sound play by both players: *19.Nc4 Bg7 20.a4 Ng6 21.Qh5 Qf6 22.Ne3 f4 23.Nf5 Ne7 24.Bd7 Ra7 25.Nxe7+ Qxe7 26.Bf5 h6 27.Rb4 Rfa8 28.Qd1 Qe5 29.Bxe4 Qc3 30.Rb3 Qc4 31.Qf3 Rxa4 32.Bb1 Rb4* 1/2-1/2, A. Areshchenko-A.Shirov, Russian Team Championship 2006. *)*]
**17.Nxc4 0-0 18.f4** It looks slightly strange to play this while the knight is still on e7, and this is in fact a new move which, however, Lautier convincingly refutes.
[Instead 18.Qd2 Ng6 *( 18...Rb8 19.b4 Rb5 20.Ne3 f4* is also certainly possible and more ambitious *)* 19.f4 exf3 20.Rxf3 f4 21.Rbf1 is more or less equal; in the game Z.Efimenko-M.Al Sayed, Moscow 2004, Black continued systematically with ...a5-a4, ...Qc7-c5, ...Re8 and ...Ra7-e7, entrenching himself on the dark squares, followed by ...Ne5, only to lose the impressively drawn pure opposite-coloured bishop ending after dropping the front f-pawn. No doubt the inventors of the FIDE time control rejoiced at the sight. *( 21.b4 Ne5* , trading the knights immediately, produced much the same result (except for the optional finale) in A.Areshchenko-

Wang Yue, Lausanne 2006. *)*]

[Finally, 18.f3 was Efimenko's later try (he is impressively faithful to this line, which seems to be a bit of a Ukrainian calling card), when a similar set-up with exf3 is certainly possible, *(*but in the 2006 Serbian League Alexander Moiseenko equalized with the other idea: *18...Rb8 19.Kh1 Rb5 . )*]

**18...Rb8!**

[As we have seen f4 is usually met by ...exf3 in this variation, but the resulting positions are a little dry, and when as here Black has not yet committed his knight to g6 (much of the point of f4 is in taking away the e5-square from a g6-knight) it makes a lot of sense to adopt the other main plan, playing against d5. Another idea is 18...a5 followed by 19...Qb8 and 20...Rc8, which equalized easily in another A.Areshchenko-Wang Yue, Lausanne 2006 game. ]

**19.Kh1**

[The tactical justification of Black's last move lies in the variation 19.Qd2 Rb5 20.Ne3 Qb6! 21.Bxb5 Bd4 22.Rfe1 Nxd5 23.Kh1 Nxe3 with very strong compensation; for example, 24.Bxa6 Ng4 25.h3 d5! . ]

**19...Rb5 20.Ne3 Rxb2 21.Rxb2 Bxb2 22.Qd2 Bg7 23.Rb1**

[White could also capture immediately on a6, but understandably didn't care for 23.Bxa6 Qb6 24.Bc4 Bd4 25.Nc2 Rc8 when it's clear that White's opening idea has not worked: he has the a-pawn, but the wonderful e3-knight pressing on f5 has been destabilized by Black's dark square control, and now White's bishop struggles to find a role, while Black's activity at least equalizes the chances. ]

**23...Qc7**

[It's not at all clear to me why Lautier rejected 23...Qa8 , since after 24.Rb6 Rb8 all White's options appear to allow Black most annoying play on the dark squares and down the open lines; for example, 25.Rxa6 *( 25.Qb4 Rc8;* or *25.Rxd6 Qa7 )* 25...Rb1+ . Possibly he just judged that the text was even more favourable. ]

**24.Bxa6 Rb8 25.Rc1**

[ 25.Rxb8+ Qxb8 is better for Black, who follows with ...Qb6 and ... Bd4. ]

**25...Qa7 26.Bf1 Rb2 27.Qe1 Rxa2** Here, too, Black has all the chances. **28.Nc4 Qf2**

[ 28...Qc5 looks very strong. If Ivanchuk had some idea up his sleeve, I can't imagine what it was; if 29.Ne3 Ra1 30.Rxa1 Bxa1 31.Nxf5 Nxf5 32.Qxa1 Ne3 is winning. ]

**29.Qxf2 Rxf2 30.Nxd6 Bb2**

[ 30...Rxf4 looks like a better try, but this was a rapid game. Lautier must have missed something round about here; possibly White's 33rd. ]

**31.Rb1 Nxd5 32.Nxf5 Rxf4**

[This doesn't test White, but perhaps there was no longer any way to do so: 32...Nc3 33.Re1 Rxf4 34.g4 leaves more play but still I doubt Black can win. ]

**33.g4! Rf2 34.Bc4 Nc3 35.Rf1 Rxf1+ 36.Bxf1 Ba3 37.Bc4 Bc5 38.Kg2 Kf8 39.g5 Nb1** Points to Remember: 1. 14 c4 tends to result in positions where the b-pawns are exchanged one way or another. Black can always force this with 15 Qb3

(or 15 Qd2) 15...e4 16 Be2 b4 and 15 Rb1 e4 16 Be2 0-0 17 cxb5 axb5 18 Bxb5 Bxb2, although in the latter case the c- and a-pawns go too. This increases Black's control of the dark squares (such as c5 and d4), and hence the drawing effect of the opposite-coloured bishops. 2. Alternatively Black can trade his b-pawn for the c-pawn, although this invites the white knight into the game and should be treated with caution. 3. After f3 or f4 from White it is often right to exchange and play ...f4 (assuming a knight on g6). The resulting positions are optically better for White but should be defensible. Alternatively, Black can always abandon his queenside and build up on the kingside a pawn down. The resulting positions are complicated and unclear.
**½-½**

**B33**

□ **Chen,F**
■ **Lakdawala,Cyrus**
Los Angeles 2006
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 h6** I feel a nagging sense of duplicity when I need to win and try some ultra-sharp line which is fundamentally at odds with my natural style. So I go for openings like the Ulfie and Caro-Kann, even when playing for a win, as in this game in the final round of the State Championship. **7.Nd6+ Bxd6 8.Qxd6 Qe7 9.Qxe7+ Kxe7 10.Be3** White prepares immediate castling, removing the sting out of ... Nb4. I think this is White's best move, after which we must play very accurately to equalize.

[The preliminary 10.f3 is inaccurate and can be met by Nb4! (amazingly, no one has tried this obvious move which disrupts White's game) 11.Kd1 *( 11.Bd3 d5* is also wonderful for Black *)* 11...Rd8 12.a3 Nc6 13.Bc4 d5! 14.Nxd5+ Nxd5 15.Bxd5 Be6 16.c4 Na5 17.Ke2 Nxc4 18.Bxb7 Rab8 19.Ba6 Nxb2 and Black stands no worse. ]

**10...d6 11.Bc4**

[Other moves: -- a) 11.0-0-0 Be6 generally transposes below after 12.f3 *(*or *12.Be2;* while *12.h3 Rhc8 13.Kb1 Na5 14.Bd3 a6 15.f4 Nc4 16.Bc1 exf4 17.Bxf4 Ne5* is perfectly okay for Black, L.Semenova-N.Ioseliani, Women's Candidates semi-final (10th matchgame), Sochi 1983. *)*]

[b) 11.Be2 (this can turn into a tempo loss if Black later plays ...Na5-c4, inducing Bxc4, when White's bishop moves twice) Be6 12.0-0-0 a6 13.a3 Rac8 14.Nd5+ Bxd5 15.exd5 Na5 16.f4 Nc4 17.Bxc4 Rxc4 18.fxe5 dxe5 19.b3 , B.Baker-C. Lakdawala, San Diego (rapid) 2014, when Rg4 looks fine for Black, with an endgame battle of opposing wing majorities. ]

[c) 11.f3 Be6 12.0-0-0 a6 is more testing (I reach this position a lot):

**A)** 13.Nd5+? Bxd5 14.exd5 Nb4 15.Bc4 Rhc8! 16.Bb3 a5! 17.a3?

*(*better to play *17.a4* , though White remains in deep trouble after *b5! )* 17...a4 and Black is winning already, A.Gonzalez-C. Lakdawala, San Diego (rapid) 2008, since 18.Bd2 can be met by axb3 19.Bxb4 Rxc2+ 20.Kb1 Rxg2 with a hopeless ending for White.;

**B)** 13.Kb1 b5 14.Nd5+?! (this is no good here either) Bxd5 15.exd5 Nb4 16.c4 bxc4 17.Bxc4 Rhc8 18.Bb3? *( 18.b3* is even *)* 18...a5 19.a3?! *( 19.a4* was the lesser evil *)* 19...a4 20.Ba2 *(*or *20.axb4 axb3 21.Rd3 Ra4 22.Rxb3 Nxd5 )* 20...Nxa2 21.Kxa2 Ra5 22.Rc1 Rxc1 23.Rxc1 Nxd5 and I converted my extra pawn, A. Householder-C.Lakdawala, San Diego (rapid) 2015.;

**C)** 13.Be2 Rac8 14.Rd2 (in 'Informator #8' this was given as clearly better for White - it isn't) Na5!? *(*risky, since the knight can end up offside; instead, *14...Nb8 15.Rhd1 Rc6 16.Kb1 Nbd7 17.a3 b5 18.a4 bxa4 19.Nxa4 Rb8 20.Kc1 Rb4 21.Nc3 Ne8 22.g3 Nb6 23.Bxb6 Rbxb6* was equal in V.Lillo Castany-Cr.Cruz, Catalonian Team Championships 2013 *)* 15.Rhd1 Rc6 *( 15...Ne8!?* is possible, despite cutting off the h8-rook; after *16.Bb6 Nc4 17.Bxc4 Bxc4 18.Ba5 Be6 19.Bb4 Rc6* , Black is tied down, yet I don't see an obvious way for White to improve his already ideally placed pieces *)* 16.Nd5+ Bxd5 17.exd5 Rcc8 18.b3! (preventing ...Nc4 and threatening Bb6) b5 19.Bb6 *(*this may be premature; the old game I.Radulov-D.Drimer, Havana 1969, saw *19.Kb2 Rb8 20.Ra1 Ra8* , when *21.a4! b4 22.Bb6 Nb7 23.a5* does look good for White *)* 19...Nb7 20.b4! (White enjoys an edge here too, though not as much as the comps claim) Nd7 21.Bf2 Ra8 22.Kb2 Rhb8 23.g3 f5 24.f4 Nd8 25.g4?! *( 25.fxe5! Nxe5 26.Bd4 Ndf7 27.a4 bxa4 28.Ka3* keeps White on top *)* 25...exf4 26.gxf5 Ne5 27.Bh4+ Kf8 28.Rf1 f3! 29.Bd3 Ndf7 30.Bg3 Rc8 and now Black stood slightly better, due to his control over e5 and c4, and I went on to convert, A.Rajaraman-C.Lakdawala, San Diego (rapid) 2014.;

**D)** 13.g4 (White begins an immediate pawn storm) 13...Rac8 14.h4 Na5 15.Nd5+ Nxd5?! *(*Black should play *15...Bxd5! 16.exd5 Nc4 17.Bf2 b5* with a dynamically balanced game *)* 16.exd5 Bd7 17.b3! (cutting the a5-knight off again) b5 18.Kb2 Nb7 19.b4! (White has an advantage similar to my game against Rajaraman above) f5 20.Be2 Nd8 21.g5? (this violates the principle: "don't close lines when you own the bishop pair") *( 21.Rhg1* hangs on to his edge *)* 21...f4 22.Bf2 Bf5 23.c3 hxg5 24.hxg5 Nf7 25.Rdg1?! *(*here *25.a4* is better *)* 25...e4! 26.Rh4? e3 27.Be1 Rxh4 28.Bxh4 Rh8 29.Rh1 *(*or *29.Be1 Rh2 )* 29...Ne5 30.a4 Ng6 (winning a piece) 31.axb5 axb5 32.Bxb5 Rxh4 33.Rxh4 Nxh4 34.Be2 Be4! 0-1 A.Householder-C. Lakdawala, San Diego (rapid) 2015, since Black forces promotion. ]

**11...Be6 12.Bb3** Of course White isn't interested in swapping on e6, which allows Black to seize control over d5 with ...f7xe6. **12...a6 13.f3 Rac8 14.0-0-0 Na5 15.Rd2**

[Here 15.Nd5+ Bxd5 16.Bxd5 *(*or *16.exd5 b5 )* 16...Nc4 17.Bf2 Nxd5 18.Rxd5 Rc6 is an equal ending. ]

**15...Nc4** Forcing White to cough up his bishop pair. **16.Bxc4 Rxc4 17.Rhd1 Rc6**

**18.Kb1 Rhc8 19.g4** QUESTION: How do we counter White's coming kingside pawn storm? --- ANSWER: We don't need to counter it. Just go about your business on the queenside. This "English Attack" plan isn't so terrifying for Black when queens are off the board. **19...Nd7** Anticipating a coming g4-g5 by running away before the knight is hit. Black has equalized comfortably. **20.h4 b5** I begin to seize queenside space. **21.Nd5+ Bxd5 22.Rxd5 Ke6 23.c3 Nf6** Back again, though I'm not really threatening to take his rook just yet. --- QUESTION: Then why did you play the move? --- ANSWER: To transfer my knight to e8 to protect d6. **24.a4** Hoping to loosen Black's queenside pawns.

[After 24.g5 hxg5 25.hxg5 Nd7 *( 25...Ne8* is possible too, to keep minor pieces on the board and play for a win *)* 26.f4 exf4 27.Bxf4 Ne5 28.Bxe5 dxe5 29.Rd7 R8c7 , Black stands no worse and may even hold a minute edge due to his superior king position. ]

**24...Rb8 25.g5 hxg5 26.hxg5 Ne8 27.f4** Trying to get at my king, which is safer than it looks. **27...bxa4 28.fxe5 dxe5**

[I didn't want to risk the line 28...a3!? 29.Bf4! Rxb2+ 30.Ka1 Rxc3 31.exd6 Rcc2 32.Bc1 Rb7 33.d7 Rxd7 34.Rxd7 Rxc1+ 35.Rxc1 Kxd7 . I don't think Black is worse here, but I doubt he stands better. ]

**29.Bc5 f5** Giving my king air.

[ 29...Rb5? 30.Rd8 Nc7 31.Ba3 leaves it in a precarious situation. ]

**30.gxf6?!** This activates my knight.

[The correct result of the game should still be a draw with correct play, but 30.exf5+ Kxf5 31.Bd4 Re6 32.Rf1+ Kxg5 33.Rxe5+ Rxe5 34.Bxe5 Rb5 35.Bd4 is a safer route to that end. ]

**30...Nxf6 31.Rd6+ Rxd6 32.Rxd6+ Kf7 33.Rxa6 Nxe4 34.Ba7 Ra8 35.Rxa4 Nd6** Threatening to exploit the pinned a7-bishop. **36.Ra2 g5 37.b4?** I'm not sure whether this was a blunder or a misguided time pressure attempt to play for a win, due to his "advantage" of bishop over knight.

[ 37.Bc5! Rxa2 38.Kxa2 Ke6 39.Kb3 should lead to a draw. ]

**37...Nb5!** Double attack. **38.Rf2+ Ke6 39.Be3 Nxc3+ 40.Kc2 Nd5 41.Bd2** The game appears to be heading for a draw, since there are so few pawns remaining. But Black has access to a little tactic. **41...Nxb4+!** Attraction. The knight can't be touched since White's rook would hang to ... Ra2+. **42.Kd1**

[After 42.Kb3 Nd3 43.Rg2 Nc5+ 44.Kb2 Ne4! 45.Be3 Kf5 , Black holds on to both pawns. ]

It appears that White has secured the draw. After all, Black's knight and g5-pawn simultaneously hang. --- EXERCISE (combination alert): Black has a problem-like way - actually two problem-like ways - to hang on to both. How? **42...Ra2?** This move should throw away the win.

[ANSWER #1: 42...Nd5 wins:

**A)** since 43.Bxg5 fails to Nc3+! and White loses the exchange, no matter where he moves his king; *( 43...-- )*;

**B)** 43.Rg2 is answered by 43...Ra1+ 44.Kc2 *( 44.Ke2 Nf4+ 45.Bxf4 gxf4*

is trivial *)* 44...Ne3+! 45.Bxe3 Ra2+ and 46...Rxg2. ]
[ANSWER #2: 42...Nd3! works in similar fashion: 43.Rg2 (otherwise 43...Nf4 follows) Ra1+ 44.Kc2 *(*or *44.Ke2 Nf4+* again *)* 44...Ne1+! 45.Bxe1 Ra2+ and 46...Rxg2 wins. ]
**43.Rg2?**
[White could simply have broken the pin on the bishop with 43.Rf8! , when Nd5 44.Bxg5 should end in a draw. ]
Your writer, normally astonishingly inept when it comes to the care and maintenance of the initiative, plays the remainder of the game with uncharacteristic accuracy. --- EXERCISE (combination alert): How does Black win this time? --- ANSWER: Knight fork/double attack. **43...Nd3! 44.Rxg5 Nf2+! 45.Kc1 Ne4**
[Not 45...Rxd2?? , when White throws in 46.Rxe5+! and draws. ]
**46.Rg2 Kd5!**
[The impatient 46...Rxd2?? leads to a drawn pawn ending after 47.Rxd2 Nxd2 48.Kxd2 Kf5 49.Ke3 . ]
[Instead, after 46...Kd5 , Black will take on d2 next move: 47.Kd1 Rxd2+ 48.Rxd2+ Nxd2 49.Kxd2 Kd4 50.Ke2 Ke4 , which is an elementary win. --- SUMMARY: I think 10 Be3 is White's best shot at an advantage in the instant endgame Ulfie. Take particular note of the 10... d6 11 f3 Be6 12 0-0-0 a6 line, where Black can run into difficulties if you're not careful. ]
**0-1**

**B33**

□ **Bronnikova,E**
■ **Kosintseva,Tatiana**
9. Russian Women's Team Championship 2006
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8 16.Ra2**
[ 16.b3 Kh8 17.Nce3 Be6 18.Ra2 would be another route to the position below. ]
**16...Kh8 17.Nce3 Be6 18.b3 Ne7** Remember our rule: no ...g7-g6, until White commits to kingside castling. This way the force of h2-h4 is ruled out. **19.h4**
[If 19.Nxe7 Qxe7 20.Nd5 Qd8 21.0-0 , R. Freydl-S.Peschardt, correspondence 2005, then f5 22.exf5 Bxf5 and Black looks okay. ]
**19...Bh6!?** Black decides to retain the dark-squared bishop.
[If you are okay with a draw, you can exploit White's "wasted" tempo on Ra2 and go for the liquidating 19...Bxe3 20.Nxe3 Bxc4 21.Nxc4 d5 22.exd5 Qxd5 23.0-0 Qxd1 24.Rxd1 Rxb3 25.Nxe5 Rxc3 26.Rxa5 with total equality. ]
**20.g3 Nxd5 21.Nxd5 f5** Black generates sufficient play down the f-file. **22.exf5 Bxf5 23.0-0 Rc8** As is usual in the Sveshnikov, Black is not busted, despite all our

strategic liberties and the computer's usual misassessment of an advantage for White. This way, Black accomplishes the following: -- 1. The advance b3-b4 is discouraged, since White's bishop hangs on c4. -- 2. Black plans to play ...Rc5, next, which adds protection to the a5-isolani. -- 3. With a rook on c5, Black adds heat to the d5-knight. **24.Qe2 Rc5 25.b4** Yes, White creates a passed b-pawn. In exchange, Black rid himself of his isolani. **25...axb4 26.cxb4 Rc8 27.Rd1 Be6** As always in the Sveshnikov, Black's pieces make their pilgrimage to our Mecca, which is always d5. This way Black can possibly bail out to an opposite-coloured bishops ending with a future ... Bxd5. **28.b5 Rc5** The rook jumps right back into c5. **29.Bb3!?** White is willing to hand over the b-pawn, if in return Black must play ...Bxd5, which gives White the better of the remaining opposite-coloured bishops.

[Nonetheless, I would prefer 29.Rb2 , following the principle: place your rook behind your passed pawn. ]

**29...Qb8! 30.b6**

[Not 30.Ra5? Qb7! 31.Qe4? Qf7! and White is busted. ]

**30...Bxd5 31.Bxd5 Qxb6** Black has won a pawn, yet White is fully compensated as he has the stronger bishop. In fact he soon finds a way to win the d6-pawn and the game is quickly drawn. **32.Ra6 Qc7**

[ 32...Qb5 33.Qxb5 Rxb5 34.Rxd6 Rb2 35.g4 Bd2 36.Be4 is an almost certain draw. ]

**33.Be4 Rd8 34.Qd3!** The d6-pawn falls. **34...d5!?**

[The clearest path to the draw lies in 34...g6! 35.Rxd6 Qxd6 36.Qxd6 Rxd6 37.Rxd6 Rc7 38.Re6 Bf8! 39.Rxe5 Re7 40.Rxe7 Bxe7 . White's extra pawn is useless due to the opposite-coloured bishops. ]

**35.Bxd5 Rc1 36.Kg2 Rxd1 37.Qxd1 g6 38.Qf3 Rf8 39.Rf6**

[ 39.Qe2 is the only way for White to try and win. ]

**39...Qe7 40.Rxf8+ Bxf8 41.h5 gxh5?!** We experience the Lion King circle of life, natural conclusion. White stands slightly better since Black nurses two isolanis and his king is slightly unsafe. Still, from a practical standpoint, Black's chance to draw is 99%, next to White's 1% chance to win. So White didn't bother trying.

[And 41...Kg7! would have ensured the draw. ]

**½-½**

TIP: In any Sveshnikov line where the central pawns disappear and leave Black with his unopposed dark-squared bishop, it is always important to get in ...b4 to break the c3/b2 couple opposing the bishop, and ...Rb8 is bound to come in useful later to promote that. Alternatively:

[Alternatively: a) 15...Bb7 leaves f5 en prise, and Black doesn't seem to obtain enough play after 16.exf5 Qg5 *( 16...d5 17.Qh5 e4 18.Rfe1* is also bad *)* 17.Ne3 d5 18.f4 exf4 19.Qg4 , which leaves Black the choice of a number of disagreeable endings in which his bishops fail wholly to compensate for the pawn weaknesses. ]

[b) 15...d5 16.exf5 e4 is better timed since White doesn't have Rfe1 and Black does have ...Bxf5, but even so 17.Be2 Rd8 18.a4 bxa4 19.Rxa4 Bxf5 20.Nd4 (Rogozenko) seems to be a bit better for White. ]

[c) 15...f4 is perhaps the main alternative and was revived by Kasparov's use of it against Judit Polgar in 2002, but after 16.a4 bxa4 17.Rxa4 Qg5 White can certainly do better by refraining from Polgar's 18.f3? Bf6 , after which White is in grave difficulties. White's best set-up in this line is not yet clear (probably it starts with 18 Qe2, but in any event Black continues with ...Bf6, ...Kh8, ...Rg8 and ...Bd8-b6 in some order), but the fact that Anand wants to play against it and that Radjabov avoids it is suggestive. , after which White is in grave difficulties. White's

best set-up in this line is not yet clear (probably it starts with 18 Qe2, but in any event Black continues with ...Bf6, ...Kh8, ...Rg8 and ...Bd8-b6 in some order), but the fact that Anand wants to play against it and that Radjabov avoids it is suggestive. ]

**16.exf5**

[ In the first game of this match Anand had tried the new move 16.Re1 . This enabled him to achieve a better role for the light-squared bishop than White can normally manage in this variation, after fxe4 17.Bxe4 f5 18.Bd5+ Kh8 19.Nb4 Qc7 . The trouble is fitting his knight into things, though, and when Anand played 20.Bb3 Radjabov was quick to fight for d5 with a5 21.Nd5 Qb7 22.a3 Be6 23.Ne3 Bxb3 24.Qxb3 f4 25.Nd5 , and here it seems that Black could have obtained the advantage with f3 , obtaining the c1-h6 diagonal for his bishop. ('It's amazing how difficult it is for White to equalize in the Sveshnikov' - Anand.) , obtaining the c1-h6 diagonal for his bishop. ('It's amazing how difficult it is for White to equalize in the Sveshnikov' – Anand.) ]

[ 16.Qh5 fxe4 17.Bxe4 f5 18.Bd5+ Be6 doesn't do much for White either; for example, 19.Rad1 Bxd5 20.Rxd5 Rf6 . ]

**16...e4 17.Re1 Bxf5 18.Ne3** The most natural move in this much-discussed position.

[ White has also tried The most natural move in this much-discussed position. White has also tried 18.Nd4 . The point of this is that the a7-g1 diagonal is blocked, so that if Bg6 White has 19.Bxe4 *(* and not *19.Nc6? Qb7 20.Nxb8 exd3 )* 19...Bxe4 20.f3 with advantage. (If White tries anything based on f3 at once then ... Qa7+ at some point spoils the plan.) ]

[ So Black is forced to give up his strong bishop with 18.Nd4 Bxd4 19.cxd4 d5 , but his strong centre is ample compensation for the formally bad bishop. ]

[ Instead 18.Nb4 has no independent significance since a5 19.Nd5 *( 19.Nc6 Qb7 20.Nxb8 exd3* is bad again *)* 19...Qe5 20.Bc2 Bg6 transposes to the game. ]

**18...Bg6 19.Nd5 Qe5 20.Bc2 a5** transposes to the game. **21.f4** Sooner or later White has to stop ...f5-f4, and this is the move usually played. **21...Qe6**

[ 21...Qe8? 22.Ne3 threatens Qxd6 and f5. ]

**22.Qd2**

[ 22.g4 is also met by f5 . ]

**22...Kh8 23.a3**

[ This might have been Anand's improvement on Bologan's 23.Rad1 , but it doesn't make an awful lot of difference. ]

**23...f5 24.Bb3 Qc8** NOTE: This is an excellent manoeuvre, bringing the queen to the c5-square where Black's major pieces are often well placed in the Sveshnikov. **25.Qf2 Qc5 26.Rad1 Bf7** Black prepares to trade his bishop for the knight when convenient. White has no advantage. **27.Bc2 Bxd5 28.Qxc5 dxc5 29.Rxd5 b4 30.Rxc5**

[ 30.axb4 cxb4 31.cxb4 axb4 32.b3 Rbc8 33.Re2 was the best way to defend according to Radjabov, 'with decent chances for a draw'. ]

**30...bxc3 31.bxc3 Rbc8!** Black uses the tactic 32 Rxa5 Bxc3 to force White to enter a worse endgame, in which he can't find a role for his bishop. **32.Rxc8 Rxc8 33.Rd1** Anand must go wrong somewhere over the next few moves.

[ Maybe Anand must go wrong somewhere over the next few moves. Maybe 33.Rb1 was better now, since Bf8 can be met with 34.Rb3 . ]

**33...Bf8!** A strong move ensuring the win of both the a- and c-pawns, according to Radjabov, although I confess I don't quite follow him. **34.Kf1**

[ 34.a4 Rxc3 35.Rd8 Kg7 36.Bd1 looks like a better try to me, but maybe I am missing Radjabov's point. ]

[ Instead 34.Rd5 Rxc3 35.Bd1 Rxa3 36.Rxf5 Bb4 37.Kf2 was the best defence according to Radjabov, who says that the position is still a draw. ]

**34...Rxc3 35.Ba4 Rxa3 36.Bd7** Presumably Anand had been relying on this counterattack, but if so he had underestimated the two passed pawns. **36...Ra2 37.Re1 Bb4 38.Re2 Bd2 39.Kf2**

[ 39.Bxf5 e3 40.g4 a4 is the same; once the rook is incarcerated the a-pawn will cost White a piece. ]

[ Instead 39.g4 e3 40.Rg2 was probably the last try. ]

**39...a4 40.Bxf5 e3+ 41.Kf3 a3 42.g3 Rb2 43.Be6 Kg7 44.Rg2 a2 45.Bxa2 Rxa2 46.Rg1 Bb4** Points to Remember: 1. The point of the immediate 13 c3 f5 14 Nc2 (without both sides castling) is to gain a tempo in the fight for the central light squares (especially f5) and reserve the option of castling queenside. Black normally finds himself forced to play ...f4, and in the resulting structure the outcome will depend on whether Black is able to create counterplay on the queenside and prevent White obtaining a bind. --- 2. After castling White's play is not nearly so effective: he can't prevent ... fxe4 and ...f5 for ever, and in the structure after exf5, ...e4; ...Bxf5-g6; f4 and ...f5, Black can gradually organize ...b4 and ...Bxd5. The resulting opposite-coloured bishops give Black as many chances as White. Points to Remember: 1. The point of the immediate 13 c3 f5 14 Nc2 (without both sides castling) is to gain a tempo in the fight for the central light squares (especially f5) and reserve the option of castling queenside. (Game 32) Olomouc 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.c3 Bg7 12.exf5 Bxf5 13.Nc2 0-0 14.Nce3 Be6 15.Bd3 f5 16.Bc2** I thought I'd show this game since 16 Bc2 has been thought to be a drawing variation. The idea of the move is basically prophylactic: White wants to draw the sting from ...e4 while reserving the choice of entering variations with 0-0 or Qh5 first. **16...Bh6**

[This was a new move as far as I can tell. Black can naturally play other moves, but the drawing variation hallowed by theory is 16...f4 17.Qh5 *(*White has no choice; *17.Nf1* is unthinkable *)*, and now the clever 17...Rf7 , when White doesn't have anything better than 18.Bxh7+ *( 18.Qxh7+? Kf8 19.Bf5 Qe8!* simply loses material *)* 18...Kf8 19.Bf5 Qe8 20.Bxe6 Qxe6 21.Qg4 Qh6 (covering f4) 22.Nf5 *( 22.Nc2 e4* is very dangerous *)* 22...Qe6 23.Nfe3 with a draw. NOTE: The text, fighting for d5 by exchanging the e3-knight, is a standard manoeuvre in other lines of the Sveshnikov but a new page in this line; usually Black players tend to feel that their king needs the protection of the g7-bishop. with a draw. NOTE: The text, fighting for d5 by exchanging the e3-knight, is a standard manoeuvre in other lines of the Sveshnikov but a new page in this line; usually Black players tend to feel that their king needs the protection of the g7-bishop. ]

**17.Qh5**

[The obvious alternative is 17.0-0 , but after f4 18.Ng4 *( 18.Qh5* is just bad: *Qg5 19.Qxg5+ Bxg5 20.Nc7 Bf7 21.Nxa8 fxe3 22.Nb6 exf2+* and so on *)*
the knight on g4 is a bit of a liability: Black just retreats with 18...Bg7 , and 19.Qd3 can be met with Qh4 . ]

**17...Bxe3 18.Nxe3 Qe8 19.Qh3**

[ 19.Qg5+ Qg6 20.h4 is a possibility which is best met by Qg7 *(*rather than *20...Qxg5 21.hxg5* which brings White's rook dangerously into the game: Black's best is *f4 22.Bxh7+ Kg7* when he certainly has some compensation but I think White can maintain some advantage. *)* After the superior 20..Qg7 White can just about win the battle for d5 in the short term: 21.Rd1 Rad8 22.Bb3 Bxb3 23.axb3 h6 24.Qxg7+ Kxg7 , but Black's king can come to e6 and White has no advantage ]

**19...Qf7** Defending f5 (and h7). White already has to be careful to keep the balance.

**20.Qg3+**

[A natural enough try, organizing f4 to try and halt Black's mobile pawn mass, but it doesn't really work: White is losing too much time, forcing the useful ...Kh8 and giving Black ...Rg8 for free too. Instead the computer wants to play 20.0-0-0 Rad8 21.g4 , which produces complications I hesitate to give an opinion about, although

I suspect Black does better to start with Ne7 , *(*rather than *21...fxg4* when the thing's idea is *22.Qh6 Bxa2 23.Rhg1 . )*]

**20...Kh8 21.f4 d5!** Winning the battle for d5 in some style; White must have underestimated this. **22.Nd1**

[Miserable, but 22.0-0 d4 wasn't much better; for example, 23.cxd4 exd4 24.Nd1 Rg8 25.Qh3 Nb4 . ]

**22...Rg8 23.Qf2 Qg7!** The perfect square for the queen, a more than adequate substitute for the bishop. **24.Ne3**

[Going to and fro with the knight like this is obviously a distress signal, but 24.0-0 exf4 is surprisingly strong. It looks as though White ought to be able to organize recapturing on f4 and then dam the g-file with g3, but Black is too quick; for example, 25.Qd2 d4 26.Rxf4 Rad8 27.Rf2 dxc3 28.Qxc3 Nd4 with a big advantage to Black. ]

**24...exf4 25.Qxf4 d4** The same recipe: Black's activity is too much for White. **26.cxd4 Nxd4 27.Bd3 Rae8 28.Kf2 Bc4** White is lost. Black doesn't even need to claim he's threatening ...Rxe3; the prosaic ...Ne6 and ...f4 will do the job just fine. **29.Bxc4 bxc4 30.g3 Re4 31.Qd6 f4 32.gxf4 Rxe3 33.Rag1 Re2+ 34.Kf1 Rg2** A finely conducted attack and an original strategic idea at an unusually early stage of the game for the Sveshnikov. Points to Remember: 1. 16 Bc2 is more or less an invitation to a draw. 2. However, the little-tried idea in the game means that it simply loses a tempo, and should enable Black to win the fight for d5. A finely conducted attack and an original strategic idea at an unusually early stage of the game for the Sveshnikov. Points to Remember: 1. 16 Bc2 is more or less an invitation to a draw. 2. However, the little-tried idea in the game means that it simply loses a tempo, and should enable Black to win the fight for d5.

**0-1**

**B33**

□ **Bobras,Piotr**
■ **Yakovich,Y**
Erin (Game 24) 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.Bd3 Ne7 12.Nxe7 Qxe7 13.0-0 0-0 14.c4** White would like Black to capture this pawn and bring his a3-knight back into the game quickly; alternatively he gives it the c2-square and hopes to distract Black by the threat of 15 cxb5. **14...f5** Of course!

[WARNING: Black can't contemplate anything like 14...b4 15.Nc2 a5 16.Ne3 when his dark-squared bishop is committed to a miserable existence on g7. He can't get by without ...f5. ]

**15.Qf3** White prevents 15...fxe4 by the reply 16 Qxe4 threatening a8 and h7. There is

a string of alternatives here:
[a) Two things White shouldn't do are grab material either on b5 or f5: 15.cxb5 d5 16.exd5 e4 17.Qe2 Qe5 18.Bc4 Qxb2 19.Nc2 axb5 20.Rab1 Qf6 gives Black good compensation, ]
[while 15.exf5 e4 16.Re1 Bxf5 is already better for Black. ]
[b) 15.Re1 doesn't really address the issue of the central light squares; after fxe4 16.Bxe4 Rb8 17.cxb5 axb5 White might as well grab a pawn, but Black has good play after 18.Qd3 f5 19.Bd5+ Kh8 20.Nxb5 e4 21.Qb3 Be5 . ]
[c) 15.Qe2 prevents 15...fxe4 in view of 16 Qxe4 threatening mate and the rook, but rather than panic and play 15...f4? Black should carry on fighting for the light squares with Bb7 16.Rad1 Rad8 17.f3 *( 17.cxb5 axb5 18.Nxb5 fxe4 19.Bxe4 d5* was the idea of Black's last move *)* 17...fxe4 18.fxe4 f5 , and Black conquers the light squares with advantage. ]
[d) 15.Qh5 is the main alternative to 15 Qf3, again preventing 15...fxe4 in view of 16 Bxe4 winning a rook, but this time ruling out 15...Bb7 by the attack on f5. Black still doesn't want to play 15...bxc4 and let the knight into the game easily, so his normal way to play is Rb8 , renewing the idea of ...fxe4 and . ..f5. White is now out of tactical ways to stop this, so the game will usually go on 16.exf5 e4 17.Rae1 (the only sensible move to address the twin threats of 17...exd3 and 17...Bxb2) Bb7 and here too White has tried a range of moves:
**A)** 18.Nc2 gives up on the idea of 13 c4 – to force Black to activate the knight over c4 – and allows Black easy play after bxc4 19.Bxc4 d5 .;
**B)** 18.b3 intends to keep a pawn on c4 to prevent ...d5, but then bxc4 19.bxc4 Rfe8 *(*the variously analysed *19...d5?! 20.cxd5 Qxa3 21.f6 Bxf6 22.Bxe4* is probably just mate *)* 20.Nc2 Bc6 (with the idea of ...Rb2) 21.a3 a5 (versus Nb4) is nice for Black.;
**C)** 18.f3 allows d5 (because of 19 cxd5? Qc5+, unpinning the e-pawn and winning the bishop) when probably the best White can do is 19.fxe4 dxc4 20.f6 (if the bishop retreats then Black obviously has great compensation after ... Bd4+) Bxf6 21.e5 Qc5+ 22.Kh1 cxd3 23.Rxf6 with a complicated position where Black probably has a slight advantage.;
**D)** 18.cxb5 d5 19.bxa6 Bc6 is nothing to be afraid of – b3 cannot be defended, and White's minor pieces struggle to find a role.;
**E)** 18.Re3 is alarming, but Black's thematic reaction with bxc4 19.Bxc4 d5 pretty much obliges White to bale out to equality after 20.Bxd5 *(*since *20.Bb3 Qe5* gives Black everything he wants *)* 20...Bxd5 21.f6 Qxf6 22.Qxd5 Qxb2 .;
**F)** 18.Qg4 continues to prevent 18...bxc4 in view of 19 Bxe4. Usually Black defends the pawn with Rfe8 *( 18...Kh8* is a good alternative *)* when White has finally found a good moment for 19.cxb5 *(*after *19.f3* Black has *h5!* , freeing the bishop and enabling the trick *20.Qxh5 Bd4+ 21.Kh1 exf3!* , which leads to an unclear position after *22.gxf3 Qxe1 23.f6 Qxf1+ 24.Bxf1 Bxf6 25.Qg4+ Kf8 26.cxb5 )* 19...d5 20.bxa6 Bc6 with a complicated position where White's tries include 21.a7 *(*alternatively *21.f3* is probably best met with Rogozenko's

untried suggestion *Rxb2 22.fxe4 Kh8 ,;* while one might have thought that the purpose of White's play so far was to enable *21.b3* preserving the b-pawn, since 21...Qxa3 is ruled out by 22 f6; probably Black's best then is *Kh8* with counterplay *)* 21...Rxb2 22.Rc1 with a very complicated position where Black's best is supposedly h5 *( 22...Bd7 23.Bb5 h5 24.Qd1* is not nearly so good; the point of 22...h5 is to prevent this regrouping *)*, based on the wicked trick 23.Qxh5? exd3 24.Rxc6 Rxf2!! .;

**G)** 18.-- ]

**15...d5** This move of Radjabov's, taking advantage of the queen's position on f3 to get Black's central break in anyway, is the fashionable one. The alternatives form a labyrinth in which I can only provide the most meagre of threads:

[a) 15...Qb7 unpins to prepare ...d5; a critical line is considered to be 16.exf5 Qxf3 17.gxf3 e4 18.Bxe4 d5 19.Bxd5 Bxf5 20.Bxa8 Rxa8 with a position where White's vast advantage in material doesn't make it easy for him to obtain any actual edge. ]

[b) 15...bxc4 is under a cloud because of Anand's 2002 innovation against Kazimdzhanov at Hyderabad (one of a number of the-Sveshnikov-is-busted games over the years) 16.Nxc4 d5 17.exd5 e4 18.Qe3 Bb7 19.d6 Qf6 20.Bc2 f4 21.Qh3 Rac8 22.b3 Qg5 and now 23.d7 with a very difficult position for Black. ]

[c) Kramnik's 15...Re8 prevents 16 exf5 in view of 16...e4. His other point is 16.Rfe1 b4 17.Nc2 f4 – although this isn't usually Black's plan in this line, here restraining White's knight and rendering his Rfe1 rather a wasted tempo makes it more viable: 18.Nxb4 Rb8 19.Nd5 *( 19.Nc6 Qg5 20.Nxb8 Bg4* traps the queen with more unclearness *)* 19...Qg5 and now either 20.Bf1 *(* or *20.Be2* are probably the critical lines. *)*]

**16.cxd5**

[The only move; 16.exd5 loses a piece e4 17.Qe2 Qb4 . ]

**16...fxe4 17.Bxe4**

[ 17.Qxe4 f5 18.d6 fxe4 19.dxe7 exd3 20.exf8Q+ Kxf8 wins the exchange but the resulting endgame is fine for Black. ]

**17...Rb8** The only sensible answer to the threat of 18 d6. **18.Rfd1**

[ 18.Rad1 is a refinement whose idea is that, after Qd7 19.d6 Rb6 20.Qc3 Rxd6 21.Bf5 , Rxd1 isn't check. ]

[Black's best reply is 18.Rad1 Rb6 and after 19.Qd3 , not

**A)** but the sacrifice 19...Qd7 20.g3 *( 20.Bxh7+ Kh8 21.Qe3 Rh6 22.Bc2 Qd6* is dangerous – Black has a lot of compensation and White was lost inside three moves in P.Smirnov-T.Radjabov, FIDE World Championship, blitz playoff, Tripoli 2004: *23.g3 Bh3 24.Rfe1 f5 25.f4?? exf4* – but still, White has various obvious alternatives and this might be a critical line *)* 20...f5 21.Bg2 Rh6 and now in P.Leko-T.Radjabov, Linares 2004, White felt it best to bale out with 22.f4 *(*rather than brave *22.Nc2 f4 )* 22...exf4 23.gxf4 Bxb2 .;

**B)** 19...Rh6 ]

[Instead 18.Bf5 Qf6 doesn't get White very far, ]

[ but Nigel Short's exchange sacrifice 18.Rac1 f5 19.Rxc8 Rbxc8 20.Bxf5 Qg5 21.Be6+ Kh8 produces an interesting and balanced position. ]

**18...f5**

[ This move was a novelty; the usual move has been 18...Qd7 , when 19.d6 Rb6 20.Qd3 Rd8 21.Rac1 Bf8 enables White to choose between a draw with 22.Qg3+ *(* and *22.Rc7 Qxc7 23.Bxh7+ Kg7 24.dxc7 Rxd3 25.Bxd3 Rc6 26.Nc2* , with an ending where Black has his usual compensation for the pawn with his bishops and central control, while the white knight is still trying to find a role *)* 22...Bg7 23.Qd3 Bf8 . ]

**19.d6** This was supposed to be good for White. **19...Qf6 20.Bc6 Be6 21.Bd5**

[ It turns out this doesn't do the business, but what White ought to do instead isn't clear. 21.d7 seems natural, to make sure this pawn survives, but after, for example, e4 22.Qe3 Rbd8 23.Rd2 Bh6 *( 23...Kh8* is possible too *)* 24.Qg3+ Kh8 25.Rd6 Rg8 Black is better. ]

**21...Rbd8 22.Qb3**

[ 22.Bxe6+ Qxe6 23.Qd5 is only about equal too; for example, Qxd5 24.Rxd5 e4 25.Nc2 *(* after *25.Rd2 Rd7 26.Rad1 Rfd8* White can't hold on to the d-pawn) *)* 25...Bxb2 26.Rb1 Bc3 27.d7 Rf7 . ]

**22...Bf7 23.Nc2 Rxd6 24.Bxf7+ Rxf7 25.Rxd6 Qxd6** Black has won the pawn back and now probably enjoys the better chances. **26.Ne3 f4 27.Rd1**

[ Ambitious; 27.Nf5 and trading on g7 was sensible and equal. ]

**27...Qg6 28.Nd5 Kh8 29.Nc3** Bobras must have thought optimistically about this set-up, with the knight coming to e4. If he could achieve Ne4 and f3 then he might be better, but it's Black's move. **29...f3 30.g3 Qf5**

[ This allows an irritating rook check; it was better to take time for 30...Rf8 . Black wants to keep the rooks, so after the next move he has to pin his bishop inconveniently and lose time to free it. ]

**31.Rd8+ Bf8 32.Nd1 Kg7 33.Ne3 Qg6 34.Qc3 Qb1+ 35.Rd1 Qe4 36.Rd5 Be7 37.h4**

[ White has managed to obtain the advantage, and 37.Qxe5+ Qxe5 38.Rxe5 Bf6 39.Re6 Rc7 40.h3 Bxb2 41.Rxa6 is obviously better for him, although Black has good drawing chances; but Bobras rightly judges that he can try for more. These moves were played in a time scramble. ]

**37...Bf6 38.Kh2 h5 39.Qc8 Be7 40.Qxa6 Bxh4 41.gxh4??**

[ A dreadful blunder; presumably White didn't realize 40 moves had been played. 41.Qe6 leaves White winning a well-played game. ]

**41...Qxh4+ 42.Kg1** Leonard Barden invited readers of the 'Evening Standard' to find Black's next move, which terminates the game immediately. **42...Kh7! 43.Nf5 Rg7+ 44.Nxg7 Qg5+** Points to Remember: 1. 10...Bg7 is not an entirely independent move, but it avoids some of the sharp lines after 10...f5, albeit at the expense of inviting a whole lot more! 2. There's a lot of specific moves in the notes to this game, but by and large they don't have to be remembered; what does have to be remembered is

the idea to fight for the central light squares and the typical methods of doing that.
**0-1**

**B33**

■ **Shabalov,Alexander**
(Game 36) Chicago 2006
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.Qh5 Rg8 13.g3 Rc8 14.c3 Rg6** NOTE: The main point of this move, besides enabling ...Rh6 in some lines (after Qxh7 in particular), is to unpin the rear f-pawn and thus prepare ... fxe4, Bxe4 ...f5.
**15.Nc2** Alternatively:
[a) Black's immediate point is that 15.exf5 is not dangerous, because after Bxd5 16.fxg6 hxg6 17.Bxg6 fxg6 18.Qxg6+ Kd7 Black is better; for example, 19.0-0 Kc7 20.Nc2 Qe8 21.Qxe8 Rxe8 when the bishops rule the roost. ]
[b) 15.h4 has a clever idea: fxe4 16.Bxe4 and now, unlike below, White has Bg4 *(*however, *16...f5 17.Bxf5 Bxd5 18.Bxg6+ hxg6 19.Qxg6+ Kd7* is more or less the same position as the last line, but with h4 in, which doesn't alter the evaluation *)* 17.Qxh7 Rh6 18.Qg8 Be6 thanks to 19.Qg5! . ]
[c) 15.Ne3 Rh6 16.Qd1 *( 16.Qf3 fxe4 17.Bxe4 d5 18.Bxd5 Bxd5 19.Nxd5 Bxa3 20.bxa3 Ne7 21.Nf6+ Kf8 22.Rd1 Qc7* is better but still nothing special for White *)* 16...fxe4 17.Bxe4 allows the blow d5 18.Bxd5 Bxd5 19.Qxd5 Qxd5 20.Nxd5 Bxa3 21.bxa3 Rd6 with a fairly equal endgame. ]
[d) 15.Qf3 is the main alternative historically, trying to hold back f5, but the complications work out for Black after Bxd5 16.exd5 e4! 17.Qxf5 Rg5 18.Qf4 *( 18.Qxh7* is much worse, since after *exd3 19.dxc6* Black has *Qe7+ 20.Kf1 Qe2+ 21.Kg2 Rh5 22.Qg8 Qe4+* with a terrible position for White *)* 18...exd3 19.dxc6 Re5+ 20.Kf1 Qb6 21.Qf3 Qxc6 , and Black has at least equality in the endgame. ]
**15...fxe4 16.Bxe4 Bg4 17.Qh4**
[ 17.Qxh7 Rh6 18.Qg8 Be6 with the threat of 19...f5 wins for Black. ]
[Instead 17.Bxg6 Bxh5 18.Bxh5 is the sort of small material investment for the light squares Black always has to be wary of in the Sveshnikov, but here I don't think White has quite enough since he can't get the c2-knight to d5 after Bh6 ; for example, 19.Bg4 Rb8 20.Bf5 Kf8 21.Bxh7 Ne7 22.Be4 Nxd5 23.Bxd5 a5 , and I don't think Black is in any danger. ]
**17...Qxh4 18.gxh4 f5 19.h5 Rg7**
[ 19...Rg5 20.h4 Rg7 21.f3 with advantage for White was given by Kasparov, but Black shouldn't give White the move h4 for free. ]
**20.Nce3**

[ The alternative is 20.h3 Bxh3 21.Bf3 Bg4 22.Nf6+ Kd8 when White has some compensation for the pawn, but it's hard to believe he has chances to be better. ]
**20...fxe4 21.Nxg4 Kf7** Black has emerged from the opening in fine shape. White manages to win the front e-pawn but even so Black is much better: Black's king has a wonderful square on e6, the extra h-pawn is more or less useless, White has terrible weaknesses down the f-file, and to cap it all he can't hold down ...d5. **22.Ngf6 Ke6 23.0-0-0 Ne7 24.Nxe7 Bxe7 25.Nxe4 d5 26.Ng3 Rf7 27.Rhf1 b4 28.Kc2 bxc3 29.bxc3 Bb4** Winning back the pawn and transposing to a winning rook ending. **30.Ne2 Bxc3 31.Nxc3 d4 32.Rd3 Rfc7 33.Kb2 Rxc3 34.Rd2 Kd5 35.Rfd1 Rf8 36.Rg1 Rcf3 37.Rg2 R8f5 38.h6 Rf6 39.Rg7 Rxf2 40.Rxf2 Rxf2+ 41.Kb3 Rxh2 42.Rxh7 Ke4 43.Rh8 Kd3 44.Re8 e4 45.Re6 e3 46.Rxa6 e2 47.Re6 Rxh6** Points to Remember: 1. With 12 Qh5 White doesn't waste a second in going for Black's most vulnerable points, and consequently forces Black out of his comfort zone, as it isn't possible to get developed and castle due to the pressure the queen exerts on f5 and h7. 2. Crazy play is the only play: Black needs to keep the king in the centre and stir up enough trouble for White's king that Black gets his chances in the resulting complications. 3. The idea of this particular line is to use a string of tactical resources to destroy White's centre through ...fxe4 and .. .f5, and this is Black's answer to more or less every White try except 15 Qf3. If by any chance you have failed to memorize the notes to White's 15th and this position crops up, remember that there should be a tactical way to justify this sequence.

■ **Rajlich,Vasik G**
Online Freestyle (Game 39) 2006
*[John Cox]*

This game was played in a man-machine internet event, open to anyone with any computer assistance they cared to use. I don't know who the White human operator was (Rajlich is rated just over 2300, but is chiefly famous as the brains behind the fashionable computer engine Rybka), but he wasn't a mug – several GM teams failed to make the final, in which these two players finished first and second. This game was played in a man-machine internet event, open to anyone with any computer assistance they cared to use. I don't know who the White human operator was (Rajlich is rated just over 2300, but is chiefly famous as the brains behind the fashionable computer engine Rybka), but he wasn't a mug – several GM teams failed to make the final, in which these two players finished first and second. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.Re1** We are now moving into highly fashionable territory. This little move is quite the vogue at the

moment. Its ideas are fairly similar to 14 Qh5 in as much as White still wants to go Qh5, c3 and Nc2-e3. This time, however, White is going to take the bishop back to f1, where if all goes well it may be able to emerge on h3, pressing on f5. White figures that actually his rooks will be fine on e1 and d1, restraining ...f4 by pressure on e4 and defending d5 respectively, since if he does play f2-f3 he can perfectly well recapture on f3 with the queen if needs be. Actually he doesn't play f3 so often in this system anyway; as I said his idea is more usually g3 and Bh3. **14...Bg7 15.c3**

[White needs to defend b2, and his only real alternative is 15.Rb1 . This casts White's play in a different mould as, instead of c3 and Nc2, he intends to play on the queenside with c4; thus: 0-0 16.c4 e4 17.Bf1 . This position is obviously very similar to the 14 c4 lines. The difference is that White has effectively taken a tempo earlier to sort out his kingside pieces with Re1 and Bf1, which is not necessarily to be underestimated – the bishop is much better on f1 than e2 where it is often a target for ...Nf4 or ...f3, and the rook is handy on e1 to restrain ...f4. Now Ng6 18.cxb5 *( 18.b4* doesn't achieve much, and *Be5 19.Qh5 Qf6 20.Re3 h6* followed by ...Kh7, ...Rg8 and so on had worked out terribly for White in an earlier Moiseenko game;*;* but *18.Re3* might be worth thinking about – it isn't easy to find a useful move for Black, while White retains the possibility of capturing on b5 next turn *)* 18...axb5 19.Bxb5 Bxb2 *(*as in the 14 c4 line Black can also continue va banque with, say, *19...Kh8* (or 19...Qg5 and ...Be5), as in P.Czarnota-A.Moiseenko, Turin Olympiad 2006, where great complications arose after *20.Bc6 Ra7 21.Nc4 Nf4 22.a4 Qg5 23.g3 Qg6 24.Qd2 Nd3 25.Re3 f4 26.Rxd3 exd3 27.Re1 Bh6 )* 20.Nc4 enables Black to consider Be5 *(*instead of *20...Bg7 . )*]

**15...0-0 16.Qh5**

[ 16.Nc2 is most logically met by f4 *( 16...Re8* is commoner, transposing to the lines in the note to White's 18th after *17.Qh5 e4 18.Bf1 Nxd5* , but Rogozenko suggests that 17 a4 may favour White *)* , which the text seeks to prevent, and here 17.a4 bxa4 18.Rxa4 a5 , followed by ...f5, gives Black good play on the kingside. ]

**16...e4 17.Bf1 Re8**

[WARNING: 17...b4? 18.cxb4 Bxb2 19.Rab1 Bxa3 20.Rb3 is no good since Bxb4? allows mate in four with 21.Rh3 . ]

[However, 17...Qc8 is a major alternative, when the main line is 18.Rad1 *( 18.Nc2? Nxd5 )* 18...Re8 *(*and not *18...Ng6* when White has time to pin the f-pawn after *19.g3* and Bh3, and so realize the ideal development for the variation: he goes on with Nc2-e3, and prepares f3 or f4 with moves like Kh1 and Rf1 if needed, while Black is tied to defending f5 *)* 19.Nc2 *(*now after *19.g3* Black has time for *Qc5* , since the f-pawn is still defended, and the counter-attack on d5 secures him equal chances *)* 19...Ng6 *( 19...Qc5 20.Nd4* is worse because Black's queen has wandered from his king, and consequently *Bxd4 21.Rxd4* is too dangerous *)* 20.Nd4 Bxd4 21.Rxd4 *( 21.cxd4* is another story and looks quite promising; Black was worse in the only game I know of after *f4 22.Rc1 Qd8*

*23.Qf5 e3 24.fxe3 fxe3 25.g3 )* 21...Re5 22.Qh6 , and now either Qe8 *(*or *22...Qf8* holds the balance. *)*]

**18.Rad1**

[The alternative is 18.Nc2 Nxd5 , but Rogozenko suggests that 17 a4 may favour White *(*after *18...Rc8 19.a4 Nxd5* the rook is not best placed on c8, and Black can hardly resist taking the d-pawn for ever, so it's best to do so at once *)* 19.Qxf5 Re5 :

**A)** After the original 20.Qh3 Nf4 21.Qg4 Black appears to be doing quite well after either Ne6 *(*or *21...Qf6* . *)*;

**B)** Thus attention has shifted to Karjakin's 20.Qg4 , planning to retreat to d1. Then f5 is very sensible, *(*but in the most recent game the Argentine GM Ruben Felgaer (who had previously lost to Karjakin in this line), won prettily with *20...h5 21.Qd1 Qg5 22.a4 Rae8 23.axb5 axb5 24.Ne3 b4 25.Nxd5 Rxd5 26.Qa4 Rde5 27.Qxb4 d5 28.Rad1 Rf5* (an advantage of ...h5 over ...f5 is this possibility of frontal pressure on the f2 weak spot) *29.Re2 h4 30.Qa4 Re6 31.c4 e3 32.Rxd5 exf2+ 33.Rxf2 Bd4 34.Rxd4 Rxf2 35.Qa8+ Kg7 36.Qd8 Ref6* 0-1, D.Valerga-R.Felgaer, Buenos Aires 2006 – as thematic a Sveshnikov game as you could wish to see. *)*;

**C)** 20.-- ]

**18...Ng6**

[A pawn sacrifice introduced and strongly recommended by Krasenkow. An easier approach is 18...Rc8 19.Nc2 Rc5 20.Ne3 f4 when in the third of these freestyle events Zor champ introduced the typical, yet still spectacular exchange sacrifice 21.Ng4 *( 21.Nf5 Nxf5 22.Qxf5 Qf6* is equal *)* 21...Ng6 *( 21...f5 22.Nh6+ Bxh6 23.Qxh6 Ng6* looks more natural to me; this exchange of the g7-bishop for the knight in this line always looks a bit shaky, but the positions seem to work out well enough for Black and it's not easy for the f1-bishop to find a role *)* 22.g3 Ne5 23.Rxe4 fxg3 24.hxg3 Nf3+ 25.Kg2 Rxe4 26.Kxf3 against an opponent styling himself 'Magnato Shredder 10', and went on to win: Re8 27.Bd3 Kf8 28.Bxh7 a5 29.Rd3 Rc7 30.Kg2 Re1 31.Rf3 Qe7 32.Bg6 Qe8 33.Qh4 Rd7 34.Nf6 Bxf6 35.Rxf6 Kg8 36.Qh7+ Kf8 37.Rf4 Rb7 38.Qh6+ Ke7 39.Rxf7+ Qxf7 40.Bxf7 1-0. A game very typical of what happens after White gives up the exchange to get this sort of bind on f5 with opposite-coloured bishops; Black can't find anything to do while White builds up. ]

**19.Qxf5 Re5 20.Qh3**

[ 20.Qg4 has the idea to tempt f5 so as to block the fourth rank, but after 21.Qh3 *( 21.Qe2 Qg5 22.c4 Ree8!* with the idea of ...Ne5 is also very unclear *)* 21...Nf4 22.Qg3 Nh5 23.Qe3 f4 it does start to look very dangerous for White. ]

**20...Nf4 21.Qg3**

[ 21.Qg4 Nxd5 22.f4 Nf6 23.Qe2 had previously been tried, but White seems to have no advantage either after Rf5 *(*or Krasenkow's *23...Rc5 24.Nc2 Qb6* . The text is directed against ...Nxd5. *)*]

**21...Qf6**

[ 21...Nxd5 22.f4 is now good for White, since ...Nf6 gaining a tempo is impossible and so exf3 23.Qxf3 , with an obvious edge for White, is forced. ]

**22.c4**

[ 22.Nc2 Kh8 had previously got nowhere; White must keep hold of d5. ]

**22...b4!?**

[ A novelty; in the game D.Mieles Palau-J.Echevarria, Buenos Aires 2005, Black had gone for it on the kingside with 22...Kh8 23.cxb5 Rg8 , and now Rogozenko showed in 'ChessBase Magazine' that 24.Kh1 Qh6 25.Nc4 Rh5 26.h3 Bd4 27.Qxg8+ Kxg8 28.Rxd4 Nxh3 29.gxh3 Rxh3+ 30.Bxh3 Qxh3+ is a draw, but suggested that White could beat off the attack with 24 Qb3, which I dare say Zor champ was about to demonstrate, but he was beaten to the punch. ]

**23.Nc2 a5 24.Qe3**

[ This would be the point White would look to improve. 24.Nd4 is evidently a critical move and, so far as I can see, Black is struggling to show his compensation; for example, Rae8 25.Nc6 Rg5 26.Qe3 , when White is threatening to consolidate with moves like g3, Kh1 and Bh3, combined with f3 or f4 at some moment. The defensive qualities of his Re1/Bf1 set-up, restraining Black along the e-file, show to good advantage in this line. ]

**24...Nd3!** Excellent. In the ensuing endgame Black's strong bishop enables him to hold the draw comfortably despite the missing pawn. **25.Bxd3 exd3 26.Qxd3 Rxe1+ 27.Rxe1 Qxb2 28.Ne3!?**

[ 28.Qb3 Qxb3 29.axb3 a4 leaves White the one who needs to take care; for example, 30.Re3 axb3 31.Rxb3 Ra2 32.Ne3 Ra1+ 33.Nf1 Bc3 34.g3 Ra3 . ]

**28...Qc3**

[ Solid; although after 28...Qxa2 I don't see myself how White could play for more than a draw following 29.Nf5 a4 without grave risk of losing ( 30.Qg3 Qb2 31.Nh6+ is perpetual). However, the text enables Black to draw fairly comfortably; indeed perhaps it might be said that White is the one who has to hold the draw. ]

**29.Qxc3 Bxc3 30.Rb1 a4 31.Nd1 Bd2 32.Kf1 Re8 33.Ne3 Re4 34.Ke2 Bxe3 35.Kd3 Rd4+ 36.Kxe3 Rxc4 37.Kd3 Rc3+ 38.Kd2 Rc4 39.g3 Kg7 40.Rb2 Kf6 41.Kd3 Rc3+ 42.Kd4 a3 43.Rxb4 Rc2 44.Rb6 Rxf2 45.Rxd6+ Ke7 46.Ra6 Rxa2 47.h3 Ra1 48.Kc5 Rc1+** Points to Remember: 1. Once White has played Re1 he's always going to meet ... e4 with Bf1, so you can afford to delay that move. Doing so enables you to meet an early c3 and Nc2 with ...f4, preventing the knight getting into the game and rendering Re1 a bit of a wasted move, since the e-pawn stays well defended on e5. 2. The thing that Black must not permit in this set-up is a pin on the f-pawn by a bishop from h3. You don't necessarily need to recall exact moves in the main (i.e. 17...Qc8) line, but you do need to remember this principle. 3. The pawn sacrifice in the text is not necessary, although it is fun and puts White under pressure. Instead 17...Re8 and 18...Rc8 is a solid way to play. 4. If White doesn't defend d5 with Rad1, then really Black has to take it and trade f-pawn for d-pawn. In the resulting positions Black has to compensate for his looseness by active play on the kingside. Points to Remember: 1. Once White has played Re1 he's

always going to meet ...e4 with Bf1, so you can afford to delay that move. Doing so enables you to meet an early c3 and Nc2 with ...f4, preventing the knight getting into the game and rendering Re1 a bit of a wasted move, since the e-pawn stays well defended on e5. 2. ■ **Lakdawala,Cyrus**
San Diego (rapid) 2006
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 h6 7.Nd5**
This move raises the ante to the second power. The knight chomps at the bit, leaping into action, interpreting the d6-hole as an evil temptation, soon to pass. --- QUESTION: Why did White refuse to play 7 Nd6+ - ? --- ANSWER: Answer: Confronted with a choice between safe conformity with knight entry to d6, or perilous dissent, White chooses the latter. His move is an attempted refutation of the Ulfie. With 7 Nd5 he forces 7...Nxd5 8 exd5, hitting the c6-knight, and plans to follow with d5-d6, obtaining a deadly bind. --- QUESTION: This looks decisive! How do we respond? --- ANSWER: The Ulfie is a line where the foppish, wig-wearing, snuff-sniffing aristocrat (us!) hides hidden talents and often cuts down the hardened soldier in a duel. We counter-attack with a timely 8...a6, as played in the game. **7...Nxd5**
Not much choice, seeing as White threatened a mega-fork on c7. **8.exd5 a6**
One of those "Now-who-is-laughing-at-whom?" moves. The Ulfie minority speaks a language which is unintelligible to the rest of the chess world. 8...a6 is the only move, yet completely adequate to our needs. Your writer, a natural positional player, experiences feelings in such chaotic positions similar to my dogs Emma and Kahless, when my wife sings "Bath time!" and they dive under sofas and tables, whimpering and desperate for cover. But with the guidance of comps the ensuing complications become a lot less scary. In this line we contrive a face of apprehension, when in reality we are not the least bit intimidated.
[Obviously 8...Ne7?? 9.Nd6# would be a sorry end to the game; ]
[while after 8...Nb8?? 9.d6 Na6 10.Bc4 , Black is grossly undeveloped and caught in a suffocating bind. ]
**9.dxc6?!** The two sides proceed with plans of dissimilar motives, almost as if each ignores the other. From my experience, this is the most common and yet the worst of White's responses.
[Next game we look at White's most dangerous option 9.Nc3 . ]
[The alternative 9.Na3!? aims either to redeploy the knight to c4, or pick up the bishop pair at the cost of structural damage - which is a bit odd since White had the option to play 7 Nd6+ and pick up the bishop pair without damage: Bxa3 10.bxa3 *(*after *10.dxc6? Bc5* , Black already stands significantly better *)*
**A)** 10...Nd4! 11.c3 Nf5 12.Bd3 d6 and Black looks fine, while White may later regret his cavalier treatment of his structure, and I'm not sure his bishop pair make up for it. *( 12...-- )*;
**B)** Instead, Andersson has preferred 10...Ne7!? 11.d6 Nc6 *(*better than *11...Nf5?!* , A.Termeulen-U. Andersson, Leiden 2013, due to *12.Qd5! Qf6 13.Bb2 Qxd6 14.Qxd6 Nxd6 15.Bxe5 Nf5 16.g4 0-0 17.0-0-0 Re8 18.Bc3*

*Ne7 19.Rd6* , when I like White's bishops and dark square control *)* 12.Bc4 *(*here *12.Qd5!? b5 13.Bd3 0-0 14.0-0 Bb7 15.a4 Qb6 16.Be3 Nb4! 17.Qxe5 Nxd3 18.cxd3 Qc6* gives White nothing *)*]

[Instead, after 9.Na3 Bxa3 10.bxa3 Ne7!? 11.d6 Nc6 *( 11...Nf5?! 12.Qd5! Qf6 13.Bb2 Qxd6 14.Qxd6 Nxd6 15.Bxe5 Nf5 16.g4 0-0 17.0-0-0 Re8 18.Bc3 Ne7 19.Rd6 )* 12.Bc4 *(*here *12.Qd5!? b5 13.Bd3 0-0 14.0-0 Qb6 15.Be3 Nb4! 16.Qxe5 Nxd3 17.cxd3 Qc6 )* 12...b5 *( 12...Qa5+!?* looks okay too *)* 13.Bd5 Bb7 14.0-0 0-0 15.Qg4 Na5 16.Bxh6 Qf6 17.Bd2 Bxd5 18.Bxa5 Qe6 19.Qxe6 fxe6 with a roughly level endgame, L.Winants-U.Andersson, Tilburg 1993. ]

**9...axb5 10.cxd7+**

[Several of my online opponents have fallen for 10.Bxb5?? Qa5+ , when White hangs a piece and game over. ]

[ 10.cxb7? is illogical too, since it helps Black's development and hands over a strong centre. After Bxb7 11.Qg4 h5 12.Qe2 Qc7 13.Qxb5 (pawn grabbing while behind in development in an open position is a practice only the Great Romantics approved of), B.Szuk-I.Bilek, Hungarian Team Championship 1995, and now h4 14.h3 Be7 15.c3 0-0 , Black has a close to winning position. ]

**10...Bxd7** Black's period of undeveloped hibernation ends abruptly. --- QUESTION: How do you assess this position? --- ANSWER: So far I'm 6-0 from this here, against an all master field. I don't believe White can equalize, although Komodo misassesses it with a "0.00" evaluation. Black's slight weakness of doubled b-pawns is insignificant when compared with his lead in development, central control and open a-file. **11.Be2**

[Other moves: -- a) 11.Qh5 Qc7 12.c3 *( 12.Bd3?! Bb4+!* is already good for Black, L.Lorenzo de la Riva-La. Karlsson, Sitges 2010 *)* 12...g6 13.Qf3 Bc6 14.Qf6?! (more time wasted) Rg8 15.Qh4 Ra4 16.Qh3 f5 , N.Arutyunov-C. Lakdawala, San Diego (rapid) 2010. One glance and we see that the opening has been a disaster for White, who was unable to survive his development lag. ]

[b) 11.Qd5 (this isn't a real double attack) Qc7! (covering the e-pawn; b5 is defended tactically, due to the ...Qa5+ trick) 12.Bd2 and now:

**A)** 12...Bc5 13.Be2 *(*or similarly *13.Bd3 0-0 14.0-0 Be6* and Black stood pleasantly better, B.Baker-C.Lakdawala, San Diego rapid 2003 *)* 13...0-0 14.0-0 Be6 15.Qf3 Rfd8 16.Rfd1 Bd5 17.Qg3 Ra6! (threatening ...Rg6) 18.Bh5 f5!? *(*I wasn't satisfied with just winning a pawn after *18...Rf6 19.Be3 Bxe3 20.Qxe3 Qxc2 )* 19.Bc3 f4 20.Qg4 b4?! *(*missing *20...Bxf2+!* and wins, since *21.Kxf2?? Qc5+ 22.Kf1 Bc4+* gives Black a decisive attack *)* 21.Be1 e4 22.Kh1 Rf6 23.h4 e3 24.fxe3 Kh7!? 25.exf4? *( 25.e4* was necessary *)* 25...g6! 26.Bg3 Qc6 27.Kh2 gxh5 28.Qxh5 Bf7 0-1 R.Bruno-C.Lakdawala, San Diego 2004.;

**B)** 12...Qc5 (you can also go for a favourable ending with this line) 13.Qxc5 *(*not *13.Qxb7? Bc6 14.b4 Qd5 15.Qb6 Be7 16.Qe3 0-0 17.a3 Bh4!* and Black is too far ahead in development *)* 13...Bxc5 14.Bd3 f5 15.Be3 Bxe3 16.fxe3 (now Black doesn't have to worry about e-file pressure) Ke7 17.Kf2 e4 18.Be2 Rhc8 19.c3 b4! 20.c4 Be6 21.Rhc1 Rc5 22.b3 Rca5 23.Rc2 Ra3

(threatening ...Rxb3) 24.Rb2 Kf6 (with White completely tied down to defence of a2, it's time to improve the king position) 25.Bd1 Ke5 26.Rd2 b6 27.Rb2 g5 28.h3 Rd8 29.Be2 f4 30.Rd1 Rf8 31.Bg4 Rfa8 32.Rdd2? Bxc4! and Black converted, R.Hermansen-C.Lakdawala, Los Angeles (rapid) 2011. ]

[c) 11.Bd3 (White's most popular move) Bc6 12.0-0 *(*if *12.Qe2 Qd5 13.f3 Bc5 14.Be3* , Y.Zherebukh-G.Matjushin, Ukrainian Team Championship 2009, I would play *0-0 15.0-0 b4* and Black is fine *)* 12...Bc5 *( 12...Qd5!? 13.Qg4 h5 14.Qh3 Be7* is okay too, A.Vitolinsh-A.Lutikov, USSR 1970 *)* 13.Qg4 Qf6 14.Bd2 0-0 15.Bc3 , D.Eggleston-J.Kvisla, Gibraltar 2007, when I prefer Black's chances after Ra4! . ]

**11...Bc6** I like my chances in the ending. --- QUESTION: The merely good is the enemy of the perfect. Why would you opt for an ending when you can go for an attack by keeping queens on the board? --- ANSWER: Practicality is the entity which sniffs haughtily when we profess the highest motives (i.e. deliver a brilliant checkmate!). It just wants to get the job done, no matter how messy the process. In this case I go with the fact that I am considerably weaker when attacking than I am in the endgame.

[If you prefer you can play something like 11...Bc5 12.0-0 Qc7 , when Black has a perfectly good position. ]

**12.0-0 Bc5 13.Qxd8+**

[White can easily into trouble if he doesn't swap queens. For example: -- a) 13.Be3 Bxe3 14.fxe3?! *( 14.Qxd8+ Rxd8 15.fxe3* transposes to 14 Be3 in the game *)* 14...Qg5 15.Bf3 Qxe3+ 16.Kh1 0-0 and Black is already winning, M.Fenollar Jorda-M.Paz, Dos Hermanas (online blitz) 2004. ]

[b) 13.c3 0-0 14.Bf3?! e4 15.Be2 Qb6 16.Qc2 e3 17.Bxe3 Bxe3 18.fxe3 Qxe3+ 19.Kh1? Rad8 20.Bf3 Rd2 21.Qf5 Rxb2 and Black wins again, R. Karlsson-M.Paz, Dos Hermanas (online blitz) 2009. ]

**13...Rxd8** Advantage Black: 1. Who owns more space. 2. Who owns the superior pawn majority. 3. Whose king is in the centre, ready for activity in the ending.

**14.Rd1?!** Little strategic issues, when left untended, have a way of aggregating into larger problems. Swapping rooks as well wastes time.

[Maybe White should try 14.Be3 Bxe3 15.fxe3 Ke7! *( 15...Rd2* is met by *16.Rf2! )* 16.Rf2 , which keeps Black's advantage to a minimal. ]

**14...Rxd1+ 15.Bxd1 Ke7 16.Bd2 f5** Black begins to push his majority. **17.Be2 Ra8!** It becomes clear that Black's doubled b-pawns are more of a strength than a weakness, since White is tied down to defence of his a-pawn on the open a-file.

**18.a3?** The pressure roils over, as White mistakenly makes a bid to release some of it.

[He had to try 18.c3 g5 and just hope he hangs on. ]

**18...b4** Exploiting the pin. **19.Kf1!?** Strategic poverty, by way of compensation, breeds resentment in a proud spirit. White decides that the fallow period has gone on long enough, so he undertakes drastic action to remedy his previous inactivity. The drawback is that he hands over a pawn while failing to generate any threats, forgetting that fantasies tend to fail when there is too little of actual reality to feed on.

[ Unpleasant as it looks, going completely passive with 19.Be3 Bd6 20.Bc1 may be White's lesser evil. ]

**19...bxa3 20.b4?!** This move makes matters worse, as White dies a death of a thousand cuts. He hopes to win back his sacrificed a-pawn later, but misjudges the difficulty of the task.

[ White is better off just resigning himself to a pawn down position after 20.bxa3 Rxa3 21.Rxa3 Bxa3 . ]

**20...Bd6 21.Bc4**

[ Both 21.c4 b6 22.Bc3 g5 ]

[ and 21.b5 Bd5 22.c4 Be6 23.Ke1 e4 24.g3 g5 are equally hopeless for White. ]

**21...b5 22.Ba2 Bd7!** Intending ...Be6, removing the a2-blockader and White's best piece. **23.c3**

[ Or 23.c4 bxc4 24.Bxc4 Be6 25.Ba2 Bxa2 26.Rxa2 Ke6 27.Ke2 e4 28.Bc3 g5 and so on. ]

**23...Be6 24.Ke2 Bxa2 25.Rxa2** When we land in such a miserable state, we feel an overpowering sense of oppression. White's position is the terminal patient, watching his life ebb away a little bit each day. --- EXERCISE (planning): The path to victory is shorter than it appears. Come up with a clear plan for Black to improve his position to the level of winning. --- ANSWER: Principle: "Use your king in the ending".

**25...Ke6** Black's king has a clear path into c4. **26.Kd3 Kd5**

[ I didn't want to get greedy with 26...e4+ 27.Kc2 Bxh2 - even if (unlike the first game of the Spassky-Fischer match) this h2-grab is sound and the bishop can't be trapped (e.g. 28.g3 g5 29.Kb3 f4 30.Be1 e3 ). ]

**27.h3 e4+ 28.Kc2 Kc4** "The reason you hate me is that I am the fruition of all you should have been, but fell short," explains Black's king to his brother. **29.h4 h5 30.Be3**

[ Or 30.g3 Be5 31.Be1 f4 32.gxf4 Bf6 and wins. ]

**30...Be5 31.Bd2 f4 32.Be1 e3** . Zugzwang. Nobody is comfortable when faced with an ultimatum. --- SUMMARY: I don't think White can even equalize after 9 dxc6?!, yet this inferior line is very commonly played.

**0-1**

French League 2005
*[Adam Hunt,MH]*

Witness the following fascinating game, full of imbalances aplenty B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Bg5 12.Nc2 0-0 13.Be2** EXERCISE: By evaluating the relative merits of the minor pieces here try to come up with a good strategy for Black. --- ANSWER: EXERCISE: By evaluating the relative merits of the minor pieces here try to come up with a good strategy for Black. ANSWER: **13...Ne7!** Very sensibly Black seeks to try and undermine the superior white knight on d5. One of Black's main advantages in this position is the bishop-pair, so he tries to maintain that advantage by using his knight for the exchange. **14.Ncb4** White of course is in no mood to 'repair' the hole on d5 by capturing back with his pawn or queen. **14...a5 15.Nxe7+ Qxe7 16.Nd5 Qb7** The position is equal. **17.Qd3** The white queen eyes up the b5-pawn. **17...b4** 0.19/22

[ ⌓17...Be6 -0.17/18 ]

[ 17...Rb8 18.0-0 Be6 19.Rfd1 Rfc8 20.a3 h6 21.g3 Bd8 22.h4 Rc5 23.b4 Rc6 24.Rac1↑ Kh8 25.Kg2 Kg8 26.Bf3 Qc8 27.bxa5 Bxd5 28.Qxd5 Bxa5 29.Bh5 Rb7 30.c4 Rbc7 31.Qxb5 Bb6 32.Qd5 Almasi,Z (2631)-Nielsen,P (2626) Bundesliga 0304 2003 (10.1) 0-1 ]

**18.cxb4N**

[ 18.c4 -0.34/25 18.cxb4 0.12 would appear to make sense, keeping an iron grip on the d5-square, but there are no real targets in the black position: Be6 19.Rd1 a4 20.0-0 Ra5! is a typical Sicilian motif and would be a creative way of trying to

fix a pawn at d5. Black is better here as his bishop exerts more influence over the game than its counterpart by controlling the c1-square. With all the heavy pieces on the board Black has every chance of converting his advantage. ]

[ 18.h4 Bd8 19.g3 Be6 20.Rd1 bxc3 21.bxc3 Bb6 22.Nxb6 Qxb6 23.Qxd6 Qxd6 24.Rxd6 Bxa2 25.Kd2 Rfb8 26.Ra1 Rb2+ 27.Ke3 Rc8 28.c4 Kf8 29.Rd2 Rxd2 30.Kxd2 Bxc4 31.Rxa5 Bxe2 32.Kxe2 Rc2+ M.Sanjuan Garcia (2609)-7.Bb3 Nbd7 8.Bg5 Qa5 (2500) 70th ch-ITA S/F 2010 1/2-1/2 ]

**18...axb4 19.Qg3 h6 20.0-0** QUESTION: What should Black's strategy be here? --- ANSWER: QUESTION: What should Black's strategy be here? ANSWER: **20...Kh8** To undermine the d5-knight. In order to do that Black must play for ...f7-f5, so he sensibly moves his king off the weak a2-g8 diagonal.

[ The premature 20...f5 allows White into the black camp after 21.h4! Bd8 22.Qg6 with unpleasant pressure. ]

**21.Qb3** Hitting the weak pawn on b4. **21...Rb8**

[ The immediate 21...f5 is also quite possible: 22.exf5 Bxf5 23.Nxb4 Be4 24.f3 Bh7 gives Black good compensation for the sacrificed pawn due to his central pawn mass and White's weak dark squares. ]

**22.Rad1 f5** The pawn break finally arrives. **23.Bf3 Qa7** Removing the queen from the long diagonal. **24.Nxb4?!**

[ 24.exf5 Bxf5 25.Nxb4 was safer, but the dynamism of the black position would still be evident after e4 26.Be2 e3! Threatens to win with ...exf2+. 27.f3 Qb6 , with a real thorn in the side on e3. ]

**24...fxe4 25.Bxe4** -0.76/20

[ 25.Nc6!= -0.22/15 remains equal. Rxb3 26.Nxa7 Rxb2 27.Nxc8 Rxc8 *( 27...exf3 28.Nxd6 fxg2 29.Kxg2∓ )* 28.Bxe4 ]

**25...Bg4!∓** The bishops' collective power is evident. **26.a3** White is forced to sacrifice the exchange, **26...Bxd1 27.Qxd1** QUESTION: How should Black defend the d6-pawn? --- ANSWER: QUESTION: How should Black defend the d6-pawn? ANSWER:. White is weak on the dark squares **27...Rbc8** He shouldn't! Hopefully by now we are thinking first and foremost about active, aggressive moves. Tying down a piece to defence of the backward pawn makes little sense. Inhibits Nc6. Black is more active. **28.g3** -1.36/24 Dodges Rf4

[ 28.Qxd6? -#4/16 28.Nc6 -1.13 Qxf2+ 29.Rxf2 Rc1+ 30.Rf1 Rcxf1# is the tactical justification. ]

[ 28.Qxd6 gets mated. Qxf2+!! 29.Rxf2 Rc1+ ]

[ ⌓28.Nc6 -0.93/23 Qb7 29.Qc2 ]

**28...Rc1 29.Qe2 Rxf1+** -0.25/19 there was a tactical shot here that black must have rejected. What was it?

[ 29...Rxf2! 30.Qxf2 Be3 looks very tempting, but after 31.Kg2 Bxf2 32.Rxc1 White has very good control of the light squares and it is the black king that must be a little careful. ]

[ 29...Rxf2!∓ -1.26/23 30.Qxf2 Be3 Pin ]

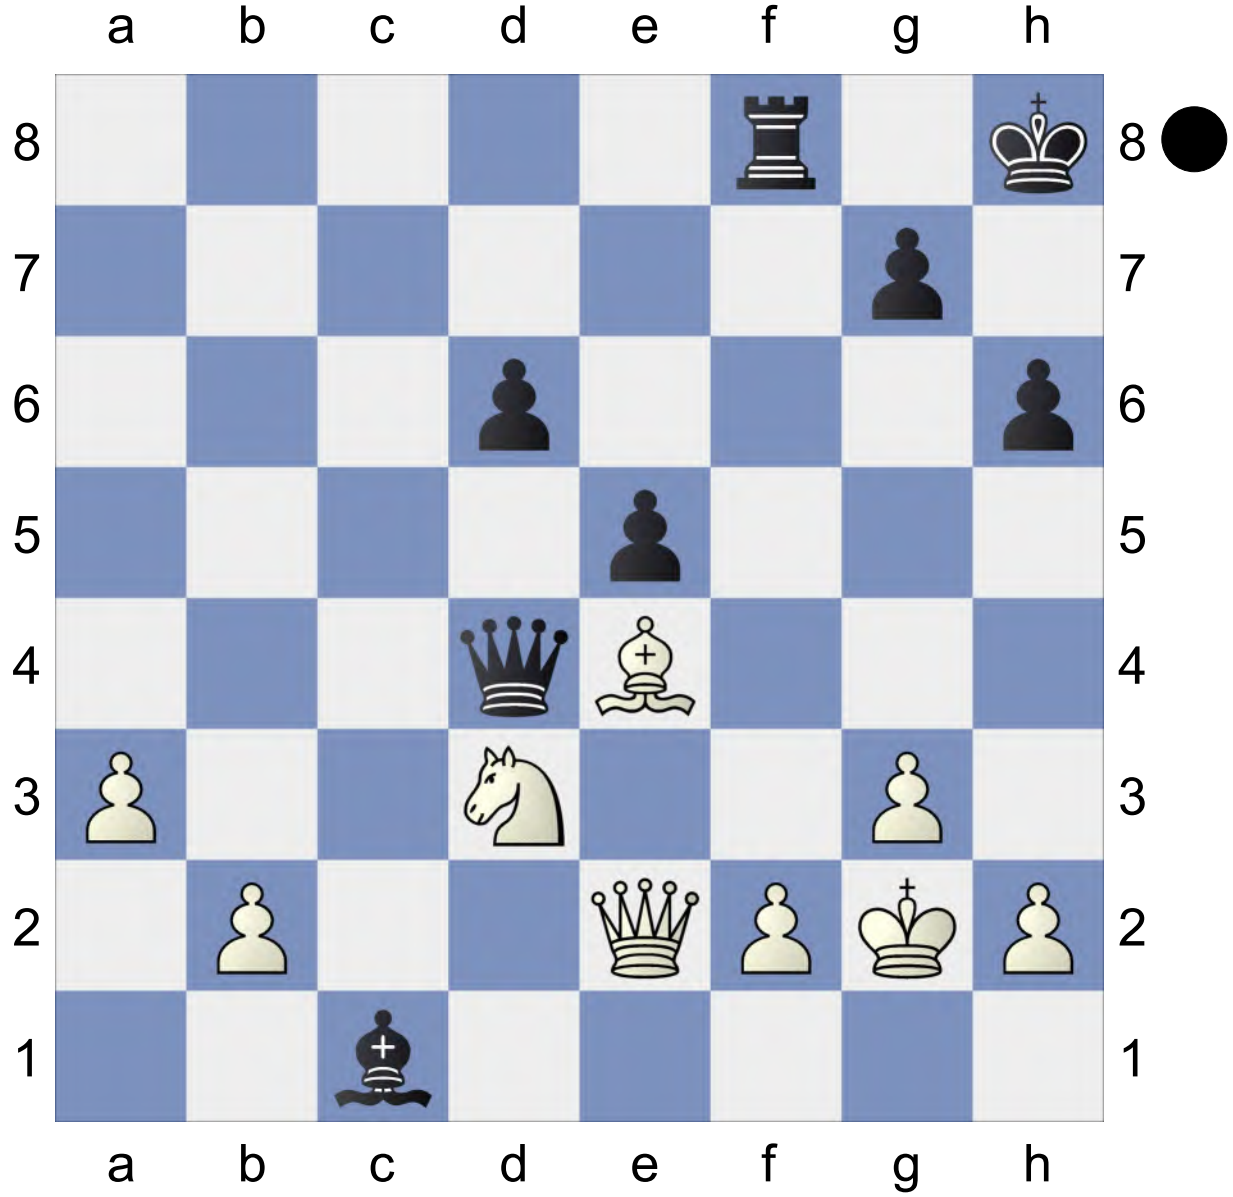
**30.Kxf1= Qd4** And now ...Be3 would win.

[ 30...Be3 again looks good and to be honest I'm not so sure why Shirov didn't go for this - it seems to force a weakening of the dark squares, such as after again looks good and to be honest I'm not so sure why Shirov didn't go for this – it seems to force a weakening of the dark squares, such as after 31.f3! Qd4 . ]

**31.Kg2** -0.40/22

[ 31.Nd5= 0.00/24 ]

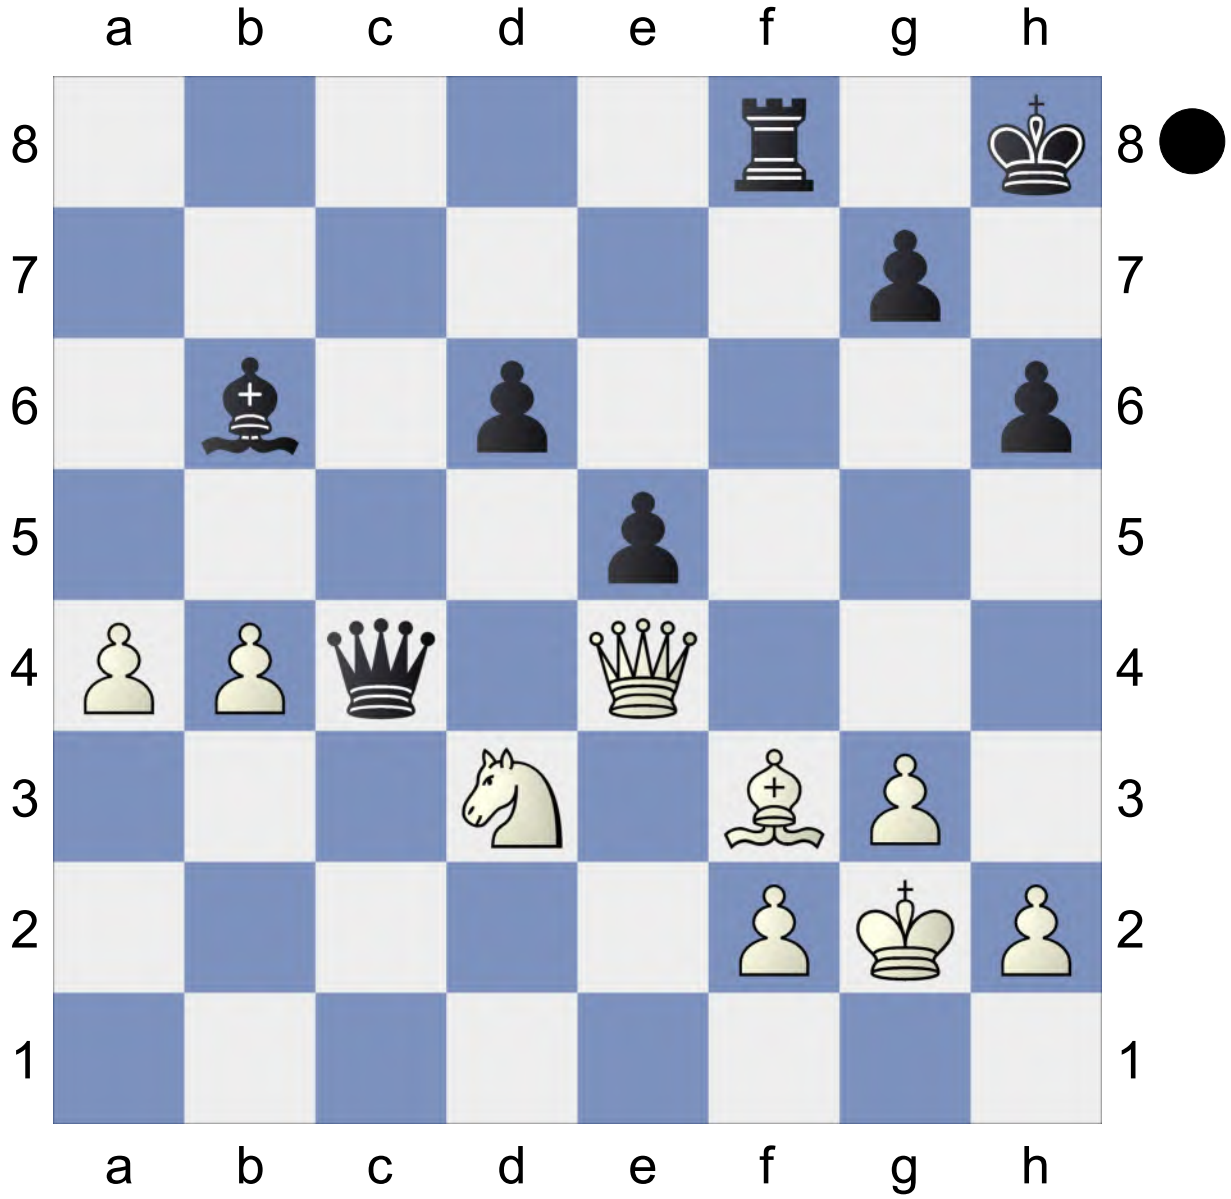
**31...Bc1 32.Nd3**



EXERCISE: Try to put yourself in the black bishop's shoes. Which diagonal would you ideally like to be on and how do you get there? --- ANSWER: EXERCISE: Try to put yourself in the black bishop's shoes. Which diagonal would you ideally like to be on and how do you get there? ANSWER: **32...Bd2** Heading for the b6-f2 diagonal! Deflection **33.Bf3**

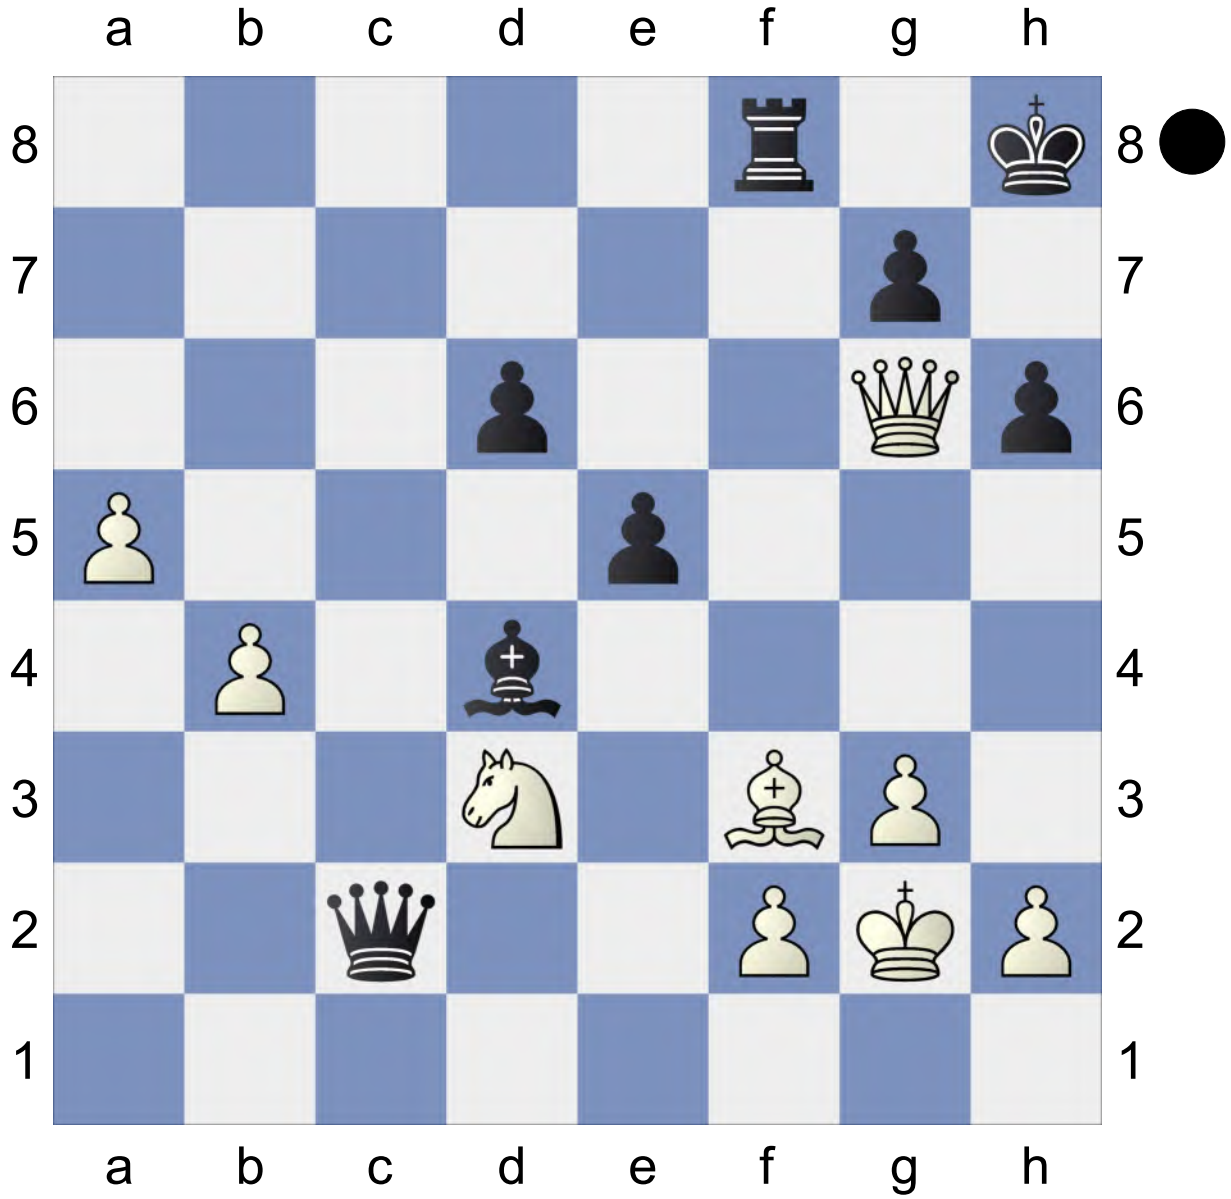
[ 33.Bb7 Rb8 ]

**33...Ba5**
[ 33...g5!? ]
**34.b4 Bb6** With the idea ...Qc4.
[ 34...Bc7 simplifies 35.Qe4 Qxe4 36.Bxe4 Bb6 ]
**35.a4! Qc4**↑ next ...d5 is good for Black. Black is pushing. **36.Qe4** -1.89/23
[ 36.a5= -0.08/22 and White has nothing to worry. Bd4 37.Nf4 Qxe2 38.Nxe2 ]



**36...Qc2?** 0.04/29
[Better is 36...Bd4!-+ -1.89/23 ...d5! is the strong threat. 37.Qe2 d5 ]
**37.a5 Bd4** Strongly threatening ...d5! Chess con chili. **38.Qg6?** -4.01/27
[I don't see anything wrong with 38.a6! Qa2 39.b5 as White can elegantly give up a piece: Qb1 40.Qd5! Qxd3 41.a7! Qa3! 42.a8Q Rxa8 43.Qxa8+ Qxa8 44.Bxa8 with a likely draw. ]

[ 38.a6!= 0.04/23 and White stays safe. ]



White fatally allows the central pawns to advance, possibly as a result of time pressure. **38...d5!-+ 39.Bxd5** Be4 would now be deadly. Black is clearly winning.

[ 39.Bh5 e4 ]

**39...Rxf2+** Pin

[ 39...Bxf2? is the wrong capture. 40.Nxe5 Qd2 41.Nf7+ Kg8 42.Nxh6+ Discovered Attack (Double Check) Kh8 43.Nf7+ Kg8 44.Qf5 Be3+ 45.Kh3+- ]

**40.Kh3 Rxh2+ 41.Kg4** Threatening mate with Qe8+. **41...h5+** . Summary: It was interesting to note the way that Shirov played around the strong knight on d5, undermining it in order to preserve his bishop-pair. Try to force yourself to constantly reassess the situation on the board and ask yourself questions about the activity of your pieces. Make them happier and your games will improve! Weighted Error

□ **Tran,Thanh Tu**
■ **Tu,Hoang Thai**
Vietnamese Championship, (Game 10) 2005
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 9.Nc4 Rc8 10.Nd5 Bxd5 11.Bxf6 gxf6 12.Qxd5 Nb4 13.Qd2 d5 14.exd5 Qxd5 15.Qxd5 Nxd5 16.0-0-0 Rd8**

[The alternative is 16...Nb4 17.c3 Nc6 . White then plays a knight to d6 and has bishop against knight, with or without rooks, and the chance later to cripple Black's majority with g4. White has done well in such endgames. The idea of the text is at least for the moment to keep the opposite-coloured bishops, and also by the exchange of one pair of rooks to increase the influence of Black's centralized king and decrease the chance of it being irritated by checks and mate threats. ]

**17.Be2 b5** This is the corollary of keeping the knight where it is; White cannot exchange knights with Ne3 without allowing equality, so he has to go to a5. **18.Na5 Nc7 19.c3**

[White has a number of alternatives which ought to maintain a definite advantage for him, of which this is one. 19.Rxd8+ Kxd8 20.Rd1+ is not as effective as it looks since Black can station his king near his queenside weaknesses, which is helpful, with Kc8 , when 21.Bh5 doesn't achieve anything decisive because of Bc5 followed by ...Rf8. ]

[The one I like the best, though, is 19.Nb7 Rxd1+ 20.Rxd1 , especially since f5 21.Nd8! *( 21.Nd6+ Bxd6 22.Rxd6 Rg8 23.g3 Rg6* is nowhere near so effective *)* seems to be very good for White: 21...Rg8 22.Nc6 Be7 23.g3 Bf6 *(* after *23...e4 24.Bh5* is very strong in view of *Rg5 25.Bxf7+ Kxf7 26.Rd7 )* 24.Rd6 Be7 25.Nxe7 Kxe7 26.Rc6 with an ideal version of the typical endgame for White, in which Black will be very hard pressed to defend, if he can do it at all. ]

**19...Ne6 20.Bf3 Bc5 21.Bc6+**

[White is beginning to wander off track. It was better to continue the attack on the black queenside with 21.Bb7 Rg8 22.g3 Bb6 23.Nc6 Rxd1+ 24.Rxd1 Nc5 25.Bc8 (the minor pieces exert great strength in this set-up), when Black's most natural attempt, Kf8 , seems to fail to 26.b4 Ne4 27.Bxa6 Nxc3 28.Rd3 Ne2+ 29.Kd2 Nd4 30.Nxd4 Bxd4 31.Bxb5 Bxf2 32.Rd8+ Kg7 33.Rxg8+ Kxg8 34.Bd3 with a bishop ending which I think White wins. ]

**21...Kf8**

[Possibly White expected 21...Ke7 , although even then he cannot directly win the a-pawn in view of 22.Bb7 Rd6 23.Rxd6 Kxd6 24.Bxa6?? Ra8 25.Nb7+ Kc6 . ]

**22.Bd7 Bxf2 23.Nc6 Ra8 24.Bxe6?**

[Going totally off track. White's position is not what it was, but still after 24.Rhf1 Be3+ 25.Kc2 Kg7 26.Ne7 he had reasonable compensation for the missing pawn. ]

**24...fxe6 25.Rd7 Rg8 26.g3**
[ White must have missed something very simple around here – possibly even as simple as 26.Rf1 Rxg2 . ]
**26...Rg7**
[ Even 26...Rc8 was good, since the apparently devastating 27.Nd8 Ke8 28.Rhd1 fails to Bd4 . ]
**27.Rhd1 Rc8?** But this is a mistake. Black should trade rooks first. **28.Rxg7?**
[ An illogical move, trading an active for a passive unit. 28.R7d6 kept equality for White, since Bc5 is met by 29.Nd8 Bxd6 30.Nxe6+ Kf7 31.Nxg7 . ]
**28...Kxg7 29.Rd7+ Kh6 30.Nd8 Kg6**
[ A very good move. It was tempting to go for the win of material with 30...b4 31.Kd2 bxc3+ 32.bxc3 Rc4 followed by ...Ra4, but White has resources. After 33.Nxe6 Ra4 34.Nf8 Rxa2+ 35.Kd3 f5 36.Rxh7+ Kg5 37.Kc4 it is not certain at all that Black can win: in fact I think probably he can't, whereas in the game Black's attack on the kingside, aided by the active king, swiftly becomes irresistible. ]
**31.Nxe6 Kf5 32.Nc7 h5 33.Kd2?**
[ A waste of time. White might as well have taken the material: 33.Nxa6 Bg1 34.h3 Rg8 35.Rh7 Rxg3 36.Rxh5+ Ke4 is certainly frightening, but White keeps chances to resist with 37.Rh4+ Ke3 38.Rh5! . ]
**33...Bg1 34.h3 Rg8 35.Rh7 Rxg3 36.Rxh5+ Ke4 37.Rh4+ Kf3 38.Rg4??**
Collapsing totally. **38...Rxg4 39.hxg4 e4** Points to Remember: None again really. Unless Black can improve after 11 Bxf6 on move 12 or 14 then, if he wants to play this variation, he has to be resigned to the rather cheerless ending in this game. As we saw, it took several terrible mistakes before White lost, and at the beginning of the ending he had good chances. 8...b5 is the main line for good reasons. Points to Remember: None again really. *[Neil McDonald]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3!?** QUESTION: What is the purpose of this move? ANSWER: If you have read the introduction to the chapter you'll be aware that I don't like 8 c3 as it feels like an

unnecessary weakening of the centre. With the game move White is waiting for Black to clarify the centre pawn structure with either ...d5-d4 or ...dxe4 (when White recaptures d3xe4). In either case it likely to be useful to be able to play Nc4 without the knight being in danger of being pushed back by ...b7-b5. **8...b5** A natural reply that centralizes the rook, overprotects e5 and refuses to declare his intentions in the centre. QUESTION: Can't Black take advantage of White's slow wing pawn moves with action in the centre: for example, 8...Qc7 when 9 h3 dxe4 10 dxe4 Rd8 looks very active for him? **9.Nd5** EXERCISE: What are the good points of this move? **9...Be7 10.Bxf6** If Black chooses 10...d4, White would rather have the rook on f1 than e1. But never mind: there is no rule in chess that says the rook can't retrace its steps with Rf1 again in the future. **10...Bxf6** At last Black chooses to play with a fixed pawn centre and an open d-file. **11.c3** QUESTION: So why is Re1 more useful than Kh2 in this pawn centre? ANSWER: The rook move has vacated the f1-square for the bishop and added a defender to e4 which facilitates a future Nc4. **11...0-0** It's easy to be critical of this lunge with the knight. But let's not forget it was made by someone rated 2324 Elo who must have played a lot of good moves in his life. The idea is that 12 c3? allows 12...Nd3 when no one will be laughing at the knight anymore. Meanwhile White is prevented from playing 12 Qe2 as a prelude to Nc4, as 12...Nxc2 wins a pawn. There is another clever point to the knight foray revealed in the note to the next move. Nonetheless, the knight move fails because White doesn't have to hurry. Black has no strong follow-up, and sooner or later the knight will have to return to defensive duties on c6. We can therefore add this game to the other examples of Black losing his patience against the KIA and starting an aggressive action that isn't justified by the position. **12.Nc2!** By putting his bishop on f1 Bogdan guards against ...c5-c4, which means he can develop his queenside after all. QUESTION: What happens if White plays 12 b3, planning to develop his bishop to b2 and attack e5? **12...Nb8** It's not good for Black's pride,

[ 12...Bb7 13.a4 bxa4 (when your opponent is planning to ram your kingside with f2-f4, it is provocative to say the least to put a pawn on g6 and a bishop on e6 which can be rammed by f4-f5) 14.Rxa4 Nb8 15.Bc4 Nd7 16.0-0 White's attack eventually broke through. As we shall see, in this structure Bogdan's 10 Re1 move is more useful. I don't recommend 10 Kh2, however, as Black can respond with Nc5 17.Ra2 as he does in the main game ANSWER: White's pieces are working in a cramped environment. For example, if Nxe4?! Black could force the queen back to d1 if he wished with 18.Qf3 . So any move that holds the black pieces a little further at bay is welcome. Playing h2-h3 rules out ...Bg4, which can be an irritating pin on the knight, and guards against a future ...Ng4. This knight move would be especially strong if, in the pawn centre that arises after ...d5-d4, White has played f2-f4 so that ... Ne3 becomes a threat. Finally, 9 h3 might support a follow-up pawn advance to f2-f4 with g3-g4. Yes, I agree a quick ...d5xe4 and ... Rd8 for Black is awkward for White if he persists in playing slowly after Nd2 . Therefore I think White should concede the centre with 19.Nxf6+ Qxf6 20.Qxb7 . Compared to the line discussed in the chapter introduction, Black doesn't have a

regrouping with ...Nc7 available to him as his queen blocks the square. Furthermore, the queen's absence from d8 means White's pawn on d3 is safer than usual, whereas the knight on d5 is exposed to a discovered attack by the bishop on g2 with 11 Nfxe5. Play could continue Nxc4 21.b3 Nd2 22.Rd1 Rab8 23.Qd5 (unleashing the bishop and preparing Ne4 in some lines) Nxb3 (an indication of lost time) 24.Rxa6 when White has pressure on the queenside. ] [ the game F.Nijboer-L.Oll, New York 1995, went 12...Rb8 and now 13.Be2 Bg5 14.0-0 looks pleasant for White Another way of waiting is with a5 when after 15.Qd3 Ne7 White's play is justified if Black plays 16.Nce3 , as then Be6 can follow. but 17.Rfd1! cuts across his plan: the knight looks lousy on h2 in the fixed centre position after Nxd5 Black diverges from the 18.Nxd5 advance of the previous game. The move order in the actual game was Qd7 19.Qg3 Bd8 20.b3 Kh8 21.c4 bxc4 22.Bxc4 g6 23.f4 exf4 24.Qxf4 f5 . ]

**13.a4 bxa4!** Finally, Black admits his mistake. In reality not that much damage has been done and the position remains fairly balanced. Nevertheless, Bogdan certainly has the psychological ascendency after his opponent's failed adventure on the queenside, and a player's mood plays a major part in the outcome of a game.

**14.Rxa4 Nd7 15.f3** White completes his development and puts pressure on the e5-pawn.

[ 15.Ncb4 , etc. or Nc5 16.Nxf6+ *(*or *16.Nc6* . while *Qe8 17.Nxf6+* followed by ... Be6 leaves White with a fractured queenside and a sickly pawn on c4 Black might have preferred *gxf6* (stopping Ng5 from attacking a bishop on e6) intending a solid centralization with ...Be6, ...Qc7, and ...Rad8. White could continue with a similar build-up as in the game, but proving an advantage would be much harder. After *18.Bb5* White could even consider *axb5* straightaway, but *19.Rxa8* looks the best way to start his plan of getting in f2-f4. Here, for example, is J.Hernando Pertierra-H.Castano Vanegas, Madrid 2010: *Qxc6?! 20.Qd5 Nd3+ 21.Kf1 Qxd5 22.exd5* and with Black having closed the centre, *Nxb2!* was played to support a future f2-f4. After *)* Stronger was 16...Qxf6 with the threat of 17.Nd5 Qg5! 18.Rc4 Be6 19.b4 Nd7 , with mate to follow on g8 or g7 as Black chooses. Black should have stood his ground with 20.Rc6! when White would probably have had to settle for f4-f5 at some point with a space advantage to add to his fantastic knight, but the game would still be a fight. He might try Qh4 . When boxed in every pawn exchanges normally helps. but his best move is probably 21.Bd3 . ANSWER: The move a5?! would allow Black to justify his knight move with 22.Rxd6! . Then axb4 , allows 23.cxb4 Ra2 24.0-0 ]

**15...Nb6 16.Nxf6+** Defending the d4-square against an invasion by a black knight and clearing c2 for the queen. **16...gxf6 17.Ra1 f5**

[ Now the white central pawns are crushing, as 17...d5 18.Nb4 loses the knight to dxe4 . The only fighting chance was to give up the exchange for a pawn with 19.fxe4 Qxd1+ 20.Rxd1 Bb7 21.Rd6 . A despairing bid for counterplay that could have been refuted by Na4 22.Nd5 Bxd5 23.exd5 Rfd8 24.Rxf6 Rxd5 ]

**18.exf5 d5 19.Bd3 e4** QUESTION: Does the pawn structure favour White?

ANSWER: The pawn structure in the centre is almost symmetrical, but not quite. Black has a pawn on c5 and White a pawn on c3. This means that the white knight has a potential outpost square on d5 as it can't be kicked away by a pawn, whereas the black knight is denied entry to d4. White's plan is to eventually manoeuvre his horse to d5, but first of all he consolidates his hold on the e4 point. **20.fxe4 Qh4+ 21.g3 Qh3 22.Bf1 Qh6 23.Bg2 dxe4**

[ 23...Re8 24.Qg4+ Kh8 The pawns run riot after 25.0-0 Bb7 26.exd5 Nxd5 27.Qd4+ . ]

**24.Qg4+ Kh8** It seems that Black is OK because 25 Ne3 can always be met by 25... Qb7, attacking e4 and guarding the d5-square three times, but Bogdan sees how to get his knight to d5. **25.0-0 Rb8**

[ 25...Bb7 26.Bxe4 Rg8 27.Qf4 ]

**26.Qxe4 Bd7** EXERCISE: Can you see the two pawn moves White needs to make to get his knight to d5? ANSWER: **27.Rxa6!** This might appear a concession, but there's no way Black can hurt White on the dark squares on the kingside.

[ 27.Rxa6 Qf6 28.Qd4 Qxd4+! And now comes a strategically strong pawn move on the queenside. Once again White's dark squares are loosened, but Black is unable to exploit them. If his knight could get to d4, of course the situation would completely change and 29 c4 would get a question mark. 29.Nxd4 Na4 At last White achieves his aim. His knight now dominates the centre. 30.Ra7 Rfd8 Trying to press home his advantage quickly, as he doesn't want Black to find a way to put his own knight on d4. 31.Bc6? EXERCISE: Why is this a terrible mistake? And what should Black have done instead? ANSWER: Maintaining the bulwark on e5 in this set-up is as vital for Black as it is for White in the KIA not to have his e4 strongpoint overrun. White now has mobile centre pawns, a bishop on b2 that is staring menacingly at g7, and an open g-file for his queen and rook. Nc5 32.b4 Rbc8 33.bxc5 Bxc6 34.Rb1 Rd5 35.Rxf7 Rxc5 36.Nxc6 R5xc6 37.Rbb7 ]

Norwegian Ch., Sandnes (Game 34) 2005
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.c3 f5 12.exf5 Bxf5 13.Nc2 0-0 14.Nce3 Be6 15.Bd3 f5 16.0-0** This position is the starting point for one of the main theoretical disputes in the Sveshnikov at the moment. White's line was the one recommended by Jacob Aagaard in Quality Chess' impressive 'Experts Versus the Sicilian', and a number of top-class games have been played from this position lately.
**16...Ra7**

[WARNING: The first thing to note is that Black should not continue naturally with 16...Ne7?? , as a bunch of players from Pentala Harikrishna downwards have done, because White has the unkind 17.Nxe7+ Qxe7 18.Bxf5! , and in view of Bxf5 19.Nxf5 Rxf5! 20.Qd5+ , the vital f-pawn disappears and with it all hope of challenging White's grip on the central light squares. Instead Kramnik's move is the most usual choice of strong players. Apart from preparing ...Ne7, the rook also has scope from a7 to join a kingside attack from either f7 or g7. Black does have plenty of other moves, however: , the vital f-pawn disappears and with it all hope of challenging White's grip on the central light squares. Instead Kramnik's move is the most usual choice of strong players. Apart from preparing ...Ne7, the rook also has scope from a7 to join a kingside attack from either f7 or g7. Black does have plenty of other moves, however: ]

[a) 16...f4? looks at first glance as though it wins a piece but is in fact a mistake. It is refuted by 17.Qh5 Rf7 18.Bxh7+ Kf8 19.Bg6! Raa7 *( 19...fxe3 20.Bxf7 Bxf7 21.fxe3* opens the f-file with crushing effect *)* 20.Bf5 Qe8 21.Bxe6 Qxe6 22.Qg4 and now White has an extra tempo in any case over the drawing line in Game 32, and moreover we see why he lured the rook to a7, since Qh6? now fails to 23.Qc8+ (this tactical variation, which is the fundamental point behind 16 0-0, was first shown by Vlastimil Jansa, who discusses this line in his underrated 'Dynamics of Chess Strategy'). Black therefore has to remove the queen somewhere else, and then White continues with 23 Nc2, and has time to cement his grip because ... e4 is impossible with f4 underdefended. ]

[b) 16...Kh8 , another way to prepare ...Ne7 and an invariably useful move, is the main alternative. There are many moves White might play, but a natural continuation is 17.Qh5 e4 18.Bc2 Ne7 (it is usually simpler to play this than to put the knight on e5 since, although it looks nice there to a certain extent, it blocks Black's play; in particular it prevents the set-up with ... Rg8 and ...Be5, and so gives a white knight a nice home on f4) 19.Rad1 Rc8 , both preparing ...Rc5 and also activating the rook in the event of ...b4. Now it seems logical for White to challenge the centre with 20.f3 , but then Black can instantly equalize with Nxd5 21.Nxd5 Bxd5 22.Rxd5 Qb6+ 23.Kh1 Qe3 , when the powerful queen gives him equality at least ( 24.Rxf5?? Qe2 ). ]

[c) 16...e4 is a natural move because, after the reflex 17.Bc2? , f4 now does win a piece since the closing of the b1-h7 diagonal means 18.Qh5 is nothing, and although d5 is defended the e3-knight is rather unexpectedly trapped! ]

[However, 16...e4 17.Nf4 Bf7 18.Bc2 avoids that problem; Black has to address the blockade of his pawns with Be5 when Jansa claims that White is better after 19.g3 *(*instead Rogozenko gives the long and interesting line *19.Nfd5 Qg5 20.f4 exf3 21.Qxf3 Bh5 22.Qf2 f4* (thus far V.Anand-V.Kramnik, Linares 1998, in which 23 h4 was played) *23.Nc7 Rac8 24.Ne6 Qh6 25.Nxf8 fxe3 26.Qf5 Bxh2+ 27.Kh1 Be5 28.Qh3 Rxf8 29.Rxf8+ Kxf8 30.Bd1* with advantage for White and which deserves a lot more comment than I can give it *)* , although other authorities give 19...Bxf4 20.gxf4 Qf6 as equal – Kramnik, for instance, whose

'Informator' note to that effect Jansa rather splendidly dismisses with the remark 'I saw somewhere the variation 19...Bxf4 20 gxf4 Qf6=, but how is Black to continue after Bb3 and Kh1?'. ]

[ d) 16...Rb8 also prepares ...Ne7. NOTE: The choice between ... Ra7 and ...Rb8 is common in the Sveshnikov. The former tends to work less well against a4 and to indicate that Black wants to play on the kingside (thus it is more appropriate in positions like this where Black has the mobile pawn duo and the open g-file than, for example, in the 9 Nd5 lines). The latter tends to discourage a4 and perhaps indicate that Black wants to prepare ...b4. 16... Rb8 hasn't been tried very much, but Rogozenko gives another interesting and untried line: also prepares ...Ne7. NOTE: The choice between ...Ra7 and ...Rb8 is common in the Sveshnikov. The former tends to work less well against a4 and to indicate that Black wants to play on the kingside (thus it is more appropriate in positions like this where Black has the mobile pawn duo and the open g-file than, for example, in the 9 Nd5 lines). The latter tends to discourage a4 and perhaps indicate that Black wants to prepare ... b4. 16...Rb8 hasn't been tried very much, but Rogozenko gives another interesting and untried line: 17.Qh5 Qd7 *( 17...e4 18.Bc2 Ne5* is a sensible alternative, meeting *19.Nf4* with *Qf6* – in a strange way the possibility of ...Nc4 makes sense of ...Rb8 *)* 18.g4 e4 19.Bc2 Rbe8 20.Rad1 , when he thinks that White has promising play. ]

**17.a4**

[ This is always a natural reply to ...Ra7. Instead 17.f4 is very well met by Ne7 ; in the structure after ...e4 White seldom achieves much when Black has the option of creating opposite-coloured bishops with ...Bxd5 and ...b4. ]

[ 17.Qh5 Raf7 doesn't change much if White plays quietly; Black's next move after anything like 18 Rad1 or 18 f4 is 18...Ne7 and he stands fine. For a while White tried the thematic but rather over-brave 18.g4 , but the exchange sacrifice e4 19.Bc2 Ne5 20.Nf4 Bd7 21.Bb3 fxg4 , and especially the slaughter which occurred in a game P.Svidler-G.Kasparov, internet blitz 1998, after 22.Ne6 Bxe6 23.Bxe6 Qf6 24.Bxf7+ Rxf7 , seems to have put him off – the strength of Black's play on the kingside is obvious, although activating the queen's rook with 25.a4 certainly gives White some chances as well. ]

**17...Ne7**

[ The natural continuation, even though it involves a pawn sacrifice. 17...b4 18.cxb4 f4 19.Qh5 Bh8 is an alternative which leads to extremely complicated play. ]

**18.Nxe7+**

[ 18.axb5?! doesn't convince after either Topalov's Nxd5 19.Bc4 *(* or *19.Bxf5 Rxf5 20.Nxf5 Nf4 )* 19...Nf4 20.Bxe6+ Nxe6 21.Qd5 Qe8 22.Rxa6 . ]

[ Meanwhile White has to act at once – after 18.Bc2 Nxd5 19.Nxd5 Black activates the rook with Rb7 and is fine. ]

**18...Rxe7 19.axb5 axb5 20.Bxb5**

[ Accepting the pawn sacrifice is naturally critical. Instead 20.Bxf5?! is another

version of the 16...Ne7 trick: after Bxf5 *(*but *20...Rxf5* avoids this pitfall and just leaves Black better *)* 21.Nxf5 Rxf5 22.Qd5+ and Ra8 White wins, ]

[ 20.Ra6 d5 21.Nc2 has also been tried, bringing the knight to b4, but White can't hope for much like this: Bc8 22.Ra8 Qd7 defends b5 and the further 23.Nb4 e4 24.Be2 d4 demonstrated the downside of putting the knight to b4 in V.Anand-G. Kasparov, Moscow 2004. ]

**20...d5 21.Ra6**

[ 21.Nc2 Rb7 gives Black good compensation after 22.Na3 Qc7 followed by ... Rfb8 – Rogozenko. ]

**21...f4**

[ We are still deep in theory. The alternative (which is quite probably better) is 21...Kh8 when Black is considered to be doing OK after 22.Qa4 f4 23.Nc2 Bc8 (there are many alternatives for both sides) 24.Ra8 Re6 , intending to develop his attack by ...Rh6 and ...Qh4, forcing a weakness by h3 before reverting to the g-file with ...Rg6, as in the impressive game Teichmann-Marotta, correspondence 2003. ]

**22.Rxe6**

[ A safe move; the more critical line is 22.Nc2 Bc8 23.Ra8 Qd6 24.Nb4 Bb7 , when White lost horribly after 25.Ra7 and subsequent blunders in V.Anand-P. Leko, Wijk aan Zee 2005, *(*although *25.Rxf8+* Black still needs to prove he has enough for his pawn. *)*]

**22...Rxe6 23.Qxd5 Qxd5 24.Nxd5 Kh8**

[ Johannessen had previously held this endgame against De Firmian after 24...e4 25.g3 *( 25.Re1* had been Rogozenko's recommendation – this variation with 21 Ra6 was his suggestion *)* 25...f3 26.b4 Kh8 27.Rd1 Bh6 28.c4 e3 29.fxe3 Bxe3+ 30.Nxe3 Rxe3 . Generally speaking Black ought to be able to defend this endgame: a rook on d6 is especially powerful since it prevents the c-pawn getting past c4 unless the knight moves first, while the other rook can make it very difficult for the bishop to get out of the road and let the b-pawn do anything useful. Black also has a number of tactical ideas on the kingside after ...f3, which both sides need to keep a weather eye out for. ]

**25.f3** A natural attempt to blockade Black's central pawns which seems to fail. White could try any number of other moves, but they aren't likely to change the general evaluation that Black can defend as long as he is careful. **25...e4** Essential, of course – Black can't allow himself to be blockaded by a piece on e4. **26.fxe4 Rxe4 27.b4**

[ It seems that White can't find a way to consolidate his knight on d5 and prevent Black from sacrificing the exchange back for a pawn to achieve a draw, either by exchanging the rooks as well, or by getting active, as for example in the sample line 27.b3 Rd8 28.c4 Bd4+ 29.Kh1 Be5 30.h3 Kg7 31.Rd1 h6 32.b4 Bc3 33.Rd3 Re1+ 34.Kh2 Be5 35.Rf3 Rxd5 36.cxd5 Rb1 , when White's chances of winning this ending, even with his extra pawn, are negligible. ]

**27...Rd8 28.Bd3 Re3!** Another typical exchange offer secures the draw. **29.Nxe3**

**fxe3 30.Be2 Bxc3 31.Rb1 Rd2 32.Kf1 Bd4 33.b5 Bb6 34.Rc1 Rd6 35.Rc6** Agreeing to the draw, but White's chances were very slight anyway. **35...Rxc6 36.bxc6 Kg7 37.Bf3 Kf6 38.Ke2 Ke5 39.Kd3 Kd6 40.g3 h6 41.g4 Ke5 42.h4 Kd6 43.h5 Bd8 44.Kxe3** Points to Remember: 1. This variation features the most popular opening blunder in the whole Sveshnikov. Watch out all the time in this line for tricks involving taking on f5 followed by Qd5+. 2. In almost every line Black's best plan is to go ...Ne7 and exchange this knight off for the one on d5. Thereafter his plan is generally to play on the kingside in one way or another. 3. The pawn sacrifice in this main line is still being worked out. The line with 21...f4 is a bit arid, but Black has plenty of rich alternatives. Points to Remember: 1. This variation features the most popular opening blunder in the whole Sveshnikov. Watch out all the time in this line for tricks involving taking on f5 followed by Qd5+. 2. Tony Kosten: 'is the other way to defend the b-pawn, as in Konguvel, P-Harikrishna,P/New Delhi IND 2001 in the archives. Rogozenco: '(Kosten, Anthony C) is the other way to defend the b-pawn, as in Konguvel, P-Harikrishna,P/ New Delhi IND 2001 in the archives." ]

**16...Kh8** Just like the games with 16 b3, Black gets his king off g8 to enable ...f7-f5.

**17.Nce3!** This is once again the critical continuation; by delaying castling White maintains the option of pushing the h-pawn.

[ If White castles with 17.0-0 straight away, then Black can safely reply Anand, Viswanathan: 'allows the immediate' straight away, then Black can safely reply Tony Kosten: 'allows the immediate Rogozenco: '(Kosten,Anthony C) allows the immediate" g6 *( 17...f5* see Socko,B-Krasenkow,M. *)* 18.b4!? (creating a passed pawn) *(*instead, *18.Nce3* transposes below*;* while other moves, such as *18.Kh1;* and *18.Qe2* , lead to play similar to earlier games in this chapter *)* 18...axb4 19.cxb4 , as in V.Anand-P.Leko, FIDE World Championship, San Luis 2005. Here f5 was necessary, according to Rogozenko, who assesses 20.exf5 *(*if instead *20.f3* , then *Ne7;* or *20.Qe2 fxe4 21.Qxe4 Bf5 22.Qe1 Be6 )* 20...Bxf5 21.b5 Ne7 22.Ncb4 Qc8 23.Qb3 Nxd5 24.Nxd5 Qc5 as unclear. ]

**17...g6?!** Kasparov also goes for the ...g7-g6/... f7-f5 plan, which to my mind is Black's most dynamic option. Unfortunately, this move order runs into the same problem we saw after 16 b3 Kh8 17 Nce3! g6?!. Anand,Viswanathan: 'Rogozenco,D: 'TonyK: 'The most common move here, Black prepares his kingside counterplay with ...f5.'" Kasparov also goes for the ...g7-g6/...f7-f5 plan, which to my mind is Black's most dynamic option. Unfortunately, this move order runs into the same problem we saw after 16 b3 Kh8 17 Nce3! g6?!. Tony Kosten: 'The most common move here, Black prepares his kingside counterplay with ...f5. Rogozenco: 'Kosten,Anthony C: 'The most common move here, Black prepares his kingside counterplay with ...f5.'"

[ So Black should probably again consider the alternatives: -- a) 17...Bxe3!? is examined in the next game. ]

[ b) 17...Be6 18.0-0 *(*here *18.h4* might be met by *Bh6!?* ; for example, *19.Nf5 Bxf5 20.exf5 Qc8* , threatening both ...Qxf5 and ...Nb4, or if *21.Bd3* then *e4! )* 18...g6 19.Qa4!? Qc8 20.b3 *(*or *20.b4 Bxe3! )* 20...f5 21.exf5 gxf5 22.f4 , P. Charbonneau-Al.Ramirez, USA 2005, and now exf4 23.Nxf4 Bxc4 24.Nxc4 Ne5 is unclear. ]

[ c) 17...Ne7 18.0-0 *(*or *18.Nxe7 Qxe7 19.Nd5 Qd8 20.0-0 f5 21.exf5 Bxf5*

*22.Qe2 Be6 23.Rd1 Rc8 24.Ra3; 18.h4 Bxe3 19.Nxe3 f5 )* 18...Nxd5 19.Nxd5 f5 20.exf5 Bxf5 21.Qe2 Be6 22.Rd1 Rc8 23.Ra3 , V. Tseshkovsky-M.Vukic, Banja Luka 1981, when Black may be slightly worse after Rc5 24.b4 axb4 25.cxb4 Rc6 26.b5 Rc5 , but a draw is still the most likely outcome. ]

instead, **18.0-0** This lets Black off the hook. transposes below

[ It was only a month later that the strength of 18.h4! began to be fully appreciated, when Bxh4 19.g3 Bg5 20.f4 exf4 21.gxf4 Bh4+ 22.Kf1! f5 23.b4 *(* White might also play *23.b3* , transposing to 18 h4! in the previous game *)* 23...fxe4 24.Rah2 g5 25.b5 *(* and later *25.Ke2! Rf7 26.b5* was shown to be even stronger *)* 25...Ne5 26.Qd4 Rb7 27.Rxh4 gxh4 28.Ke2 gave White a dangerous attack in V.Kramnik-L.Van Wely, Monte Carlo (rapid) 2005. ]

**18...f5 19.Qa4** The idea is follow up with Bb5, increasing pressure on the c6-knight which defends a5. Rogozenco,D: '!?' '!?' Anand,Viswanathan: 'Rogozenco,D: '!?' Rogozenco,D: 'TonyK: '!' TonyK: 'This queenside diversion appears to be very rare, but was awarded an exclamation point ten years ago by Nesis,G and Novik,M.' The idea of Sankt Petersburg GM M.Novik. White uses the fact that he hasn't played b2-b3 yet." The idea is follow up with Bb5, increasing pressure on the c6-knight which defends a5. Tony Kosten: '!' □ **Bruno,Ronald**
■ **Lakdawala,Cyrus**
64 Los Angeles 2005
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 Bc5** Ron also lives in San Diego and we had played many times before this game, so I knew he would come heavily theoretically armed against my usual openings. Therefore in this game I tried the 6...Bc5 line. I made a good choice since Ron's eyes widened in shock after my sixth move. **7.Bg5** This is one of White's better lines against 6...Bc5.

[After 7.Nd5?! 0-0 I have caught more than one person in online blitz games with the trap 8.Bg5? *( 8.Nbc3 Nxd5* looks fine for Black, no matter how White recaptures on d5 *)* 8...Bxf2+! , when White has to play 9.Ke2 *(*if *9.Kxf2??* then *Nxe4+* etc *)* 9...Bc5 10.Bxf6 *(*instead, L.Liaskos-N.Galopoulos, Kallithea 2008, continued *10.Qe1?! Be7 11.Nxe7+ Qxe7 12.Qh4 Qc5! 13.Nc3 Ne8!* and White had no compensation whatsoever *)* 10...gxf6 11.Qd2 with some, albeit not enough, compensation for the missing pawn; e.g. Kg7 12.Kd1 a6 13.Nbc3 Rg8 14.Be2 Kh8 . ]

**7...0-0!**

[ 7...h6 8.Be3! would give Black an extra ...h7-h6 on the 7 Be3 of Game 66, but simply castling is better than that. ]

**8.Qf3!** White's most logical move, pressuring f6 and intending Nd5, while preparing to castle queenside.

[ Not 8.Nd5? Bxf2+! , which is just a permutation of the same trap. ]

[ Instead, M.Veljkovic-G.Galiot, Belgrade 2010, saw 8.Qd2 a6 9.Bxf6 Qxf6 10.Nc7 Rb8 11.N7d5 Qd8 12.h4 b5 13.Ne3 Bd4 14.Ncd1?! (this is clunky) *(* White should just go for it with *14.0-0-0 Ne7 15.Bd3 d6* and the comp says even, while I slightly prefer Black's chances *)* 14...Ne7 15.h5 Bb7 16.f3 d5 , when Black already had a strong initiative, development lead, the bishop pair and dark-square control. ]

**8...Be7**

[ 8...a6? is too slow. White ignores it with 9.Nd5! , since axb5 10.Nxf6+ gxf6 11.Bxf6 Qa5+ 12.c3 Rd8 13.Qg3+ Kf8 14.a4 is pretty much just winning, P. Lehtinen-A.Siikaluoma, correspondence 2007. ]

**9.Bxf6** As in regular Sveshnikov lines, White eliminates the defender of d5, at the cost of weakening the dark squares. The comp gives White an edge, while I am comfortable with Black.

[ Instead, 9.0-0-0 may be White's best move, as in G.Halvax-K.Neumeier, Austrian Championship, Pinkafeld 2015, which continued a6 10.Bxf6 Bxf6 11.Nd6 . Here Black should play Be7 (threatening ...Nd4) 12.Nf5 Bc5 13.h4 g6 14.Ne3 d6 15.h5 Qg5 , when Black has a good grip on the dark squares. ]

**9...Bxf6 10.Nd5 Be7** Covering the d6-square.

[ Not 10...Bg5?! 11.h4! and if Black tries to hang on to the dark-squared bishop with Bh6? then 12.Nd6 Nd4 13.Qd1 puts him in deep trouble, since c2-c3 follows and Black experiences serious difficulties in developing the queenside. ]

**11.Nbc7!?** White gets tempted by the allure of the d5-square and begins to fall behind in development.

[ Instead: -- a) 11.c3 d6 12.0-0-0 Be6 13.Kb1 a6 14.Nbc7 Rc8 15.Nxe7+ Qxe7 16.Nd5 Qd8 17.Qe3 Ne7 and Black stood at least equal, V.Ivanov-S. Gromov, correspondence 2013. ]

[ b) 11.Nxe7+! Qxe7 , G.Ruben-M.Ajoy, correspondence 2003, and now 12.0-0-0 may be White's last hope for an edge. I intended d6! as I can't allow his knight to roost there. When in a strategically inferior situation, we have little choice but to ignite a crisis. After 13.Nxd6 Be6 , I hoped my open c-file and attacking chances would compensate for my lost pawn. ]

**11...Rb8 12.Nxe7+ Nxe7!** The prime directive in the Sveshnikov: Black must fight for eventual control over d5. **13.Qc3!?** White dithers when he should be completing development.

[ He is probably still okay in the ending after 13.Nb5! d5! 14.exd5 Qxd5 *( 14...Nxd5 15.0-0-0 Qg5+ 16.Kb1 Nf4 17.Qe3* is also fine for White *)* 15.Qxd5 Nxd5 16.0-0-0 Be6 17.Bc4 Ne3! 18.fxe3 Bxc4 19.Nd6 Be6 20.b3 , as the

entrenched knight on d6 is impressive. Personally, I still slightly prefer Black, but the comp calls the ending even. ]

**13...d5! 14.exd5?!**

[ White had to try 14.Qxe5! Nc6 15.Qg3 dxe4 16.c3 (preventing .. .Nb4) Bg4! 17.Bc4 , when he stands only slightly worse. ]

**14...Nxd5 15.Nxd5 Qxd5** White is now in deep trouble for the following reasons: -- 1. He lags in development, with his king stuck in the middle of the board. -- 2. He can't play Rd1, since this hangs his a2-pawn. -- 3. He can't move his bishop, since this hangs g2. -- 4. He must watch out for a queen check on e4, which either wins the g2- or c2-pawn, or forces his king to move to the open d-file. **16.Qe3**

[ After 16.Qf3 e4 17.Qf4 Be6 18.Be2 Rbc8 19.c3 Rfd8 20.0-0 Qd2 21.Qxe4 Qxb2 22.Rab1 Qxc3 23.Qxb7 Bxa2 24.Ra1 Rc7! Black hangs on to the extra pawn. ]

**16...Bf5 17.c3** This is a forced weakening of d3, which acquires great significance later on. **17...Rbd8 18.Rg1!** Freeing his bishop at the cost of eliminating kingside castling as an option.

[ 18.f3 e4! 19.f4 Bg4 20.h3 Bd1! is also unpleasant. ]

**18...Bg6** Clearing the path for the f-pawn to move forward.

[ 18...Bc2 is perhaps even better. ]

**19.g4!** A strong defensive move, hoping to discourage ...f7-f5, even at the cost of opening the f-file.

[ Whereas after 19.b3 Rd7 20.Be2 Qc6 21.Rd1 Rxd1+ 22.Bxd1 Rd8 (threatening ...Rd3) 23.Be2 Bb1! , White is in deep trouble. ]

**19...f5!?** Opening the f-file has to be beneficial for Black.

[ I also considered probing for weakness along the third rank with the rook lift 19...Rd6 . ]

**20.gxf5 Bxf5?!** This automatic recapture reduces Black's advantage.

[ Instead, 20...Bh5! threatens mate, and after 21.Be2 Bxe2 22.Qxe2 Rxf5 the major piece ending is rough for White, since his king will never feel safe. ]

**21.Be2 Kh8 22.h4 h6 23.h5 Bh7 24.b3** He is sick and tired of his a1-rook babysitting his a-pawn. The trouble is that with every pawn push, White's queenside becomes more vulnerable. **24...b6?!**

[ 24...Qa5! leaves White struggling to unravel. ]

**25.Rd1! Qe6**

[ Now after 25...Qa5 26.Rxd8 Rxd8 27.Qg3 Rd7 28.Kf1 , it isn't so easy for Black to improve his position. ]

**26.Qg3?!**

[ White unravels with 26.Rxd8! Rxd8 27.Rg3 , when it's getting harder and harder for Black to claim more than an edge. ]

**26...Rxd1+ 27.Bxd1 Qf6 28.Be2 Rd8 29.a4?** Lashing out unnecessarily.

[ White gets excellent drawing chances if he gives up his a-pawn with 29.Qe3! Bb1 30.Rg3! *( 30.a4? Bc2 31.c4 e4* leaves White in deep trouble *)* 30...Bxa2 31.Rg6 Qf4 32.Qxf4 exf4 33.Bd1 Bb1 34.Rc6 , when Black will have a very tough time

converting his extra pawn. ]

**29...Bc2 30.Bc4?!**

[ Giving up a pawn with 30.b4 was necessary. ]

**30...e4!** Black threatens ...Bd3, cutting off the white queen's protection of c3. **31.Ke2 Bd3+** With the elimination of bishops, Black's rook infiltrates at d3. **32.Bxd3 Rxd3 33.Qg4**

[ After 33.Qb8+ Kh7 Black threatens ...Qf3+ and then mate on d1. If then 34.Rg3 Rf3! 35.Rxf3 Qxf3+ 36.Ke1 Qxc3+ 37.Kf1 Qh3+ 38.Ke1 Qh1+ 39.Kd2 Qxh5 40.Qxa7 Qd5+ , Black will win the queen ending. ]

**33...Qxc3 34.Kf1**

[ The e-pawn is taboo, as 34.Qxe4?? Qc2+ 35.Kf1 Rd1+ wins White's queen. ]

EXERCISE (planning): We come to a crossroads. The plans are: a) playing directly for mate with 34...e3; or b) removing queens from the board with 34...Qc1+, followed by 34...Qg5, entering a pawn-up rook ending. One wins easily, while the other allows White to resist. Which one would you play? **34...Qc1+?!** Of course I jump at the chance to simplify, when I could have knocked out my opponent.

[ ANSWER: Plan a) 34...e3! wins; e.g. 35.Qf3 (threatening perpetual check) Qxb3 (planning to meet a back rank check with ...Qg8) 36.Rg3 Rd1+ 37.Kg2 exf2! and White is down too many pawns. ]

**35.Kg2 Qg5?**

[ Black should reverse intent with 35...Qc6! 36.Kh2 Qf6 37.Qxe4 Qxf2+ 38.Rg2 Qe3 39.Qxe3 Rxe3 40.Rb2 Re5 , when h5 falls and White finds himself down two pawns in the rook ending. ]

**36.Qxg5 hxg5 37.Kh2?**

[ 37.Re1! offers White chances to hold the game; e.g. Rd4 38.a5 bxa5 39.Rc1 Kh7 40.Rc5 Kh6 41.Rxa5 Rd7 42.Re5 Rb7 43.Rxe4 Rxb3 44.Ra4 Rb7 45.Ra5 Kxh5 reaches one of those annoying rook endings where one side is up two pawns and it's still a draw. ]

**37...Rxb3** Now Black is winning again. **38.Rxg5 Ra3 39.Re5 Rxa4 40.Kg3 Kh7 41.Re6 Rb4 42.Kf4 a5** The e-pawn remains safe, since a king and pawn ending is hopeless for White. **43.h6 e3+!?**

[ Simply 43...g6! is the easiest path to the win. ]

**44.Kxe3 gxh6 45.f4 h5 46.Re7+ Kg6 47.Re6+ Kg7 48.Re5 h4 49.Rh5 h3 50.f5**

[ 50.Rxh3? hangs the rook to the obvious Rb3+ . ]

**50...Kf6 51.Kd2 Rb3 52.Kc2 a4**

**0-1**

**B33**

□ **Lakdawala,Cyrus**
■ **Sevillano,Enrico**
San Diego (rapid) 2005
*[Cyrus Lakdawala]*

**1.e4!?** Well, we all do crazy things in our youth. (Your now elderly writer was but a lad of 45 at the time of this game.)

[Today, of course, I am more likely to open with 1.d4 and annoy the opponent with a London or Colle System. ]

**1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Ne7!?**

[If for some reason we don't feel like venturing into the main line after 11...0-0 12.Nc2 Bg5 , we might occasionally use 11...Ne7!? as a surprise weapon. ]

QUESTION: When White plays Bxf6 on the ninth move, we reply ...g7xf6 (which we look at in detail later in the book). In that version, we get the bishop pair in return for the doubled f-pawns. What compensation do we receive here? --- ANSWER: What we get here is freedom for our remaining pieces. Anyway, I'm not so sure that the doubled f-pawns can accurately be characterized as a weakness, since Black gets an open g-file for his rook, and a potentially stronger centre if we achieve an ...f6-f5 break. **12.Nxf6+** The only way to try and punish Black's previous move. Compared with the line 10 Nxe7 Nxe7 11 Bxf6 gxf6, seen in the notes to Polgar-Kramnik, White has the extra and useful c2-c3.

[Alternatives offer White nothing: -- a) 12.Nxe7 (this just frees Black's game) Bxe7 13.Nc2 Bb7 14.Bd3 0-0 *(*or *14...d5* already *)* 15.Ne3 Bg5 16.Nd5 *(*or *16.Qe2 a5 )* 16...Bxd5 17.exd5 e4 and Black has an active position, T.Rogalski-H. Nakamura, Virginia Beach 2004. ]

[b) 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Nb4 Bb7 15.Qd3 0-0 16.Be2 a5 17.Nd5 b4! 18.0-0 bxc3 19.bxc3 Bg5 20.Rab1 Qd7 21.Rb3 Bc6 22.Rfb1 Rxb3 23.Rxb3 g6 24.Rb6 Rc8 and Black stands no worse, A.Giri-Ma. Carlsen, Sinquefield Cup, Saint Louis 2015. ]

**12...gxf6 13.Bd3**

[White has also tried: -- a) 13.Be2 Bb7 14.Bf3 Qb6 15.Nc2 d5 16.exd5 Rd8 17.Qe2 Nxd5 18.0-0-0 0-0 and Black's chances are no worse in the opposite wing attacks, An.Sokolov-M.Krasenkow, French Team Championship 2013. ]

[b) 13.g3 Bb7 14.Bg2 f5! (exploiting the pinned e4-pawn to eliminate our doubled f-pawns and reduce White's central control) 15.Qe2 fxe4 16.Bxe4 d5 17.Bg2 Qd6 18.Nc2 0-0 19.0-0 , when Komodo likes White, while I would be okay playing Black's side, M.Panchanathan-S.Mamedyarov, World Junior Championship, Nakhchivan 2003. ]

[c) 13.Nc2 (making use of the extra move) Bb7 14.Bd3 d5 15.exd5 Qxd5 16.Ne3 Qe6 17.a4 *(*after *17.Qh5 0-0-0 18.Bc2 Kb8 19.Bb3 Qc6 20.Qxf7 Ng6* , Black has good play for the pawn *)* 17...Rd8 18.Qe2 Nd5 19.Nxd5 Qxd5

20.0-0-0 Qxg2 21.Rhg1 Qf3 *( 21...Qxh2!?* might be better, intending *22.Bxb5+ Ke7!;* or *21...Qxh2 22.Qe3 bxa4 )* 22.axb5 Qf4+ 23.Qe3 Qxe3+ 24.fxe3 axb5 25.Bxb5+ Ke7 26.Rxd8 Rxd8 27.Rd1 Rb8 and White's two connected queenside passed pawns gave him an edge in the ending, B.Socko-M.Krasenkow, Polish Team Championship 2009. ]

**13...Rg8!?** This has not been played very often.

[Instead: -- a) 13...Bb7 14.Qe2 *(*or *14.Nc2* - see 13 Nc2 in the previous note *)* 14...d5 15.0-0-0 Qb6 16.Nc2 0-0-0 17.f3 Kb8 18.Kb1 , when I think White holds an edge with the superior pawn structure, E.Alekseev-M.Roiz, Maccabia 2001. ]

[b) 13...d5 (I think this is Black's most accurate path) 14.Qe2 *(*now if *14.Nc2* , then *dxe4 15.Bxe4 Qxd1+ 16.Rxd1 Ra7 17.Rd6 Be6* is fine for Black *)* 14...d4! *( 14...Bb7* was the previous line *)* 15.cxd4 Qxd4 16.0-0-0 Qb6 and Black is close to equality; for example, 17.Qe3?! *( 17.Nc2* is about even *)* 17...Qxe3+ 18.fxe3 Rg8 19.Rd2 Bb7 20.Rf1 , B.Socko-M.Krasenkow, German League 2003, and now Black should continue f5 21.exf5 Bxg2 , and if 22.Rg1 Bf3 23.Rxg8+ Nxg8 24.Nc2 Nf6 , with an edge in the ending. ]

**14.g3**

[The alternative was 14.Qf3 Bb7 15.Nc2 f5 16.0-0-0 Qb6 17.Ne3 f4 18.Nd5 Bxd5 19.exd5 f5 *(*after *19...b4 20.c4 b3 21.axb3 Qxb3 22.Kb1* , White might have an edge *)* 20.Qh5+ Rg6 21.Bxf5 Nxf5 22.Qxf5 Qxf2 and the players agreed a draw, N. Kalantarian-Art. Minasian, Paris 1994. ]

**14...d5** Black achieves his freeing break after all. **15.Nc2 Bb7 16.Qe2 f5?!** Playing this thematic move at this precise moment actually benefits White - or might have done.

[Black should limit his ambitions with 16...dxe4 17.Bxe4 Bxe4 18.Qxe4 Qd5 19.Qxd5 Nxd5 , when he gets a playable ending. ]

**17.f3?!** After this passive response, Black is okay again.

[I should have played 17.0-0-0! fxe4 18.Bxe4 Qc7 19.Bg2 0-0-0 20.Rhe1 , when Black experiences trouble holding his centre together. For example, f6 21.f4 e4 *( 21...Ng6? 22.Nb4* is even worse: *d4 23.Bxb7+ Kxb7 24.Qe4+* and Black's king is seriously compromised; "I said you would receive justice. I didn't say you would like it," comments the queen *)* 22.Kb1 Kb8 23.Bh3 Rd6 24.Qh5 and Black has loose pawns and a hole on d4. ]

**17...dxe4 18.fxe4 Qd6?!**

[GM Sevillano rejects an even ending after 18...fxe4 19.Bxe4 Bxe4 20.Qxe4 Qd5 and insists on complicating - and who can blame him, considering his easy-to-confuse opponent? The problem is that the complications favour White. ]

**19.0-0-0 0-0-0!?**

[Objectively, 19...Qg6 is probably Black's best move here, but then 20.Rhe1 fxe4 21.Bxe4 Bxe4 22.Qxe4 Qxe4 23.Rxe4 f6 24.Rh4 Rg7 25.a4 lands him in a definitely inferior ending, since his pawns require round-the-clock nursing care. ]

**20.Rhf1**

[Not 20.Bxb5?? , which hangs a piece to Qh6+ . ]

**20...Qh6+ 21.Kb1 f4!?** QUESTION: Why did the GM voluntarily wreck his own pawns? --- ANSWER: A starving, counterplay-less opponent, is a dangerous opponent. Sevillano critically weakens his f-pawns to clear the e-file for a rook and open the e5-square for his knight. He also turns my e4-pawn into a target.

[Attempting to grab the initiative with 21...Rxd3?? 22.Qxd3 Bxe4 fails miserably to 23.Qd7+ , when the e7-knight falls. ]

[Whereas 21...fxe4 22.Bxe4 opens lines to White's advantage; for example, Qe6 23.Rde1 f6 24.Bxh7 Rh8 25.Be4 Bxe4 26.Qxe4 Rxh2 27.Qa8+ Kc7 28.Qa7+ Kc8 29.Rd1 Rdd2 30.Rxd2 Rxd2 31.Nb4 Qc4 32.Qxa6+ Kd7 33.Qxf6 and Black won't hold the game. ]

**22.gxf4 exf4 23.Nd4** Another concession Black made when playing ...f5-f4!? was to cede control over the d4-square. **23...Ng6**

[Or 23...Nc6 24.Nf5 Qh3 25.Rf3 Qh5 26.Rdf1 Ne5 27.Ne7+ Kb8 28.Nxg8 Nxf3 29.Nf6 Qg6 30.Qxf3 Qxf6 31.Kc2 and the f4-pawn falls. ]

**24.e5?!** If chess was an easy game, it wouldn't be any fun. When a positional player like me lands in a complex, potentially tactical situation, in my disorientation there is no logical next step, and each further move I make is merely an illusion of continuity. Here conflicting passions drive both sides: Overt hostility on GM Sevillano's part, and the need for safety on mine. At the time I thought this move, depriving Black's knight of the e5-square, followed the Bruce Lee "Be water, my friend" philosophy, when in reality it's a reactive move, which under-estimates White's attacking potential.

[The correct dose of a medication is crucial. Too weak, and the medicine is ineffectual; too strong, and you risky undesired side-effects. In this instance, I took too weak a dose. I should undermine his queenside with the aggressive 24.a4 Ne5 25.axb5 Nxd3 26.Rxd3 axb5 27.Nxb5 , when I don't think his light square control compensates for the missing pawn. ]

**24...Rge8** EXERCISE (critical decision/planning): White has a choice of plans: -- A: Play 25 Be4 to neutralize Black's bishop. -- B: Play 25 e6 and, when Black takes it, follow up with 26 a4 again to loosen the pawn front around his king. --- One plan leads to an advantage for White; the other allows Black to escape his difficulties. Which one would you play? **25.Be4?!** History tends to ignore events which never happened. In the space of a single move an immense power can be brought to a state of inertia, like an injured boxer after a blow to the head. When we fail to recognize a key moment, we risk wasting resources in pursuit of obsolete aims. --- How sadly typical for your initiative-challenged writer to turn and seek safety at the first sign of danger. I wanted to eliminate Black's premier piece. I should have been thinking about offence, rather than defence.

[ANSWER: 25.e6! fxe6 26.a4! puts Black's game under heavy pressure. For example, f3 27.Nxf3 Nf4 28.Qe3 Qh3 29.Be4 Rxd1+ 30.Rxd1 Bxe4+ 31.Qxe4 Qf5 32.Qxf5 exf5 33.axb5 axb5 34.Nd4 and Black loses a pawn, though does have drawing chances due to the reduced amount of material of pawns on the board. ]

**25...Nxe5** Now Black has equalized. **26.Bxb7+**
[ If instead 26.Nf5 then Qh3! 27.Nd6+ Rxd6 28.Bxb7+ Kxb7 29.Rxd6 Nc4! 30.Qd3 Nd2+! (this knight is the annoying owner of a giant SUV, who constantly parks in the "compact vehicle" parking spot) 31.Qxd2 Qxf1+ 32.Kc2 Re2 (game over? - not quite) 33.Rd7+ Kb6 34.Rd6+ and Black must allow the perpetual, since Ka5?? walks into 35.b4+ Ka4 36.Rxa6# . ]
**26...Kxb7 27.Qe4+ Nc6 28.Qxf4 Qxf4 29.Rxf4 Rd7 30.Kc2 Nxd4+ 31.Rdxd4**
The ending is drawn.
[ One sample variation: 31.Rdxd4 Rxd4 32.Rxd4 Re2+ 33.Rd2 Rxd2+ 34.Kxd2 Kc6 35.Ke3 Kd5 36.b3 *(* or *36.Kf4 Kc4 37.Kf5 Kd3 38.h4 Kc2 39.h5 Kxb2 40.h6 Kxc3 41.Kf6 a5 42.Kxf7 b4 43.Kg7 a4 44.Kxh7 b3* etc *)* 36...Ke5 37.c4 bxc4 38.bxc4 a5 39.h4 h5 40.a3 a4 41.c5 Kd5 42.Kf4 f6 43.Kf5 Kxc5 44.Kxf6 Kc4 (the promotion race isn't equidistant, yet White draws anyway) 45.Ke5! Kb3 46.Kd4 Kxa3 47.Kc3 and so on. --- SUMMARY: Try 11...Ne7 if you want to remove a theoretically well-prepared opponent from his comfort zone. ]

46. European Cup, Saint Vincent 2005
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Ne7 9.c3** At first sight White's move may make no sense. After all, if White's goal is to advance the queenside pawn majority then why not push the pawn two squares, rather than meekly one? The answer is that in this version White isn't playing the push-my-majority game. Instead, he has the following ideas: -- 1. With a

white pawn on c4, Black sometimes is allowed undermining tricks with ...b7-b5. In this version Black is deprived of this possibility. -- 2. White seeks a set-up involving a2-a4, Na3, Nc4 and Be3, targeting both d6 and the potentially sensitive b6-square. -- 3. The move involves a trap if Black gets suckered into ...a7-a6?? on the next move.
**9...Nf5** In all the games of this chapter so far, Black's knight has moved to g6. In this version he is better off with ...Nf5. The reasons are: -- 1. White is discouraged from Be3, so his dark-squared bishop is thus deprived of its natural square. White can eliminate the f5-knight in two ways but both have problems. The plan with Bd3 and Bxf5 costs White the bishop pair and weakens the light squares. Alternatively, White can play g2-g4, but this obviously weakens the kingside. -- 2. On f5, the d6-square is reinforced and Black no longer worries about Qa4 tricks from White. -- 3. On f5, Black can even consider playing ...g7-g6, fianchettoing and then castling kingside, since the d6-pawn is reinforced.

[ Let's try not to fall for the trap 9...a6?? 10.Qa4! with terrible threats on d6 and c7. The knight can't be captured either. Tactically, Black's only move would be the rather unpalatable Kd7 . (I count 13 unfortunates in my database who had the bad luck to play Black in this position.) ]

**10.a4!**

[ With d6 protected 10.Qa4?! makes no sense. White just loses time after Bd7 11.Qb3 a6 12.Na3 b5 and Black already looks slightly better. ]

**10...g6**

[ I prefer the fianchetto to the also playable 10...Be7 11.Bd3 0-0 12.0-0 Nh4 13.f4 a6 14.Na3 exf4 15.Bxf4 Ng6 , as in R.Zelcic-M.Illescas Cordoba, European Team Championship, Plovdiv 2003. I slightly prefer White after 16.Be3 Ne5 17.Nc4 Nxc4 18.Bxc4 Bd7 . ]

**11.Na3**

[ 11.Bd3 Bg7 12.0-0 0-0 13.Qb3 Re8 14.Re1 was L.Yudasin-V.Kramnik, Candidates match (game 3), Wijk aan Zee 1994. Chances look balanced after Bd7 . ]

**11...Bg7 12.Bb5+** As played in all four games in my database. White deems it beneficial to trade light-squared bishops, since Black's plan to attack the white king depletes somewhat with an exchange of pieces.

[ If 12.Nc4 0-0 13.Be2 then Ne7 and Black begins to push on the kingside. ]

**12...Bd7 13.Bxd7+ Qxd7 14.0-0 0-0 15.Nc4 Rac8 16.b3 h5 17.Ra2 e4!?** Following the principle: advance pawns on the wing where you have a majority. Of course, this move comes with some risk, since on e4 Black's e-pawn is artificially isolated.

[ A few years later, in P.Rossi-C.Humeau, Grosseto 2009, Black tried the less committal 17...Rfe8 18.Qc2 Rc5 19.Rd1 e4 20.Ba3 Rc7 21.Re1 Qd8! , when Black looks slightly better. Now White blundered with 22.Rxe4?? Rxe4 23.Qxe4 Re7 24.Qb1 Qe8 25.Kf1 Bxc3 (threatening mate once again on e1) 26.Nd2 Re2 27.Nf3 Rxa2 28.Qxa2 Qe4 and White can resign. ]

**18.Re1 Rfe8 19.Qc2?!** Lethargy is often the precursor of a slow decline. This is

inaccurate, since it shuts the a2-rook out.
[White should temporarily sacrifice a pawn to generate play with 19.Rae2! Bxc3 20.Bd2 Bf6 21.Rxe4 Rxe4 22.Rxe4 b5 , though I slightly prefer Black's chances. ]
**19...Rc5! 20.Rxe4 Rxd5 21.f3?!** We are all forced to perform penance in the future for our lack of understanding in the present.
[White minimizes his disadvantage with 21.Bd2! Rxe4 22.Qxe4 Rc5 . ]
**21...Rc8!** Black's pressure against c3 mounts. **22.Ba3 b5! 23.axb5 Rxb5** Threatening ...d6-d5. **24.Re1 d5 25.Ne5 Qc7!** With a double attack against e5 and c3. **26.f4 Qb6+!**
[Even stronger than 26...Qxc3 . ]
**27.Qf2 Rxb3** To the criminal mind, theft is only reprehensible when the perpetrator is caught. **28.Qxb6 axb6 29.Bb2** This sad-looking move is forced.
[After 29.Bb4? d4 Black wins. ]
**29...Nd6 30.Re2 Bxe5 31.fxe5 Nc4** The b2-bishop is displaced further. Black is a pawn up with dominant pieces and pressure against White's c3-pawn and e5-pawns. The game is over. **32.Kf2**
[ 32.Bc1 saves the e5-pawn, at the cost of the c3-pawn after Rxc3 . ]
**32...Re8 33.Bc1 Nxe5** Ivanchuk picks up pawn number two. **34.Rad2 Rb1 35.Ba3 Re6 36.Kg3**
[ 36.Rxd5?? loses a rook to Ng4+ 37.Kf3 Rf1+ 38.Kg3 Rxe2 . ]
**36...Nc4! 37.Rxe6 fxe6 38.Ra2 Nxa3** You may be wondering why such a dominant knight is willing to trade itself for an inferior bishop. Ivanchuk decides that simplification to a pure rook ending is the easiest win for Black. **39.Rxa3 Kf7**
**0-1**

**B33**

□ **Sulskis,Sarunas**
■ **Cmilyte,Viktorija**
Lithuanian Ch., (Game 27) 2005
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 b5 10.Nd5 f5 11.Bxb5 axb5 12.Nxb5 Ra4 13.b4!? Rxb4 14.Nxb4 Nxb4 15.0-0 Be7 16.Rb1 Na6 17.exf5 0-0!**
[A good move; the obvious 17...Bxf5 would give White the chance for 18.Qf3 Bc8 19.Rfd1 0-0 20.Nxd6 Bxd6 21.Qd3 Nc5 22.Qxd6 Qxd6 23.Rxd6 with at least equality in the endgame. ]
**18.f4**
[White can't maintain d5; 18.Qf3 Nc5 19.Rfd1 Bb7 20.Qe3 f6 21.Nc3 Qa8 is very bad. TIP: As usual in the Sveshnikov, Black needs to concentrate on winning the battle for d5 and activating his pieces rather than grabbing pawns. ]

**18...e4 19.Qd5**

[ It's surprising that White didn't try 19.f6 Bxf6 20.Nxd6 here. After that the position seems about equal. I suspect Black's next move came as a shock. ]

**19...Nc7!**

[ Another good move, fighting for control again and not worrying about pawns. 19...Nc5 20.Rfd1 Bb7 21.Qd4 , for example, was much less good – White's threats against the pawns leave Black struggling. In effect, once the b5-knight is gone, Black's dark-squared bishop is able to keep White's major pieces out of the d- and e-files on its own, and the rest of the pieces can then play. ]

**20.Nxc7**

[ 20.Qxe4 Nxb5 21.Rxb5 Ba6 22.f6 Bxf6 23.Rh5 Re8 24.Qxh7+ Kf8 is good for Black if the f1-rook moves: the mighty dark-squared bishop can look after the king on his own, while White's pieces on the h-file have simply wandered offside. Nevertheless, some engrossing complications arise after 25.Rg5!? Bd4+ *( 25...Bxf1 26.Rg8+ Ke7 27.Qe4+* is an immediate draw,*;* while *25...Bxg5 26.Qh8+ Ke7 27.Re1+ Kd7 28.Qxe8+ Qxe8 29.Rxe8 Kxe8 30.fxg5* is an ending which I think is also a draw *)* 26.Kh1 Bxf1 27.Rg8+ Ke7 28.Qe4+ Kd7 29.Qb7+ Ke6 30.Qe4+ Be5 31.f5+ Kf6 32.Qh4+ Kxf5 33.Qxd8 Rxd8 34.Rxd8 Ke4 , and the complications go on. ]

**20...Qxc7 21.Rfe1**

[ 21.Qxe4 Qc5+ 22.Kh1 Bf6 is also excellent for Black; once she gets organized like this White is always going to struggle. ]

**21...Qxc2 22.Rbc1 Qb2 23.Qxe4 Bf6 24.Red1 d5! 25.Qd3**

[ The point of Black's last is that 25.Qxd5? loses to Bb7 26.Qd2 Bd4+! 27.Kh1 Qxd2 28.Rxd2 Be3 with a winning ending for Black. ]

**25...Qb6+ 26.Kh1 d4 27.g4 Bb7+ 28.Kg1 Qd6 29.Rb1 Ba6 30.Qe4 d3 31.g5 Bd4+ 32.Kg2 Bc4 33.Kg3 h6 34.h4**

[ If 34.gxh6 , then Kh7 followed by a devastating rook check, of course. ]

**34...Rd8 35.f6 Bxa2 36.Rbc1 Bb3?!**

[ Black has played splendidly up to here but this move gives White an opportunity. It's not particularly simple, but maybe 36...d2 was the way to do it, in view of 37.Rxd2 *( 37.Rc2 Bb3 )* 37...Qa3+ 38.Qf3 Qxc1 39.Rxa2 when Black must be winning. ]

**37.Rc6**

[ 37.Rxd3 Bf2+ 38.Kxf2 Qxd3 39.Qxd3 Rxd3 40.h5 was an interesting try and certainly a lot better than the text – if Black can make any effort to win this endgame at all it's certainly not readily apparent how (watch out for g6-g7). ]

**37...Qd5 38.Qxd5 Bxd5 39.Rc7 Be4 40.Re7 Bg6 41.Rc7 h5** Completing the consolidation and winning. **42.Re7 Bf5 43.Rc7 Re8 44.Re7 Kf8 45.Rxe8+ Kxe8 46.Re1+ Kd8 47.Kf3 d2 48.Rh1 Bg4+ 49.Ke4 Bf2** Points to Remember: 1. Black should be OK if White just takes back the rook as in this game. 2. Have Leko's sequence 13 b4 Rxb4 14 Nbc7+ Kd7 15 0-0 Rg8! engraved on your heart. As Edith

Cavell didn't quite say, sometimes understanding is not enough.
**0-1**

**B33**

□ **Nepomniashchy,Y**
■ **Kuzubov,Yuriy**
Kirishi (Game 20) 2005
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Rb8 13.a3** I mentioned this move before; White wants to prepare Ncb4 ...Nxb4, axb4, and he may also simply use the move as a prophylactic against ...b4 (even after ...a5, the move might still enable him to meet ...b4 by cxb4 ...axb4, a4). **13...Bg5** We mentioned this position briefly in the notes to Game 15; White could venture 14 h4 Bh6 15 g4 here, but in the game he plays less critically. **14.Bd3**

[When you see the game you wonder whether White wouldn't have done better with 14.Ncb4 , but she got nowhere after Bb7 15.g3 a5 16.Nxc6 Bxc6 17.h4 Bh6 18.Bh3 b4! in Xie Jun-E.Sutovsky, Pamplona 1998. ]

**14...Be6** TIP: Usually ...Be6 is a good reply to Bd3 in the Sveshnikov. White almost never wants to allow ...Bxd5, exd5 unless he has doubled Black's f-pawns, but otherwise the point of a3 is lost. **15.Ncb4 Nxb4 16.axb4**

[ 16.Nxb4 Qc8 followed by ...a5 is easy for Black. ]

**16...Bxd5 17.exd5** Both sides have achieved what they wanted: Black can play on the kingside with ...e4 and ...f5, while White has the a-pawn as a target on an open file. Probably, too, he calculated that he wasn't that upset about the trade on d5 because without the light-squared bishop Black would find it hard to defend a6.

**17...e4 18.Bc2**

[After 18.Bxe4 , Qe7 *( 18...Re8* is not all that effective after *19.Qg4 )* , keeping a rook on the f-file so as to meet 19.Qg4 by f5 , is very strong. ]

**18...Ra8 19.0-0 f5 20.f3**

[It's not so simple as just besieging the a-pawn with 20.Ra3 , since Black's last also enabled him to meet this with a5 , and it's not easy for White to arrange for his bishop to attack b5 with the e- and f-pawns on light squares the way they are. So instead White tackles Black's central pawn chain. ]

**20...exf3 21.Qxf3 g6 22.Rae1**

[If White had tried 22.Bd3 to try and prevent ...a5, then after Re8 he would have had to play 23.Rfe1 anyway, so the dream of getting control simply on the queenside cannot be put into practice. ]

**22...a5 23.bxa5 Rxa5 24.Re6** This looks impressive, but it doesn't achieve anything. Black is already better, largely because his bishop is better. The combination of his light-squared pawn chain and White's own d5-pawn restrict White's bishop, whereas

there are no obstacles to Black's (especially after ...b4 breaks down White's dark-squared pawn couplet on the queenside), and it has several tempting outposts, such as e5 or c5, where it is protected, invulnerable and hugely influential. TIP: In these opposite-coloured bishops positions the key almost always lies in the pawn chains. Where Black is attacking, on the kingside, he needs his pawns on light squares to complement his pieces. Where he is weaker, on the queenside, he needs to get rid of his pawns on light squares, both to remove the weaknesses White might otherwise attack, and to break down the resistance to his own bishop and secure outposts for it. Philidor pointed this out long ago. **24...Ra2 25.Rb1 b4 26.Bb3 bxc3 27.Qxc3 Ra7 28.Rbe1 Rb7 29.Kh1 Bf6 30.Qc2 Kg7** Compare the bishops: Black's keeps the white rooks out single-handed and at the same time attacks b2, whereas the only influence White's has on the play is that it needs defending by the queen. **31.R6e3 Be5 32.Rb1 Qg5 33.Rh3 Rfb8 34.Ba4 Qf4!**

[ Not, of course, 34...Rxb2? 35.Rxb2 Rxb2 36.Qc7+ with a draw, but Black has plenty of time. ]

**35.Re1**

[ In view of 35.b3 Qxa4 the b-pawn is a goner, and after that Black can turn his attention to the kingside. ]

**35...Qb4**

[ 35...Rxb2 was in fact quicker since 36.Qc7+ achieves nothing, because after Kf8 37.Rxh7 *( 37.Qxh7 Qe4* is also devastating; look at that bishop on e5! *)* , 37...R2b7 just wins the rook. But probably the players were short of time, and Kuzubov prefers a safe, if less immediate method. ]

**36.Rhe3 Qxb2 37.Qxb2 Rxb2 38.Bd1 Rd2 39.Bf3 Rbb2 40.h3 h5 41.Rxe5** Black's plan was ...Kh6, ...g5-g4 and White had nothing to oppose to this, so he decides at least to rid himself of his main enemy, but Kuzubov tidies up effectively. **41...dxe5 42.Rxe5 h4 43.Re1 Kf6 44.Kg1 Kg5 45.Rf1 Rb3 46.Kh2 Rdb2 47.Bd1 Rb4 48.Kg1 Rb1 49.Bf3 Rxf1+ 50.Kxf1 Rd4 51.Ke2 Kf4 52.Kf2 g5** Points to Remember: 1. In the Sveshnikov ...Be6 is always the first move to consider in reply to Bd3. 2. ...Bxd5, exd5 is almost always a good transaction for Black. This game was typical: Black's bishop was so much stronger than White's that the game virtually won itself while White couldn't find anything useful to do at all.

**0-1**

**B33**

□ **Rodriguez Vila,Andres**
■ **Van Wely,Loek**
Minneapolis 2005
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3**

[ White actually punted the tricky move order 2.Nc3 Nc6 3.Nge2!? , to which Van

Wely replied Nf6 *(*the best move for Sveshnikov adherents, unless you want to try *3...e5!?* - anything else and you may find yourself in a different Sicilian altogether after *4.d4!* etc *)* , and the game transposed with 4.d4 cxd4 5.Nxd4 . ]

**2...Nc6 3.d4 cxd4 4.Nxd4 Nf6** 0-1 (39) Rodriguez Vila,A-Van Wely,L Minneapolis 2005 Sicilian Sveshnikov MBM [Cyrus Lakdawala] **5.Nc3** . **5...e5 6.Nde2** This oddity certainly doesn't fit the "normal" mould. --- QUESTION: What are the pluses and minuses of retreating the knight to e2: --- ANSWER: Pluses: -- 1. White doesn't have to worry about ...Bb4 and ...Bxc3+, his c3-knight is now covered. -- 2. The knight may transfer to g3, where it prepares for a kingside attack, and may induce the weakening ...g7-g6 from Black. --- Minuses: -- 1. The knight is clumsy on e2 and must later be moved again to develop the f1-bishop. This means White loses quite a bit of time. -- 2. This loss of time means that the f2-square will be weak and perhaps entail even more time lost defending it. **6...Bc5!** Target: f2. White must be on high alert for ...Ng4 and ...Qb6. It makes little sense to play the knee-jerk ...Bb4, since the c3-knight is well protected. **7.Ng3**

[QUESTION: Is it worth White trying the radical 7.Be3 - ? --- ANSWER: It's easy to commiserate with such a decision, since it gives short-term relief for White. My feeling is the long-term damage to his structure after Bxe3 8.fxe3 is more harmful than beneficial; for example, 0-0 9.Ng3 d6 10.Qd2 Qb6 11.0-0-0 Be6 12.Nd5? *( 12.Kb1* might be a better try *)* 12...Bxd5 (our Sveshnikov rule of thumb for the entire book: "Try and plug the d5-hole with a white pawn, if possible") 13.exd5 Nb4 14.Bc4?! Rfc8 15.Qe2 Nxc2! and Black won a pawn, A.Rodriguez Vila-V. Spasov, World Junior Championship, Tunja 1989, since 16.Kxc2 Qb4 regains the piece with a big advantage (if 17.b3 then b5 ). ]

**7...d6** Already threatening ...Ng4.

[Instead, 7...0-0 8.Be2 h6 (ruling out Bg5) 9.0-0 a6 10.Nd5 d6 11.Nxf6+ Qxf6 12.c3 , as in P.Stoma-K.Szromba, Krakow 2006, is balanced after Be6 . If White gets greedy with 13.b4 Ba7 14.Qxd6?? (when we commence an unsound idea, why does it always appear so distressingly plausible?), then Rfd8 15.Qc7 Rd7 sees the queen trapped. ]

**8.Be2** White's most sensible move, which covers against ...Ng4 tricks.

[The more active-looking 8.Bc4?! is unwise, since it allows Ng4 9.Rf1 *(*not *9.0-0?? Qh4 10.h3 Nxf2* and White can resign *)* 9...Qh4 10.Qf3? *( 10.h3!* was correct, when Black should retreat his knight; *Nxf2!? 11.Qf3 Be6 12.Bb5* is not so clear *)* 10...0-0 (now ...Nxh2 is a threat) 11.Qd3 and here apart from Qxh2 , as in A.Temelkov-N.Yordanov, Bulgarian Junior Championship 2001, *(*Black might play *11...Nb4 12.Qe2 Nxh2 13.Rh1 Bg4 14.Rxh2 Qxh2 15.Qxg4 Qxg2! 16.Qe2 Bxf2+! 17.Qxf2 Nxc2+ 18.Ke2 Qxf2+ 19.Kxf2 Nxa1* and his two rooks and four extra pawns will beat White's three minor pieces. *)*]

[QUESTION: Why doesn't White pick up the bishop pair with 8.Na4 - ? --- ANSWER: Black simply dodges with Bb4+ 9.c3 Ba5 , as in K.Chernyshov-P.Piscopo, Pardubice 2009. Then if 10.b4 Bc7 , Black's bishop may not be so pretty on c7, but we can also point out White's ugly a4-knight in recompense. ]

**8...a6 9.0-0 h6 10.Nh5**

[ The immediate 10.Nd5 is ineffective after Nxd5

**A)** 11.Qxd5?! Nd4 forces White to lose time with 12.Qc4 , *(* since *12.c3??* fails to *Be6! 13.Qxb7 Ra7* and the queen is trapped again *)*;

**B)** 11.exd5 (a reminder: we love it when we induce this pawn-plug on d5) 11...Ne7 12.Kh1 0-0 13.f4 exf4 14.Rxf4 Ng6 (Black gets good use of e5 for his knight) 15.Rf1 Ne5 16.c3 f5 , when I prefer Black's game slightly, J.Nissen-R.Wild, German League 2007. ]

**10...Nxh5 11.Bxh5 0-0 12.Nd5** The knight takes up its optimal post, while making way for c2-c3. **12...Qh4!** The queen menaces the e4-pawn, and ... f7-f5 is also in the air. **13.Bf3 Nd4 14.Ne3?!** I'm not sure what this move was for, especially seeing as the knight soon goes back again.

[ Instead, 14.Be3 Be6 is about balanced. ]

**14...b5**

[ Or 14...Bd7 15.c3 Nxf3+ 16.Qxf3 Bc6 17.Nd5 Bxd5 18.exd5 with a similar position. ]

**15.c3 Nxf3+ 16.Qxf3 Bb7 17.Nd5 Bxd5 18.exd5** We sense a shift in the balance of power. Black's kingside majority is the more potent of the two. **18...Rac8**

It isn't clear to me that the rook belongs here, rather than on b8 or e8.

[ I would play the immediate 18...f5! , keeping options open. ]

**19.g3?!** "Energetic" can easily lose focus and morph into "erratic". This looks like a calculated discourtesy, designed to provoke, and is probably unwise, since it virtually begs Black to push his kingside majority forward and attack. **19...Qe7**

[ And now I might play 19...Qh3 . Van Wely has a different plan for his queen. ]

**20.a4 f5 21.Qe2 Qb7** Covering b7, while pressuring d5. **22.axb5 axb5 23.Ra5 Rb8 24.Rd1 f4!** Now the weakness of f2 gnaws at White like a toothache. **25.gxf4** This concession was a small price for even temporary relief.

[ It still won't be easy for White to map out a route to king safety, but he couldn't allow Black to open the f-file, and 25.g4? Qe7 26.Kh1 f3 was hopeless. At least in this version White manages to close the file and ease pressure on f2. ]

**25...exf4 26.b4?!** White fixes the black b-pawn as a weakness, but he doesn't have time for such considerations.

[ 26.Qf3 was necessary. ]

**26...Bb6 27.Ra2**

[ Unfortunately, 27.Rxb5?? loses the exchange to Bxf2+ , so White has to waste a tempo retreating his rook, while his king is obviously unsafe. ]

EXERCISE (critical decision): What is Black's strongest way of proceeding?

**27...Rbe8?!** This gives White another chance to solidify his kingside defences a little.

[ ANSWER: 27...f3! appears virtually decisive, not fearing the loss of a pawn since Black gains a devastating attack in all variations; for example, 28.Qe6+ *(* or *28.Qd3 Qf7 29.Kh1 Rbe8 30.Qxb5 Re5* , followed by ...Rfe8 *)* 28...Kh8 29.Qxd6 Rbd8 30.Qe6 *(* if *30.Qe5 Qf7;* or *30.Qg6 Rxd5! )* 30...Rde8 31.Qg4 *(* or *31.Qc6 Qe7 )* 31...Qxd5! 32.Rad2 Qe5 and White looks busted. ]

**28.Qf3 Qc8 29.Kh1 Re5 30.Rg1 Qb7** Keeping White busy protecting the d5-pawn. **31.Rd2 Rff5 32.Bb2!** White hopes that his veiled pressure on g7 will be a counterbalancing force to Black's obvious strategic trumps. **32...Re7?!**

[ Van Wely naturally spots the trap 32...Rxd5?? (a sentry may grow lax if he stands inattentive guard for too many uneventful days) 33.c4 with a dual attack on d5 and g7, and so defends against the threat in advance, though not in the most active way. ]

[ Instead, 32...Qe7! 33.c4 Re1 34.Rd1 Rxd1 35.Qxd1 Rg5 looks quite awful for White. ]

**33.Qd3?**

[ White is desperate to play c3-c4 to free his bishop, but it was better to see first to the safety of his king with 33.h3! and if Qc7 (intending ...Qc4) then 34.c4! Qxc4 *(* or *34...bxc4 )* 35.Kh2 , when he at least has some activity for the pawn. ]

**33...Qd7 34.c4 Rg5! 35.Rxg5** After while **35...hxg5** , White has nothing, since

[ After 35...hxg5 , White has nothing, since 36.cxb5?? loses to Re1+ 37.Kg2 Qg4+ 38.Qg3 f3# ; ]

[ while 35...hxg5 36.Qf3 bxc4 is also completely hopeless. ]

**36.Re2 bxc4 37.Qf3**

[ Not 37.Qxc4? (a move made with the philosophy: when we are losing, it is no time for austerity measures) Qh3! 38.Kg1 f3 and Black forces mate. ]

EXERCISE (combination alert): Black to play and win. --- ANSWER: **37...g4!** Step 1: Overload White's queen, forcing the following sequence. **38.Rxe7 Qxe7 39.Qxf4** White's defenders rattle around like dice in a shaken cup, and we feel a premonition of disaster in the air. Find one deadly move and you end the game.

[ Taking the other pawn is no better: 39.Qxg4 Qe1+ 40.Kg2 Qxf2+ 41.Kh3 Qxb2 42.Qc8+ Kh7 43.Qf5+ g6 and there is no perpetual check for White. ]

**39...Qe2!** Step 2: Double attack.

[ After 39...Qe2 , there is no remedy to the dual threats of ... Qf1 mate and ...Qxb2, since 40.Qc1 allows Black to force mate in three with Qf3+ 41.Kg1 Qxf2+ 42.Kh1 Qf3# . "It is no easy matter explaining something to a person as witless as His Excellency, but I will do my best: You are king, only for show," lectures the queen to her brother. --- SUMMARY: 6 Nde2 avoids structural damage for White, but at the high cost of time. Black stands at least even after 6...Bc5!. ]

**0-1**

**B33**

□ **Springer,Patrick**
■ **Andersson,Ulf**
Zürich 2005
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 h6** As always in the Ulfie, outward appearances intimate that Black chases himself in a circle of illogic. **7.Nd6+ Bxd6 8.Qxd6 Qe7 9.Qxe7+ Kxe7 10.Bc4** Logically reinforcing the d5-hole. Yet this line is one of the easiest for Black to face.

[Another of Andersson's games saw 10.Bd3 d6 *(*if easy equality is what you are after, then *10...Nb4* is the move *)* 11.0-0 Be6 12.b3 *( 12.a3* is perhaps more accurate *)* 12...Rhc8 13.Bb2 *(*now if *13.a3* then *Nd4 14.Bb2 Rc6* and Black already stands better *)* 13...Nb4 14.Rfc1 Rc6 15.Nd1 Rac8 16.Ne3 Ng4! (eliminating a defender of c2) 17.Nxg4 Bxg4 18.Bc4 b5! (Black breaks in) 19.Bxb5 Rxc2 20.Ba3 Nxa2 21.Rxc2 Rxc2 22.Bc4 Be2! 23.Bd5 Nc3 (Black's pieces rule the centre) 24.Bb7 Bd3 25.Re1 *(*after *25.Bb4 Bxe4 26.Bxe4 Nxe4 27.Rxa7+ Ke6 28.Be1* , Black has a little trick based on White's insecure back rank: *Nxf2!* and wins *)* 25...Ne2+ 26.Kh1 Ra2 27.Bc1 Nxc1 28.Rxc1 Rxf2 29.Kg1 Rc2 30.Ra1 Rc7 31.Bd5 f5 0-1 A.Kouwenhoven-U. Andersson, Utrecht 2012. Andersson makes these endings look like forced wins for Black! I have seen him do this to titled players, over and over in ICC blitz games. ]

**10...d6 11.0-0?!** If the specifics elude us, our otherwise correct plan can fall apart later on, as if it were unsound at its outset. --- QUESTION: What is the problem with this natural move? --- ANSWER: It's slightly inaccurate, since White experiences trouble covering c2.

[Instead, 11.Be3 Be6 *(*if *11...Nb4* here, White just castles long *)* 12.Bb3 Na5 was equal in T.Mifsud-J.Dudas, Budapest 1997. ]

**11...Nb4! 12.Bd3** QUESTION: This retreat feels unnatural. Why didn't White slide his bishop to b3 instead?

[ANSWER: After 12.Bb3 , his grasp of c2 can be undermined by Be6 13.Bd2 *( 13.Ba4* would waste even more time with the bishop *)* 13...Bxb3 14.cxb3 and Black already stands better due to White's newly crippled queenside pawn majority, although this point is beyond the comps' horizon, so they incorrectly call the game even. ]

**12...Be6 13.f4** This is a common way for White to try and rustle up open lines, but the move doesn't bother Black here, since he doesn't fear either f4xe5 or f4-f5.

**13...Rac8 14.Bd2 a6 15.Rf3 exf4!** Same as it ever was. Black clears e5 for his knights. **16.Bxf4 Nc6** Andersson isn't interested in chopping White's feeble light-squared bishop.

[I would be more inclined to go for 16...Nd7 . ]

**17.h3 Ne5 18.Re3 Rc5 19.Rd1 Rhc8 20.Be2** Just in case Black was considering

a strategic exchange sacrifice on c3. But now the c2-pawn is undefended, which means White can't move his knight. **20...b5 21.a3 g5** We note a distinct interrogative inflection in Black's last few moves. Andersson seizes space on both wings. **22.Bh2?!** Slow deterioration on our side is often proof that the system we oppose is on the right track, while we head in the wrong direction. White clearly stands worse with a passive, counterplayless position. Such is the insidious nature of the Ulfie.

[ As strong as the e5-knight is, White can't afford to give away his dark squares with 22.Bxe5? Rxe5 . ]

[ Presumably he hadn't foreseen Black's coming knight manoeuvre, or he might have prepared for it with 22.Bg3 , and if Nfd7 then 23.Be1 *(* or *23.Bf2 Nb6 24.Rg3 )* 23...Nb6 24.b3 . ]

**22...Nfd7 23.Rf1 Nb6** Now White must be on guard for either ...Nbc4 or ... Na4. The prospect of the former, with a double attack against b2 and e3, has him rushing to remove one of the knights. **24.Bxe5?** He didn't listen to my advice! The bishop acts as a revolutionary, when his position requires a reformer. This concession, which hands Black control of the dark squares, feels like a grumbled afterthought. White gives away a lot more than he gets.

[ He should just wait with something like 24.Bg3 , since Nbc4 25.Bxc4 Nxc4 isn't fatal after 26.Rd3 Nxb2 27.Bxd6+ Ke8 28.Bxc5 Nxd3 29.Bd4 , even if Black is certainly better. ]

**24...Rxe5** Correctly utilizing e5 for his pieces. Now White must worry about his e4-pawn and ideas of ...d6-d5. **25.Ref3?!** If White hopes that breaking the pin on the e-file will defuse Black's next move, he is going to be disappointed.

[ Instead, 25.Kf2 may be the depressingly best option, when Na4! 26.Nxa4 bxa4 27.Bd3 Rb8 wins the b2-pawn 28.-- *(* since *28.Rb1* fails to *Ba2;* but at least White gains some activity after *28.Ree1 Rxb2 29.Rb1 . )* ]

**25...d5! 26.Bd3**

[ Black has picks up a clean pawn after 26.exd5 Nxd5 27.Nxd5+ Bxd5 28.R3f2 Rxc2 . ]

EXERCISE (planning): Don't get tricked searching for hidden meaning, when the truth is in front of our nose. Come up with Black's strongest plan. --- ANSWER: Andersson gets to play his trademark exchange sacrifice after all, decimating his opponent's structure. **26...Rxc3!** Theory without the delivery system of application is a time-wasting endeavour. How wonderful when an abstract idea intersects with real life. Karl Marx was the first to note that history has a way of repeating itself. I've witnessed Andersson win countless blitz games with similar well-timed strategic exchange sacrifices on c3, which is a recurrent theme virtually baked into the opening. **27.bxc3 dxe4 28.Re3** White saves his bishop but not the game. His current material advantage of the exchange for a pawn is soon to become a riches to rags story, as Black's central pawns surge. **28...f5 29.Ree1**

[ Or 29.g4 Nd5 30.Ree1 Nf4 31.gxf5 Bxf5 32.Re3 Kd6 33.Be2 Nxh3+ 34.Kh1 Nf4 and Black's three passed pawns ensure the victory. ]

**29...Kd6 30.Be2 Rc5** Another pawn falls. White can safely resign here. **31.Rd1+ Nd5**
[ Or 31...Ke5 32.Rd8 Rxc3 33.Rh8 Rxc2 34.Bd1 Rc3 35.Rxh6 Rxa3 36.Rg6 Nd5 37.Rxg5 b4 38.h4 b3 and White is too slow in the race. ]
**32.c4 bxc4 33.Rb1 Nc3! 34.Rb6+** This temporary burst of activity gives White scant comfort. His counterplay is a bag of sugar with a hole in the bottom. **34...Rc6** Swapping away White's only active piece. **35.Rxc6+ Kxc6 36.Bh5 Kd5** White's poor rook, an amnesiac adrift and alone in a now strange city, is unable to enter via the b- or d-files, while Black duly pushes his passed pawns down the board. **37.Bg6 f4 38.h4 e3** Black's position floats upon principled inertia. **39.hxg5 hxg5 40.Bh5 Kd4 41.Re1 Bf5**
[ White, whose tormented pieces look like unfortunate denizens of Dante's "Inferno, " isn't interested in witnessing his own slow demise: 41...Bf5 42.Rc1 g4 43.Kf1 e2+ 44.Kf2 g3+ 45.Kf3 Ke5 46.Re1 Be4+ ("The emperor is the last one to realize that he is naked," comments Black's bishop) 47.Kg4 Bxg2 and Black's three connected passed pawns win easily. --- SUMMARY: 10 Bc4 is too innocuous to cause Black any trouble. Remember to play ...Nb4! if the opportunity arises. ]
**0-1**

**B33**

□ **Baker,B**
■ **Lakdawala,Cyrus**
San Diego (rapid) 2005
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 h6 7.Nd6+**
White's most logical move. He is given rights to d6, so he enters, picking up the bishop pair. **7...Bxd6 8.Qxd6 Qe7** We immediately challenge White's control over d6 and offer an ending. **9.Qd1!?** My opponent, an attacking player, wants to keep

queens on the board. White scores a massive 66.1% with this idea in the Löwenthal Variation; the difference here is that we've not wasted a tempo on ...a7-a6.

[ We look at 9.Nb5 in the next game ]

[ and 9.Qxe7+ in Zilberstein-Lakdawala, Berg-Andersson, and Spinger-Andersson. ]

[ Other queen moves are inferior: -- a) 9.Qc7? 0-0 (White already faces the threat of 10...Ne8, trapping the queen) 10.Nd5 Nxd5 11.exd5 Qb4+ 12.c3 Qe4+ 13.Be3 Qxd5 and Black is just a pawn up, D.Heever-M.Paz, Dos Hermanas (online blitz) 2004. ]

[ b) 9.Qd3 gives us a position similar to that in the previous game, except that we have again saved a tempo by omitting ... a7-a6. After d6 10.Be2 Be6 , the players agreed a draw right here in J. Dominguez Rueda-I.Molano Lafuente, Llobregat 2010. ]

[ c) 9.Qd2 (artificial) 0-0 and then:

**A)** 10.g4? (artificial-er!) Nd4 (threatening to fork on f3) 11.Be2 d5! (principle: "open the position when leading in development") 12.exd5? *(*White had to try *12.Nxd5 )* 12...Bxg4 13.Bxg4 Nxg4 14.Qd3 Qh4 15.Be3 *( 15.Nd1 Nxh2* is equally hopeless *)* 15...Nxe3 0-1, since White is unable to recapture, C.Milton-C.Lakdawala, San Diego (rapid) 2007.;

**B)** 10.b3 has been played a couple of times. I would continue with 10...d6 11.Ba3 (hammering away at d6 seems the only point to White's set-up) Nd4 12.Bd3 Be6 13.0-0 Qc7 14.Ne2 Nxe2+ 15.Qxe2 Nd7 , when Black stands no worse. ]

**9...0-0 10.Bc4** White logically tries to dominate d5. We must be patient and slowly challenge for the square. **10...d6**

[ The surprising 10...Qb4!? may be a slight improvement, and if 11.Qd3 then d5! or

**A)** 12.Bxd5 Nxd5 13.a3 Nf4 14.Bxf4 *(*or *14.axb4 Nxd3+ 15.cxd3 Nxb4 )* 14...Qxb2 15.Ra2 Qb6 16.Be3 Qa5 17.0-0 Be6 with a structural edge;

**B)** 12.exd5?! Nd4 13.Bb3 Bf5 14.Qd2 , A.Pasko-D.Orlyanskaya, Dnipropetrovsk 2005, and I like a5 15.0-0 a4!? 16.a3 Qd6 17.Bxa4 *(*or *17.Nxa4 Rfc8 )* 17...Nxd5 , when Black has excellent play for the pawn. ]

**11.0-0 Be6 12.Nd5**

[ If 12.Bb3 Rac8 13.Be3 , K.Doskocil-H.Tschedemnig, Liechtenstein 1994, then Rfd8 14.Nd5 Bxd5 15.Bxd5 *(*or *15.exd5 Na5 16.Bxa7 Qc7 17.Be3 Nxb3 18.cxb3 Qa5* and Black regains the pawn with the superior structure *)* 15...Nb4 16.Bb3 d5! 17.exd5 Nbxd5 18.Qe2 Nxe3 19.Qxe3 Nd5! 20.Qe4 *(*not *20.Qxa7?! Ra8 )* 20...Nf6 and Black stands no worse. ]

**12...Bxd5 13.exd5**

[ QUESTION: Why plug d5 with a pawn when White can play 13.Bxd5 - ? --- ANSWER: After Qc7! *( 13...Nb4?! 14.Bb3 Nxe4?* fails to *15.Bxh6! )* 14.c3 Ne7 15.Qd3 Nfxd5 16.exd5 Rac8 , the d5-hole has been filled in anyway, and I prefer Black's more fluid majority to White's. ]

**13...Nb8** Just like the previous chapter, our knight redeploys to d7, where it suppresses White's future c4-c5 break. **14.Re1 Nbd7** QUESTION: Isn't White clearly better with his two bishops against Black's two knights? --- ANSWER: I knew this question was coming! The players are in disagreement about the position's most basic premises. White believes his bishops give him the advantage, whereas Black thinks his knights, coupled with a superior majority, allow him to retain dynamic equality. In my opinion, the claim to the "advantage" of the bishop pair bears only a tenuous relationship to actual reality. The premise of the Ulfie will offend all bishop lovers, since we hand White at least one of our them in most variations of this line. --- Specifically, I disagree with your assessment for the following reasons: -- 1. The position is rigid, at least for the time being, so Black's knights operate at least as well as White's bishops. -- 2. White didn't obtain the bishop pair for free. In return Black got the superior pawn majority, since ours is free to move forward, while it will take an eternity (which is a really long time!) to play for a c2-c4, b2-b4 and c4-c5 break, since the c5-square is the equivalent of Fort Knox for our side. **15.b4?!**
Risky, bordering on impatient. To my opponent this strategic concession is a means to an end. He reasons that if Black plays ...a7-a5, as I did in the game, he opens lines for his bishops and weakens my b7-pawn, which is all true. But I think the handing over of c5 carries more weight, and that White's move is therefore misconceived.

[Instead, 15.f4 is well met by Rac8 16.Bb3 Nc5 17.fxe5 dxe5 18.d6!? Qd8 19.Rxe5 Nxb3 20.axb3 Rc6! 21.Bf4 *( 21.Rxa7??* drops the bishop to *Rxd6* and 22...Rd1+ *)* 21...Rxd6 22.Qf3 Nd5 23.Bg3 Nb4 24.c3 Nc6 , when Black stands no worse. ]

[QUESTION: What if White plays slowly with a long-term c2-c4-c5 in mind? --- ANSWER: Let's look. After 15.Bf1 Rac8 16.c4 Nh7 17.b4 f5 18.f3 Nhf6 19.Be3 b6 20.Qb3 Rc7 , say, Black can in turn build slowly for a kingside attack, while I don't see how White generates enough fire-power for a doable c4-c5 break. ]

**15...a5** As just explained, I think seizing control of the c5-square outweighs any disadvantages for Black. **16.bxa5 Rxa5 17.Rb1 Rc8 18.Bb3 Nb6!?** Discouraging c2-c4.

[Another option was to allow it with 18...Nc5 19.c4 and then play b5! 20.Bd2 Nxb3 21.axb3 Ra2 22.Be3 Qd7 23.Rc1 bxc4 24.bxc4 Ng4 25.h3 Nxe3 (no more bishops) 26.Rxe3 Ra4 27.Rec3 Rc5 , when White is tied down to his backward c-pawn and Black has all the winning chances. ]

**19.Bd2 Raa8 20.Bb4 Qc7** Moving the queen out of the potential gaze from White's e1-rook and b4-bishop. **21.c3 Nbd7 22.a3 Nc5** This ensures that White will be deprived of one of his bishops. **23.Bc2?!**

[It was better to play 23.c4 and let the light-squared bishop go. ]

**23...Na6! 24.Bf5 Re8 25.Qd3 Nxb4 26.cxb4!**

[This counterintuitive recapture is superior to 26.axb4?! Ra3 27.Rbc1 g6 28.Bh3 (to keep control of c8; the sacrifice on g6 is completely unsound) Rea8

, when White is under pressure; for example, 29.g3 Kg7 30.Re2 Ra1 31.Ree1 Rxc1 32.Rxc1 Ra2 (now f2 is tender) 33.Re1 Qb6 34.Re2 Ra3 35.Bf1 Qxb4 36.Qxg6+ Kxg6 37.cxb4 Rb3 and White loses a pawn for no compensation. ]

**26...g6** Even the smallest items have their utilitarian uses. A daisy can be plucked to see if the object of your attraction loves you, or loves you not. I begin the slow process of activating my kingside majority. **27.Rbc1 Qe7 28.Bh3** Other than preventing ...Rc8, this puts the bishop out of play.

[ The ominous evidence of White's decay can be seen by 28.Be4 Rec8 29.f3 Qd7 30.Rc3 Rxc3 31.Qxc3 Rc8 32.Qb3 Qc7 , when White finds himself mired in a classic bad bishop vs. good knight situation. ]

[ Again 28.Bxg6?? is completely unsound. ]

**28...e4** At long last, Black's majority starts to roll, clearing e5 for his pieces. **29.Qb3 Qe5** Menacing d5. **30.Rcd1**

[ After 30.Rc7 Qxd5 31.Qxd5 Nxd5 32.Rxb7 Rxa3 33.Rd7 Nxb4 34.Rxd6 Nd3 , not only is Black a pawn up, his pieces dominate in activity as well. I don't think the fact that all the remaining pawns are on the same side of the board will save White. ]

**30...Qh5!** The g4-square begins to exert an irresistible fascination to your writer, who plots ideas of ...g6-g5-g4. **31.Rd2?!**

[ White should take the opportunity to play 31.Qc3 , intending Nxd5 32.Qd2 Nf6 33.Qxd6 Kg7 34.Ra1 Qg5 35.Qb6 Qd2 (threatening 36...Rxa3!) 36.Rf1 , when he remains worse, but far less so than in the game. ]

EXERCISE (critical decision): Black has a large positional advantage. How can he best convert it into a decisive one? **31...Re5** The second best move.

[ ANSWER: I just told you the answer: 31...g5! . --- QUESTION: Why didn't you play it then? --- ANSWER: I should have. I was afraid of the line 32.Qb2 Re5 33.f3 , but misassessed it. After Rae8 34.Rde2 Qh4! , White is busted. For example, 35.Bg4 *(*or *35.Qd2 h5! )* 35...exf3 36.Bxf3 Rxe2 37.Rxe2 Rxe2 38.Bxe2 Ng4 39.Qd4 *(*not *39.Bxg4?? Qe1# )* 39...Qxh2+ 40.Kf1 Qh1+ 41.Qg1 Ne3+ 42.Kf2 Qxg1+ 43.Kxg1 Nc2! 44.Bd3 Nxa3 and if White goes after the trapped knight, he loses on the kingside: 45.Kf2 Kg7 46.Ke3 Kf6 47.Kd4 h5 48.Kc3 Ke5 49.Kb3 Kf4 50.Kxa3 Kg3 51.Be4 f5 52.Bxf5 Kxg2 and the bishop can't stop the pawns. ]

**32.Red1?!**

[ White should try 32.Rd4 and let the d-pawn go. Note that g5 could then be met by 33.g4! Nxg4 34.Rdxe4 . ]

**32...Rae8?!** Even when the initiative jumps into my arms like a sweetheart, I - a kind of chess eunuch - don't know what to do with her.

[ Your wishy-washy writer once again discards the powerful 32...g5! , which was my original intent. I have no explanation why I didn't play it here, except that I was low on time and probably saw a ghost. ]

**33.Qc4! e3**

[ Playing 33...Rg5! first is also strong, intending 34.Kf1 e3 35.fxe3 Rxe3 36.Re1

Rxe1+ 37.Kxe1 Re5+ 38.Re2 Nxd5 with a winning position. An isolani is both an advantage and a disability, since it tends to gift us with an initiative or space in the middlegame, while mostly bringing us sorrow in endings. ]

**34.fxe3 Rxe3?!**

[ I missed 34...Rg5! , when 35.Kf1 *(* while *35.Qd4 Ne4 36.Bd7 Ree5!* sees White's position collapsing *)* 35...Rxe3 is the same as before. ]

**35.Rf1 Qg5** Threatening ... Rxh3. **36.Rdf2 Re1** This pin secures f6. **37.g3 Kg7 38.Bg2 Rxf1+ 39.Rxf1** Good knight vs. bad bishop. Let this be a lesson to those delusional bishop worshiping readers out there! EXERCISE (combination alert): I'm embarrassed to call this a combination, since it's so easy to spot. Black to play and win a pawn. --- ANSWER: Queen fork - a3 falls. **39...Qe3+ 40.Rf2**

[ If 40.Kh1 Qxa3 41.Qd4 Re5 42.Qf4 Rf5 43.Qxd6 , then Rxf1+ 44.Bxf1 Qf3+ 45.Kg1 Qe3+ 46.Kh1 *( 46.Kg2 Qd2+ 47.Kf3 g5!* is even worse *)* 46...Qf2! 47.Qf4 (forced) Qxf4 48.gxf4 Nxd5 49.Bg2 Nxb4 50.Bxb7 Nd3 and Black wins the endgame. ]

**40...Qxa3 41.Bf1**

[ 41.Qd4 is met by Re1+ 42.Bf1 Qa1! and the X-ray defence covers f6. ]

**41...Re5 42.Qc7**

[ Not 42.Qf4 Rf5 43.Qxd6?? Rxf2 and White is unable to recapture. ]

**42...Qe3 43.Qxd6?** A time pressure blunder. When it comes to true and false, there can be no neutrality of the middle. Why is it that our hallucinations appear before our gullible minds with such acute clarity?

[ 43.Kg2 was forced, even if Qe4+ and 44...Qxb4 wins in any case. ]

EXERCISE (combination alert): The d6-pawn was a tainted gift. Why? --- ANSWER: Attraction/knight fork. **43...Qxf2+!** "Bye, bye! Keep in touch!" sings the queen. Translation: "Don't leave town, or I will hunt you down." After falling for such a vulgar cheapo, even with the flag hanging, it's as if the sight of the board scandalizes our offended eyes. --- SUMMARY: Have faith in our Ulfie-ized knights. You will be surprised how often you win with good knight vs. bad bishop in this variation.

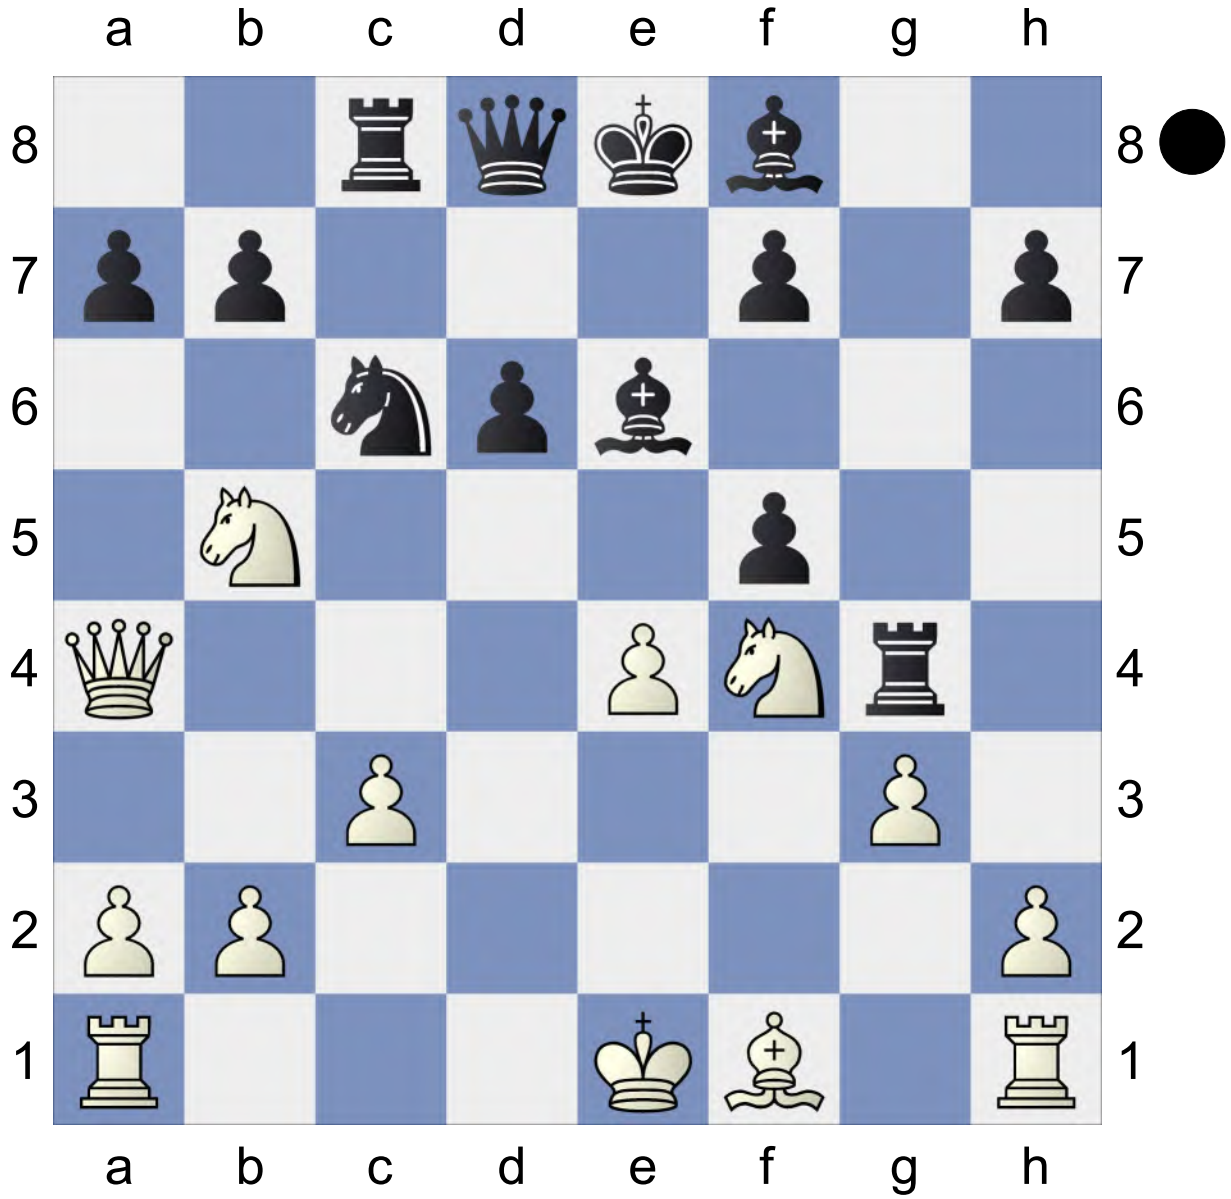
Black is not helped by the fact that he has the wrong rook's pawn for his bishop. *16.Nxf4 Qxf4 )* 15...Rxf4 16.Nxf4?? White was clearly worse, but this is just disastrous. Qxf4 17.Be2 Bh6?? 18.Qc2 Prevents Qd2+. a6 ]
[ ⌓14.h3 -1.84/23 Rxg3 15.0-0-0 ]

(Diagram)

White intends to regroup with Bf1 and Rd2, activating his rook along the d-file while



avoiding a queen exchange. This plan was first introduced by Nigel Short as an improvement over his Brussels encounter with Larsen. --- NOTE: White can also opt for this plan using the 11 Bd3 move order. **14...Rxf4!-+ 15.gxf4** 0-0-0 is the strong threat. **15...Qh4+ 16.Ke2**

[ 16.Kd1 Qxf4

**A)** 17.Be2 a6 18.Na3? -4.97/19 White hurries to exchange the soon to be liberated bishop. *( 18.Rf1* -3.10/19 *Qxe4 19.Qxe4 fxe4 20.Na3 )* 18...Bh6-+ 19.Qc2 Inhibits Qd2+. *( 19.Ke1 Ke7 )* 19...Nb4 20.Qc1 -11.28/20 *( ⌓20.Rf1* -4.99/18 *Nxc2 21.Rxf4 Ne3+ 22.Ke1 Bxf4 23.exf5 Nxf5 24.Kf2 )* 20...Qxe4-+ 21.Qxh6 Qxh1+ 22.Kd2 Qxa1;

**B)** 17.Kc2 Qf2+ 18.Kb1 Qe1+! Fixing White's weak h-pawn while securing an outpost on g3. White enjoys the potentially decisive advantage of an extra passed pawn, but in the mean time he has to worry about his fragile kingside. ---

NOTE: This is a good example of a middlegame initiative persisting deep into the endgame, without being dampened by a queen exchange. 19.Kc2 Qxa1!? Blacks light-squared bishop was not doing much on c6, so Caba takes steps to erode the restrictive white pawn wedge. ]

**16...Qxf4** Threatens to win with ...Bh6. **17.Bg2**

[ 17.Bh3 -6.29/18 17.Ke1 -4.46 fxe4 -2.65/18 *( ⌓17...Bh6* -6.29/18 ( → ...Qd2+) *18.Rhg1 Qe3+ 19.Kf1 Qxh3+ 20.Rg2 Ke7 )* 18.Bxe6? -5.69/21 *( 18.Raf1* -2.65/18 *Bg4+ 19.Bxg4 Qxg4+ 20.Ke1 )* 18...Qf3+?!-+ This allows Black to ferry his heavy artillery over to the kingside if needs be, but it seems a little on the slow side. Instead, I think that Black's number one priority must be to execute the attacking thrust ...g5-g4 to generate some kingside play. As we will soon see, this can be very risky if White can respond with f3-f4. 19.Kd2! Qd3+? This is the move Black wants to play, but it contains a massive flaw. 20.Ke1? Returning the favour. fxe6 21.Rd1? -6.24/20 *( 21.Nd4* -3.82/20 *Be7 22.h4 Bxh4+* Decoy *23.Rxh4 Qg3+ 24.Kd1 Qxh4 25.Nxc6 bxc6 26.Rc1 )* 21...Qe3+-+ 22.Kf1 Qf3+ 23.Kg1 Bh6 -5.37/16 *( ⌓23...Be7* -12.43/19 *24.Nd4 Qg4+ 25.Kf1 Qh3+ 26.Kg1 Kd7 27.Rd2 Rg8+ 28.Kf2 Qg2+ 29.Ke1 Qxh1+ 30.Ke2 Qg1 31.Qxc6+ bxc6 32.h3 Rg2# )*]

**17...Bh6 18.Rad1** Inhibits Qd2+. **18...Ke7** One of the most appealing aspects of the ...g6-g5 plan is that it leads to positions quite unlike anything else you might encounter in the Accelerated Dragon, or any other opening for that matter. Black has been shuffling his heavy pieces around the back rank, but is about to succeed in provoking a weakening of White's castled position. **19.b3 Rg8** Black mates. **20.Rhg1!?** White hurries to open a queenside file. **20...Qe3+ 21.Kf1 Rg4** White got outplayed after the opening. Weighted Error Value: White=1.03/Black=0.00 (flawless) . Mistake: White=3 --- Inaccurate: White=1 --- OK: White=1 Black=5 Best: --- Black=1 Strong: --- Black=3 Brilliant: --- Black=1

Argentinean Ch., (Game 7) 2004
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.a4 a6 8.Na3 Bg4 9.Be2 Bxe2 10.Qxe2 d5** This is the other point of 8...Bg4; the trade of light-squared bishops by itself is quite acceptable to White, but for a moment his queen has come off the d-file and he's lost the ability to prevent ...d5. **11.exd5**

[ 11.Bg5 used to be White's idea. Then

**A)** but simpler is 11...Nd4 12.Qd3 *( 12.Bxf6 Nxe2 13.Bxd8 Nxc3 14.Bc7*

*Nxa4 15.Bxe5 f6* is simply bad *)* 12...Bb4 when White has to play carefully to equalize; for example, 13.Bxf6 Qxf6 14.0-0 *( 14.exd5? Rc8 15.0-0 Bxc3 16.bxc3 Rxc3* demonstrates Black's tricks *)* 14...Bxc3 15.bxc3 dxe4 16.Qxe4 Qf4 with equality.;

**B)** 11...d4 isn't bad, ]

**11...Nxd5 12.Nxd5 Qxd5** NOTE: Black has slightly the better of equality here: development tempi are equal but White has still to solve the traditional Sveshnikov problem of the knight on a3. **13.0-0 Be7 14.Be3 0-0 15.Rfd1**

[ 15.Nc4 Qe6 16.c3 Rad8 17.Rfd1 e4 18.Bb6 Rc8 19.Ne3 Ne5 ]

**15...Qe6 16.Qc4**

[Both players have made natural developing moves up to here which do not call for any comment, but it looked more natural to play 16.Nc4 , addressing White's main positional problem and aiming perhaps to bring the knight via b6 to d5. Black might reasonably continue with e4 *(*or *16...f5* , hoping to use the mobile kingside pawn duo to create attacking chances. *)*]

**16...Qg6 17.Qb3** By bringing his queen here White must have hoped to incommode Black by forcing him to pause and defend b7, but in fact Black doesn't bother and White never finds a moment when he has the time to capture on b7, so his idea doesn't really work. **17...Kh8!?**

[Clearly there were milksop alternatives – Clearly there were milksop alternatives - Clearly there were milksop alternatives – 17...Rab8 for example – but Black believes in his attack. for example - but Black believes in his attack. for example – but Black believes in his attack. ]

**18.Nc4**

[ 18.Qxb7 was in fact not that clear at all and probably ought to have been played. You can see why White was concerned about something like f5 19.Nc4 would have led to the last note and, if this was the alternative, should definitely have been played, since now Black gains time to bring all his pieces into the attack. f4 20.Bb6 f3 21.g3 Qe6 22.b3 , but nothing's happened yet and it wouldn't surprise me if objectively White can beat off the attack. ]

**18...f5**

[ 18...Rad8 19.a5 ]

**19.f4**

[ 19.Qxb7 would have led to the last note and, if this was the alternative, should definitely have been played, since now Black gains time to bring all his pieces into the attack. ]

**19...exf4 20.Bxf4 Rae8**

[It looks more natural to play 20...Bc5+ 21.Kh1 Rae8 , since 22.Nd6 appears well met with Re2 , but in fact 23.Qf3 Rxc2 24.Nxb7 doesn't give Black much. Instead Felgaer decides to remove the knight when it arrives on d6, and if he's going to do that then clearly the white king should be left on the more vulnerable g1-square. ]

**21.Nd6 Bxd6 22.Rxd6 Qg4 23.Qg3 Re4 24.Rf1?**

[ 24.Qxg4 fxg4 25.Bg3 Nd4 was a bit uncomfortable, but this is a horrible move. ]
**24...Nd4 25.Qxg4?**
[ 25.Kh1 was best although Nxc2 wins a clear pawn, but White is in shock. ]
**25...fxg4** White now loses a piece thanks to the pin along the f-file. **26.Kh1**
26...Ne2+ was threatened, and of course this only gained in force if the bishop moved,
[ 26...Ne2+ was threatened, and of course this only gained in force if the bishop moved, while while 26...Ne2+ was threatened, and of course this only gained in force if the bishop moved, while 26.g3 Nf3+ is like the game. ]
**26...Kg8** Preparing ...g5. **27.g3 g5 28.Rd1 Nf3 29.Bc1 Re2 30.R6d2 Nxd2 31.Bxd2 Rd8** Points to Remember: 1. We are now approaching the real Sveshnikov where White battles sensibly for the d5-square and it isn't possible just to equalize with ...d5. 2. Indeed Black has to play 6...d6. He derives compensation from the tempi he gains against the white knight driving it to a3, and while it gets back into play from there. 3. 7 a4 loses time and weakens b4, which Black often exploits with a knight jump there or perhaps to d4. 4. Specifically 8...Bg4 is very annoying for White. If he wants to continue the fight for d5 then he has to weaken himself with f3, but that gives Black tactical opportunities which keep the fight at least equal for him. Points to Remember: 1. We are now approaching the real Sveshnikov where White battles sensibly for the d5-square and it isn't possible just to equalize with ...d5. --- 2. Indeed Black has to play 6...d6. He derives compensation from the tempi he gains against the white knight driving it to a3, and while it gets back into play from there. --- 3. 7 a4 loses time and weakens b4, which Black often exploits with a knight jump there or perhaps to d4. --- 4. Stockholm 2004
*[Jacob Aagaard]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Nb8 9.a4 Be7 10.Be2 0-0 11.0-0 Bf5?!**

[I had only prepared for 9 c4 and did not know the theory of 11...f5 (which I was and am convinced is the best move). I had seen that Illescas Cordoba had played 11...Bf5 against 9 c4 (although that could have been a mistake in the database!), so I decided to play like this to depart from theory as soon as possible. My opponent is well known for his hard work on the opening, so this approach made good practical sense. But usually I do not like to deviate from my opening repertoire and play inferior moves, as this often means ending up in a bad position. I would rather risk meeting my opponent's opening repertoire head on, as experience tells me that they are not perfectly prepared either, and I might improve on their analysis or on other people's play in similar positions. ]

**12.f4** This move is not really very good. Nataf decided upon it within five minutes, and at first I thought it was very strong as the white knight gains the d4 square. Later I decided that this square was not so important.

[After the game, when I was falling apart with fatigue and Nataf had awoken fully, he found the following convincing way to gain an advantage: 12.c4! a6 13.Nc3

**A)** 13...Nd7 14.a5 and White is better.;

**B)** . My attempt to create a blockade on the queenside dark squares with 13...a5 was eliminated by 14.c5! dxc5 15.f4! e4! *(*Black has to play this since *15...exf4? 16.Bxf4 Bg6 17.Qb3* gives White a decisive positional advantage *)* 16.g4 Bd7 17.Nxe4 f5 18.gxf5 Bxf5 19.Ng3 and Black is in trouble.;

**C)** 13...-- ]

**12...exf4 13.Bxf4 Bg6 14.a5?!** As I said, White was not at his best.

[Later we quickly agreed that White is better after 14.Qd2! a6 15.Na3 Nd7 16.Nc4 with a standard position for this variation. With the text move he loses the chance of going to a3. ]

**14...a6 15.Nd4 Nd7 16.c4 Re8** Another critical moment. On a normal day Nataf would have realized which way the tide was moving and used a lot of time at this critical moment to find the right way. Instead he played a very suspect move.

**17.Bh5?!** In principle this should be a good exchange for White, as it is his 'bad' bishop for my 'good' bishop. But actually this is a naive understanding of the position. The important question is where the pieces are going and where they would like to go: to give them a definite function and avoid specious moves, as described above in Aagaard-Østergaard. Here the exchange on g6 is completely in Black's favour. The knight manoeuvre . ..Nd7-c5-e4 is now much more pleasant, while the d4-knight becomes somewhat lost in space with no prospects, despite its central position; its

only dream was of the f5-square, which will now evaporate. Black's dark-squared bishop is in no way bad either: after ...Be7-f6 the bishop will become a monster with strong influence on the centre; the white bishop on f4 has nothing similar in its crystal ball. Finally, White no longer guards the d3-square very well and will have some problems with his pawns on the light squares, which were better off with the protection of his light-squared bishop. In principle this should be a good exchange for White, as it is his 'bad' bishop for my 'good' bishop. But actually this is a naive understanding of the position. The important question is where the pieces are going and where they would like to go: to give them a definite function and avoid specious moves, as described above in Aagaard-Østergaard. Here the exchange on g6 is completely in Black's favour. The knight manoeuvre ...Nd7-c5-e4 is now much more pleasant, while the d4-knight becomes somewhat lost in space with no prospects, despite its central position; its only dream was of the f5-square, which will now evaporate. Black's dark-squared bishop is in no way bad either: after ... Be7-f6 the bishop will become a monster with strong influence on the centre; the white bishop on f4 has nothing similar in its crystal ball. Finally, White no longer guards the d3-square very well and will have some problems with his pawns on the light squares, which were better off with the protection of his light-squared bishop.

[ White's position was not easy, but moves like 17.Kh1 ]

[ or even 17.Bd3 would have served him better. ]

**17...Qc7!** I used some 10 minutes to picture the organization of the black pieces. To be honest, it was not very difficult and I could have done it faster, but I had enough time. **18.Bxg6 hxg6 19.b3 Bf6** It is easy for Black to find the right move order once he has decided where his pieces belong. He just needs to find the move order that grants him the greatest flexibility and his opponent the greatest inconvenience, if only from a practical viewpoint. If the opponent has to attend to a lot of tactical threats all the time, if nothing else he will have to invest time in avoiding them. **20.Bg3?!** This logical move is actually rather bad as from here on it is hard for White to organize his pieces effectively.

[ The natural move 20.Qd2!? was better. Black has a pleasant game with Re4 *( 20...Nc5!? )* 21.Be3 Rae8 22.Bf2 Nc5 23.Ra3 R4e7 , but White can still defend with 24.Qc2! , and if Ne4? *(* instead Black should probably continue with *24...Qc8!* , bringing the least active piece into the game *)* 25.Ne6! White is definitely back in business. Attention to such small tricks is an important part of the defence. ]

**20...Nc5** Again an easy move to play, as the natural move is assisted by the threat of winning the exchange. **21.Rf3** Things are no fun for White.

[ If 21.Bf2 Ne4 22.Be3 *( 22.Qd3!?* is probably necessary and Black is clearly better *)* 22...Nc3 23.Qd2 Ne2+! 24.Nxe2 Bxa1 25.Rxa1 Qe7 26.Bf4 Qxe2 27.Qxe2 Rxe2 28.Bxd6 Rae8 and Black should win the endgame, though White still has some counterplay. ]

**21...Ne4 22.Be1** Allowing the exchange of knight for bishop would leave White permanently and unpleasantly worse. **22...Re7!** Making room for the other rook to

enter the game. Everything is still easy for Black.

[ 22...b5!? was also possible, but with 22...Re7 I had an simple way of improving my position and bringing all the pieces into play before seeking a direct confrontation. ]

**23.Bb4 Rae8 24.Rc1?!** After this move I am sure White's position simply cannot be saved with best play by Black.

[ 24.Qd3 was necessary in order to bring the rook quickly to d1, and after Nc5 25.Qd2 Black is clearly better, but nothing immediately conclusive strikes the eye. ]

**24...Qb8!** Neither to me nor my opponent was this move anything special. The queen is the worst placed piece and activating it via a7 is a standard manoeuvre in these kind of structures. **25.Qd3**

[ At first my computer program believes that White should try 25.Ne2 , but quickly realizes its mistake. Suddenly Black has an extra option in b5! which is very uncomfortable for White. He is completely disorganized and Black is ready to increase the pressure. One possible line to show what White can expect is 26.Rc2 bxc4 27.Rxc4 Rb7! 28.Nd4!? *(* if *28.Be1 Ng5 29.Rd3 Rbe7 30.Rc2 Ne4* with enormous pressure *)* 28...Bxd4+! 29.Qxd4 Nf6 30.Bc3 Rxb3 31.Rxf6 gxf6 32.Qxf6 Rxc3 33.Qxc3 Qb1+ 34.Kf2 *( 34.Qc1?? Re1+! )* 34...Qf5+ 35.Qf3 Qe5 and White has enormous problems with his king and pawns, which cannot all be saved. ]

**25...Qa7 26.Rd1** Now Black can no longer improve his position and must strike before White has a chance to get out of trouble. The first move is not difficult.

**26...Nc5 27.Qd2** This looks strange, but it is understandable if we try to follow the grandmaster's line of thought.

[ 27.Qc3 loses to Nxb3 28.Qxb3 Bxd4+ 29.Kh1 Bc5 and White has no compensation for the pawn ]

[ while after 27.Bxc5 Qxc5 he has no defence on the dark squares. Having eliminated these possible candidates, White played the text move. ]

**27...Re2** This looks logical.

[ An interesting alternative was 27...Re4!? (found by Alexander Rosenkilde), when White is more or less forced to give up the exchange on f6, as 28.Bxc5 *(* and *28.Qf2* loses to *Bxd4 29.Rxd4 Re2 30.Qh4 Nxb3 31.Rxb3 g5 32.Qg4 R2e4* and White's position collapses *)* 28...Qxc5 is horrible. ]

**28.Qc3** "Sometimes, now is not tomorrow." – Esben Lund. **28...Bxd4+!!**
Quite a surprising and paradoxical move. Black gives up his powerful bishop for the weak and pinned knight. All in the name of tactics of course.

[ I also calculated a long variation with 28...Nxb3 29.Qxb3 Bxd4+ 30.Kh1 Bc5 *( 30...Qb8!* was an important move I missed, but I would still have rejected the line since Black is not well coordinated and White has counterplay against d6 and b7 *)* 31.Bxc5 Qxc5 when, compared with 27 Qc3, White has an extra option in 32.Qxb7 Re1+ *( 32...f5* leaves Black with a structural advantage, but this is less than I was bargaining for *)* 33.Rf1 . At first I thought I could win with Qf2!? , but instead of ending my analysis here, I looked for the opponent's move at the end of the

variation and found 34.Rdxe1! Rxe1 35.Qc8+ Kh7 36.Qh3+ with perpetual check. ]

**29.Qxd4 R8e4** Winning the queen. **30.Bxc5 Rxd4 31.Bxd4 Qb8 32.Re3!** White needs to exchange the rook in order to protect his second rank.

[ 32.Rdf1 Qe8 33.Rxf7 Qxf7 34.Rxf7 Kxf7 is not an endgame White can survive. ]

**32...Rxe3** There is no choice.

[ If 32...Ra2? 33.Rde1 Kf8 34.Re8+! Qxe8 35.Bxg7+ Kxg7 36.Rxe8 and Black has made trouble for himself. ]

**33.Bxe3 Qe8 34.Bf4!** My opponent was fully awake now and started to display some of his enormous strength. At this point I had 25 minutes remaining to reach move 40 and should have been cruising. My simple chess had won the queen for insufficient material and with just a little accuracy I should win. However, I was now getting tired and losing focus. So instead of sensing the critical moment, I decided on a long-term plan. This was a great psychological and practical mistake, no matter the objective value of my long-term planning. If I want to make things easier for myself, it is better to expend some energy in calculating the win at the appropriate moment, rather than delaying it for a later occasion. **34...Qe7?!** Thus I played a horrible, unambitious move. There are no real excuses though one can be produced.

[ After the game Nataf showed me the following winning line: 34...Qe2

**A)** 35.Rf1 Qa2 36.Rf3 *( 36.Bxd6 Qxa5* also wins *)* 36...Qxa5 37.Bxd6 Qe1+ 38.Rf1 Qe3+ 39.Kh1 Qxb3 and Black wins.;

**B)** . I had in fact seen all of this, but simply overlooked that 35.Rd2 is met strongly by Qe1# .;

**C)** 35.-- ]

[ I did not spend much additional time on this position before writing this book, and as I partly expected it is actually much worse for White than it looks. Besides 34... Qe2 Black has other ways to terminate the game to his advantage; for instance 34...Qd8 35.Ra1 Qf6 36.Rf1 Qc3 37.Bxd6 Qxb3 and Black wins. ]

[ But best of all I like 34...g5!? 35.Bxd6 Qe3+ 36.Kh1 Qxb3 37.Rc1 Qb2 38.Rg1 Qa2 and White is completely finished. So Black has at least three directly winning lines, which could easily have been calculated accurately had I invested some energy in doing so. The problem was that I was getting tired and, facing a little resistance in the most promising line, chose not to make a real effort calculating it. Not so strange, then, that things went as they did. and White is completely finished. So Black has at least three directly winning lines, which could easily have been calculated accurately had I invested some energy in doing so. The problem was that I was getting tired and, facing a little resistance in the most promising line, chose not to make a real effort calculating it. Not so strange, then, that things went as they did. ]

**35.h4!** I was still under the impression that I just had to bring the king to d7, then the black queen would enter the white position and some pawn would drop off. This kind of thinking will be dealt with under the heading "assumptions" in the next chapter.

**35...Kf8 36.g3 Ke8**

[Even now after 36...Qe2!? 37.Bxd6+ Ke8 38.Rb1 Qe4 39.Rf1 Qe3+ 40.Kg2 Qxb3 Black is doing well. ]

**37.Kf2 Qc7 38.Re1+ Kd7 39.Bg5 f6 40.Bd2 Qc5+ 41.Re3 Qd4**

Having reached the time control, I suddenly realized that things are not as easy as I had expected. **42.Bc3 Qg4 43.Bd2 Qd1 44.Bb4 Qc2+ 45.Ke1 Qb1+ 46.Ke2 Qc2+** . The position is still winning, but I could not see how and, with no fighting energy left, decided to end the game here. Nataf was very surprised when I offered him a draw, as he considered his position lost, but previous experiences have taught me not to burn the bridge I am crossing when I am tired, as everything is happening in a very slow tempo and I might not get off the bridge before it falls apart. After the game Nataf and I did not find it easy to find a winning plan, which states something about how tired we both were. The next day I did not find it difficult to see that Black needs to play ...b7-b6, take it with the queen, get his pawn to a4 to undermine the c4-pawn and then Black will win a pawn. Later he will be bring his king to h5 and push the g-pawn and in the end White will not be able to resist. But Nataf would probably not have allowed me to do all of this without a fight... . **½-½**

**B33**

□ **Crepan,Marjan**
■ **Dobrov,Vladimir**
(Game 3) Nova Gorica 2004
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.Nc3 Nf6 4.d4 cxd4 5.Nxd4 e5 6.Nb3 Bb4 7.Bc4 0-0 8.Qd3?! d6**

[In this exact position 8...d5 is strong, since White is worse after

**A)** 9.exd5 is bad too: e4 10.Qg3 Ne7 11.0-0 Nf5 12.Qg5 *(*or *12.Qf4 Bd6* and ...Qc7 forking c4 and h2 *)* 12...Bxc3 13.bxc3 Qc7 and Black wins at least a pawn back;

**B)** 9.Bxd5 Nxd5 10.exd5 Ne7 and ...Bf5 will leave Black ahead in development and winning the pawn back. But White can avoid this with the sensible 8 0-0. ]

**9.0-0 Bxc3 10.bxc3 Be6 11.Ba3**

[NOTE: Black's crucial trick is that if 11.Bxe6 fxe6 12.Ba3 then Rf7 indirectly defends the d-pawn, since capturing it loses a piece to the pin: 13.Bxd6 Rd7 14.Rad1 Ne8 . ]

**11...Bxc4 12.Qxc4 Qc7** Now Black can defend d6 and in the long run the chances are all his; White's weaknesses on the c-file are very serious. **13.Rfd1 Rfd8 14.Rd2 b5 15.Qe2 a5 16.Rad1 b4** It looks a bit strange to remove the doubled pawn, but the one remaining on c2 is plenty weak enough on its own, and driving White's bishop out of play is more important. **17.Bb2 bxc3 18.Bxc3 Nb4 19.Bxb4 axb4 20.Nc1 Qc6 21.f3 h6 22.Qf2 d5 23.exd5 Rxd5 24.Rxd5 Nxd5** A horrid position for White to defend, even if it's possible. The rest is less interesting: **25.Nd3 f6 26.Qc5 Qxc5+ 27.Nxc5 Nc3 28.Rd7 Ne2+ 29.Kf1 Nd4 30.Rb7 Nxc2 31.Ne6 Ne3+ 32.Kf2 Nf5 33.Rxb4 Rxa2+ 34.Kg1 Ne3 35.g4 Kf7 36.Nd8+ Ke7 37.Nb7 Rg2+ 38.Kh1 Rf2 39.h3 Rxf3 40.Kh2 Nd5 41.Ra4 Nf4 42.Ra7 Rxh3+ 43.Kg1 Rg3+ 44.Kf2 Rxg4 45.Kf3 h5 46.Nc5+ Kd6 47.Ne4+ Ke6 48.Ra6+ Kf5 49.Nd6+ Kg6 50.Nc8 Nd5 51.Rd6 Rc4 52.Na7 Rf4+ 53.Kg3 Ne3 54.Ra6 h4+ 55.Kh3 Rf3+ 56.Kh2 h3 57.Nc6 Ng4+ 58.Kg1 Rg3+** Points to Remember: 1 It's not worth getting involved in any 6 Nb3 Bb4 7 Bc4 Nxe4 stuff because Black simply has the better chances anyway. 2 After 7 Bc4, the sequence ...Bxc3, bxc3 ... Be6, based on the trick in the note to White's 11th, is worth noting. 3 Don't be afraid to concede the b4-bishop for a knight to enforce ...d5. The central control this move gives Black is usually adequate compensation. Points to Remember: 1 It's not worth getting involved in any 6 Nb3 Bb4 7 Bc4 Nxe4 stuff because Black simply has the better chances anyway. 2 After 7 Bc4, the sequence ...Bxc3, bxc3 ...Be6, based on the trick in the note to White's 11th, is worth noting. 3 Don't be afraid to concede the b4-bishop for a knight to enforce ...d5. 44. Dutch League 2004
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Ne7 9.c4 Ng6 10.Bd3** No early queen sorties this time. White simply brings out a piece. The key question is whether d3 is a better square than e2 for the bishop. On d3, White risks tempo loss in the future if Black plays ... f7-f5 and ...e5-e4.

[Others: -- a) 10.Be3 a6 11.Nc3 Be7 12.Bd3 0-0 13.0-0 transposes to the main game. ]
[b) 10.Be2 Be7 11.0-0 0-0 12.Be3 a6 13.Nc3 Bg5 14.Bxg5 Qxg5 15.Ne4?! (this move actually loses, rather than gains time, since Black gets ...f7-f5 with tempo) Qd8 16.b4 was N. Nikolovski-Ki.Georgiev, Macedonian Championship, Skopje 2019. Black stands clearly better after f5 17.Nd2 a5 and if 18.a3 Nf4 , then ...Qg5 is coming and White is in danger. ]
[c) 10.h4 isn't as effective if it is played without the inclusion of Qa4. Play can continue a6 11.h5!? *(*after *11.Nc3* it's better not to accept the offer of White's h-pawn, since Black will have a hard time castling with White in charge of an open h-file, so *Be7 12.h5 Nh4* and Black is just fine as it is hard to see what White achieved with the mad pushes of the h-pawn *)* 11...Nh4 *(*taking on b5 is also fine for Black according to Komodo: *11...axb5 12.hxg6* is slightly in Black's favour *)* 12.Nc3 Be7 13.a4 0-0 14.a5 Nf5 15.Bd3 Bg5 and Black stood no worse, A. Rodriguez Vila-A.Shirov, Arica 2018. ]
[d) 10.g3 Be7 11.h4 e4! is fine for Black. We learned from Carlsen that Black should not be afraid to push the e-pawn to clear e5 for the g6-knight. ]
[e) 10.c5?! a6 11.Nxd6+ Bxd6 12.cxd6 Qxd6 , D.Janosevic-B.Filipovic, Pula 1988, saw White pick up the bishop pair, but he gave away too much for it, falling behind in development and taking on an isolated d-pawn. Black's kingside pawn majority will also later roll. ]

**10...Be7**

[The immediate 10...a6 doesn't alter much. ]

**11.0-0**

[After 11.c5 a6 12.Nxd6+ Bxd6 13.cxd6 Qxd6 14.0-0 , Black can draw (if he wants) with Qxd5 15.Bxg6 Qxd1 16.Bxf7+ Kxf7 17.Rxd1 Be6 . I can't see either side winning this. ]

**11...0-0 12.Be3 a6 13.Nc3 f5 14.f3**

[ 14.Qb3 , intending c4-c5 tricks, can be met by e4 . G.Fuchs-R.Hanel, Austrian League 2012, continued 15.Be2?! *(*White should have played *15.Bb6 Qe8* , which is about even *)* , when Black could have seized a strong initiative with 15...b5! and if 16.cxb5 then f4 17.Bd4 f3 18.Bd1 fxg2 19.Re1 Bg5 with a strong attack against White's vulnerable king. ]

**14...Bg5** An exchange of dark-squared bishops would allow Black's queen to swoop into the kingside. **15.Bf2**

[ 15.Qd2 Bxe3+ 16.Qxe3 Nf4 17.Ne2 *( 17.Rfd1 Qg5 18.Qd2 Bd7* also looks promising for Black *)* 17...Nxd3 18.Qxd3 was E.Meduna-D. Brock, Bayerisch Eisenstein 2012. I prefer Black's chances after b5! . Black has the superior majority and the bishop looks better than White's knight. ]

**15...Nf4 16.c5 Rf6!** The position is now similar to a Classical Dutch. This means the rook can be lifted into the attack along the third rank. **17.b4**

[If 17.Bc4 , V.Rohackova-A.Stojanovic, Mureck 1998, then dxc5 18.Bxc5 Kh8 and Black stands better. ]

**17...Rh6** Intending ...Qe8-h5.
[ 17...Rg6 is an option too, but White looks okay after 18.Ne2 Nxd3 19.Qxd3 Bd7 20.Rfe1 . ]
**18.Bc4?!** White doesn't have time to hang on to his bishop.
[ It was imperative to remove or chase away Black's powerful knight with 18.Ne2 . Then after Nxd3 19.Qxd3 Bd7 20.Rfe1 Black only stands slightly better. ]
**18...Qe8 19.Na4?** White's knight is clearly not X-Men material. Yes, Black's queenside may be falling apart. But it won't do White a damned bit of good if his king is mated.
[ 19.Kh1 is a better try. After Qh5 20.Bg1 Nxg2! 21.Kxg2 Bf4! 22.Kf2 Bxh2 23.Ke3 Qh4 24.Be2 Qxb4 White is in trouble, but not as much as in the game. ]
**19...Qh5** Threatening mate on the move. **20.Bg3** EXERCISE (combination alert): White's position is overpowered. Continue Black's attack. **20...Nh3+!**
ANSWER: Annihilation of defensive barrier. Step 1: Sacrifice the knight on h3. Acceptance is forced.
[ The sacrifice on h3 is stronger than 20...Nxg2?! , when after 21.f4! Nxf4 22.Qxh5 Nxh5 23.Nb6 Rb8 24.Nxc8 Rxc8 25.Rxf5 White has chances to fight on. ]
**21.gxh3**
[ If 21.Kh1 f4 , White can just resign. ]
**21...Be3+** Step 2: Give a bishop check on e3 and drive White's king into the corner. **22.Kh1 f4** Step 3: Push to f4, with tempo. **23.Be1 Bxh3** Step 4: Chop on h3 with the bishop. The computer already announces mate (in twelve) for Black, which is no surprise. **24.Qc2** The queen's situation is the story of the lonely widow who waits by the window for her husband each evening at 6:00 p.m., who will never return home.
[ If 24.Rg1 , Black forces mate with the pretty clearance trick Bf1! . ]
**24...Rg6!** Threatening ...Bxf1 and ...Rg1 mate. **25.Bc3 Bxf1 26.Rxf1** EXERCISE (combination alert): I forgot just how many stages of grief there are, but I'm certain this is the final one. Black to play and force mate in two. **26...Qxf3+!** Oh, the glory. ---
ANSWER: Queen sacrifice/attraction/ removal of the guard. **27.Rxf3** Well, why not die rich? **27...Rg1#**

□ **Granara Barreto,Sebastian A**
■ **Felgaer,Ruben Alejandro**
Buenos Aires 2004
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8 16.b3 Kh8 17.Nce3!** This move may be our biggest

challenge in this chapter, and it's not easy to find a path to full equality for Black. --- QUESTION: What is the idea behind this move? --- ANSWER: Nimzowitsch would be pleased. White over-over-protects d5 while suppressing ...f7-f5. On the other hand, one of the things I mentioned earlier was that White can only occupy d5 with one piece; the others kind of play the role of well-wishers.

[ 17.0-0 g6 18.Nce3 is another route to the position in the game. ]

**17...g6?!** This natural move may well be inaccurate. Now that White committed his knight earlier to e3, Black's ...g7-g6 and ...f7-f5 plan is all the more tempting, since in this version we can gain an attacking tempo with a future ...f5-f4.

[ However, there is one serious issue for Black after 17...g6 : White remains uncastled and has the option of a promising pawn sacrifice with 18.h4! . ]

[ Instead: -- a) QUESTION: Shouldn't we think about ridding ourselves of our bad bishop with 17...Bxe3 - ? --- ANSWER: Your suggestion is playable, and in fact Topalov plays in a similar fashion in Karjakin-Topalov. All the same, I don't really consider our dark-squared bishop to be 'bad' since it sits outside the pawn chain; and since White gave up his own dark-squared bishop, ours may later come in very handy in controlling the dark squares unopposed. So why give it up? It's not as if the e3-knight is going to jump to d5, to share the square with the knight which already occupies it. After 18.Nxe3 Ne7 (enforcing the ...f7-f5 break) 19.0-0 f5 20.exf5 Bxf5 *(* here *20...Nxf5* and if *21.Nxf5 Rxf5 22.Qd5* then *Rg5!?* might offer more counterplay *)* 21.Ra2 Be4 22.Rd2 Rb6 23.Re1 Qb8 24.Qa1 , I don't see Black's compensation for his weak a- and d-pawns, P.Leko-T. Radjabov, Morelia/ Linares 2008. ]

[ b) 17...Be6 seeks to defer ...g7-g6 until White has castled;

**A)** i.e. 18.0-0 g6 with similar play to our main game, albeit with the c8-bishop already committed. *( 18...-- )*;

**B)** 18.h4! is a strong alternative (cf 18 h4! in the main game), however, when P. Leko-T.Radjabov, Morelia/Linares 2006, continued 18...Bf4!? *(* not *18...Bxh4??* due to *19.Qh5* and wins*;* while *18...Bxe3 19.Nxe3 Bxc4 20.Nxc4 f5 21.0-0* leaves White with the better chances, J.Smeets-T.Kosintseva, Wijk aan Zee 2007 *)* 19.Nf5! *(* touché: rather than give Black a hook after *19.g3 Bxe3 20.Nxe3 Bxc4 21.Nxc4 f5* , White aims to create one for himself *)* 19...g6 20.Nfe3 and now instead of Kg7 , *(* Black should have opted for *20...Ne7 21.h5 Nxd5 22.Nxd5 Bg5* , when his control over the dark squares keeps his king relatively safe. I still slightly prefer White, due to his weakness-free structure and control of the light squares, but Black is not without counterplay; for example, *23.Qa1 gxh5! 24.Rxh5 f5 25.exf5 Bxf5 26.Rxa5 Be4 27.Ra7 h6* with full compensation for the pawn. *)* ]

[ c) 17...Ne7 looks like the safest move and is probably what I would play. Then 18.Nxe7 *(* or just *18.0-0 Nxd5 19.Nxd5 f5* transposing*;* while *18.h4 Bxe3 19.Nxe3 Bb7 20.Nd5 f5* is fine for Black, N.Pokazanjev-R.Mamedov, St Petersburg 2006 *)* 18...Qxe7 19.Nd5 *(* or *19.Nf5 Bxf5 20.exf5 e4 21.0-0 e3* with counterplay *)* 19...Qd8 20.0-0 f5 21.exf5 Bxf5 22.Qe2 Bd7 23.Ra2 Be6

24.Rd1 Rc8 has seen quite a bit of testing in correspondence games. White's light square control and pressure on d6 and a5 are perhaps worth more than our activity and two bishops; nevertheless, it is not easy for White to make progress, and CCGM Reinhard Moll has drawn four times from here as Black, seemingly without much difficulty. ]

**18.0-0**

[ By castling and transposing to our standard 17 0-0 g6 line, White misses the chance to go all out with the critical 18.h4! , trying to show that our plan with ...g7-g6 has weakened the kingside. Since the pawn will go on if the bishop retreats, Black has to accept the sacrifice with Bxh4 , after which the play becomes very sharp: 19.g3 Bg5 *( 19...Bf6 20.Ra2 Bg7 21.f4 exf4 22.gxf4 Re8 23.Rah2 h6 24.Qf3 Kg8 25.Qg2!* also gives White a very strong attack *)* 20.f4! (gaining more time to open more lines) exf4 21.gxf4 and now:

**A)** 21...Bh4+ 22.Kd2 Ne7! (playing to reduce the attacking forces) 23.Kc1 *(*if *23.Rxh4 Nxd5 24.Qh1 Nf6 25.Nd5* , B.Khatanbaatar-B.Tuvshintugs, Ulaanbaatar 2009, then *h5!* looks fine for Black*;* while *23.Qg1 Nxd5 24.Nxd5 Be6 25.Qh2 g5 26.fxg5 Bxg5+ 27.Kc2 h6 28.Raa1 Rg8 29.Rag1 Rg6 30.Nf4 Bxf4 31.Qxf4 Qf6 32.Rxg6 Qxf4 33.Rhxh6+ Qxh6 34.Rxh6+ Kg7 35.Rh5 Bxc4 36.bxc4* is just an equal ending, S.Karjakin-W.So, Al Ain 2008 *)* 23...Nxd5 24.Nxd5 Be6 (going after the other knight as well) 25.Qd4+ Kg8 26.Ra2 *(*if *26.Kb1 Bxd5 27.Qxd5 Bf6 28.Kc2 Qb6 29.Rf1 Qe3 30.Qd3* , D.Jakovenko-A.Shirov, Foros 2007, then *Qxd3+ 31.Kxd3 Bd8* gives Black the better chances according to Rogozenko *)* 26...Bxd5 27.Qxd5 Qf6 28.Qd2 Bg3 29.Rf1 d5! *(*Rogozenko's improvement on *29...h5 30.Rxa5 Ra8 31.e5 Qf5 32.Rxa8 Rxa8 33.Kb2 h4 34.Qxd6* , V. Topalov-P.Leko, Linares 2005, although he says that *Bxf4!* would also have been okay for Black *)* 30.Bxd5 *(*or *30.exd5 Rfe8 31.Rf3 Qh4 32.d6 Re4 33.Ra4 Kg7 )* 30...g5! (showing the point of deflecting the white bishop: the f-pawn is now pinned to the f1-rook) 31.Kb2 Bxf4 32.Rxa5 Rbc8 *(*it is acceptable to chicken out with *32...Bxd2 33.Rxf6 Kg7* , reaching a level endgame *)* 33.Qd3 , O.Korneev-M.Devereaux, Port Erin 2006, and here Rogozenko recommends Rc7 34.b4 *(*not *34.Ra6? Rxc3 )* 34...Rfc8 35.Ra3 h5 , when Black should not be worse.;

**B)** 21...Bh4+ 22.Kf1! is, unfortunately, a significant improvement for White, whose attack is now exceedingly dangerous: f5 23.Ra2! (intending to swing the rook over to h2) fxe4 24.Rah2 g5 25.Qh5 Rb7 *( 25...Ne5 26.Ke2! Nxc4 27.fxg5 Rxb3 28.Rxh4* doesn't exactly fill me with confidence either *)* 26.Ke2 Be6 27.Qh6 Bg8 *( 27...Bxd5 28.Nxd5 Rff7 29.Qe6!* is very good for White, N. Kolpakov-V.Kurgansky, correspondence 2013 *)* 28.Rg2! Bxd5 *(*certainly an improvement on *28...Rbf7? 29.Rxh4! gxh4 30.Nf5 h3 31.Nh4!* , threatening mate on the move, when *Qxh4 32.Rxg8+ Rxg8 33.Qxh4* didn't give Black anything like enough for the queen, A.Giri-A. Shirov, 6th matchgame, Hoogeveen 2014 *)* 29.Nxd5 Ne7 30.Rxg5 *(*if *30.Nxe7 Rxe7 31.fxg5* then *d5 32.Bb5 Qb8! )* 30...Nxd5 31.Rxd5 Bf6 32.Rdh5 Qe7 33.Qg6 *(*or *33.Bd5*

*Qg7 34.Qxg7+ Rxg7 35.Bxe4 Re8 36.Kf3 Ree7 37.c4 Bc3 38.Rh6 Rgf7! 39.Rxd6 Rxf4+* etc, A.Agrafenin-D.Trebizan, correspondence 2012 *)* 33...Qg7 34.Qxe4 Re7 35.Rxh7+ Qxh7 36.Rxh7+ Rxh7 37.Qe3 Rc8! 38.Qg3 Bg7 and Black's control of the dark squares enabled him to hold after a long struggle, V.Grigoryev-R.Nickel, correspondence 2014. --- As Giri said in his post match interview: "[22] Kf1 is maybe not winning, but it poses Black very serious problems", who then "has to find a series of extremely difficult moves", just to have the chance to try and draw a difficult endgame. So, while Black may have the available resources to defend, it is probably not practical (or indeed desirable) to attempt to do so over the board, and I would recommend choosing something other than ...g7-g6 on move 17. Of course, if White plays 17 0-0 first and meets 17...g6 with 18 Nce3, then we're back in our main game. ]

**18...Bh6** As we have seen in earlier games, this move makes room for either ...Qh4 or ...Qg5.

[ The immediate 18...f5 is played more often; for example, 19.Qf3!? (an unusual way of preventing ...f5-f4-f3, since the queen is obviously a shade uncomfortable under the f8-rook's glare) *(* instead, *19.exf5 gxf5 20.f4 exf4* is similar to the game *)* 19...Be6 20.Rd1 Qd7 21.h3 Qg7 22.Nf1 Bd7 23.Nde3 f4 24.Nd5 Bd8 25.Ra2 Ne7 26.Nxe7 Qxe7 27.Rd3 g5 and Black's potential for a kingside attack easily compensates for his inferior structure, E.Riccio-D.Lafarga Santorroman, correspondence 2009. ]

**19.Qe2**

[ If White intends to follow up with e4xf5 and Qh5 (as in the game), he might find something else to do here, such as 19.Ra2 ]

[ or 19.Kh1 , though Black can stick to his plan in any case. ]

**19...f5 20.exf5** Otherwise White faces ...f5-f4-f3 again. **20...gxf5 21.Qh5**

[ The alternative is 21.f4 exf4 22.Qh5 Qg5 23.Qxg5 Bxg5 24.Nxf4 Bd8 25.Kh1 Re8 26.Nfd5 Ne5 27.h3 Rf8 28.Ra3 with a dynamically balanced ending, where White's superior structure is counterbalanced by Black's bishop pair and potential dark square control. The players in fact agreed to a draw at this point in A.Remde-S.Istomin, correspondence 2009. ]

**21...Qg5**

[ Black should avoid 21...Bg7? 22.g4! Ne7 *(* or *22...e4 23.gxf5 Ne7 24.f6 Bxf6 25.Nxf6 Rxf6 26.Rxa5 )* 23.Nxe7 Qxe7 24.Nxf5 Bxf5 25.gxf5 and White stands better, not so much due to the extra pawn, more the superior opposite-coloured bishop, O.Kozlova-T.Shumiakina, Warsaw 1999. ]

**22.Qxg5 Bxg5 23.g3** Sometimes a new move is made in the name of progress, rather than because it's good. White prepares to break with f2-f4, but this is too slow and he never gets the chance.

[ He had a better shot for an edge with 23.Nc7 , as in L.Karasek-D. Bobarnac, correspondence 2008, where I would have gone for f4! 24.Ned5 Bd7 25.Rfa1 e4 with equal chances in a complex ending. ]

**23...f4!** I begin to nurse paranoid suspicions of treachery from my opponent, when

even one of his pawns passes the central demarcation barrier, and enters the vicinity of my king. By preventing White's intended f2-f4, while opening the position for his bishop pair, Black achieves dynamic equality. **24.Ng2 Bh3 25.Rd1 Bg4 26.Rf1** White, the lower-rated player, would be happy with a repetition draw against the GM. **26...Rb7 27.f3 Bh3 28.Ra2**

[QUESTION: Why doesn't White close the kingside with 28.g4 - ? --- ANSWER: The kingside is anything but shut down after e4! 29.Be2 *(*or *29.fxe4 f3 )* 29...exf3 30.Bxf3 Rxb3 with a clear advantage for Black. ]

**28...Bd8!? 29.Kh1**

[White plays it safe, declining the invitation of 29.gxf4 Rbf7! , when he must return the pawn. ]

**29...Ne7 30.Nxe7 Rxe7 31.gxf4** White can't avoid this move forever, since at some point Black can play his bishop to b6, trade on g3 and then lift a rook to f6, intending to swing it to h6. **31...exf4 32.Rff2 Bb6** Black's structure may be worse but his nasty bishops outweigh this factor. **33.Rfe2 Re5 34.Rad2 Rf6 35.Rd1** White can only wait to see how Black plans to open the game. **35...Kg7** Another advantage: Black's king is activated, while White's remains frozen on h1. **36.Rde1 Rg5 37.Nh4 Be3**

[Another way was 37...d5 38.Bd3 Rc6 39.c4 dxc4 40.Bxc4 Bc5 41.Ra2 Rh6 42.Ng2 Bd7! , when White must avoid 43.Rxa5?? in view of Rxh2+! 44.Kxh2 Rh5+ 45.Nh4 Rxh4+ 46.Kg2 Bh3+ 47.Kh2 Bf1# . "Is pride truly a sin if one backs up one's claims with results?" asks the bishop. ]

**38.Ng2 Bc5 39.Bd3 d5** It isn't easy for Black to make progress against White's attempted fortress, especially with so few pawns remaining on the board. **40.Ra1 Bb6 41.Rae1 Rf7 42.Nh4?** Having "parked the bus" White decides now to "pass", but this move was a serious mistake.

[ 42.c4! was correct, when it's difficult to see how Black can win. ]

EXERCISE (planning/combination alert): White's last move allows a forced win, if you discover the accurate continuation. **42...Kh6?** Alas, h6 is only a temporary paradise. The GM spots the right idea, but selects the wrong square for the king. With this inaccurate move he introduces a detrimental element to his intended pattern.

[ANSWER: Clearance/mating net. The correct move was 42...Kf6! , after which the web-like interrelation between White's king and his defenders snap. The decisive threat is 43...Rfg7, when White must hand over a piece to avoid mate on g1. There is no attention-grabbing narrative blatant as when our opponent suddenly lunges at our king. ]

**43.Ng2 Bc5**

[QUESTION: Why doesn't the same plan with 43...Rfg7 still work? --- ANSWER: It fails to the counter-combination 44.Re6+! (this move isn't possible with Black's king on f6) Bxe6 45.Rxe6+ R7g6 *(*not much choice, since *45...Kh5??* runs into *46.Nxf4+ Kh4 47.Rh6+ Rh5 48.Rxh5# )* 46.Bxg6 Rxg6 47.Nxf4 which leaves White a pawn up, with all the winning chances. Note that ...Rg1 mate is a mere

fantasy, since the rook is pinned to the king. ]

**44.Ra1 Rfg7 45.Raa2** How frustrating for Felgaer. White's fortress adheres for the time being. **45...Bb6 46.Rec2 Re7 47.Ra1!**

[ Avoiding the cheapo 47.Re2?? Bxg2+! (deflection/weak back rank) 48.Rxg2 Re1+ 49.Rg1 Rgxg1# . I think this one should count as an X-ray double checkmate! ]

**47...Reg7** A line-up like this is designed to shake an opponent with even a bedrock of equanimity. **48.Bf1** I'm not so sure if this is the balm which soothes the wound.

[ It isn't clear to me how Black makes progress after 48.Raa2 . ]

**48...Rh5 49.Rd1?**

[ It was better simply to return the bishop with 49.Bd3 . It isn't easy to defend under such prolonged pressure, which sometimes feels like we are the condemned prisoner who watches the carpenter meticulously construct our gallows, just outside our cell. ]

[ White's biggest issue is his tied down knight, which hinders defensive communication. He is unable to play 49.Nxf4?? due to Rg1# . If you are a fugitive at large, in a populated city, the worst thing you can do is to run, and call attention to yourself. ]

EXERCISE (combination alert): White's last move allows Black a winning combination. But where? --- ANSWER: Clearance/mating net. **49...Rhg5?** When we are the ones in control, we must be on guard for a slackening of our calculations.

[ Here Black missed 49...Rg3!! , threatening 50.-- Bf5 and 51.-- Rxh2+ 52.Kxh2 Rh3# ]

[ while 49...Rg3 50.hxg3 allows Bg4+ 51.Nh4 Bxf3+ 52.Kh2 Bxd1 53.Rd2 Bxb3 and White can resign. ]

**50.Rcd2 Be3 51.Rc2 R7g6 52.Ra2 Kg7 53.Rc2 Ba7 54.Re2 Bb6 55.Re7+ Kf8 56.Re2 Rh6** The rook goes back to eye h2 with the longing of a starved fox, staring into the barrier of the chicken coop. **57.Rde1?** Bland indifference is an odd reaction in a crisis. I suppose that when you pepper an opponent with irritating threats for a prolonged period, it tends to exert a cumulative effect.

[ White had to play 57.Red2 . White could then have answered the equivalent Be6 with 58.Bd3! , when Rxh2+ 59.Kxh2 Rh5+ 60.Nh4 Rxh4+ 61.Kg2 gives Black no more than a draw. ]

EXERCISE (combination alert): How to make this monstrously immovable object budge? --- ANSWER: Step 1: Clearance/endgame mating net. **57...Bd7!** Clearing the h-file for the forthcoming combination. You can't expect a grandmaster to keep passing up chances. **58.Re5** Unfortunately, unlike the note above with 57 Red2, 58 Bd3 is impossible since the white rook is in the way. **58...Rg3!** The euphoria of spotting a mating pattern is similar to being slightly drunk, and then noticing someone attractive. The rook initiates the attack and his h6-brother soon follows suit. **59.R1e2 Rxh2+!** A good district attorney never brings a case to trial unless the verdict's outcome is a foregone conclusion of "Guilty!".

[ After 59...Rxh2+ , 60.Kxh2 Rh3# . White's king sighs sadly, as he gazes down

on the instruments of his new profession: a mop and bucket. --- SUMMARY: An important issue with 17 Nce3! is that White remains uncastled and can meet 17... g6 with the promising pawn sacrifice 18 h4!. So, via this move order, we should consider 17...Bxe3, 17... Be6 and 17...Ne7 as alternatives to our normal plan. On the other hand, if White plays 17 0-0 and 18 Nce3, then 17...g6 is even more effective, as White must be on the look-out for ...f7-f5-f4. ]

34. Correspondence 2003
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 b5 10.Nd5 f5 11.c4** This position is similar to, but not the same as, the ones involving c3-c4 we examined in the previous chapter. In this version two factors are altered: -- 1. Black's f-pawns are doubled. -- 2. White's e-pawn is under attack. Black actually proceeds exactly as we did last chapter by pushing the b-pawn with ...b5-b4 and not fearing Qa4. **11...b4 12.Qa4!?**
This adventurous move is inherently in Black's favour, although care is needed, since great complications arise.
[Instead, after 12.Nc2 fxe4 13.g3 Bg7 14.Bg2 0-0 15.Bxe4 Rb8 16.b3 f5 17.Bg2 e4 18.Rb1 Qa5 19.0-0 Qxa2 20.Nde3 Qa5 21.Qxd6 Rf6 22.Qf4 Qe5 23.Qxe5 Nxe5 24.Nd5 Rf7 25.Ncxb4 Black got full compensation for the sacrificed pawn, H.Nakamura-B.Gelfand, Moscow 2013. This game is annotated in 'Sveshnikov: Move by Move'. ]
**12...Bd7**
[Let's try not to fall for the boneheaded trap 12...bxa3?? 13.Qxc6+ Bd7 14.Qxa8! , when Black can resign. ]
**13.Nb5!** The only move, as can be seen:
[a) 13.Nxb4?? Nd4 14.Qd1 Rb8 15.Nac2 Ba4! 16.b3 Qa5 17.Nxd4 Qxb4+ 18.Qd2 Qxd2+ 19.Kxd2 exd4 20.bxa4 fxe4 and White is completely busted in the ending. ]
[b) 13.Nb1? Nd4 14.Qd1 fxe4 15.Nd2 Bg7 16.Nxe4 0-0 17.Be2 a5 18.Nd2 f5 , when White lost tempi regaining the e4-pawn and has already landed in a rotten position. ]
**13...axb5!** Black accepts the challenge. **14.Qxa8 Qxa8 15.Nc7+ Kd8 16.Nxa8**
Black has entered an ending a full exchange down but has plenty of compensation; in fact I slightly prefer Black's chances. In the Sveshnikov Black will constantly be either down material or in possession of a wretched structure. In both cases ferocious piece activity usually compensates, as it does here. **16...Nd4 17.Rd1?!**
[Here 17.Kd1?! is also poor; e.g. fxe4 (threatening ...Bg4+ and ...Bh6+, followed by ... Nc2+, picking off the a1-rook) 18.h3! (V.Cobic-D.Stankovic, Bela Crkva 1987). Black is close to winning after Be6 19.Nb6 Bh6! 20.a4 bxa3 21.Rxa3 Kc7 22.Nd5+ Kb7 23.Ne3 Rc8 , as White is fighting for his life, despite the extra exchange. ]

[ However, White has an improvement in 17.Bd3! . Everyone seems to (falsely) believe this move is unplayable. It isn't and White may actually save the game with it. I hate to offer suggestions to help our opponents, yet our goal in chess is to follow knowledge, wherever it takes us. For example: fxe4 18.Bxe4 bxc4 19.Nb6 f5 20.Bd5 *(* not *20.Bb1?? Bc6 21.0-0 Rg8 22.f3 Nxf3+ 23.Kf2 Nxh2 24.Rg1 d5* , when ...Bc5+ is coming and White can resign *)* 20...c3 21.bxc3 bxc3 22.Nxd7 Kxd7 23.Rc1 c2 24.Bb3 Bh6 25.Rxc2 Nxc2+ 26.Bxc2 Ke6 . Black stands a touch better but the ending should be drawn with correct play. ]

**17...fxe4 18.cxb5 d5 19.Nb6 Be6 20.h3?** This is an act of omission White can ill afford.

[ He had to try 20.Na4 Rg8 21.h3 Bh6 22.Be2 Rxg2 , when White is struggling but has more chances than in the game. ]

In such dire positions, even a single inaccuracy may be the last. Black is still down a full exchange, yet he stands clearly better for many reasons: -- 1. A monster knight on d4. -- 2. The bishop pair in an open position. -- 3. Dark-square domination. -- 4. A massive pawn centre which will later roll forward. -- 5. White's knight is out of play. -- 6. White's kingside pieces are in desperate need of employment. -- 7. Believe it or not, White's king is unsafe, as we discover in the coming combination alert. --- EXERCISE (combination alert): White's misery index is way too high. How did Black convert his overwhelming strategic advantages into a combination? **20...b3!** ANSWER: Step 1: Clearance. Black threatens a devastating bishop check on b4.

**21.a3 Nc2+** Black finally takes the fight to White's shores. **22.Ke2**

[ 22.Kd2? merely hands Black a free tempo. After Bh6+ White's king must head for e2 all the same, since 23.Kc3?? allows d4+ 24.Rxd4+ exd4# . ]

**22...d4** Step 2: Clearance once again. Black opens the c4-square and creates the threat of ...Bc5, followed by ...Bc4+. The second point is that by pushing the pawn to d4, Black traps the white knight, as it can no longer escape via the route a4 and c3.

**23.f3**

[ Or 23.Rd2 Kc7 24.Na4 Bd6 25.g4 Ra8 26.b6+ Kb8 and White's knight is trapped. ]

**23...Bc5 24.Na4 d3+**

[ If 24...d3+ 25.Kd2 Be3+ 26.Kc3 Bd4+ 27.Kd2 e3+! 28.Kxd3 Ke7 29.Nc3 Rd8 , Black threatens ...Bxc3+ and ...Rxd1, while 30.Be2 *( 30.Rc1 Bb6+* also forces mate *)* 30...Bb6+ 31.Ke4 f5+ 32.Kxe5 Bc7+ 33.Rd6 Bxd6# is mate. ]

**0-1**

**B33**

□ **Morozevich,Alexander**
■ **Van Wely,Loek**
Melody Amber (rapid), Monaco 2003
*[Richard Palliser]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nde2 Bc5** Actively developing a bishop which is normally initially restricted (after 6 Ndb5 d6) in the Sveshnikov, and now the position takes on many features of the Open Games (1 e4 e5 openings). White must especially beware an early accident on f2 and needs to develop patiently, aiming to gradually exploit his positional trumps. **7.Ng3 h5!? 8.Bg5!** Actively countering Black's ambitious play. It is possible that Morozevich had studied Teschner-Richter, the stem game for 6 Nde2, in which a similar motif occurred, but I suspect that in any case this sacrifice quickly appealed to a mind as creative as his. **8...Qb6**

[ROLL THE DICE! In a blitz game Black might even go in for immediate tactics against f2, although it doesn't require much calculation to see why they fail. After 8...Ng4?? 9.Bxd8 Bxf2+ 10.Ke2 Nd4+ 11.Kd2 Be3+ 12.Kd3 b6 13.Nd5 Nf2+ 14.Kxe3 Nxd1+ 15.Rxd1 White simply emerges a whole piece ahead. ]

[He also does after 8...Bxf2+?? 9.Kxf2 Ng4+ 10.Qxg4! Qb6+ 11.Be3 , but Van Wely's choice, attacking both b2 and f2, appears rather more problematic. ]

**9.Qd2 Qxb2?**

[DANGEROUS WEAPON! Morozevich is renowned for his tactical vision and must have quickly realized that 9...Bxf2+? 10.Qxf2! Qxb2 11.Nd1 Qxa1 12.Bxf6 gxf6 13.Qxf6 is a very promising exchange sacrifice. Indeed, Black would do well to survive the attack which both Bc4 and Nf5 are set to reinforce: for example, Rh7!? 14.Nf5 Qxa2 15.Nd6+ Kf8 16.Bc4 Qa5+ 17.c3 Qd8 fails to defend in view of 18.Qf5 Rg7 19.0-0 Qe7 20.Qxh5 when White's extra firepower decides. Van Wely grabs the other pawn, but this also fails to convince. Evidently he had never properly studied 6 Nde2 and his overly ambitious play should soon have caught up with him. ]

[Black had to find 9...Ng4 , although after 10.0-0-0! *( 10.Nd1* is also possible and leads to a rather obscure position after *f6 11.f3 Nf2 12.Nxf2 Bxf2+ 13.Qxf2 Qxb2 14.Rd1 fxg5 15.Qd2 Nd4 16.Bd3 )* 10...Bd4 *( 10...Nxf2? 11.Na4! Qb4 12.Nxc5 Nxd1 13.Qxb4 Nxb4 14.Kxd1* clearly favours the pieces over the extra rook *)* 11.Bc4 Nxf2 12.Rhf1 0-0 13.Rde1 the position remains quite dangerous for Black, if also far from clear, with 14 Nxh5 followed by a sacrifice on f6 most certainly a threat. ]

**10.Rb1 Qa3 11.Bxf6 gxf6 12.Rb3** Not only is Black's structure a wreck, but it also turns out that his queenside pieces are far from well coordinated. **12...Qa5 13.Rb5! Qa3 14.Nd5 a6?**

[ 14...Kf8 15.c3 , followed by Nf5 or by Be2 and Nxh5, would have given White

excellent compensation, but Van Wely's choice should have cost him material. ]
[ After 14...a6? , Morozevich presumably rejected 15.Rxc5! Qxc5
**A)** 16.Nc7+ Kf8!? 17.Nxa8 Ne7 *(* desperately trying to cover the c7-square; instead *17...h4* is rebuffed by *18.Ne2 d5 19.Qc3;* , and *17...Nd4 18.c3 Ne6 19.Nf5 d5!?* by *20.exd5 Ng5 21.Ne3 Ne4 22.Qb2* when again the knight escapes *)* 18.Be2 b6 19.0-0 . Now Black can corner the knight with either h4 *(* or *19...Bb7 20.Qxd7 Bxa8 21.Nxh5 )* 20.Nh5 Qc6 21.Qb4 Qxa8 22.Qxb6 , but both leave Black's position in a complete mess and White with a huge advantage.;
**B)** 16.Nc7+ Kd8 , covering the c7-retreat square, appears more natural, but leaves the black king rather vulnerable and is also too slow; for example, 17.Nxa8 Ne7 *( 17...Qa7? 18.Qd6!* is just one problem *)* 18.Be2 h4 *(* or *18...b6 19.Nxh5 Bb7 20.Nxf6 d6 21.Nxb6 Qxb6 22.0-0 )* 19.Nh5 b6 *(* and not *19...b5?! 20.Qa5+ )* 20.Nxf6 Qc6 finally traps the errant knight, but at too great a cost as 21.Nd5 Qxa8 22.Qg5 leaves White with a crushing bind. SMOKING GUN: It's a mystery as to why Morozevich rejected taking the rook as doing so would have refuted Van Wely's rather ambitious approach.;
**C)** 16.Nc7+ due to fears that the knight would be rounded up, but that is far from easy for Black to do: ]
Instead, he continued **15.Rb3 Qxa2 16.Be2** and eventually triumphed after a fluctuating struggle: **16...Nd4 17.Rc3 d6 18.0-0 Be6 19.Nxf6+ Kf8 20.Bd3 Qa5 21.Rb1 h4 22.Nf5 Bxf5 23.exf5 b5 24.Bf1 h3 25.Nd7+ Ke8 26.Nxc5 dxc5 27.Qe3 Qc7 28.Qe4 Ke7 29.Re3 Kf6 30.c3 Nc6 31.g4 Rag8 32.Rg3 Rg5 33.Bxh3 Na5 34.Ra1 Qb6 35.Re3 Nc4 36.Rg3 Rd8 37.Bg2 Nd2 38.Qe2 c4 39.h4 Rgg8 40.Rd1 Qd6 41.Qe3 Ke7 42.g5 Rd7 43.g6 fxg6 44.fxg6 Rxg6 45.Rxg6 Qxg6 46.Rxd2 Rxd2 47.Qxd2 a5 48.Qd5 Qb6 49.Qxe5+ Kd7 50.h5 a4 51.Bh3+ Kd8 52.Qg5+ Kc7 53.h6 a3 54.h7**

Dubai 2003
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5**
The threat of a knight check on c7 forces our hand. --- QUESTION: Why would White openly violate the principle: "Don't move a piece more than once in the opening, unless absolutely necessary?" --- ANSWER: With this move White creates an immediate imbalance of kingside versus queenside pawn majorities, since he plans to recapture with the e-pawn. This in turn causes our side to lose time retreating the c6-knight; so in effect, White doesn't lose any time at all with 7 Nd5.

[ Just so you don't get surprised, here are a couple of rarely played seventh move alternatives: -- a) 7.Be3 a6 *( 7...h6!?* transposes to a line of the Ulfie in Chapter Six *)* 8.Na3 b5 9.Nd5 (threatening Bb6 and Nc7+) Nxd5 10.exd5 *(* this seems like an inferior version of 7 Nd5 line, but *10.Qxd5 Bb7* doesn't trouble Black either *)* 10...Ne7! (we go back this way here since we can gain a tempo on White's important dark-squared bishop) 11.c4 (the point of White's play, opening the queenside; if we take, then the a3-knight gets back into the game) Nf5! 12.Bd2 *(* after *12.cxb5?! Nxe3 13.fxe3 Qh4+ 14.g3 Qe4* , Black regains the pawn with advantage *)* 12...g6! (we play the position as a sort of Benko Gambit) 13.cxb5 Bg7 14.Bc4 *(* or *14.bxa6 0-0 )* 14...e4 and Black's initiative, lead in development, and potential open queenside lines are worth White's extra pawn, D.Kappes-R.Heinke, correspondence 2007. ]

[ b) 7.a4 is also played occasionally. --- QUESTION: How do we respond, now that we can't enforce a ...b7-b5 break? --- ANSWER: It's true that we can't advance our b-pawn; on the other hand, preventing this has cost White a tempo and weakened the b4-square. For example, a6 8.Na3 Bg4! (provoking White's next move) 9.f3 *(* if *9.Be2* then *Bxe2 10.Qxe2 d5* equalizes *)* 9...Be6 10.Bc4 *(* or *10.Be3 Nb4 11.Nc4 d5 12.Bb6 Qe7 13.exd5 Nbxd5 14.Nxd5 Nxd5 15.Bf2 Rd8* and White found himself in serious trouble, K.Müller-V.Babula, German League 1998 *)* 10...Rc8 11.0-0 *(* or *11.Bg5 Be7 12.Bxf6 Bxf6 13.Nd5 0-0 14.c3 Bg5 15.Ne7+* with a perfectly good position, M.De Jong-E. Moradiabadi, Dieren 2010 *)* 11...Nb4! 12.Nd5 Nbxd5 13.exd5 Bd7 *(* or *13...Bf5 )* 14.c3 Be7 15.Kh1 0-0 and Black looks just fine, Xie Jun-V.Kramnik, Monte Carlo (rapid) 1996. ]

**7...Nxd5 8.exd5** Suddenly a major imbalance arises, where each side is presented with a wing majority, ours on the kingside and White's on the queenside. The question boils down to: can we hinder or stall our opponent's majority, while activating our own?

[ Taking with the queen makes no sense here, as White faces a developmental backlash: 8.Qxd5? a6 9.Na3 *(* if *9.Nc3? Nd4* , White must move his king to d1, since *10.Bd3?? Rb8* threatens to trap the queen with ...Be6, and *11.Qc4 b5* wins a piece *)* 9...Be6 10.Qd1 d5 11.exd5 , Z.Milosavljevic-M.Bozic, Serbian Team Championship 2004, and after Qxd5 , Black stands clearly better. ]

**8...Nb8** Black's most popular move, and the choice of most top GMs. By playing to b8, we intend to redeploy to d7, which hinders White's natural c4-c5 break in the future. In any case, d7 just feels like the best outpost for the knight, since from there it can also transfer to either e5 or f6 in pursuit of kingside chances.

[ We won't look at the alternative, 8...Ne7 , since I would rather concentrate on mastery of one line than dilute the chapter with two. ]

**9.c4** White's main move, logically activating his majority. He ensures that, after Black plays ...a7-a6, he won't block his queenside majority and c-pawn with Nc3.

[ Instead: -- a) 9.a4!? is examined in Nakamura-Gelfand at the end of the chapter. ]

[ b) 9.Bd3 a6 10.Nc3 (White gets an inferior version of the main line, since his knight hinders his c-pawn) Be7 11.Qh5!? (this move, which is at variance with the

normal plans of such positions, prevents Black from castling, which is all the good I can see in it; piece play without pawns in such a position feels like an ineffective strategy) Nd7 12.Be3 Nf6 13.Qf3 , K.Yap-W.So, Asian Championship, Cebu 2007, and now after Ng4 14.Bd2 f5! 15.Bxf5 0-0 16.Qxg4 Bxf5 17.Qd1 b5 , Black already looks slightly better. It feels to me that his bishop pair, lead in development, and open f-file more than compensate for White's extra pawn. ]
[c) 9.c3 a6 10.Na3 *( 10.Qa4 Nd7 11.Qa3?* is effectively met by *Nb6! 12.Be3 Nxd5 13.0-0-0 Be6 14.Qa4 Ke7! 15.Na3 Nxe3 16.fxe3 Rc8* and White doesn't have anything for his missing pawn, since Black's king can unravel with ...f7-f6 and ...Kf7 *)* 10...Nd7 11.Be2 Be7 12.0-0 0-0 13.Kh1 f5 14.f4 Qc7 15.Be3 exf4 16.Bxf4 g5!? 17.Be3 Ne5 18.Nc2 and the knight has finally reached a promising square but at the cost of an enormous wastage of time. Black's kingside assault looks more promising than White's central and queenside play, M.Packalen-L. Schandorff, Stockholm 1998. ]
[d) 9.Be3 a6 *( 9...Be7* is also possible; White actually doesn't threaten a7 just yet, since Black has ...Rxa7 and ...Qa5+ tricks, picking up two pieces for a rook and pawn, but I doubt any player rated over 800 will fall for this *)* 10.Na3 (the idea is to bind Black on the queenside with Nc4 and a2-a4-a5) Nd7 *(*Black should avoid *10...b5?! 11.c4* , opening the queenside; this is the 7 Be3 line above with Black playing 10...Nb8?! rather than 10...Ne7! *)* 11.Qd2 Be7 12.Nc4 0-0 13.a4 b6! (alertly avoiding White's intended bind with a4-a5) 14.Be2 a5 *(*the immediate *14...f5* looks good too *)* 15.0-0 , M.Narciso Dublan-F.Vallejo Pons, Spanish Championship, Leon 2006, and here I would play f5 , when Black's chances look fully equal since his majority is fluid, whereas White's on the queenside stalls, and I don't believe White is able to exploit the apparent light square holes. ]
[e) 9.Qf3 was covered by IM Jeroen Bosch in the 'Secrets of Opening Surprises' series. --- QUESTION: What on earth is the point of this move? --- ANSWER: The idea is to swing the queen over to a3, where it nullifies ...a7-a6, while adding pressure to d6. For example, a6 10.Qa3 Be7 11.Bg5 *(*oh, such dirty tricks: *11.Bg5 Bxg5? 12.Nxd6+ Kf8 13.Nxc8+ Kg8 14.Nd6* is good for White, since *Be7?* fails to *15.Nxb7 Bxa3 16.Nxd8 Bxb2 17.Rb1 Bc3+ 18.Ke2 Nd7 19.Nc6* with a winning ending for White *)* 11...f6 12.Bd2 0-0 13.Bb4 (is d6 falling?) Qd7! (no!) 14.c4 *(*not *14.Nxd6?? a5 15.Bc5 b6 16.Bb5 Qc7* and White loses material*;* or *14.Bxd6?? axb5 15.Qxa8 Qxd6* , when Black's two minor pieces far outweigh White's rook and pawn *)* 14...b6! (now ...Bb7 is coming) 15.Nc3 (sound the retreat) f5 and Black looks better already, since White's ineffectively clustered pieces make an odd impression on the queenside, M.Solleveld-E. Alekseev, Santo Domingo 2003. ]

**9...Be7** There is no rush for .. .a7-a6, since we can gain the tempo later.
[This move order avoids annoying ideas like 9...a6 10.Qa4 Nd7 11.c5! , after which I prefer White's position. ]

**10.Be2**
[On e2, the bishop stays out of the way of a future ... Nc5 or ...e5-e4 tempo gain,

which is a constant feature after 10.Bd3 (Saksis-Balabaev) ]
[ as well as 10.c5!? 0-0 11.Bd3 (Hofer-Percze). ]

**10...0-0 11.0-0 a6** Black finally gets around to booting the b5-intruder before activating his kingside majority. **12.Nc3 f5** We will mostly concentrate on this logical move.

[ Black can also develop with 12...Nd7 before pushing the f-pawn. We will see an example of this move order in Ruiz-Moiseenko. Note here that 13.Qc2 f5 14.f4 Bf6 transposes to our main game below. ]

**13.f4** White can either challenge Black's majority forcefully with f2-f4, or play to restrain it with f2-f3. We look at both plans in this chapter: f2-f4 in the first three games, and f2-f3 in Rombaldoni-Krasenkow and Saksis-Balabaev.

[ Another possibility is 13.Rb1!? (the idea is to play b2-b4 and c4-c5 as quickly as possible) Nd7 14.b4 e4 (clearing e5 for his pieces) 15.c5! Ne5 (Black should always think carefully before taking the advancing c-pawn since doing so activates White's game) *(* here after *15...dxc5? 16.d6 Bf6 17.Nd5 cxb4 18.Qb3 Kh8 19.Nc7 Rb8 20.Ne6 Qe8 21.Nxf8 Qxf8 22.Qxb4* , Black doesn't have enough for the exchange *)* 16.Bb2 Bd7 17.a4 Bf6 18.Rc1 Kh8 19.Ba3 Ng6 20.f4 exf3 21.Bxf3 Ne5 22.Qb3 Rc8 23.Be2 Bg5 24.Rcd1 dxc5! (now it's okay) 25.bxc5 Be3+ 26.Kh1 Bxc5 and Black stood clearly better, J.Polgar-S.Karjakin, Bilbao (blindfold rapid) 2007. ]

**13...Bf6**

[ QUESTION: Why not create a connected and passed central pawn with 13...e4 - ? --- ANSWER: Believe it or not, I feel this move is a slight strategic error, since Black's majority then loses its mobility which, in my opinion, is too high a price. For example, 14.Be3 Nd7 15.Qd2 b6 16.b4 Bb7 17.Rfd1 h6 18.Rab1 Rb8 19.Na4 Qc7? *(* Black should make do with *19...Bc8* and an inferior position, mainly since his kingside plans stalled *)* 20.c5 bxc5 21.bxc5 1-0 S.Tatai-M.Figus, Turin 2000. This isn't a premature resignation on Black's part; he is unable to capture on c5, while after Bc8 22.Rxb8 Qxb8 23.c6 Nf6 24.Nb6 Bd8 25.Rb1 , his position looks strategically hopeless. ]

**14.Qc2**

[ In the next game White tries 14.Kh1 Nd7 15.a4 *(* here *15.Qc2* just transposes below. *)* ]

[ Another idea is 14.g3 (giving White the option of g3xf4 if Black chops on f4; the trouble is that it exposes his king) Nd7 15.Qc2 exf4 16.gxf4?! (consistent but inaccurate; he should recapture with the bishop) Bd4+ 17.Kh1 Nc5 18.Bf3 Bd7 19.Rb1 , L.Yudasin-V.Kramnik, Wijk aan Zee (7th matchgame) 1994, and here I prefer Qh4 *(* rather than Kramnik's *19...b5?! )* 20.b4 Ne4! (the open lines and clearance of f5 is worth a pawn) 21.Nxe4 fxe4 22.Bxe4 *(* or *22.Qxe4 Qf6 )* 22...Rae8 23.Qd3 *( 23.Bg2??* loses to *Bf5 )* 23...Rxe4! 24.Qxe4 Re8! *( 24...Bf5 25.Qxd4 Bxb1 26.Bb2* is fine for White *)* 25.Qxd4 Re2 26.Qg1 Bf5 27.Qg3 Qxg3 28.hxg3 Bxb1 with the better ending for Black due to his infiltrating pieces. ]

**14...Nd7 15.Kh1** A precautionary move, which takes the sting out of surprise ...Qb6+

tricks. **15...exf4!** Clearing e5 for his pieces, while preparing a potential ... g7-g5. I realize that for some of us this may be counterintuitive. Accustom yourself to the idea that creating a passed pawn with ...e5-e4?! is just too costly strategically. **16.Bxf4 Be5** The e5-square is ripe for occupation, but then there is the question of succession.

[Black can also put his knight there: 16...Ne5 17.Be3 Bd7 *( 17...b6* is a consideration *)* 18.Qb3 Ng6! (making way for the bishop after all) 19.Bh5 Be5 (threatening ...Qh4) 20.Bxg6 hxg6 21.Bf4 Bxf4 22.Rxf4 Qc7 23.Rff1 Rae8 24.Rae1 , when Black has both the more mobile majority and the superior remaining minor piece, L. Mrazik-G.Toro Solis de Ovando, correspondence 2006. ]

**17.g3!?** The idea, as in Yudasin-Kramnik above, is to recapture on f4 with a pawn, depriving Black's pieces of the use of e5. The trouble with such moves is that even an impression of weakness around our king invites attack. **17...g5?!** Black goes straight for it.

[Objectively, it was probably better to play 17...Bxf4 18.Rxf4!? *( 18.gxf4 Nf6 19.Bd3 g6* looks level *)* 18...Ne5 19.b3 b6 20.Raf1 Ra7 21.Nd1 Re8 22.R4f2 Rae7 , when I like Black's chances since his majority still feels more potent, and his rooks look more dangerous on the e-file than White's doubled uselessly on the f-file, B.Zimmermann-J.Kusmierek, correspondence 2000. ]

**18.Bxe5?!** This only helps Black.

[He should preserve his dark-squared bishop with 18.Bd2! , after which Black's king looks the more vulnerable. ]

**18...Nxe5 19.Bd3** White goes after the f5-pawn, inviting Black to take the bishop and swap away his powerful e5-knight. **19...f4!?** There is a slight difference between moulding something and building it. Black's last move - one which seeks to increase, rather than merely preserve - can be categorized by the former. This no-middle-ground move is an attempt to scythe the initiative from under White. Black offers one pawn to get another entrenched on f3.

[What to do when we have two radically opposed choices, yet both feel equally warranted? The answer: go with the one which suits your style. There was nothing wrong with the safer 19...Qf6 , which would almost certainly be your safety-oriented writer's pick. ]

**20.Bxh7+ Kh8 21.Be4!**

[If White returns with 21.Bd3?! , then Black seizes a strong initiative after Bh3 22.Rg1 Bg4 23.Be4 f3 24.Nd1 Rc8 25.b3 b5 . ]

**21...f3**

[The c4-pawn is poisoned: 21...Nxc4?? 22.Qe2! Qc7 (Black can't afford to allow the white queen to enter h5, yet he must cover his hanging knight) 23.Qh5+ Kg8 24.gxf4 g4 25.f5 Qh7 26.Qxg4+ Kf7 27.Qe2 Ne5 28.Bc2 Rh8 29.Ne4 and White has a decisive attack. ]

**22.Rae1?!**

[White should try and disrupt Black's build-up by returning the pawn with 22.c5 dxc5 23.Nd1 Bh3 24.Rf2 Qf6 25.Ne3 , when chances are close to even. ]

**22...Bh3 23.Rf2 Rc8 24.b3 b5!** Black's initiative is worth more than White's extra pawn. **25.Nd1**

[Not 25.cxb5?? Qb6! (threatening ...Rxc3 and ...Qxf2) 26.Kg1 Ng4 and White is lost. ]

**25...bxc4 26.Ne3?!**

[The comp prefers 26.Qd2 . ]

**26...cxb3 27.Qxb3 Qa5!** And this is why; Black threatens the e1-rook as well as . .. Rc3. **28.Rb1?** White tethers himself to an untenable argument on the b-file.

[ 28.Qd1 was necessary. ]

**28...Rc3?!**

[Black has a forced win with 28...Rb8! 29.Qd1 *(*or *29.Qxb8 Rxb8 30.Rxb8+ Kg7 31.Rb1 Qc5 32.Nd1 Qd4 33.Bc2 Bg2+ 34.Kg1 Ng4* and wins *)* 29...Rxb1 30.Bxb1 Qc3 31.Nf1 Ng4 32.Rc2 Qb4 33.Rd2 Qc4 34.Bd3 Bg2+ and White must hand over material since 35.Kg1 Qc5+ leads to mate. ]

**29.Qb7** White saves his knight by threatening mate himself. **29...Qc7 30.Qxc7 Rxc7** Black's attacking ardour finally cools, since he is consoled by the fact that he gets a winning ending. White's bishop and knight dangle precariously, and his blockade at f2 is shaky too. **31.Kg1 Rc3 32.Re1 Bd7?!** When we miss an opportunity, it is one of those situations where we are at the movies and everyone laughs at the actor's line, while we just sit there, not getting what is so funny.

[Here Black lets another chance go, this time by piling up on White's bishop and knight with 32...Re8! 33.Rb2 Nd7 34.Nd1 (White's knight is the slightly intoxicated tightrope walker, windmilling his arms in a desperate bid to regain balance) Rc1 35.Kf2 Ne5 36.Ne3 Rxe1 37.Kxe1 Nd7 38.Rb4 Nf6 and Black wins a piece. ]

**33.Rd2 a5** Contemplating pushing the pawn to a3, which fixes the a2-pawn as a target and creates an entry point at b2 for his rooks. **34.Rb2 a4 35.Nd1** The knight doesn't have time to reach f2, but there was nothing better.

[He can't play 35.Kf2? due to Rxe3! 36.Kxe3 Nc4+ etc; ]

[while after 35.Rf2 a3 ]

[or 35.Rd2 a3 , White is reduced to hopeless shuffling. ]

**35...Rc1! 36.Rb1 Rxb1 37.Bxb1** EXERCISE (combination alert): Black to play and win material. --- ANSWER: Clearance/knight fork. **37...f2+! 38.Nxf2 Nf3+ 39.Kf1 Bb5+**

[Black has an easier win if he keeps the bishops on the board: 39...Nxe1! 40.Kxe1 Rb8 41.Bd3 Rb2 42.Bc4 Rc2 and the fall of the a2-pawn is decisive. ]

**40.Bd3 Bxd3+ 41.Nxd3 Nxe1+ 42.Kxe1 Rb8** White's a- and d-pawns are in big danger, since his knight is unequal to the task of covering them both. **43.h4** Endgame Principle: "The material-down side should strive to swap away as many pawns as possible". **43...Rb5 44.hxg5 Rxd5** The position, which buzzed with activity a few moves earlier, now looks almost deserted by comparison. **45.Nb2** When we were kids being chased by an older sibling, fear always lent speed to our legs. **45...Rd4**

[ Black is nervous about the depleting pawns on his side and makes the practical decision to preserve them, rather than enter a line like 45...Rxg5 46.Nxa4 Rxg3 (which is mate in 31 according to the tablebases). ]

**46.Ke2 a3 47.Nd1 Kg7 48.Ne3 Kg6** The g5-outlier is a goner. **49.Nc2 Ra4** Black's a-pawn is the quivery-lipped kid who faces down the neighbourhood bully and is suddenly restored with hope, having spotted his older brother. **50.Kd2 Kxg5 51.Kc3 Kf5! 52.Kb3 Ra8 53.Nxa3** To Black's slight concern, the plural has been reduced to the singular in his remaining stock of pawns. The tablebases aren't worried, declaring mate in 26. **53...Ke4!** Black's plan is clear: Escort the d-pawn up the board with his king and rook's help. **54.Nc4 d5 55.Nb2 d4 56.a4 d3 57.g4** EXERCISE (combination alert): White's fading position, like autumn leaves, is ready to die. Black to play and force the win. --- ANSWER: Simplification. **57...Rb8+! 58.Kc3 Rxb2!** Black converts to an easily won pawn ending, where he forces promotion. **59.Kxb2 Ke3** . --- SUMMARY: The most important strategic idea to remember from this game is: when White plays f2-f4, avoid creating a passed pawn with ...e5-e4?!, however tempted you may be. Instead, keep Black's kingside majority fluid and aim for . ..e5xf4! at an appropriate moment, after which we can use the e5-square for our pieces and contemplate ...g7-g5 as well.

**0-1**

□ **Khan,Shamshad**
■ **Atish,Das Sarma**
AICCF 7265 2003
*[ Santhosh, Matthew Paul]*

Shams Khan sent the following win over Mr. Atish. According to him, it is Atish's first CC loss. The opening is the Sveshnikov variation of the Sicilian Defence, the rage at the moment in elite chess circles. It is a highly theoretical opening, and I decided to consult "The Sicilian Sveshnikov" by Yuri Yakovich, a recent book by an acknowledged Sveshnikov expert. All comments below are based on the above book, except where I have explicitly stated "Games Editor". **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.Qh5**

[ 12.0-0 is a serious alternative. ]

**12...Bg7**

[ 12...Rg8!? This dynamic move is preferred nowdays. The text move was popular in the 70's and 80's. ]

**13.0-0 f4 14.c3**

[ 14.c4! is a strong alternative. ]

**14...0-0 15.Rad1** Anand relied on this move several times in 2001. **15...Ne7**

[ 15...Kh8! Planning to use his Rook on the 'g' file. 16.g3 Rg8 17.Kh1 Bf8!

**B33**

□ **Saksis,Juris**
■ **Balabaev,Farit G**
Correspondence 2003
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Nb8 9.c4 Be7 10.Bd3** Rather than playing 10 Be2, as in the previous four games, White develops his bishop more actively on the b1-h7 diagonal. --- QUESTION: What's the drawback? --- ANSWER: The bishop is also more exposed on d3, specifically to a timely attack by Black's e5-pawn or knight. **10...0-0 11.0-0 a6 12.Nc3 f5 13.f3** Again attempting to restrain Black's kingside majority.

[ White can try 13.f4!? here as well, offering us the chance to hit the bishop with e4 . *(* Despite the tempo gain, I think we should still resist the temptation and instead play *13...Nd7* , aiming for a later ...Nc5 or ... e5xf4 and ...Ne5. For example, *14.Qc2 g6 15.Rb1 Bf6 16.b4 Qc7 17.Qb3 b5 18.Bb2 bxc4 19.Bxc4 exf4 20.Rxf4 Ne5 21.Ne2 g5 22.Bxe5 Bxe5 23.Rf2 f4 24.Bd3? Qa7!* with a strong attack for Black, N.Vink-P.Harikrishna, Wijk aan Zee 2001. *)* ]

**13...Nd7**

[ As we saw in the previous game, Black can also play 13...Bg5 first; for example, 14.Bxg5 *( 14.Kh1 Nd7* transposes to the next note *)* 14...Qxg5 15.f4 *(* or *15.Qc1 Qf6 )* 15...exf4 16.Qe2 Kh8 *( 16...Nd7? 17.Qe6+* wins the d6-pawn *)* 17.Rae1 Nd7 18.Qe6 Qf6 19.Qxf6 Nxf6 20.Na4 , A.Naiditsch-F.Nijboer, Wijk aan Zee 2003, and now b5!? 21.Nb6 Rb8 22.Nxc8 Rfxc8 23.cxb5 axb5 24.Bxf5 Rc4 (Chuchelov) is pretty equal. ]

**14.Be3**

[After 14.Kh1 Bg5 15.b4 a5 16.a3 axb4 17.Bxg5 Qxg5 18.axb4 Rxa1 19.Qxa1 Qe3 20.Be2 b5!? (breaking up White's queenside majority) 21.Qc1! Qxc1 22.Rxc1 bxc4 23.Nb5 Bb7 24.Nxd6 Bxd5 25.Bxc4 Bxc4 26.Rxc4 e4! , White's edge was neutralized, P.Leko-V.Kramnik, Monte Carlo (blindfold rapid) 2003. ]

**14...Bg5 15.Bf2** This is the consequence of playing 13...Nd7, rather than the more forcing 13...Bg5. White has the option to dodge the intended swap of his dark-squared bishop by sliding it back into f2. Having said that, I don't think it's such a grand plan for White.

[QUESTION: Can White try 15.Qd2 , planning to replace his bishop with his queen on e3? --- ANSWER: This is possible, but White can't expect an edge: after Bxe3+ 16.Qxe3 Nc5 17.Bc2 a5 , Black has full dynamic equality. Compare this with Kasimdzhanov-Carlsen in the notes to the previous game. ]

**15...Qf6** The idea is to swing into h6, enhancing Black's dark square control and massing forces against White's king. Now future ...e5-e4! pawn sacrifices become more potent for Black. **16.Qe2** Ensuring that Black is unable to sneak in a dark-squared bishop swap via e3.

[Other moves: -- a) 16.Qc2 (White reinforces e4 and pressures f5, hoping to prevent ...Qh6) Nc5! 17.Bxc5!? *(*this gets a passed d-pawn at the high price of handing Black the bishop pair and total dark square control; but *17.Be2* just loses a tempo, when *a5 18.Na4 Nxa4 19.Qxa4 e4! 20.Qa3 Bf4 21.fxe4 Be5 22.Rab1 Qh6 23.g3* , J.Smeets-M.Pavlovic, Wijk aan Zee 2004, and now *Qg6* looks promising for Black *)* 17...dxc5 18.Rae1 Bd7 19.Qb3?! Rab8 20.Na4? (returning the queen to c2 looks correct) Qh6 *( 20...Bxa4 21.Qxa4 e4!* looks even stronger; for example, *22.Be2 Qh6! 23.fxe4 Bd2 24.Bf3 Bxe1 25.Rxe1 fxe4 26.Rxe4 Qc1+ 27.Qd1 Qxb2* and White is busted *)*

**A)** 21.g3? b5! 22.Nc3 bxc4 23.Qxc4 Rxb2 and Black won quickly, G.Gomez-E.Matsuura, Belo Horizonte 2004. *( 23...-- )*;

**B)** But if 21.Nb6 then 21...Be3+! 22.Rxe3 *(*or *22.Kh1 Bf4 )* 22...Qxe3+ 23.Rf2 e4! with a clear advantage. ]

[b) 16.Na4 (aiming to enforce a c4-c5 break) Qh6 17.c5 *(*or *17.Qe2 e4! 18.fxe4 f4 19.Bd4 Bf6 20.Bxf6 Qxf6* , which Komodo rates at even, whereas I prefer Black's chances since his attack is easy and natural after ...Ne5, intending .. .f4-f3 at some point *)* 17...e4! (a sacrifice to clear e5) 18.fxe4 Ne5 19.exf5 Bf4 20.h4 *(*not *20.g3? Bd2 21.Be4 Bxf5 22.Bxf5 Rxf5 23.Kg2 Nf3 24.Bg1 Raf8* and Black has a decisive attack *)* 20...Nxd3 21.Qxd3 Bxf5 22.Qc4 Be5 23.Qc1 Qf6 24.Qg5 Qxg5 25.hxg5 with a level endgame, E.Laine-V. Petukhov, correspondence 2013. ]

**16...Qh6 17.Rad1** QUESTION: What is White's plan with this move? --- ANSWER: If given time, he would like to play b2-b4 and c4-c5.

[White has more often played 17.Rfe1 , when Black responds with the clearance sacrifice e4 18.fxe4 f4 19.Bd4 Bf6 20.Bxf6 Qxf6! *( 20...Rxf6* allows the

counter-clearance *21.e5! Nxe5 22.Ne4* and White is okay *)* 21.Qd1 Ne5 22.Be2 Qh4 23.Rf1 g5 , followed by ...Rh6 with a strong attack, K.Glaser-J.Pecka, correspondence 2008. ]

[ Instead, 17.Na4 transposes to 17 Qe2 in the line with 16 Na4 of the previous note. ]

**17...b6** When our position is reasonably good, many of us fear change, always assuming it is for the worse.

[ Here Black again has access to the thematic clearance pawn sacrifice 17...e4! (when we play such a move, we must live for the moment, without worrying thoughts of poverty in our old age - we basically warn our opponent: "It's dangerous to try and finesse your way to victory when facing a caveman or cavewoman") 18.fxe4 f4! (now White must watch out for ... f4-f3 tricks) 19.Bd4 Bf6 20.Bxf6 (now White is left with a bad bishop) Rxf6 with a promising attack; for example, 21.b4 *(* if *21.e5 Nxe5 22.Ne4* then *Rf7 23.h3 Bf5* , intending ...f4-f3 *)* 21...Ne5 22.Qd2 Bg4 23.Be2 Bxe2 24.Qxe2 f3! and White is busted. ]

**18.Bc2** A wise precaution against a coming ...e5-e4. **18...Rb8**

[ Actually, 18...e4! still looks promising. Avoidance of this move is like the actor who knows he is gifted, yet his talent goes to waste since he is unable to land even an audition. ]

**19.b4** White begins his plans to achieve c4-c5. **19...Nf6** Sigh. How unfortunate that Black lacked access to this excellent book in 2003! There seems to be a surplus of thumb twiddling on Black's part.

[ Once again he avoids 19...e4! 20.fxe4 f4! and, once again, Black's attack feels highly promising, effervescing with attacking potential. For example, 21.Bd4 Bf6 22.Bxf6 Rxf6 23.Qd2 Ne5 24.Bb3 Ng4 25.g3 Ne3 26.e5 Rg6 (the queue of attackers around White's king takes on stadium, pre-Superbowl proportions) 27.Bc2 Nxc2 28.Qxc2 fxg3 29.e6 (it looks like this will keep his king safe, but it is an illusion) Qe3+ 30.Kg2 gxh2+ 31.Kh1 Bb7! and White is in deep trouble. ]

**20.Rfe1 Bd7 21.Ba4!?**

[ It looks more consistent to play the long-prepared 21.c5 , but I don't think it fully equalizes: bxc5 22.bxc5 dxc5 23.Ba4 *(* or *23.d6 Kh8 )* 23...e4! 24.Bxd7 Nxd7 25.fxe4 Bf6 26.Rd3 Be5 27.Rh3 Qg6 and I like Black's activity. ]

**21...Bxa4 22.Nxa4 b5 23.Nb6**

[ After 23.cxb5 Rxb5 24.a3 Rd8 25.Nc3 Rbb8 , the game looks about even, as long as White avoids 26.Qxa6? Bd2 , winning material. ]

**23...bxc4 24.Nxc4 e4!** Glory Hallelujah! At long last, Black achieves his natural break, freeing his kingside activity with a much-needed enema, and regaining White's drifting attention. **25.a3!** This quiet move is the best defence.

[ Not 25.Nxd6? Bf4 26.Bg3 Nh5! , when White is in deep trouble; ]

[ nor 25.fxe4? Nxe4 (threatening ...Nc3) 26.Bd4 Rxb4 and Black has won a pawn, while retaining the superior position. ]

**25...Rbe8!** Every black piece is massed on the kingside. **26.Nxd6?** Having more options sometimes merely means more chances of going down the wrong path. After

this mistake, stability for White packs its bags, never to return. He inadvertently crosses the divide between risky and lethal, soon dealing with a landslide of threats to his king.

[ Relatively best is 26.Bd4 (a move made with the thought: an eventless vigil is a good vigil) Nxd5 27.Qa2 Kh8 28.fxe4 fxe4 29.Qb2 , even if White doesn't quite have full compensation for the pawn. ]

**26...Bf4** Double attack on d6 and h2. **27.Bg3 Bxg3!**

[ White may have expected 27...Nh5?! 28.Nxe8 Nxg3 29.hxg3 Bxg3 30.Qe3 Qh2+ 31.Kf1 Rxe8 32.d6 , when he looks okay. ]

**28.hxg3** EXERCISE (planning): Find one strategic idea and Black achieves a winning position. --- ANSWER: By capturing on f3, Black enables his knight to roost on g4.

**28...exf3! 29.Qxf3**

[ Not 29.Nxf5? (a futile attempt to bribe the hangman to neglect his duties) fxe2 30.Nxh6+ gxh6 and White is just a piece down. ]

**29...Rxe1+ 30.Rxe1 Ng4** The enemy knight outpost endangers White's king and a palpable sense of lassitude begins to creep across his position. **31.Re6 Qd2!**

**32.Qe2**

[ White can't play 32.Nxf5 since his knight drops off after Qc1+ 33.Qf1 Qxf1+ etc. ]

**32...Qd4+ 33.Kh1 h5!** Black makes luft for his king, which is stronger than taking on d5. **34.Re8 Kh7!**

[ 34...Kh7! is a little reminder to White that his back rank is loose; i.e. 35.Rxf8?? (White's idea to reduce the number of black attackers on the board lurches erratically to its failed conclusion) Qa1+ 36.Qe1 Qxe1# . "Escort His Grace to the Exhibitory, where my brother may reflect on his failure behind a glass screen for my amusement," commands the queen. ]

**35.Re6 Rf6!** Threatening ...Rxe6 followed by another back rank mate. **36.Qe1 Qxd5 37.Rxf6 Nxf6 38.Ne8 Ne4!** Suddenly, the white knight is stranded.

[ If it tries to escape after 38...Ne4! with 39.Nc7 , then Qe5! 40.Qc1 *(* or *40.Nxa6 Nxg3+ )* 40...Nxg3+ and 41...Ne2+ wins the queen. ]

**39.Qa1** By threatening mate, White saves his knight for the time being. **39...Qd7 40.Qe5 Nf2+ 41.Kg1 Ng4 42.Qe2 Qd4+** For now, Black's queen merely makes discrete inquires on the white king's whereabouts. **43.Kf1 Kh8** A technical zugzwang; White can only make his position worse. **44.Qe1**

[ If 44.Nc7 , then Qa1+ 45.Qe1 Nh2+ 46.Kf2 Qd4+ 47.Ke2 Qe5+ 48.Kd1 Qd6+! (to avoid an annoying Qe8+) and 49...Qxc7⊕ picks up the stray knight. ]

**44...Nh2+ 45.Ke2 Qd7 46.Kf2 Ng4+ 47.Kf3**

[ Or 47.Kf1 Kg8! (Black's plan begins to flesh itself out) 48.Qe2 Kf8! and White's knight is trapped. The king's crab-like sideways walk reminds us of the vaudeville performer attempting a comic exit side stage. ]

The white king whistles a happy tune, feigning nonchalance, when in reality he is in dire need of "adult undergarments". Alternatively, if Black's queen and knight team were political candidates against their white counterparts, they would be 53% ahead

in the polls on the eve of election day. --- EXERCISE (combination alert): Black to play and force the win. --- ANSWER: Zugzwang/mating net. **47...Qd4!**

[ After 47...Qd4

**A)** White cannot move his queen in view of 48.Qe6 Qf2# *( 48...-- )*;

**B)** or 48.Qe2 Nh2#;

**C)** if he passes with his queenside pawns, then 48.-- g5! and 49.-- Qd3+ forces mate again;;

**D)** 48.Nc7 (the knight is the puppet flopping in an undignified posture once its strings are cut) 48...Qd3+ 49.Kf4 Qd6+ 50.Kf3 Qc6+ , the white knight's dereliction of duty is made plain to see. --- SUMMARY: If White manages to avoid the bishop swap with f2-f3 and Bf2 - which I don't think is a particularly good plan - transfer your queen to h6 and then look for a timely . ..e5-e4!, which clears e5 for our knight and ensures us promising attacking chances. When we make such sacrifices, it isn't necessary to substantiate every detail with hard variations. Just have faith that our open e5-square, in conjunction with our massed pieces, provides more than enough compensation. ]

*[Jacobi]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.Qh5 Rg8** A popular move in recent times, but more common is 12...Bg7 **13.g3 Rg4** Kramnik has played this move with success. Against J.Polgar(GM), J.Lautier(GM) [2003 Enghiens-les-Bains] played 13...Rg5 and ended up with equal chances before eventually losing his way in a very complicated position. Other alternatives for Black that have appeared in Master competition are 13...Rc8, 13...f4, 13... h6, 13...Nd4, and 13...Bxd5. **14.Ne3**

[ 14.f4! (Runting) - Is regarded as the only move for White in the latest book on the Sveshnikov by Yakovich. ]

**14...fxe4 15.Nxg4 exd3 16.cxd3** White has also played 16.c3 and 16.Ne3 in this position. Black eventually won both those games, although in each case White appeared to have at least equal chances before losing. **16...Qa5+**

[ 16...Nd4! Yakovich - is also good (Runting). ]

**17.Kf1 Qd2 18.Nf6+**

[ 18.Ne3 (Runting) Qxb2 19.Nac2 Nd4 20.Qd1 Bh3+ 21.Kg1 Nxc2 22.Nxc2 Rc8 23.Ne3 Bh6 24.Ng2 Bg4 25.Qb1 Rc1+ 0-1 Federic,P-Flasik,R/Komarno 1999 ]

**18...Ke7 19.Ng8+** 19.Nxh7 is better as it keeps the Black King tied down to the K-

side. Instead he can now escape to the Q-side leaving White with poorly coordinated, undeveloped pieces. **19...Kd8 20.h4?** Too slow. White's best chance to hold the game was 20.Rd1, Qxb2 21.Nb1 (this move is ugly but 21.Qf3? fails to 21...Rc8) and now 21... Nd4 gives Black a dangerous attack. **20...Qxb2 21.Qg5+ f6 22.Qxf6+ Kd7 23.Rd1 Nd4**
**0-1**

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.c3 Bg7 12.exf5 Bxf5 13.Nc2 0-0 14.Nce3 Be6 15.Bd3** In this highly theoretical position White announces his intention to control the central light squares with the manoeuvre Bd3-c2-b3. If he manages to exchange light-squared Bishops it's then much easier to gang up on d6 with his Rooks. Black fights against this plan using his mobile e and f pawns and tries to open up the game for his Bishop on g7,possibly saddling White with a corresponding weakness on c3.

[ 15.g4 An original idea of Robert Byrne.

Challengers Hastings (3) 12.12.2001
*[ Kwiatkowski]*

In the summer of 1983, I went away house-sitting for a few weeks. For summer reading, I borrowed a club-mate's German translation of a Soviet tome on various lines of the Sicilian. The book included an exposition of the Pelikan, the theory of which had recently been enriched by Sveshnikov, Timoshchenko and others. I went through these lines out of idle curiosity and was instantly ravished by the beauty of the ideas behind the opening. I have been playing it on and off ever since. Of course, if you do not handle it properly, it is as if you were falling off a motorcycle at high speed, but when it works, it REALLY works. This is one of my better efforts with it. Naturally, the game gave me immense personal satisfaction at the time, but I was not aware of the significance of the game. Nor was anybody else. It did not appear in the tournament bulletin - a pity, for it was a good game. Nor did it appear in the tournament report carried in "Chess" magazine - volume 67/ no.2 -May 2002, page 23. This is surprising for two reasons. First, the theme of 'elderly amateur bites grandmaster' is normally much beloved by the chess press. Second, the writer of the report could scarcely have been unaware of the game, for the writer was Neil McDonald himself. I wrote up the game for my county magazine, showed it to friends and, being just an amateur, put it in a dusty corner of my mind and moved on with my life. Then, towards the end of 2003, the game J. Polgar - Gelfand, Budapest 2003, began to appear in various elements of the chess press - see for example Informator 87, game 132 and New in Chess 2003/5, page 19. Boris Gelfand made a draw and had some chances to do better. To my surprise, 17 ... Ne7 was marked as an innovation by Informator. To my further surprise, when I later logged on to the excellent www.chesscafe.com website, it was listed as one of the very best innovations of the volume. At this, a growing sense of irritation found expression. I fired off an e-mail of protest to the site. The site graciously contacted Informator, and the editor said that my game simply does not appear in any of the commercially available databases. Accordingly, I now cry to the world for recognition.' Kwiatkowski: 'In the summer of 1983, I went away house-sitting for a few weeks. For summer reading, I borrowed a club-mate's German translation of a Soviet tome on various lines of the Sicilian. Kwiatkowski: 'In the summer of 1983, I went away house-sitting for a few weeks. For summer reading, I borrowed a club-mate's German translation of a Soviet tome on various lines of the Sicilian. The book included an exposition of the Pelikan, the theory of which had recently been enriched by Sveshnikov, Timoshchenko and others. I went through these lines out of idle curiosity and was instantly ravished by the beauty of the ideas behind the opening. I have been playing it on and off ever since. Of course, if you do not handle it properly, it is as if you were falling off a motorcycle at high speed, but when it works, it REALLY works. This is one of my better efforts with it. Naturally, the game gave me immense personal satisfaction at the time, but I was not aware of the significance of the game. Nor was anybody else. It did not appear in the tournament bulletin - a pity, for it was a good game. Nor did it appear in the tournament report carried in "Chess" magazine - volume 67/ no.2 -May 2002, page 23. This is surprising for two reasons. First, the theme of 'elderly amateur bites grandmaster' is normally much beloved by the chess press. Second, the writer of the report could scarcely have been unaware of the game, for the writer was Neil McDonald himself. I wrote up the game for my county magazine, showed it to friends and, being just an amateur, put it in a dusty corner of my mind and moved on with my life. Then, towards the end of 2003, the game J. Polgar - Gelfand, Budapest 2003, began to appear in various elements of the chess press - see for example Informator 87, game 132 and New in Chess 2003/5, page 19. Boris Gelfand made a draw and had some chances to do better. To my surprise, 17 ... Ne7 was marked as an innovation by Informator. To my further surprise, when I later logged on to the excellent www.chesscafe.com website, it was listed as one of the very best innovations of the volume. At this, a growing sense of irritation found expression. I fired off an e-mail of protest to the site. The site graciously contacted Informator, and the editor said that my game simply does not appear in any of the commercially

available databases. Accordingly, I now cry to the world for recognition. Kwiatkowski, Feliks Jerzy: 'In the summer of 1983 I went away house-sitting for a few weeks. ■ **Balabaev,Farit G**
29. Correspondence 2002
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.c3 Bg7 12.exf5 Bxf5 13.Nc2 Be6 14.g3** What is the difference between this game and the previous one? In this version White retains his knight on c2, since it impinges upon Black's wish to generate queenside play with the plan ...Rb8, ...a6-a5 and ...b5-b4. **14...0-0 15.Bg2 a5** Black still desires a break on b4. **16.0-0 f5**

[Instead, 16...Rb8 17.Qh5 f5 18.Rad1 Kh8 19.Rd2 Ne7 20.Rfd1 was S.Görlinger-J.Frijling, correspondence 1996. Play can reach a tense position with balanced chances after Bf7 21.Qe2 e4 22.Nxe7 Qxe7 23.Rxd6 b4 . Here Black has full compensation for the sacrificed pawn. ]

**17.Qe2 Rb8 18.Rfd1 Kh8 19.Rd2 e4!** Black gives up something and gets something in return. He creates a hole on f4, while opening a square on e5. With a subsequent ...Be5, Black defends d6, his main strategic worry. **20.Nf4 Bc4 21.Qh5** Threatening 22 Ng6+, forking king and rook. **21...Ne7** Covering against White's threat, while reinforcing d5. **22.Nd4** White threatens a fork on e6, while increasing pressure on f5.

[The alternative is to fight for d5 with 22.Ne3 Bf7 23.Qg5 Bg8 24.Nh5 Be5 25.f4 exf3 26.Bxf3 Ng6 27.Qxd8 Rbxd8 28.Nd5 f4! 29.Ndxf4 b4 1/2-1/2 S. Matyukhin-V.Pankratov, correspondence 2002. Black achieved full compensation for the pawn in this interesting ending, which was cut short with an agreed draw. ]

**22...Rf6**

[After 22...Qe8! 23.Qxe8 Rfxe8 24.Bh3 b4! 25.cxb4 Rxb4 26.Nxf5 Nxf5 27.Bxf5 Bxb2 28.Rad1 Bxa2 29.Rxd6 a4 , I like Black's passed a-pawn more than White's chances of generating play against Black's king. ]

**23.Re1**

[Or 23.b3 Rh6 24.Qg5 Qf8! 25.Nh5 *(* after *25.bxc4? Bf6 26.Nde6 Bxg5 27.Nxf8 Bxf4 28.gxf4 bxc4! 29.Nd7 Rb7* Black has the better ending after regaining White's trapped knight *)* 25...Bd3 26.Qxg7+ Qxg7 27.Nxg7 Kxg7 28.f3 d5 29.Bf1 Bxf1 30.Rxf1 Rd6 , when chances look balanced in the ending. ]

**23...b4** Black achieves his thematic break and the game looks dynamically equal.

**24.cxb4 axb4**

[After 24...Rh6 25.Qg5 Qf8 26.Nxf5 Nxf5 27.Rxe4 Bg8 28.bxa5 Rb5 the game is an irrational mess, which the comp unhelpfully assesses at completely even. ]

**25.Qd1?!** I don't see a good reason to retreat a queen which isn't attacked.

[Correct was 25.Qg5 . ]

**25...Bh6!** Strange noises awaken the sleeping sentry on f4. Black threatens to

damage White's structure and king cover with ...Bxf4. **26.Rc2** We can feel the energy ebb from White's position.

[Others: -- a) 26.Nde2? Bxe2 27.Qxe2 Bxf4 28.gxf4 d5 is clearly in Black's favour. ]

[b) 26.Nh5!? (White offers an exchange to escape the bind) Rg6 27.Bh3 Qa5 28.b3 Bxd2 29.Qxd2 Bf7 30.a4 Qe5 and Black has the better chances. ]

**26...Bxf4 27.Rxc4 d5** Advantage Black, whose massive centre looms over White's position. --- One curious trait of the Sveshnikov is that, right out of the opening, it seems inconceivable that White will ever lose control over d5. And then later on, Black somehow manages to seize control of that very square. **28.Rc2 Bh6**

[ 28...Bc7 , intending ...f5-f4, is a superior option. ]

**29.Qh5 Bg7 30.Rd1 Ra8** White's a2-pawn is a cause for concern. **31.b3 Qb6** Black targets the blockading knight on d4. **32.Ne2**

[ 32.Kh1 f4 also looks unsaveable for White. ]

**32...d4!** Black finds a clever way to destroy White's blockade of d4.

[The patient and unflashy 32...Rd8! is also strong, intending ...d5-d4 next, without giving White any options. ]

**33.Nxd4** This move walks into a decisive pin.

[However, others don't help: -- a) 33.Rc4 is met by d3 34.Nf4 Raf8 and White is strategically busted. ]

[b) 33.Rxd4 Rh6 34.Qg5 Bxd4 35.Nxd4 Qf6 36.Qc1 Rg6 and White doesn't have enough for the sacrificed exchange, though this was probably his best practical chance. ]

**33...Rd8!** White's knight is pinned, even though the d1-rook is protected. **34.Rc4** White will never untangle.

[If 34.Nxf5 Rxf5 35.Rxd8+ Qxd8 36.Qg4 then e3 and White is busted. ]

**34...Rfd6 35.Qf7 Qa7!** White's position is plagued by disease and death. This wins a whole piece;

[and is even stronger than 35...Rxd4 36.Rdxd4 Bxd4 37.Rxd4 *(*not *37.Qxe7? Bxf2+* and wins, since *38.Kf1 Rd1+ 39.Ke2 Re1+ 40.Kd2 Qe3+ 41.Kc2 Qc1#* is mate *)* 37...Qxd4 38.Qxe7 Qd1+ 39.Bf1 Qd6 and Black consolidates. ]

**36.Bf1 Rxd4 37.Rcxd4 Bxd4 38.Kh1**

[ 38.Rxd4 Rxd4 39.Qf6+ Kg8 40.Bc4+ Rxc4 is game over. ]

**38...Nc8?!** This slight inaccuracy is perhaps based on the notion that a blackmailer should not be too greedy. If you ask for too much, too often, the person who you are blackmailing may have you killed. This concession isn't necessary, as there was no hand over the f5-pawn.

[ 38...Qc5! hangs on to everything. ]

**39.Qxf5 Nd6 40.Qg5 Re8 41.Qd2 Be5** . Two pawns are not enough for being a piece down.

**B33**

□ **Bologan,Viktor**
■ **Hamdouchi,Hicham**
Belfort 2002
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Nxd5 8.exd5 Nb8 9.c4 Be7 10.Be2 0-0 11.0-0 a6 12.Nc3 f5 13.f4 Bf6 14.Kh1 Nd7 15.a4** We'll see another example of White playing a2-a4 in the next game. There Black responds with ...a6-a5, whereas here he opts to concentrate on the centre.

**15...exf4** Hamdouchi immediately clears e5 for a piece. QUESTION: Which strategy do you recommend for Black? Play ...a6-a5, or avoid it, as Black did in this game?

[ANSWER: My personal preference would be to meet an early a2-a4 with ...a6-a5. In defence of Black's decision in this game, it does follow the principle: "Avoid confrontation on your opponent's strong wing". Nevertheless, 15...a5 would be my choice. I think it's a bargain for Black to seize control over c5, which is more important than the b5-square White gains in return. For example, 16.Nb5 Nc5 17.Ra3 Qe7 18.g4!? (the bombing coordinates have been specified; this is simultaneously a risky and ambitious move - in my opinion, perhaps a touch too risky) g6 19.Rg3 Bd7 20.Rg2 Rae8 21.Qc2?! *( 21.b3* looks correct *)* 21...fxg4 22.Bxg4 Bxg4 23.Rxg4 exf4! 24.Rfxf4 *(*or *24.Rgxf4 Be5 25.R4f2 Qh4* and Black takes over the initiative *)* 24...Be5 25.Rxf8+ Rxf8 26.Bh6 Rf1+ 27.Kg2 , Dr.Lazic-Du.Radovanovic, Serbian Championship, Kragujevac 2000, and now after Re1! , Black's threats look far more potent. ]

**16.Bxf4 Ne5 17.Be3** A new move.

[Bologan decides to play for a c4-c5 break with his pieces, rather than attempt to clamp down with 17.a5! , which I think is more consistent with White's strategy. After Qe7 18.Na4 Bd7 19.Nb6 Rae8 20.Qc2 , I slightly prefer White's chances, E.Formanek-Sr.Zakic, Schellenberg 1991. ]

**17...Ng6** Preparing ...Be5 and ...Qh4 ideas. **18.c5!?** A move made with the philosophy: a modification won't do the job if your position requires a complete revision. So White achieved his c4-c5 break without the help of his b-pawn. Bologan commits to absolutes, sensing that the rewards of his venture are more than commensurate with the risk involved in taking on an isolani. **18...Be5 19.Bd4** Challenging Black's most dangerous piece.

[After 19.c6!? Rb8 20.Qb3 Qe7 (now ...Bxh2 is in the air) 21.Nd1 f4 22.Ba7 Ra8 23.Bb6 Nh4 , Black's kingside chances compensate for White's queenside bind. ]

**19...dxc5**

[QUESTION: Didn't you say that Black should think carefully before taking the c5-pawn? --- ANSWER: Yes, and I'm sure he did. Most importantly, after 19...dxc5 , 20.Bxc5 can be met by b6!

**A)** since 21.Bxf8? allows Black a dangerous attack after Qh4 22.h3 Qg3 (Black's queen smiles and pats the cushion next to her, beckoning White's terrified king with a crooked finger and a twinkle in her eye) 23.Kg1 Kxf8 24.Qd3 Qh2+ 25.Kf2 Nf4 26.Qf3 Bd4+ 27.Ke1 Nxg2+ 28.Kd2 Ne3 and White is in big trouble. *( 28...-- )*;

**B)** He would have to limit himself to something like 21.Bg1 Bb7 22.Qb3 Rf6 , or;

**C)** 21.Bd4 Qd6 , when chances look balanced. ]

**20.Bxe5?!** A worse mistake than our error is to not realize it, since we then confidently march a doomed path. This pawn sacrifice looks dubious. White hopes his now passed d-pawn will be enough to choke Black, but computer analysis

demonstrates that it falls a bit short.

[ He should have gone for 20.Bxc5 , as in the previous note. ]

**20...Nxe5 21.d6** It appears as if White has a strong initiative, but Black's next move dispels this notion. He ignores the coming Qd5+ and adds pressure to White's now wobbly d-pawn. **21...Rf6! 22.Qd5+ Nf7** White's sacrifice worked in reverse ratio to his previous high expectations. It becomes clear that his initiative has become defunct, since his advanced d-pawn can no longer be supported. **23.Qxc5 Qxd6 24.b4 Be6 25.Rad1**

[ After 25.Qxd6 Nxd6 26.Bf3 Re8 , Black is in control; if 27.Rad1?! then Bc4 . ]

**25...Qxc5 26.bxc5** So Black has won a pawn but conversion won't be easy, since b7 is slightly weak. If White can swap away all the queenside pawns, he will have good chances to hold a draw. **26...Rc8 27.Nd5!** If you lack the resources for comprehensive measures, then a small fix is the next best thing. The threat to both rooks (28 Nxf6+ or 28 Ne7+) forces Black's next move. **27...Bxd5 28.Rxd5 g6 29.g4!** White tries to undermine Black's kingside pawn phalanx, following the endgame principle: "the material down side should swap pawns". **29...Rfc6**

[ After 29...f4 30.h4 h6 31.g5 hxg5 32.hxg5 Rf5 33.Rxf5 gxf5 34.Rxf4 Rxc5 35.Bd3 Nxg5 36.Rxf5 Rxf5 37.Bxf5 , the game should end in a draw. ]

**30.Rc1?** When we nurse a single weakness, like White's c5-pawn here, the danger is that a chain reaction follows and the resources we expend in defence lead to problems on the other side of the board, through neglect and scant resources.

[ White actually had no need to go on the defensive and missed a golden opportunity to hold a draw with 30.gxf5! Rxc5 31.Rxc5 Rxc5 32.fxg6 hxg6 33.Rb1 Nd8 34.Bf3 b5 *(* or *34...Rc7 35.Rb6 Kg7 36.Be4 )* 35.Be2 , when Black's winning chances reach anorexic levels. ]

**30...fxg4 31.Bxg4 R8c7 32.Bd7 Rf6 33.Kg2 Kg7 34.Kg3 Ne5!** This move is the loose end which untangles Black's position. It turns out that f7 was merely a truck stop, rather than a final destination for his knight.

[ 34...Nd6! 35.Kg2 Ne4 was strong too. ]

**35.Rcd1**

[ After 35.Rxe5 Rxd7 , White will experience great difficulties ahead, since he nurses an all-isolani ward. ]

**35...Nxd7 36.Rxd7+ Rf7 37.Rxc7 Rxc7 38.Rd5 Kf7 39.Kf4 Ke7!**

[ Better than 39...Ke6 40.Rd6+ Ke7 41.Rb6 Kd7 42.Ke4 Kc8 43.Kd5 Rd7+ 44.Ke5 Rd2 45.h4 Ra2 46.c6 bxc6 47.Rxc6+ Kb7 48.Rc4 Kb6 49.Kf6 Rg2 50.Re4 a5 51.Rc4 h5 52.Ke5! , when White should hold the draw; for example, Rg3 *(* not *52...Rg4?? 53.Rxg4 hxg4 54.Kf4 Kc5 55.Kxg4 Kb4 56.Kg5 Kxa4 57.Kxg6 Kb3 58.h5* , when White promotes first and wins *)* 53.Kd5 Rg4 54.Rd4! Rxd4+ 55.Kxd4 Kc6 56.Kc4 with the opposition. ]

**40.Ke4 Rd7!** Now Black's rook is free. **41.Rg5 Rd2 42.Rg3 Re2+! 43.Kd5** EXERCISE(critical decision): If Black takes the h2-pawn, White responds with Rb3. Should Black take the pawn anyway? Or is there something better? --- ANSWER: Black should grab on h2, since his rook can slip back to d7, securing b7. **43...Rxh2!**

The creature's mouth salivates at the thought of all the soft-fleshed young now within its reach. **44.Rb3 Rd2+! 45.Ke5 Rd7** White's final hope perishes, since his position moves from poverty, to abject poverty. Black's rook may chafe at his subordinate role, but this is only a temporary state. The remainder is easy. **46.Rb6 Rc7 47.c6 bxc6 48.Rxa6 c5 49.Re6+ Kd7 50.Rd6+ Kc8 51.Rd3 c4 52.Rc3 Kb7 53.a5** White can never take the c4-pawn, since Black would then promote one of the kingside pawns. **53...Ka6 54.Kd6 Rc8 55.Kd7 Rc5 56.Kd6 Kb5 57.a6 Rc6+ 58.Kd5 Rxa6 59.Rxc4** EXERCISE (combination alert): The tablebases say that 13 of Black's 17 legal moves win here. Find the quickest one. --- ANSWER: Overloaded defender/simplification. **59...Rd6+!** "On the battlefield I have killed far greater foes than the one I face today. You do not rule here, boy," declares the rook. --- SUMMARY: As the game demonstrates, it isn't obligatory to meet White's early a2-a4 with ...a6-a5, yet I still feel that this is Black's best plan. We'll look at an example of that now.
**0-1**

□ **Rogers,Ian**
■ **Volzhin,Alexander**
Saint Vincent (Game 5) 2002
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nf5 d5! 7.exd5 Bxf5 8.dxc6 bxc6 9.Qf3 Qd7! 10.Bg5 e4 11.Qe2**
[ 11.Qe3 Ng4 and ...Bc5 is annoying, ]
[as is 11.Qg3 Bd6 . The text is consistent and hopes to win the e4-pawn, but White is taking too much upon himself. ]
**11...Be7**
[ 11...Bb4 12.Bxf6 gxf6 is very playable too, although more double-edged. The text tempts White into a pawn grab which had a bit of success prior to this game. ]
**12.Bxf6**
[ 12.Rd1 Qe6 13.Qc4 Rb8 14.Qxe6 *(*White had to play for a draw with *14.b3* , as Rogozenko pointed out *)* 14...fxe6! (a fine move to secure d5 for the knight) worked out better for Black in V.Akopian-Y.Yakovich, Rostov 1993. ]
**12...Bxf6 13.Nxe4 0-0 14.Nxf6+ gxf6 15.Qd2**
[This is the only move that's been played to my knowledge, although a natural try is 15.Rd1 Qb7 16.Qd2 ; for example, Qxb2 17.Be2 Rfd8 18.Qxd8+ Rxd8 19.Rxd8+ Kg7 20.0-0 Qxc2 21.Bf3 when the computer says Black is just winning. However, this is not so clear to me; if White could manage to trade his a-pawn for a queenside pawn, then give up one of his rooks for the bishop and the other queenside pawn, he would be able to draw. ]
**15...Rfe8+ 16.Kd1**

[ 16.Be2 Qe6 17.Kf1 Rad8 also gives Black great compensation for his pawn. White had won a few games with 16 Kd1, but Volzhin comprehensively refutes it. ]

**16...Qc7!**

[ For some reason 16...Qb7 had been popular, forcing Kc1, which White wants to play anyway, while sidelining the black queen. The text is much better, keeping the possibility of ...Qe5 in many lines, and leaves White really struggling. ]

**17.Bd3**

[ 17.Kc1 Rad8 18.Bd3 transposes. ]

**17...Rad8 18.Kc1** transposes. **18...c5!** Black is clearly better and no White player has tried this pawn grab again since this game. **19.b3 Qe5 20.Rb1 c4!** Opening up the white king and essentially forcing the win of material that occurred in the game. **21.bxc4 Rb8 22.Rxb8 Rxb8 23.Qe3 Qb2+ 24.Kd1 Bg4+ 25.f3 Qa1+ 26.Kd2 Qxh1 27.Qf4 Qxg2+ 28.Kc3 Re8 29.Qxg4+ Qxg4 30.fxg4** White has succeeded in escaping into an ending where the passed c-pawn gives him some hope of a swindle, but Black is winning with reasonable care. **30...Re5 31.Kd4 h5 32.c5 Kf8 33.h3 h4 34.Be4 Ke7 35.c3 Kd7 36.a4 a5 37.Bf5+ Kc6 38.Be4+ Kc7 39.Bd5 Re2 40.Bxf7 Rh2 41.Be6 Rxh3 42.g5 Rf3 43.Ke4 Rg3 44.gxf6 h3 45.Bd5 h2 46.Kf5 Rxc3 47.f7 Rxc5 48.f8Q Rxd5+ 49.Ke6 h1Q 50.Qf4+ Kb7 51.Qf7+ Ka6 52.Qg6 Rc5 53.Qd3+ Ka7 54.Qd4 Qc6+ 55.Ke7 Qb6** Points to Remember: 1. 6 Nf5 would be a great move if it wasn't for the fact it doesn't stop 6...d5 – so play it! 2. Black shouldn't cravenly swap the queens: he can keep the tension and meet the 9 Qf3 double-attack with the careful 9...Qd7. 3. Thereafter Black shouldn't be able to go too far wrong, but generally it's best to avoid simplification combined with doubling of the f-pawns. Points to Remember: 1. 6 Nf5 would be a great move if it wasn't for the fact it doesn't stop 6...d5 – so play it! 2. Black shouldn't cravenly swap the queens: he can keep the tension and meet the 9 Qf3 double-attack with the careful 9...Qd7. 3. ICCF Officials 50th JT/IM-B 2001
*[Pedro]*

**1.Nc3** White "offered" to play a relatively unknown opening as the Van Geet. 1.Nc3 was interesting, but I think the transposition we played is 180 degrees away from that opening: I wished to give the game a Sveshnikov character, which is much sharper than a Van Geet, although it is widely studied and that is a negative issue. **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.e4 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7** In playing a Sveshnikov for the first time as Black (I am not a Sicilian player!), I tried to steer away from the game Chess Mail Readers vs. Tunc Hamarat. Therefore I played 10... Bg7 instead of 10... f5. **11.Bd3 Ne7 12.Nxe7 Qxe7 13.0-0 0-0 14.c3 f5 15.Nc2 Rb8 16.exf5 e4 17.Re1 Bxf5 18.Nd4 Bxd4 19.cxd4 Kh8** Here I played a relatively untried idea, which was in fact played against me by Carlos Salgado Allaria in the Martinez Acosta Memorial A. There are just a few games with this move, and I think the position favours Black, at least slightly. **20.Qb3** In a sharp-edged Sicilian the loss of a move or tempo is vital, the difference between winning and losing, and I think that the three moves I saw played are not very good. I tried 20.Qh5 and it turned out to be a Queen sortie that proved too slow, and unsuccessful as I lost. Then there was 20.Qd2 played in Sion Castro vs. Ochoa de Echaguen in Spain, when White barely survived with a draw. The move order there was 20.Qd2 Bg6 21.Bf1 f5 22.Rac1 f4 23.Rc6 e3 24.fxe3 f3 25.gxf3 Rxf3 26.d5 Be4 27.Qc3+ Rf6 and the attack has somehow fizzled. I followed these moves as faithfully as possible, because you can see the spirit of the position is similar, the main difference is that here the Queen is on d2 and yours was on b3, but both are not very active. **20...Bg6 21.Rac1 f5 22.Bf1 f4 23.Rc6 e3 24.fxe3 f3 25.gxf3 Rxf3 26.Bg2**

[ 26.d5 Qg5+! [I found a better continuation if you would have played 26.d5 in the case you were following this Spanish game, even with the changed Queen locations! The improved moves I found were 26.d5 Qg5+! (instead of 26Δ Be4) 27. Bg2 (the only move) Rbf8 28.Qc3+ R8f6 29.Rc8+ (if 29.Qd2 the move order simply varies, arriving at the same liquidation) Kg7 30.Rc7+ Kh6 31.Qd2 Be4 32. Rc2 Bxc2 33.Qxc2 Rxe3 -+ . There was also another winning line starting with 26.d5 Rbf8. One of the main problems with these two games is that the move 23. Rc6 is pointless: it is too slow, and trying to win the a-pawn is not very productive. ]
[ 26.Qc3 White's suggestion 26.Qc3 seems more interesting, I just gave it a quick look and it gives meaning to Rc6 as White now threats Rc8+ and probably exchange one of the Rooks, and additionally White has the uncovered check with d5+. I saw 26... b4 and 26... Qg5+ as answers to 26.Qc3, and the position (even one pawn down) is slightly better for Black, because White ends up holding everything together but has no maneouvrability and less space. But a win is not

clear for Black...] ]

*[Jacob Aagaard]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.Qh5 Bg7 13.c3 0-0!?**
A sharp sideline but healthy enough. **14.exf5 Bxd5 15.f6 e4 16.fxg7 Re8**
Here White has a choice between Be2 and Bc2, but he completely overlooked my intended response to 17 Bxb5 and lost a piece. **17.Bxb5?? Re5! 18.Qh6 axb5 19.Nxb5 Bc4! 20.Na3**

[ 20.Nd4 Nxd4 21.cxd4 Rg5! and ...Qa5+ will decide the game on the next move. ]

**20...Bd3 21.h4 Qb6 22.Qd2** So far it has been easy for Black. I concentrated only once and saw a two-move line. But now it is time to wrap up the full point and put it in the bag. Such a position might very well win by itself, but my lead in development should be enough to tear White's position apart. Now I chose to force him to castle queenside because I had seen a more or less forcing win. **22...Rae8! 23.0-0-0**

[ 23.Rh3 e3 24.Qxd3 exf2+ 25.Kd2 Qxb2+ 26.Nc2 Re1 , when Black wins everything, was the tactical basis of my line. But what now? How to proceed? ]

**23...Rb8!**

[ 23...Ra8 would probably have been the choice of many, as the threat ...Rxa3 would force White into 24.Qe3 , which loses the game after the exchange of queens. But I did not see any reason for my opponent to make it to an endgame. Not that I had any doubts whether or not I would win it, but I did not see it as the strongest option available for me. You can compare it to choosing between winning a pawn and a piece. ]

**24.Rh3 Ra5! 25.Rxd3 exd3 26.Nc4 Qb3!**

[ 26...Rxa2 , of course, wins immediately, and then after 27.Qxd3 comes Qb3! with a direct win, as can be seen in the game. But I was focused and saw another

way to decide the game. ]
**27.Qxd3 Rxa2** '!' with a direct win, as can be seen in the game. But I was focused and saw another way to decide the game. **28.Re1 Ne5!** . Obviously not a Beauty Prize game, although I am quite proud of it. I played two very nice moves (23...Rb8! and 26...Qb3!) and kept maximum concentration all through the game. However, it is not a game worth publishing anywhere - White just blundered a piece, as a pupil of mine pointed out (it should be said that this pupil does have a tendency to draw his winning positions...). --- I once saw a game being played in Germany, Movsesian being White against Korchnoi in the final round of an open event. Movsesian had made 71/2/8, while Korchnoi was on only 61/2 points. The advantage of the first move saw Movsesian obtain a small advantage, and then he systematically made poor exchanges, leading to an endgame which he knew was drawn and which he drew. I am always impressed with this kind of confidence and control, but I still find it foolish in 99% of cases.
**0-1**

**B33**

□ **Efimov,I**
■ **Eljanov,Pavel**
35. European Championship 2001
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.Nc3 Nf6 4.d4 cxd4 5.Nxd4 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Nxb5!?** White's army marches into battle, pennants aloft and fluttering in the wind. The Great Romantics would approve of White's piece sacrifice; the comps don't think much of it. White is lucky to remain even after this exuberance. **11...axb5 12.Bxb5 Bb7!** It seems odd to not break a pin, yet the bishop is better placed on b7, where it takes aim at d5, and indirectly at e4 and g2.
[For the nervous among us 12...Bd7 is also playable, when 13.exf5 Rb8 14.a4 leads to equal chances. White scores a lot better from this position in my database than from the 12...Bb7! lines. ]
**13.exf5 Ra5**
[Others: -- a) 13...Bg7 14.0-0 *( 14.f6!* is a stronger move *)* 14...0-0 15.Bc4 Qg5 16.a4 Kh8 Black had the better chances, S.Sulskis-L.Van Wely, Moscow 2004. This game is covered in 'Sveshnikov: Move by Move'. ]
[b) 13...Bh6 is untried and may be an improvement. I can't find equality for White after 14.f6 Kf8! ; e.g. 15.Qh5 Bf4 16.Nxf4 Qa5+ 17.c3 Qxb5 and White is in some danger. ]
**14.Qd3**
[ 14.a4 is met by Rxb5! 15.axb5 Nd4 16.c4 Bxd5 17.cxd5 Bg7 . The comp calls it even, while I prefer Black's minor pieces over White's rook and wobbly

pawns. ]

**14...Bg7 15.Qc4**

[ Alternatives: -- a) 15.Nb4 is ineffective due to Rxb5 16.Qxb5 Qa8 17.Nd5 0-0 with advantage for Black. ]

[ b) 15.b4 is met by Ra8 16.Qe4 Kf8! 17.Bxc6 Bxc6 18.0-0 Ra4 and Black's extra piece is worth more than White's pawns, U.Drössler-K.Norchenko, correspondence 2013. ]

**15...Rxb5 16.Qxb5 Ba8!** Even after this, it may appear on the surface as if White, with rook and three pawns against Black's minor pieces, is winning but this is not the case. Firstly, Black's minor pieces are two bishops in an open position. Secondly, White's pawns are ineffective and pushing them takes a long time. Black will easily generate counterplay before that happens.

[ Eljanov's move improves upon 16...Qa5+?! 17.Qxa5 Nxa5 18.Rd1 , when White stood at least equal, J.Hrdina-J.Markauss, correspondence 1992. ]

**17.Qb6?** Efimov misassesses the ending and this move instantly gets him in trouble.

[ He had to try 17.c3 0-0 18.Rd1 Qg5 19.f6 Bxf6 20.h4 Qh6 21.Nc7 Ne7 22.Nxa8 Rxa8 23.Rxd6 Rxa2 24.Rd8+ Kg7 25.0-0 Qxh4 , albeit with the better chances for Black. ]

**17...Nd4** Now the ending is heavily in Black's favour. **18.Qxd8+ Kxd8 19.Ne3** Covering against the dual threats ...Bxd5 and ...Nxc2+. **19...Bh6!** Threatening 20... Bxe3, after which both c2 and g2 hang. **20.0-0-0?!**

[ White had more chances to save the game after 20.Rd1 Rg8 21.Rf1 Bxg2 22.Nxg2 Rxg2 23.c3 Nxf5 . ]

**20...Bxg2** Exploiting the pin on the e3-knight. **21.Rhe1**

[ 21.Rhg1? loses a piece to Bxe3+ 22.fxe3 Ne2+ . ]

**21...Be4! 22.c3 Kd7!** This nonchalant non-response must have come as a shock for White, who is oddly paralysed by Black's minor pieces. **23.b4**

[ Not 23.cxd4?? , which allows Rc8+ 24.Kd2 Rc2# . ]

EXERCISE (combination alert): Find a forcing line which wins material for Black.

**23...Nc2!** ANSWER: Step 1: Chase White's e1-rook to e2. **24.Re2**

[ Others don't help: -- a) 24.Rg1 Nxe3 25.fxe3 Bxe3+ and the g1-rook falls. ]

[ b) 24.Rf1 Bxe3+ 25.fxe3 Nxe3 and one of White's rooks will be picked off. ]

**24...Nxe3 25.fxe3 Bf3** Step 2: Bishop skewer. **26.Rdd2 Bxe2 27.Rxe2** White's two pawns for the piece are not enough. **27...Rc8 28.Kc2 d5 29.Kb3 Rc4!** Black's king can deal with White's two connected queenside pawns, while the rook can maraud along the fourth rank, going after the e3-straggler. **30.a4**

[ Or 30.e4 Rxe4 31.Rxe4 dxe4 32.Kc2 (White's three connected passed pawns can easily be halted) Kc6 33.c4 e3 34.Kd3 e4+ 35.Ke2 Bf4 36.h3 Kb6 37.Ke1 Be5 38.Ke2 Bd4 39.Kd1 Bc3 and wins. ]

**30...Re4 31.a5 Kc6 32.a6 Bxe3 33.Rg2** The rook plans to raid the seventh rank.

[ After 33.b5+ Kc7! 34.Re1 Ba7 35.Rd1 Kd6 White's pawns are blockaded. ]

**33...Kb6**

[ 33...Rf4 leads to a quicker win. ]

**34.Rg7 Kxa6 35.Rxf7 Rf4 36.f6 Rf5 37.c4 dxc4+ 38.Kxc4 Bg5!?** He is cutting it close, since if every black pawn is traded away, then it's a theoretical draw.
[ 38...h6 is easier. ]
**39.Rxh7 Rxf6 40.Kd5 Bf4 41.h4 Kb5 42.Rb7+ Ka4 43.b5 Kb4 44.Rh7**
[ 44.h5 is met by Rh6 . ]
**44...Kxb5 45.h5 Kb4 46.h6 Rb6 47.Rh8?**
[ 47.Ke4 was necessary, when Black still has work to do. ]
EXERCISE (combination alert): White just blundered in an already lost position. How did Black exploit this lapse? **47...Bxh6!** ANSWER: Black's e-pawn is immune due to ...Bg7+, which would win White's rook.
**0-1**

**B33**

□ **Braakhuis,W**
■ **Rodriguez,Jorge Mario**
10. Correspondence 2001
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8 16.b3 Kh8 17.0-0** Only fundamentalists - true believers - opt for the crazy theoretical nightmare h2-h4 lines we looked at previously. Safe castling is what you are far more likely to see at club level, since most C-, B- and A-rated players would be nervous plunging into one of those h2-h4 pawn sacrifices. By castling White plays for the win, in relative safety. **17...g6**
[ In the next game we look at 17...f5 . ]
**18.Qd3 f5 19.f3** White bolsters his centre; ...f5xe4 can now be met by f3xe4.
[ Others: -- a) 19.Rd1 Bh6 20.Nde3 Rf6 21.f3 Ne7 22.Rda1 Bb7 23.Rxa5 (is Black busted? no; he gets plenty of compensating play on the kingside and e4) fxe4 24.fxe4 Rf4 25.Bd5 Bxd5 26.Nxd5 Nxd5 27.Rxd5 Qb6+ 28.Kh1 Qxb3 29.Ne3 *( 29.Rxd6 Qb1+! 30.Qd1* (the only move) *Qxd1+ 31.Rdxd1 Rxe4* is a likely draw, although I would take Black if given a choice *)* 29...Rf2 30.Re1 Rbf8 31.h3 Bxe3 32.Qxe3 Qc2 33.Rg1 Qe2 1/2-1/2 V.Bologan-J.Degraeve, Belfort 1998. ]
[ b) 19.exf5 has not been tried. After gxf5 20.Rd1 f4 21.f3 Bf5 Black has compensating play down the g-file and on the kingside to offset the weakness of d6 and a5. ]
**19...Bh6** We have seen this precaution before. Black wants to make certain that, if and when White plays f3-f4, it will not be with tempo on the bishop. **20.Ra2**
This move was new. The position is slightly different from the previous game, where Black's bishop was on e6.
[ 20.Rd1 (A.Bedoya-M.Uribe, Medellin 1999) can be met by Ne7 21.Nxe7 Qxe7

22.Rxa5 *(*after *22.Qxd6?! Qxd6 23.Rxd6 fxe4 24.fxe4 Bb7!* White is the one in trouble; if *25.Bd3?* then *Rfd8 26.Rxd8+ Rxd8 27.Ne1 Bd2* wins material *)* 22...fxe4 23.Qxe4 Bb7 24.Qe1 e4 25.fxe4 Qxe4 26.Qxe4 Bxe4 27.Nb4 Be3+ 28.Kh1 Bf4 , when Black's bishops and piece activity offer full compensation for the missing pawn. ]

**20...Be6 21.Nce3 Qh4** As mentioned previously, it's not easy for White's peace of mind to have this queen lurking about the white king. **22.g3**

[ 22.Nc7? fxe4 23.fxe4 Bxe3+ 24.Qxe3 Rxf1+ 25.Bxf1 Bxb3 26.Rd2 Qe7 27.Nb5 a4 leaves White in deep trouble. ]

**22...Qd8!**

[ 22...Qh3?! 23.exf5 gxf5 24.f4 leaves Black's queen out of play, rather than attacking. ]

**23.Kg2 Qd7 24.exf5** This opens the game for Black's bishops. But White didn't like the idea of Black playing either ...f5xe4 or ...f5-f4 at his leisure. **24...gxf5 25.f4 Bg7 26.Rd1 Bf7** The idea is to swing up to h5. **27.h3 Bh5 28.Rf1 Bg6** The game is dynamically equal, despite the computer's standard misassessment in White's favour. **29.Bb5** The bishop was better posted on c4. **29...exf4! 30.gxf4**

[ Others: -- a) 30.Nxf4 Qb7! 31.Bxc6 Qxc6+ 32.Rf3 Rxb3 leaves White tangled up and in trouble from Black's bishops. ]

[ b) 30.Rxf4 Ne5! 31.Bxd7 Nxd3 32.Rf1 f4! 33.gxf4 Be4+ 34.Kg3 Nc5 35.Ba4 Nxb3 is at least equal for Black. ]

**30...Ne5!** The pin which never was. By now you know that in the Sveshnikov violence is the norm. **31.Bxd7 Nxd3 32.Ba4 Bh5**

[ 32...Nc5 also places White on the defensive. ]

**33.c4 Rf7 34.Bb5 Nc5 35.Rxa5 Nxb3** With advantage to Black, since his pieces - especially his bishops - breathe fire. **36.Ra3 Nd2 37.Rf2 Rg8!** A new factor is added. White's king is insecure, despite the fact that queens have been removed from the board. **38.Kh1 Ne4 39.Rfa2 Bd4** Black's pieces are generating more and more power. **40.Kh2** EXERCISE (planning): How should Black continue? **40...Rfg7!!** ANSWER: Shift the f7-rook to g7, after which Black has a winning attack. The f5-pawn is protected tactically. **41.Rg2!** If your most paranoid suspicions are suddenly confirmed, then guess what? You weren't paranoid to begin with. 41 Rg2 is the only move.

[ If 41.Nxf5? (principle: our absolute conviction that our move is correct doesn't necessarily make our move correct) then Bg1+! 42.Kh1 Ra7!! and White is curiously helpless, since 43.Rxa7 *(*the threat was *43.-- Rxa3 44.Rxa3 Nf2# )* 43...Bf3+ 44.Rg2 Rxg2 leads rapidly to mate. ]

**41...Ng3! 42.Rf2 Ne2!** It's one thing to achieve a winning position and quite another to govern it properly, so it doesn't degenerate to its previous non-winning state. My head is swimming with confusion from the complications created by the central cluster of pieces. The threat is 43...Ng1! and ...Nf3+, when White's choice is to hand over the exchange or get mated. **43.Ra2**

[ After 43.c5 Ng1 44.Nf6! Bxf6 45.Nxf5 Rc7 46.cxd6 Rc3 47.Rxc3 Bxc3

Black should convert the extra piece, despite the reduced number of pawns on the board. ]

**43...Ng1! 44.Rg2 Nf3+ 45.Kh1 h6**

[ Here 45...Nh4!! 46.Rxg7 Kxg7! leaves White in a strange zugzwang. For example, after a waiting move such as 47.Bd7 Black wins with Bf3+ 48.Kh2 Kf7! 49.Bb5 Bxd5 50.Nxd5 Nf3+ 51.Kh1 Rg1# . ]

**46.Rxg7 Rxg7** Threatening 47...Rg1 mate. **47.Rg2 Ra7!** Threatening White's eternally weak back rank. **48.Nc2 Ra2! 49.Re2**

[ Not 49.Nxd4?? Ra1+ 50.Rg1 Rxg1# . ]

**49...Bc5! 50.Be8**

[ Or: -- a) 50.Bc6 Ne5! 51.fxe5 Bf3+ 52.Kh2 Bxe2 53.Ncb4 Rb2 54.Na6 Bxc4+ wins. ]

[ b) 50.Nc3 Rb2 51.Ba4 Nh4! 52.Re6 Ng6 53.Rf6 Nxf4 54.Rxf5 Ne2! 55.Nxe2 *( 55.Rxh5 Nxc3* wins a piece *)* 55...Bxe2 and White is tangled up and busted. ]

EXERCISE (combination alert): The defence is worn to tatters. Black to play and win material. **50...Rxc2!** ANSWER: Overloaded defender. Black picks up two bishops for the rook, leading to an easy win.

[ Actually 50...Ng1! also wins material, no matter how White responds. ]

**51.Rxc2 Bxe8 52.Rb2** Threatening 53 Rb8. **52...Bf7 53.Kg2 Nd4 54.Kg3 Nc6 55.Ra2 Nb4!** Black's job is made easier if White's knight is exchanged off. **56.Rd2 Nxd5 57.cxd5 Kg7 58.Rd3** EXERCISE (planning): White's rook is tied up defending d5. What is Black's winning plan? **58...Kf6!** ANSWER: Black's king infiltrates on the queenside, via e7, d7, c7 and b6.

[ Whereas 58...Kg6 59.Kh2 Kh5 60.Kg3 doesn't get Black anywhere. ]

**59.Kg2 Ke7 60.Kf1 Kd7 61.Ke2 Kc7 62.Kd2 Bb4+ 63.Ke3 h5 64.Kd4 Bc5+ 65.Kc4 h4** White is plagued with multiple weaknesses, which cannot be simultaneously defended. Black threatens to invade via the queenside and White must also cover the d5-pawn, the f4-pawn and the h3-pawn. **66.Rd1 Bh5 67.Rd2 Bf3 68.Rc2 Be4 69.Re2 Bb6!** Zugzwang.

[ After 69...Bb6 70.Re1 *(* or *70.Ra2 Be3 )* 70...Bf2 71.Re2 Bg3 the f4-pawn falls. ]

**0-1**

□ **Petrovic,D**
■ **Pavlovic,M**
Serbian Team Championship (Game 4) 2000
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nde2 Bb4 7.a3 Ba5 8.b4 Bb6 9.h3**
[A sign of White's difficulties, but good alternatives are hard to come by: 9.Bg5 Bxf2+ 10.Kxf2 Ng4+ loses for White, ]
[while it's still not practical to move the knight since 9.Ng3 Bd4 (this is the difference from 6...Bc5 7 Ng3) doesn't leave White anything better than the humble 10.Nge2 . ]
[Meanwhile the immediate 9.g3 Ng4 is also devastating, so White is driven into losing time with the text move. ]
**9...0-0 10.g3**
[ 10.Bg5 h6 11.Bh4 is met by the cheeky (and crushing) Nxe4 – a trick which works even if White's ninth is 9 f3 'protecting' the e-pawn. Thus White opts for slow development while at least preventing ...d5, or so he hopes. ]
**10...d6**
[ 10...d5 was actually well possible anyway after White's loss of time, for example 11.exd5 Nd4 12.Bg2 Bf5 13.0-0 Bxc2 14.Qd2 Bb3 when Black is much better. Presumably Pavlovic saw something he didn't like; and the queenside weaknesses and loss of time give Black an easy game even without getting ...d5 in. ]
**11.Bg2 Be6 12.Nd5 Bxd5** TIP: This exchange is the usual way to deal with Nd5 in this structure; Black's remaining minor pieces have good possibilities on the dark squares and the pawn at d5 means that White's light-squared bishop doesn't have any great scope. **13.exd5 Nd4 14.Bb2 Re8 15.0-0 Nxe2+ 16.Qxe2** White has actually managed to emerge from the opening in reasonable shape and can think about playing for an advantage, with c4 and Rac1 trying for c5, if Black doesn't act quickly. **16...e4** A good move. Black's trumps lie in active play with his kingside majority. We shall see more positions like this in the next chapter. **17.Rad1**
[White wants to trade the b6-bishop, but after this the black knight is always going to outshine his remaining bishop. Computers for some reason understand this position terribly and think that White is much better. They want to play one of two

lines: 17.c4 aims to meet ...e3 with a counterattack, thus e3 18.c5 dxc5 19.fxe3 cxb4 20.Bxf6 gxf6 21.Qg4+ Kh8 , but Black is more than fine here with his dark square control; ]

[ or 17.Kh2 e3 18.fxe3 Rxe3 19.Qd1 Nd7 , and again to a human eye Black cannot possibly be worse here with his e-file control, active minor pieces, and safer king. Indeed after 20.Qg4 Ne5 the machine already bales out to a level semi-ending with 21.Bxe5 Rxe5 22.Rae1 Rxe1 23.Rxe1 , although even here it still claims an advantage, but in my opinion it's wrong. ]

**17...e3 18.Bd4**

[ 18.f4 Ne4 is easy for Black, but after the text too he is fine. ]

**18...exf2+ 19.Qxf2 Rc8** From here on the grandmaster fairly clearly outplays the weaker player, although Black already has no conceivable difficulties; the doubled pawns after 20 Bxb6 Qxb6 21 Qxb6 axb6 are no problem for him. **20.g4?**

[ This isn't helping at all – look at the dark squares. White would do better to play for exchanges with 20.Rde1 . ]

**20...h6 21.a4** And this doesn't achieve anything either: White has failed to adjust to the fact he has no initiative and is worse. **21...Bxd4 22.Rxd4 Rc3 23.a5 Qc7 24.Rd2**

[ After 24.Rf4 Black should play b6 *(* rather than *24...Rxc2? 25.Qxa7* with counterplay *)* when 25.Rxf6 gxf6 26.Qxf6 is nothing to be afraid of; for example, Rxc2 27.Qxh6 Re5 and Black should win. ]

**24...Ree3 25.Rd3 Rexd3 26.cxd3 a6 27.Qf4 Qe7 28.Qd2** White cannot find a plan as Black's pieces crawl in on the dark squares. **28...Qe5 29.Qf4 Qe7**

[ A curious move; just teasing presumably. Either 29...Qxf4 ]

[ or 29...Rxd3 was plenty good enough. ]

**30.g5** Obligingly making it even easier. **30...hxg5 31.Qxg5 Rc2?!**

[ A very strange move which makes me think that Pavlovic must have been in desperate time trouble. Much simpler was 31...Rxd3 . ]

**32.Rc1??**

[ 32.Be4 , for example, would have allowed White to put up much more resistance than looked likely a move or two back, but instead White creates a 'Black to move and win' puzzle which the grandmaster is up to even if he was in time trouble. ]

**32...Nxd5** Points to Remember: 1. 6 Nde2 Bc5 is tempting but unthematic, and after 6... Bb4 White generally ends up anyway driving the bishop to that diagonal with gain of tempo. 2. As usual with these variants Black shouldn't be afraid to chase a bishop on g5 with ...h6 and ...g5. 3. Black could have got in ...d5 as a promising sacrifice but instead he elected to play positionally. In this structure after Nd5 ...B(N)xd5, exd5 Black has to play actively on the kingside. The e-file and the e5-square are key.

**0-1**

**B33**

□ **Prassas,G**
■ **Halkias,Stelios**
18 Ano Liosia 2000
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.Be2** This move may be safe, but it certainly won't give White an edge. The general consensus is that White's bishop is best placed on c4. **11...Bb7** As usual Black fights for control over d5.

[There is of course nothing wrong with castling first. For example, 11...0-0 12.0-0 Bg5 13.c3 Ne7 (our continual strategy in Sveshnikov is to challenge the occupant of d5) 14.Nc2 Nxd5 15.Qxd5 Be6 16.Qd3 and now Black can either play the freeing ...d6-d5, or maybe try and keep it more complicated with a5!? 17.Rfd1 Rc8! 18.Ne3 *( 18.Qxd6? Qxd6 19.Rxd6 b4* favours Black *)* 18...b4 19.cxb4 axb4 20.Nd5 Bxd5 21.Qxd5 Rc2 , when I slightly prefer Black, G.Peli-G.Galliano, correspondence 2016. ]

**12.c3**

[ 12.c4 is well met by 0-0 *( 12...Nd4* is also fine for Black *)* 13.cxb5 Nd4 since if White gets greedy with 14.bxa6?! *(*instead, *14.Nc3 axb5 15.Naxb5 d5!! 16.exd5 Bxd5 17.Nxd5 Qxd5 18.0-0 Rxa2* is equal *)* , then 14...Bxd5 15.exd5 Qa5+ 16.Kf1 (forced) Rxa6! sees White behind in development and in deep trouble. ]

**12...0-0 13.Nc2 Bg5 14.0-0 Nb8!?** This move scores better than playing the knight to e7, which may be more thematic. The idea is to shift to c5.

[If you are not looking for drama, there is the normal 14...Ne7 15.Ncb4 Ng6 16.g3 , A.Kovchan-J.Fluvia Poyatos, Oropesa del Mar 1998, when Black looks just fine after a5 17.Nc2 Bc6 . ]

**15.a4** White breaks up Black's queenside, which is logical, if a little late.

[Instead, after 15.Qd3 Nd7 16.Rfd1 Nc5 17.Qf3 g6 18.Nce3 Kh8 19.Bf1 , chances were balanced in S.Tiviakov-A.Shirov, Oakham 1992. ]

**15...bxa4 16.Rxa4**

[Or 16.Na3!? Nd7 17.Nc4 Nc5 18.Ndb6 Rb8 19.Qxd6 Qxd6 20.Nxd6 Bc6 21.Nbc4 , A.Stearns-C. Lakdawala, San Francisco 2000. Black stands slightly better due to the bishop pair and pressure down the b-file after Be7 22.Nf5 Bf6 . ]

**16...Nd7 17.Ra3 a5 18.Bc4** It doesn't make much sense that White plays the meek 11 Be2, only to move it to c4 later in the game. Black is okay here, despite the Sveshnikov-hating comp's usual misassessment of an advantage for White. **18...Nc5 19.Qe2 Kh8 20.Rfa1**

[Creating a passed b-pawn with 20.b4 is more thematic. All the same, Black looks okay after Ne6 . ]

**20...a4!** The more unlikely our idea, the more we want to play it. Once we commit to a move like this, we can't subsequently turn back and pretend we never made it. The

advance b2-b4 is prevented and White's rooks look odd, pressing against the a4-pawn. Black's move ups the aggression factor by several levels of magnitude. The obvious drawback is that it pretty much dooms Black's a-pawn if White plays Bb5. GM Halkias correctly foresees that Black gets sufficient counterplay on the kingside if White wastes time picking off the pawn. **21.Ncb4**

[ If 21.Bb5?! then, as the saying goes, you get what you pay for. The move is well met by f5! 22.Ncb4 fxe4 23.Bxa4 Nd3! 24.Nxd3 Bxd5 25.Nb4 Bb7 26.c4 Qb6 with pressure on the dark squares and against f2. ]

**21...Rc8?!**

[ Here 21...f5! is thematic and correct. ]

**22.Bd3!** Preventing ...f7-f5. **22...g6 23.Bc2** Black's a-pawn is doomed, so he must generate quick play with a break on f5. **23...f5 24.exf5 gxf5 25.Bxa4** This is not the kind of position which is willing to give us a straight answer to even one of our questions. White has won a pawn, but it is obviously not the end of the story, since, as so often happens, Black soon generates a compensating kingside attack.

**25...Rg8 26.Bc2 Qf8** The black forces creep closer to the white king. **27.Qh5**

[ I would toss in 27.f3 . ]

**27...e4! 28.c4** A dual-purpose move. White backs up the d5-knight, while enabling defensive ideas such as Rg3.

[ If 28.f4 , Black gets full compensation for the pawn with exf3 29.Qxf3 Qg7 30.Re1 *( 30.Bxf5?!* is just asking for it after *Rcf8 )* 30...Rce8 31.Rxe8 Rxe8 32.Ra1 Re5 33.Rd1 Be3+ 34.Kh1 f4 with chances for both sides. ]

**28...Ne6 29.Ra7?!**

[ After 29.Rg3 Rg7 the position is unclear. ]

**29...Qg7!** Discoveries are in the air with the g5-bishop, which would then uncover a mating threat on g2. **30.b3??**

[ 30.g3 was necessary; even then Black has a dangerous attack after 30... Nd4. Nd4 . ]

EXERCISE (combination alert): You know that feeling we get when we bang down our awful move and instantly realize it loses, and then the room begins to spin and we lose all sensation in the body? Well, I'm pretty certain White felt that here. White covered c4, but forgot about something else on his last move. Find Black's next and White's position frantically shouts for help. **30...Bf6!** ANSWER: Double attack. Black threatens mate on g2 and also ...Bxa1. Cheapos such as this aren't just things which happen to someone else. We all fall for them from time to time. **31.Qh3** White has nothing left to bargain with.

[ After 31.g3 Bxa1 32.Qxf5 (a few pawns won't make up for the rook he just lost) Ng5 33.h4 Nf3+ 34.Kh1 Rcf8 35.Qxe4 Bd4 Black wins, since f2 falls. ]

**31...Bxa1**

□ **Readers Of Chess Mail**
■ **Hamarat,Tunc**
Internet Match (2) 2000
*[Harding, Hamarat]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.0-0 Bxd5 13.exd5 Ne7 14.c3 Bg7 15.Qh5 Qd7 16.Rad1 Rc8 17.Nc2 0-0 18.f3! h6□ 19.Kh1**
[ 19.g4!? Hamarat, INF 69 ]
**19...f4□** and now a close vote. The chosen move is **20.Rg1!N** "One of the strongest moves that has ever been played against me in the Sveshnikov" - Hamarat. 20 g3, as played in Franzen-Hamarat (CC World Ch Final XIV) received one vote less.
[ 20.g3!? fxg3?! *( 20...f5□* Hamarat *)* 21.Rg1!? *( 21.hxg3 f5; 21.Ne3 f5 )* 21...gxh2 22.Kxh2 f5! *( 22...Kh8? 23.Rxg7! )* 23.Qxh6 Rf7 24.Ne3 f4 Franzen,J-Hamarat,T CC Wch-14 Final 1994 25.Bh7+!+- △Kf8□ *( 25...Kh8? 26.Rxg7+- )* 26.Rxg7 Rxg7□ 27.Ng4 ]
**20...f5!?** Suitable for this type of event
[ 20...Rc7 is safer but accepting a disadvantage. △21.g4 f6⩲ with passive play for Black. (I would have been forced to play this move in an important competition). I decided to play f5 !? which gives a beautiful game for White, but on the other side a very interesting game for the Readers and also in harmony with my chess style. After that move Black should find the best moves in order to survive somehow. White can play first or second best moves. ]
**21.g4 Rf6 22.g5 hxg5 23.Rxg5 Rcf8 24.Rdg1 R8f7 25.Nb4 Qb7 26.Qh3 a5 27.Rh5 Rg6 28.Rxg6** Game B is very easy to understand. White has a plan and the moves are according to this plan, a kingside attack, place the rooks on the g-file, move the g-pawn and so on. GAME A is interesting, because it is the reverse case. The plan is following the moves. What I mean is: You have to have many plans according to the moves of your opponent; therefore this game is confusing and not clear. **28...Nxg6 29.Nc6**
[Several players wanted 29.Bxf5 axb4 *( 29...Ne7 30.Be6* prevents ...axb4 (JJ) *)* 30.Bxg6 surely 32..Kf8 is the big blunder that throws away all hope - 32..Qc7 should offer more resistance I also feel that after 29 Nc6 Qb6 then 30. Rg5 is better move than 30. Bxf5. Rf6 31.Bc2 as the B has to vacate g6 why not protect the d5 pawn (JJ) bxc3 32.bxc3 Kf8 *( 32...Qc7* Henrick. after elroy's suggestion 30...Qc7 then 31.Rg5 Kf8 and i'm not sure how white should continue. jj's point about the Q entering at e3/ f2 looking for a perpetual is important. this could waste a lot of time as indeed did i analysing 29.Nc6 Qb6 30.Qf1 (too slow?) as this move is necessary if black gets the Q to e3. but after 30...e4! 31.fe4 fe4 32.Be4 Nf8 black seems to have a tight position. is there anything there? to persist with the idea of Nc6 Qb6, i think Bf5! is better than Rg5. here's my fantasy variation if then Qe3 white plays 31.Qf1! Nf8 32.Be6 Ne6 33.de6 Rc7 34.e7 Kf7 35.Rh7 Rc6 36.

Rg7 Ke8 and now Qh3 forces mate so let's get the horse to c6 for a start... Roy Ellis: 29 Bf5 ab4 30 Bg6 Rf6 31 Bc2 bc3: 32.bc3 and then Qc7. So 32..Qc7, not 30..Qc7 I'm convinced that 29. Nc6 gives white a larger advantage than 29. Bf5 - one possible line is 29. Nc6 Qb6 30.Rg5 Qe3 31. Bb5 and I can't find any satisfactory move for black. I apologize if my previous message was unclear and I hope I'm not just being a menace here, but I do feel that if the point is to find the shortest route to victory, than 29 Bf5 might not be the move (although I'm not going to argue that it doesn't win) . Roy Ellis JJ: Your previous message WAS unclear - when I dug out the jar of potcheen from the cellar it was part empty so I wonder if you had been there before me....but even if 32..Qc7 is better than "I've forgotten what" you have made absolutely no case for 29.Nc6 rather than 29.Bf5 - c'mon lets have some "published analysis" (like maybe 31 Bh7+ forcing Kf8 and then B# is the optimal sequence) rather than the b****r might steal my horse!;-) Done MY bit - you do YOURS! Regards JJ *)* 33.Rh8+ Ke7 34.Rg8 Bf8 35.Rxf8 Kxf8 36.Qh8+ ]

[ 29.Bxf5!? ]

**29...Qb6 30.Rg5** Elroy and others suggested this. Henrick complained: it certainly looks as if black can now draw. can anybody who voted for 30.Rg5? explain what the idea was? no regrets about playing 29.Nc6 though, but it had to be followed up with an immediate Bf5. now we've let GM Hamarat off the hook. .. regards,

[ 30.Bxf5 preferred by others ]

**30...Qe3 31.Bxf5**

[ 31.Nd8 Knudsen: 31. Nd8! which is a natural follow-up to 29. Nc6. The more you look at it (31. Nd8 I mean) the better it gets...i.e., 31... Qxd3 32. Nxf7 Kxf7 33. Qh5 leads to a winning endgame or 31...Rf8 32. Bxf5 and it is all over. ]

**31...Rxf5 32.Rxg6 Rf7 33.Nd8** Med Samraoui emailed me to claim White is STILL winning game B. He says: "In the game B, White is winning after 32.Rxg6 Rf7 33. Nd8! if 33... Re7 ( 33.. . Qd3 34.Rg1 Re7 is the same variation) 34.Ne6 Qd3 35. Rg1 Qxd5 36.Ng5 Qc6 37. Qh7+ Kf8 38.Qg6! ie. Kg8 39.Rd1 Qc4 40.Qd6 Bf8 41.Rg1 Rg7 42.Qe5 Be7 43.Ne6 Rg1+ 44.Kg1 Kf7 45.Qf5+ Ke8 46.Qxb5+ Qxb5 47.Nc7+ Kd7 48. Nxb5 with an easy win. 38...Qd7? 39.Nh7+ Kg8 40.Nf6+ wins the queen."

[ Maybe simpler was 33.Rg1 32 Rg6 Rf7 ) 33 Rg1 (mainly to protect the b pawn) Qd3 34 Qg4 (protects the d-pawn) Qd5: ?? 35 Qg7 Rg7 36 Ne7 (Rook is pinned) Kf/ h8 37 Nd5 or 36 kf/ h7 37 Rg7 and 38 Nd5. So 33Rg1 is probably a half-point more accurate than 33 Nd8. Black does have 34...e4 but 35.Nd8 R# 36Ne6 does the trick so black is in urgent need of a bonecruncher on move 35...or I'm missing something. (JJ) ]

**33...Qd3 34.Rg1 Re7 35.Nc6! Rf7**

[ 35...Rd7 35...Rd7 instead of 35.Rf7 so that 36 Qg4 37Nd8 would not win a tempo or the exchange (no the rook would not be en prise -because of perpetual check if Qd7: Qf3:+ Qf1 )JJ ]

**36.Qg4** 36. Qg4 and black is almost without a single move to play: 36...e4 37. Nd8 Re7 (or someplace else) 38. Ne6 wins - heading for the easily won K+P ending after exchanging the pieces on g7. White does not fear 38...Qxf3+, as it brings about the

desired simplified ending. 36...Kf8?? 37. Qc8# 36...Qxd5?? 37. Qxg7+ is cruel. 36... Kh7?? 37. Nd8! 36...Rd7 or other screwy Rook moves 37. h4! or 38. Nd8! etc. (Knudsen) Regarding Game A, I seem to be the only one who voted for 30...Qxa5 - what was wrong with it? Fortunately, perhaps this game is still playable for the readers. The ending after 32...Kh8 33. Qxe5 fxe5 34. c3 Rc5 is probably playable - but nothing to write home about. **36...Rd7**

[ 36...e4 Hamarat, Harding 37.Nd8 Re7 38.Ne6 ]

**37.h4** Black resigns: "Congratulations ! Franzen-Hamarat Variation is dead !!"

[ 37.h4 Game B is much more fun... No doubt GM Hamarat is hoping for 37. Nd8, when 37...Qxd5 gives him some play, although after 38. a4! it is still a win for white. Better is 37. h4! which on the one hand creates a "luft" square for the White King and on the other hand threatens to advance further, i.e., 37...Rf7 38. Nd8 Qxd5 39. Nxf7 Qxf7 40. h5 Kh8 41. Qg6! and it is all over except scooping up pawns on the queenside with the rook. So the move for game B is 37. h4! (Knudsen) ]

[ 37.h3 got a lot of support, why? ]

[ 37.Nd8 Qxd5 After 37. Nd8 Qxd5 38. Ne6, Black complicates things a bit with 38... Qb7! It's probably still a win (involving the Ng5/Ne4/Nd6 knight tour), but why bother? 37. h4! is more direct, is simple, and leaves little or no room for mistakes... ]

**1-0**

□ **Nikac,Predrag**
■ **Komarow,Dmitry**
50 Niksic 2000
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.Nc3 Nf6 4.d4 cxd4 5.Nxd4 e5 6.Nde2** This clunky retreat is yet another attempt to dodge main line theory. Here are the pluses and minuses of the move. --- The pluses: -- 1. White no longer fears ...Bb4 and ...Bxc3+, since the c3-knight is covered its colleague on e2. -- 2. White's knight may transfer to g3, where it may later hop into f5. This could induce the weakening ...g7-g6 from Black. -- 3. White can play Nh5, exchanging off Black's f6-knight, a key defender of d5. --- The minuses: -- 1. The e2-knight blocks the natural development of the f1-bishop. -- 2. The f2-square now becomes difficult to guard, as shown in the game continuation. -- 3. The principle: Bring your pieces out early in the opening of the game, is not one that requires the wisdom of hindsight. White's last move does indeed develop, but to a lousy square. The move incurs a loss of time since the e2-knight must be moved twice in the opening. --- In conclusion the move contains more drawbacks than benefits. **6...Bc5!** Targeting f2. **7.Ng3** White must guard against ...Ng4.

[Note that 7.h3?? is terrible. My wife was talking to me as I wrote this, except I didn't hear a word of what she said, since I was so distracted by White's last move,

which totally ignored Black's threat. I have found through experience that those who "surprise" us with little played sidelines, often don't know the theory. With the simple double attack Qb6 , Black simultaneously wins a pawn while destroying White's structure. --- A. Silvestre-C.Lakdawala, San Diego (rapid) 2017, continued 8.Be3 Bxe3 9.fxe3 0-0! (principle: the threat is stronger than its execution) *(*this move is an improvement over both *9...Qxe3;* and *9...Qxb2 )* 10.Qd2 *(*White can save both pawns with *10.Qc1* , but then *Rd8!* , intending ...d7-d5, leaves him fatally behind in development *)* 10...Qxb2 11.Rb1 Qa3 12.Rb3 Qc5 13.g4!? d6 14.Ng3 Be6! (the pawn is returned to seize the initiative) 15.Rxb7 Rab8 16.Rxb8 Rxb8 17.Bg2? (this fatally weakens c4) *(*he had to try *17.Kf2 )* 17...Na5 18.0-0?! Nc4 19.Qe1 Nxe3 20.Rf2 Nexg4! 21.hxg4 Nxg4 22.Bf3? *(*I analysed *22.Nh1 Nxf2 23.Nxf2 Rc8 24.Nd5 Bxd5 25.exd5 f5!* and White has no chance to save the game *)* 22...Nxf2 23.Qxf2 Qxc3 24.Qxa7 Qc5+ *(*I knew *24...Rb1+* was stronger, but in rapid chess I always pick the simplest win if it's 100% certain *)* 25.Qxc5 dxc5 0-1. ]

**7...d6** Threatening ...Ng4.

[Instead, 7...Qb6!? is met by 8.Qd2 Ng4 9.Nd1 , when White will regain the lost time. ]

**8.Be2 Nd4!?** The GM is looking for some adventure.

[I would play 8...a6 which secures Black's dark-squared bishop from Na4 ideas. After 9.0-0 h6 10.Nh5 Nxh5 11.Bxh5 0-0 12.Nd5 Qh4 13.Bf3 Nd4 14.Ne3 b5 15.c3 Nxf3+ 16.Qxf3 Bb7 17.Nd5 Bxd5 18.exd5 Rac8 19.g3 Qe7 20.a4 f5 , Black had the superior pawn majority and used it to generate a kingside attack, A.Rodriguez Vila-L.Van Wely, Minneapolis 2005. This game is annotated in 'Sveshnikov: Move by Move'. ]

**9.Bg5 Ne6** Attacking the g5-bishop with tempo. **10.Bb5+ Kf8!** Black wants to retain his good light-squared bishop. Loss of castling won't bother Black at all, since he can play ...h7-h6, ...g7-g6 and ...Kg7, castling by hand. **11.Bxf6** White is willing to hand over dark squares to secure his grip on d5. The game is dynamically balanced. **11...Qxf6 12.0-0 Nf4 13.Nd5 Nxd5 14.Qxd5 g6** Black's king will be well hidden on g7. **15.Ne2** White seeks to open the f-file with a future f2-f4. **15...Kg7 16.Kh1 Be6!** Well calculated. Komarov sees that he doesn't need to waste a tempo on ... Rb8. **17.Qd2**

[After 17.Qxb7?? a6 18.Bd3 Rhc8! there is no answer to the coming ...Ra7, trapping White's queen. ]

**17...Rhd8 18.Nc3?** White gets distracted.

[He should have stuck to his plan with 18.f4 . Even then, I prefer Black after d5! . ]

**18...Bd4!** If White's knight moves, then b2 hangs. **19.Bd3**

[If 19.Rab1 then Bxc3! 20.Qxc3 Bxa2 steals a clear pawn, which Black should convert. ]

**19...Rac8 20.Nb5 Bb6!**

[I prefer keeping it simple, over the greedy 20...Bxb2!? 21.Rab1 d5 , although even here White experiences difficulties. ]

**21.Nc3**
[ 21.a4 a6 22.Na3 d5! is awful for White. ]
**21...Ba5!** Just as in some of the earlier games of the chapter, White is destined to sustain significant structural damage on the queenside. **22.Rab1 Bxc3** He won't give White time for b2-b4. **23.bxc3 b6** White is busted since he has zero compensation for his awful queenside. **24.a4 d5!** Black eliminates his single weakness of the backward d-pawn, while threatening ...d5xe4. **25.exd5 Bxd5**
I would probably recapture with the rook. **26.f3 Bc6 27.Ra1**
[ After 27.a5 bxa5 28.Qe3 Rc7 29.Rfe1 Re8 Black's a5-pawn may be doubled, but it's still extra and passed. ]
**27...Rd5 28.c4 Ra5!** Black's contempt for White's attempts to counterattack is clear. This move denies White any a4-a5 liquidation ideas, and White's counterplay level falls to absolute zero. **29.Qb4 Rd8 30.Be4 Rd4** GM Komarov doesn't want to take on e4 and open the f-file for White. **31.c3 Rd2 32.Rfd1** Desperation. This loses the a4-pawn, but I don't have any great suggestions for White.
[ 32.Bxc6 Qxc6 is just slow death as the c4-pawn will eventually be picked off. ]
**32...Rxd1+ 33.Rxd1 Rxa4 34.Qb3 Ra5 35.Bd5?** Principle: no piece in our position can act as if it has its own life to lead, with no connection to the remainder of our pieces. --- EXERCISE (combination alert): As all programmers understand: garbage in, garbage out. This one is easy. White just blundered in an already losing position. Black to play and win. **35...Ba4!** ANSWER: Bishop skewer.
**0-1**

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nf5 d5 7.exd5 Bxf5 8.dxc6 bxc6 9.Qf3 Qd7** With this and (usually) 10...Nbd7 Black just about completes development while observing the often critical e5-square. Let us return to 9...Bg4. With this and (usually) 10...Nbd7 Black just about completes development while observing the often critical e5-square. **10.Bg5 e4** Others: **11.Qe2 Qe6** Natural and best, activating the rook and in so doing nipping in the bud (for the moment, at least) any ideas White might have of e4-e5.

[ 11...Be7 12.Bxf6 Bxf6 13.Nxe4 0-0 and now 14.Nxf6+! gxf6 denies Black's knight use of the c5-square and secures White the better chances after 15.Qd2 . Rfe8+?! 16.Kd1 ]

**12.Qa6**

[ 12.Bxf6 Qxf6 13.Nxe4 transposes to Lautier-Smirin in the previous note. White's deployment of the rooks along the ranks is worth remembering, with the king's rook being particularly flexible in that as well as defending the b2-pawn it can also play a part in aggressive operations on the kingside by facilitating the e4-e5 advance. Qxb2 14.Rd1 *( 14.Nf6+* , Lautier-Smirin, Cap d'Agde 1996. There followed *Kd8 )* 14...Be7 ]

[ 12.Qc4 Be7 ]

[ 12.0-0-0 ]

**12...Bb4**

[ 12...Nd7 13.Bc4 *(* A new alternative to *13.Be3 Bb4 )* 13...Qg6 14.Be3 Bb4 *( 14...Qxg2! 15.0-0-0* transposes to Lautier-Smirin in the previous note. White's deployment of the rooks along the ranks is worth remembering, with the king's rook being particularly flexible in that as well as defending the b2-pawn it can also play a part in aggressive operations on the kingside by facilitating the e4-e5 advance. *)* 15.0-0-0 White's grip on the centre outweighs Black's queenside play. *( 15.0-0*

*Bxc3 16.bxc3 Bh3 )* trying to hold back the tide with 15...Bxc3 neglects e6, e.g. 16.bxc3 0-0 ]

**13.Bc4 Nd5** Played to guarantee ...b7-b5 since 14 a4 c4! is fine for Black. Of course Black has alternatives to the text, the most popular being 13...a6, below. **14.0-0**

[ 14.Bxd5 Bxc3+ returns the pawn but keeps White in the driving seat. White's last eyes the b3-square as well as protecting c3, so continuing the theme with 15.bxc3 must be investigated. Unfortunately for Black pushing the c-pawn frees the d4-square for White in addition to c5 for Black, thus enabling White to plant his bishop in the middle of the board with cxd5 , in so doing challenging its often influential opposite number. The other downside (for Black) of the arrival of the bishop on d4 is White's increased control of the crucial e5-square, and after ]

**14...Bxc3** The point.

[ 14...0-0 15.Ne2 Qg6 16.Bxd5 cxd5 *( 16...Qxg5 17.Bxc6 )* 17.Qxg6 fxg6 *( 17...hxg6 18.c3 )* 18.c3 ]

**15.bxc3 0-0** One of three moves, the best of which is probably 15...Nb6, below.

**16.Be3**

[ 16.Rab1 Qg6 17.Bxd5 cxd5 18.Qxg6 Bxg6 19.Be3 *( 19.Rb7 Rfc8 )* 19...Rfc8 20.Bd4 Rab8 21.Rb3 ]

**16...Bg4**

[ 16...Qg6 17.Bxd5 cxd5 18.Qxg6 Bxg6 19.Rab1 *( 19.Rfd1 Rfc8 )* 19...Rfc8 20.Bd4 Rab8 ]

**17.h3**

[ 17.Rab1 Qg6 18.Bxd5 Bf3 19.Bxf7+ Rxf7 20.g3! A good practical decision that eventually has the desired psychological effect on White. Qg4 21.Rfe1 Rd8? ]

**17...Bxh3**

[ 17...Bh5 White has an extra pawn and the bishop pair and should win quite comfortably from here. Black's only hope is to drum up some counterplay on the dark squares while White's bishop is temporarily away from the action on a7. However, a key problem for Black is the d6-pawn, which currently holds the position together and holds back the d5-pawn. 18.Rab1 ]

**18.gxh3 Qxh3 19.Bxd5!? Qg4+** Embarking on a natural but suspect sequence from which White emerges with a clear lead in the subsequent ending.

[ 19...cxd5 20.Qd6 Rac8! 21.Bd4 Rc6 22.Qxc6 Qg4+ 23.Kh2 Qh4+ ]

[ 19...Rae8 20.Rfd1 ]

**20.Kh2 Qh4+ 21.Kg2 Qg4+?** With White's position steadily improving (note that White's forces are creeping forward!) Black looks for simplifying complications.

**22.Kh2 Qh4+**

**½-½**

**B33**

□ **Asquith,Jerry E C**
■ **Kwiatkowski,Feliks Jerzy**
BCCS-BCCA match (4.1) 2000

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.c3 f5 12.exf5 Bxf5 13.Nc2 0-0 14.Nce3** One of the most consistent lines for White against this system. (Hopefully you'll forgive me if, after the theoretical debates of the two previous games, I decide not to discuss the opening of this one in any depth!) **14...Be6**

[ 14...Bg6!? ]

**15.Bd3 f5 16.0-0** # In Watson's fascinating book 'Secrets of Modern Chess Strategy', there is an interesting discussion about the redundancy rate of pieces like the White Knight on e3 here. Clearly a player with an outpost piece, like the Knight on d5 here, would hope to retake 'like for like' in the event of it being exchanged off. The question then is, does the defending piece play any part in the game other than guarding the outpost? If the answer is 'no' then clearly it is in the opponent's interest to avoid the exchange. Larsen also once made the point that sometimes the outpost piece itself may be just looking pretty, and not actually doing anything useful! Things to bear in mind before instinctively exchanging off an opponent's piece, just because it is on a 'strong' square!? **16...Ne7?**

[ I can't agree with this at all. More to the point is the usual 16...Ra7 (as used by one V.Kramnik, amongst others, and he understands a bit about chess.) I expect that White was prepared for that line - maybe something along the lines of the following- 17.a4 Ne7 18.Nxe7+ Rxe7 19.axb5 axb5 20.Bxb5 d5 21.Ra6 f4 22.Rxe6 Rxe6 23.Qxd5 Qxd5 24.Nxd5 f3 25.g3 Rd8 26.Rd1 *( 26.Bc4!? )* 26...Kf7 27.b4 Bf8 28.Bc4 Which looks somewhat better for White - although these exchange for pawns position are very difficult with a lot of open lines. J, Asquith (!) Barker. corr 1999. megacorr 2. ]

**17.Nxe7+ Qxe7 18.Nxf5** simply picking off a pawn, because of the potential fork on d5.

[ 18.Bxf5!? ]

**18...Bxf5 19.Bxf5 Qg5 20.Be4 Rad8 21.Qd5+ Kh8** O.K, while we're in the mood for positional discussions - 'Bishops of opposite colour'. In one way they favour the defending side, in that they make exchanges more profitable because of their drawing properties in the ending. The big factor there is that simply by offering an exchange, the defender can often force away an attacking piece. On the other hand, they can give the attacker what is effectively an extra piece with which to attack target squares of a particular colour - that's potentially half the squares on the board - which can be especially nasty when there are target squares around the opposing King. The moral is, beware of cliches, and study the exact position on the board! In this case though, Black's bishop really doesn't count for much with those pawns blockaded on e5 and d6, whilst there are white square weaknesses around his king,

and no open files on which to offer an exchange of Rooks. **22.a4 Rf4 23.axb5 axb5 24.g3 h5 25.Kh1! Rff8 26.f4 Qh6 27.Ra7 h4**
[ 27...exf4 28.gxf4 comes to pretty much the same thing ]
**28.gxh4!** # **28...Rxf4 29.Rg1 Rg8 30.Raxg7** Finishing neatly. **30...Rxg7**
And it's mate in a hurry on those white sqares after Qa8+
**1-0**

Eu-Youth Boys-u20 (13) 18.10.1999
*[Fed]*

7 a4 is a very underrated approach. It's something to keep an eye on for both sides. 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.a4 a6 8.Na3 Be7 9.f3 This ruins the whole thing. Just the normal 9 Nc4 or 9 Bc4 look reasonable. Now some dark squares have been weakened. 9...Be6 10.Bc4 Rc8 11.Nd5 0-0 12.Be3 Bxd5 13.Bxd5 Qa5+ 14.c3 Nxd5 15.exd5 Nb8 Now Black looks to be slightly better. Both of White's minor pieces are misplaced and Black has the f5 possibility. 16.Qb3 Qc7 17.Bb6 Qd7 18.0-0 Bd8 19.Be3 Qc7 20.Rac1 Nd7 21.c4 Nc5 22.Qc2 Qa5 23.Bxc5 Qxc5+ 24.Kh1 Bb6 25.Qc3 a5 26.Nb5 Rcd8 27.Rce1 f5 28.Qa3 Rf7 29.Qxc5 Bxc5 30.g3 Re8 31.Kg2 Rfe7 32.Re2 e4 33.f4 Kf7 34.Rd1 Kf6 35.Nd4 Bxd4 36.Rxd4 h6 37.Rd1 g5 38.Rf1 Rc8 39.b3 g4 40.Re3 h5 41.Rc3 Rh7 42.Re3 h4 43.Ree1 Rch8 44.Rh1 Ke7 45.Re3 Kd7 46.Ree1 Kc7 47.Re3 Kb6 48.gxh4 Rxh4 49.Rg3 Kc5 50.Re3 b6 51.Rg3 Rh3 This opening has potential for White.

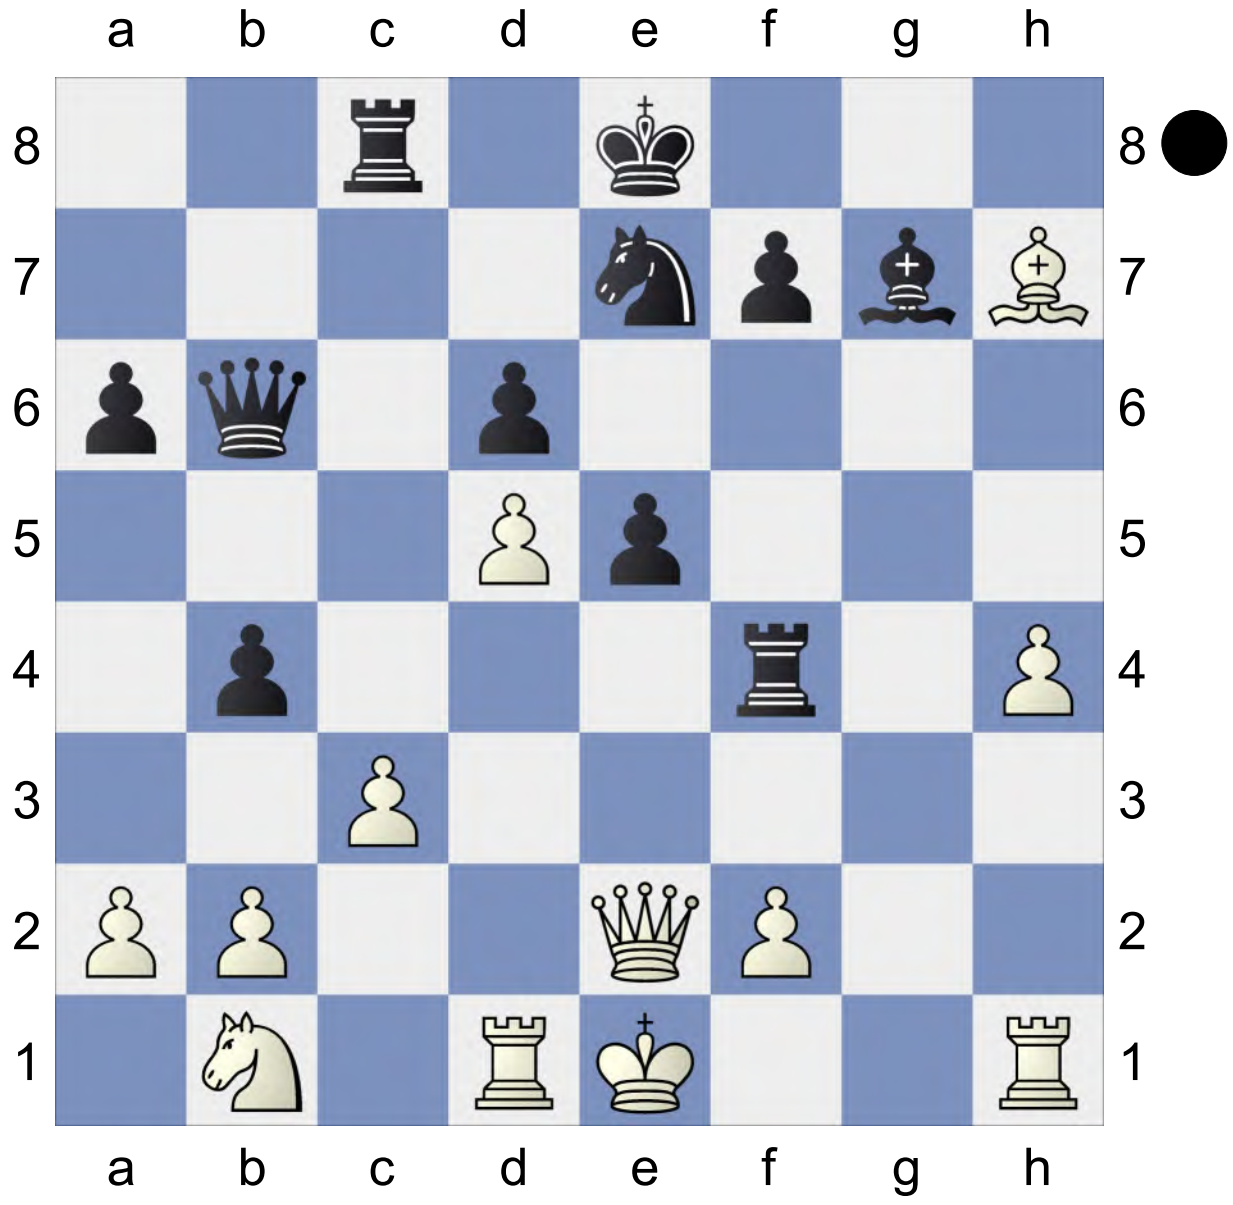
Australia ch-23 1999
*[McKenzie]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3 Be6 12.Qh5 Rg8 13.g3 Rg5**
I was very tempted to play the following variation, but thought, at the time that there was not enough in it for Black...!
[ 13...Rg4 14.f4 exf4 15.0-0-0 fxg3! 16.exf5 Bxd5 17.Rhe1+ Ne5 18.Qxg4 Bxa2 19.Rxe5+ dxe5 20.Bxb5+ axb5 21.Rxd8+ Rxd8 22.b4□ gxh2 23.Qh4 Bxb4 24.Kb2 Bd5 25.Qxh2 Bd6 26.Qxh7≅ Actually played this in a Pelikan

Theme Event, McKenzie - Caron (FRA). The previous seven or so moves were conditionals offered by Black and accepted ! ]

**14.Qd1 Bxd5 15.exd5 Ne7 16.c3 Bg7 17.h4 Rg6 18.g4?!** The only move which dissipates White's opening initiative, but which would probably go rather well in an OTB game. **18...Rxg4 19.Bxf5 Rf4 20.Bxh7** White has certainly picked up an unretrievable Black pawn, but will lose the power of the Bishop that took it! Black can quickly build an arsenal towards f2 and along the c-file. **20...Qb6 21.Qe2 Rc8!** In my mind, Black is winning here -Perhaps White should try 22.Bd3. **22.Rd1 b4 23.Nb1**

[ 23.cxb4 Qxb4+ 24.Kf1 Rxh4 gives White a little counterplay. ]



**23...f5! 24.Kf1 e4** The c-pawn is now very weak which indicates that White should have tried the previous note variation. **25.h5? bxc3 26.bxc3 Bxc3 27.Nxc3 Rxc3**

Black singlemindedly aims for the f2 square, which White must defend - albeit he is essentially a Bishop down. **28.Rh2 Rcf3 29.Bg6+**
[ 29.Kg1 e3 was my intention. ]
**29...Kf8** Because the h-pawn is going nowhere, 30...e3 is now the exclusive threat.
**30.Kg1 e3 31.Rf1 exf2+ 32.Kh1**
[ 32.Rfxf2 Qb1+ wins. ]
[ 32.Rhxf2 Qd4 zugzwang. ]
**32...Re3 33.Qd2**
[ 33.Rhxf2 Rxe2 34.Rxf4 Qb2 35.Rh4 Qe5 will suffice. ]
**33...Re1!** White resigned due to:
[ 33...Re1! White resigned due to: 34.Rxe1 *( 34.Qxe1 fxe1Q 35.Rxe1 Qd4-+ )* 34...f1Q+! 35.Rxf1 Rxf1+ 36.Kg2 Qg1+ 37.Kh3 Qg4# ]

□ **Brkic,Ivica**
■ **Shariyazdanov,Andrey**
Zadar 1999
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6** In this book, we assume that you enter the Sveshnikov via the 2...Nc6 move order.

[QUESTION: How else can we reach it? --- ANSWER: In my early Sveshnikov

days, I hated facing the Rossolimo Sicilian (3 Bb5), so I opted for the move order 2...e6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 6.Ndb5 *(*here Black must be aware of *6.Nxc6 bxc6 7.e5 Nd5 8.Ne4* , which we don't cover in this book *)* 6...d6 7.Bf4 e5 8.Bg5 and we reach a Sveshnikov position, with an extra move for each side. ]

**3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5** This move is our gateway into the Sveshnikov Sicilian complex. We offer White temporary (and sometimes permanent!) control over the key d5-square. --- QUESTION: What do we get in exchange for this concession? --- ANSWER: See the section on "The d5 Issue" in the Introduction! **6.Nb3** White refuses to enter a theoretical duel by playing the knight to b5, and meekly retreats it to b3, where at least it doesn't block a future f2-f4 advance. --- QUESTION: Isn't Nb3 a common move in response to ...e7-e5 in many Sicilians? --- ANSWER: It's common only if Black already tossed in ...d7-d6, which isn't the case here. The point is that there remains the good option of pinning the c3-knight, making this a superior version for Black, when compared to other ...e7-e5 Sicilians. **6...Bb4!** Our most natural and best move. Now White must reckon with both ...Nxe4 and ... Bxc3+, inflicting structural damage, and even early ... d7-d5 freeing breaks. **7.Bd3** White develops while covering e4.

[ Instead: -- a) 7.Bg5?! h6 8.Bxf6 Bxc3+ 9.bxc3 (we obtained structural damage in handing over our dark-squared bishop, whereas White got nothing for his) Qxf6 10.Bc4 d6 and Black already stood better with a clear structural edge, D. Majigsuren-E.Sevillano, Reno 2004. ]

[ b) 7.Bc4 (White sets a little trap) Nxe4! (...into which we should deliberately fall!) 8.Bxf7+ *(*after *8.Qd5? Nd6* , Black is just up a pawn for no visible compensation*;* while the double attack *8.Qg4?!* can be met by *d5! 9.Qxg7 Qf6 10.Qxf6 Nxf6 11.Bb5 Ne4 12.a3 Bxc3+ 13.bxc3 Rg8 14.g3 Bh3* with a clear structural advantage for Black *)* 8...Kxf7 9.Qd5+ Ke8 10.Qxe4 d5 11.Qe2 d4 12.a3 Be7 13.Ne4 Qd5 14.0-0 Bf5 and although Black may have lost castling rights, he gets the better of the bargain with a strong pawn centre, the bishop pair and an open f-file for his major pieces, J.Duras-L.Engels, Sao Paulo 1957. ]

[ c) 7.f3?! (this passive response hands over the initiative without a fight) d5 8.Bg5 *(*after *8.exd5 Nxd5 9.Bd2 Nxc3 10.bxc3 Bd6* , Black has both the superior structure and greater central influence *)* 8...dxe4 9.Qxd8+ Nxd8 10.Bxf6 Bxc3+ 11.bxc3 gxf6 12.fxe4 Ke7 and White's doubled c-pawns are a serious weakness in the endgame, whereas Black's doubled f-pawns are easy to protect, M. Karaklajic-D.Cramling, Reggio Emilia 1979/80. ]

[ d) 7.Bd2 (another passive response, by which White hopes merely to prevent damage to his pawn structure) 0-0 *( 7...Bxc3 8.Bxc3 Nxe4 9.Qg4* is dynamically balanced *)* 8.Bd3 Bxc3!? *(*Black's lead in development means more than White's bishop pair; GM Kotronias advocates *8...d5* , which also looks pleasant for Black; e.g. *9.Nxd5 Nxd5 10.exd5 Qxd5 11.0-0 Bxd2 12.Qxd2 e4 13.Be2 Qe5 14.c3 Be6 )* 9.Bxc3 *(*or *9.bxc3 d5 10.exd5 Qxd5 11.f3 e4 12.fxe4 Nxe4 13.0-0 Nxd2 14.Qxd2 Be6* and White's activity doesn't fully make up for his damaged queenside pawns *)* 9...d5 10.exd5 Nxd5 11.Bd2?! *(*White can keep Black's edge

to a minimum with *11.Qd2 Nf4 12.Be4 Qf6 )* 11...e4! 12.Bc4? *( 12.Bb5* was necessary *)* 12...e3! and Black has a winning position, M.Gaspersic-A. Drinovec, Tomo Zupan 1995; for example, after 13.Bxe3 Nxe3 14.Qxd8 *( 14.fxe3? Qh4+* picks off the loose c4-bishop *)* 14...Nxc2+ 15.Kd2 Rxd8+ 16.Kxc2 Bf5+ 17.Kc3 Rac8 , White's horrible king position means his odds of survival are close to zero. ]

**7...d5** '!' **8.exd5 Nxd5**

[ 8...Qxd5∓ ]

**9.Bd2**

[ QUESTION: Can White gambit for development with 9.0-0 - ? --- ANSWER: Sometimes we deliberately take on pain if the alternative is unendurable. We should be aware of this gambit, but if we defend properly after Nxc3 10.bxc3 Bxc3 , I think it's semi-sound at best for White:

**A)** 11.Ba3!? - the wizard raises his arms and calls forth fireballs, lightning and thunder to subdue his enemies. Unfortunately he botched the spell and only got the thunder, which didn't bother his enemies at all. This is the nuclear option; White adds a full exchange to keep Black's king in the middle. Under the comp's harsh interrogation, this sacrifice has about as much legitimacy as your office co-worker who shows up with a mug entitled: "World's greatest Dad!". Just because his mug proclaims it, doesn't necessarily make him a good father - Bxa1 (we should accept such a brazen challenge) 12.Qxa1 Qc7 13.Rb1 b6 14.Qc3 Bb7 15.Bf5 (White attempts to prevent castling on both sides of the board) g6 16.Bh3 was M.Crepan-E. Sveshnikov, Slovenian Team Championship 2003, and now I don't see White's compensation after simply f5 17.Rd1 Rd8 18.Re1 Kd7! (the king slips over to c8 to castle by hand) 19.g4 Kc8 20.gxf5 gxf5 21.Bxf5+ Kb8 , when Black is delighted to have given a pawn back to open the g-file and expose White's king. 22.-- *( 22.-- )*;

**B)** 11.Rb1 0-0 12.Qh5 f5 13.Nc5 is calmer, J.Bibiloni-F. Braga, La Plata 1997. Here Black should play Bb4! 14.Bc4+ Kh8 15.Rd1 Qc7 16.Ne6 Bxe6 17.Bxe6 Rad8 18.Bb2 Rd6! (the f5-pawn can't be touched, due to the fork with ...g7-g6) 19.Rxd6 Qxd6 20.Bb3 Nd4 and White doesn't get full compensation for his missing pawn. ]

**9...Nxc3** Why not, if we inflict structural damage for free? **10.bxc3** The queenside now represents a target-rich environment for Black. It makes sense for White to avoid swaps, so he recaptures with the pawn to gain a tempo. **10...Bd6!** The best retreat, temporarily discouraging f2-f4, which is White's main source of counterplay. **11.0-0**

[ After 11.Qh5 g6 12.Qh6 Bf8! 13.Qe3 Bg7 14.0-0 0-0 , Black's king is perfectly safe and White has no compensation for his structural defects, C.Samuel Sousa-C.Arduman, Istanbul Olympiad 2000. ]

**11...0-0 12.f4** White hopes to make up for a weakness on one side with a strength on the other.

[ 12.Qh5 f5 13.Bc4+ Kh8 14.Bf7?! turned out to be a complete waste of time after Qf6 , I.Blagonadezhnaya-A.Pridorozhni, Decin 1997. ]

**12...f5!** A move which serves two functions: -- 1. It gives Black more kingside space, which in turn keeps his king safer. -- 2. The push of the f-pawn deprives White's pieces use of the e4-square. **13.fxe5 Bxe5** Black elects to retain control over d4. **14.Qf3 Be6!** This well-calculated move cuts out any Bc4+ surprises in the future. **15.Rae1**

[Fear, which normally is uttered with a negative connotation, is also a force which keeps us alive. White declines to enter the complications of 15.Nc5 , which appears tempting at first but works out in Black's favour: Bd5 16.Nxb7 Qb6+ 17.Be3 Bxf3 (when we agree to enter lines like this, all distinctions between up and down are abolished, to be replaced with disorienting chaos) 18.Bxb6 axb6 19.Rxf3 Rab8 20.Ba6 Rf7 and White's knight has no escape, so Black gets two pieces for a rook. ]

**15...Bd5 16.Qh3 g6 17.c4 Bf7 18.Kh1 Qd6** Cutting off Nc5 ideas. It becomes clear that White's opening has been a failure. Not only is Black more active, he also has an endgame insurance policy with his vastly superior structure. **19.Be3 Rfe8 20.Bg1** White, whose passivity reaches a vegetable-like level, can't find a plan, since it's hard to think of one when you nurse two or three wounds in your structure.

[Perhaps 20.g4!? , but when we play such a move, it is predicated upon the wobbly assumption that our own king won't get mated first! Here, after f4 21.Bd2 Rf8 22.Re4 Be6 , White's king looks more exposed than Black's. ]

**20...Bg7 21.Rd1** Every swap - which douses the flames of White's hoped-for attack - helps Black, the structurally superior side, so White dodges this possibility. **21...Qc7 22.Bf2 Be5** Preventing Bg3 for the moment.

[Black isn't in any hurry to grab material with 22...Ne5 23.Nd4 Bxc4 and allow his opponent counterplay, though he soon changes his mind. ]

**23.c3!?** This is a desperate attempt to make use of the d4-square, at the cost of further weakening his structure.

[I would have played 23.Nd2 in order to bring the knight to the kingside. ]

**23...Bg7** Clearing e5 again for his knight. **24.Bg3 Ne5!** Targeting the c4-pawn. Rarely is it advisable to enter into a self-pin; in this case we see an exception, since White has no way to exploit it.

[After 24...Ne5! , 25.Rfe1?? walks into Black's trap: Nxd3 26.Rxd3 *( 26.Bxc7 Rxe1+ 27.Rxe1 Nf2+ 28.Kg1 Nxh3+ 29.gxh3 Bxc4* is wretched for White *)* 26...Qxc4 with an extra pawn and a dominating position. ]

**25.Nd4**

[Trying to save the front c-pawn with 25.c5 is met simply by Qc6 ; for example, 26.Be2 Nc4 (threatening ...Ne3, and the c3-pawn is loose as well) 27.Bf3 Qa6 28.Rg1 Ne5 29.Bxe5 Rxe5 30.Rd7 Qxa2 31.Nd4 Rae8 32.Bxb7 Re1 33.Nf3 Qf2! and White is busted. ]

**25...Bxc4** Even as a child, the thieving bishop would wander away with items which weren't his. **26.Bxc4+?** In a position this difficult, a single inaccuracy is once too often. Now Black is just a pawn up, with both the initiative and a superior structure.

[White had to try 26.Nb5 Bxb5 27.Bxb5 Re7 and then something like 28.Bh4

Rf7 29.Ba4 Kh8 30.Bb3 Rd7 when he at least remains active, even if he doesn't have enough for the pawn. ]

**26...Qxc4 27.Bxe5** Another concession, but the parasitic knight fed off White's misery. **27...Rxe5 28.Qf3 Re7** Covering the b7-pawn; White follows suit. **29.Rf2 Rae8 30.g3 Re4 31.Rfd2** EXERCISE (planning): How does Black win more material? --- ANSWER: A simple double attack on f3 and c3, since b7 isn't really hanging. **31...Re3! 32.Qxb7??** White's queen, desperate to be useful, remains in a state of eternal uselessness as Black now forces mate. **32...Re1+!** "Well met, friends!" says the white king, as he waves to Black's rook and queen, who don't look all that friendly.

[ 32...Re1+ 33.Rxe1 Rxe1+ 34.Kg2 Qf1# . --- SUMMARY: Answer 6 Nb3 with the pinning 6...Bb4, after which White will be lucky to remain even. ]

**0-1**

□ **Tiviakov,Sergei**
■ **Luke Mcshane**
Chess Festival (6) 1998

British prodigy Luke McShane is a name to reckon with. At age 14 he came from behind to tie for first by upending the pre-tournament favorite, Russian grandmaster Tiviakov (rated 2655). The kid is outplayed most of the way and finds himself with a bad bishop against a good knight. When given a chance, he lands a Sunday punch. 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 More complex than 6...a6 7. Nd6+ Bxd6 8. Qxd6 Qf6. Black is saddled with a backward d-pawn in this complex Sveshnikov Variation. 7.Bg5 Stronger than 7. Nd5 Nxd5 8. exd5 Nb8 when Black gets a broad center by f5. 7...a6 8.Na3 b5 9.Bxf6 Trying to exploit the doubled pawns, although some players favor the positional approach 9. Nd5 Be7 10. Bxf6 Bxf6 11. c3. 9...gxf6 White stays on top after 9...Qxf6 10. Nd5 Qd8 11. Be3. 10.Nd5 f5 11.exf5 Bxf5 12.c3 Bg7 13.Nc2 Be6 14.g3 0-0 15.Bg2 a5 16.0-0 Rb8 17.Qd2 An improvement on 17. b4!? once adopted by Anand which merely created weaknesses in White's position. 17...Qd7 18.Rad1 f5 19.Nde3 Temporarily vacating d5 in order to exchange as many pieces as possible on d5 to saddle Black with a bad bishop against a good knight on d5. When this plan works, White usually wins. When it doesn't -- watch what happens! Now 19...f4? is refuted by 20. Qxd6. 19...Rbd8 20.Bd5 Ne7 21.Bxe6+ Qxe6 22.Nd5 f4 23.Nxe7+ Qxe7 24.Qd5+ Kh8 25.Rfe1 Qf6 26.Re2 Bh6 27.Qxb5 White has achieved his goal but snatching the pawn is perilous. The right plan is 27. b3 f3 28. Re4 Qf5 29. Rd3 Qh3 30. Ne1. 27...f3 28.Re4 Rb8 29.Qxa5 Isolates the queen on the wrong wing. 29. Qd5 Rxb2 30. Ne1 is necessary to stay alive. 29...Rxb2 Nimzovich termed such a marauding rook a "pig." 30.Ne3 Re2 31.Ng4 Qg6 32.Rb4 Bf4 The silent bishop comes to life

and changes the outcome completely. 33.h3 Bxg3 34.Qd5 If 34. fxg3 Qc2 35. Rf1 Rg2 36. Kh1 Rh2! 37. Nxh2 Qg2 mate. 34...Bxf2+ 35.Kf1 Bc5 36.Rb7 Rg2 The threat of ...Rg1 is horrendous for White. White Resigns.
**0-1**

**B33**

□ **Topalov,Veselin**
■ **Kasparov,Garry**
Human+computer, Leon (blitz playoff) 1998
*[Cyrus Lakdawala]*

QUESTION: Why are we covering a blitz game? --- ANSWER: Normally I wouldn't, but for this game there were two extenuating factors: 1. Although the time control was short, the move quality was still high, since this was a man/ machine match, where we incompetent humans got a big boost by teaming up with comps, which precludes any low-calculation tactical miscalculation. 2. Its quality and instructional value (at least to my mind) was superior to other games I examined with a slower time control. --- **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0**

[Kasparov has sometimes played 11...Bg5 here (as he in fact did in this game) and sometimes castled first. The former route gives Black some extra possibilities after 12.Nc2 , such as Ne7 *(*and *12...Rb8;* but if we're planning to transpose with *12...0-0* anyway, it makes no real difference. *)*]

**12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4 Rb8 16.b3 Kh8 17.0-0 g6 18.Qd3** With this move, White indicates that he has no intention of ever taking on f5. Instead, he plans to back up his e4-pawn with f2-f3. **18...Bd7** This develops a piece, while getting White nervous about future discoveries on his insecure a4-rook.

[The alternative is 18...f5 19.Rd1 Bh6 20.Nde3 Rf6 . --- QUESTION: Isn't the backward d6-pawn a constant source of worry to our side? --- ANSWER: It appears that way, but from my own experience I don't recall a single game where I dropped the d6-pawn - or, for that matter, ever having lost because the d6-pawn forced me into a passive defensive stance. You will find that you can either comfortably defend d6, and even when you can't, you get a counter-attack on some sensitive point in White's position. --- The game V.Bologan-J.M.Degraeve, Belfort 1998, continued 21.f3 *( 21.Nd5 Rf8 22.Nde3 Rf6* is of no benefit to White, unless he is happy with an early draw *)* 21...Ne7 22.Rda1 Bb7! 23.Rxa5 fxe4 24.fxe4 Rf4 25.Bd5 Bxd5 26.Nxd5 Nxd5 27.Rxd5 Qb6+ 28.Kh1 Qxb3 29.Ne3 *(*or *29.Rxd6 Bf8 30.Rd7 Qb1+! 31.Qd1 Qxd1+ 32.Raxd1 Rxe4* and Black doesn't stand worse in the ending; by the way, this line is exactly what I was talking about in your last question - Black did indeed drop d6, but he got compensatory attacks for it *)* 29...Rf2 , and now the game remains approximately even after 30.Rxd6 Qb2 31.Rg1 Qe2 32.Nc4 Bf8 33.Rd7 Qxd3 34.Rxd3 Re2

35.Nxe5 Rxe4 36.Nf3 Rc4 37.Nd2 Rc7 . It's exceedingly unlikely that White will be able to convert his extra pawn, since Black owns the superior minor piece and his rooks remain active. ]

**19.Ra2** I think this is slightly more accurate than playing back to a1, since White's rook may operate later on the second rank, should the centre open.

[ Instead, after 19.Raa1 f5 20.Rfd1 Bh6 21.Nde3 Rf6 22.f3 Ne7 23.Kh1 Bf4 24.b4 , A.Shirov-V.Kramnik, Monte Carlo (blindfold rapid) 1995, and now axb4 25.Nxb4 fxe4 26.fxe4 Bxe3 27.Qxe3 Rc8 28.Ba6 Rc7 , Black doesn't stand worse as the weaknesses of c3 and d6 counterbalance the other. ]

**19...f5 20.f3** To me, the position exudes a King's Indian feel, where Black attacks on the kingside, while White attacks the queenside and centre. --- QUESTION: What KID line allows White absolute control over d5, as in this position? --- ANSWER: Admittedly, the occupation of d5 is for now in White's favour. But I respond to your question with a question of my own: What KID line allows Black an unopposed dark-squared bishop, which may later be the cause of White getting mated? **20...Bh6** **21.Rd1** White logically overprotects d5, while tacitly menacing d6 (the pawn I promised you would never lose without compensation!). **21...Qh4** When we enter this line our inheritance is often an attack, while our opponent picks on our structural weaknesses, the a5- and d6-pawns being wobbly placed. **22.Nce3** This brings the inactive c2-knight into play, while allowing White's a2-rook to participate in the defence of his king.

[ White can also retreat the d5-knight to increase the pressure on d6. Topalov in fact won with 22.Nde3 in the first (rapid) game of the match, but Kasparov would naturally have prepared an improvement. I think Black should play Rbd8! 23.Raa1 *( 23.exf5 gxf5 24.Qxd6?!* looks too greedy: after *Bf4 25.h3 e4 26.Qc5 Ne5* , Black's attack begins to get rather scary; I feel there are too many attackers around White's king, who surrounds himself with an entourage of attendants, none of whom has the least skill in defending him *)* 23...fxe4 24.fxe4 Qf2+ 25.Kh1 Qh4! (threatening ...Bf4) 26.Ne1 *( 26.Kg1* repeats*;* whereas *26.Qxd6?? Bf4* is curtains for White *)* 26...Qg5 27.Nd5 Rf2 and Black's activity easily compensates for the weakness of d6 (I believe we covered this subject earlier!). ]

**22...Be6** Making it easier for Black to cover d6, since it clears the d-file for either rook going to d8. **23.Nf1**

[ Topalov, nervous about his king, wisely refuses to accelerate Black's attack with 23.Bb5?? , in view of fxe4 24.fxe4 Bxe3+! 25.Nxe3 Bxb3 and wins. ]

**23...fxe4 24.Qxe4** It is in White's best interest to remove queens from the board, since his king is endangered and Black's pawns are weaker, but even with queens gone the dynamism in Black's position remains.

[ Instead, 24.fxe4 , as in E.Wiersma-H.Goeldi, Triesen 2006, is not an improvement. Here Komodo suggests the inhumanly strong Nd8! , planning to transfer the knight to c5; for example, 25.Rxa5?! Nb7 26.Raa1 Nc5 27.Qg3 Qd8! (both b3-and e4-pawns are loose) 28.Qe1 Nxb3 and Black stands strategically better. ]

**24...Qxe4! 25.fxe4 Rf7** Covering against future Nc7 tricks. **26.Rf2 Kg7** Principle: "Centralize your king in an ending". **27.Rxf7+ Bxf7 28.Kf2!?** In the planning stage your writer is normally full of fire. Then when the time to take action comes, I tend to hesitate. Not so with Kasparov! This calculated distraction is a move born of convenience and whim, rather than actual need. Kasparov attempts to orchestrate coordination from the knight's formally passive outpost. --- QUESTION: What is the point of this retreat, which leaves the a5-pawn unattended? --- ANSWER: It's the prelude to a risky pawn sacrifice. The idea is to bring the knight to c5 (as we saw earlier in the note to White's 24th move).

[Or 28.Ra1 Bg5 29.Kf2 Be6 30.Nfe3 Rb7 , which looks level to me, even if for some silicony reason Komodo gives White an edge. ]

**28...Nd8!?** In the planning stage your writer is normally full of fire. Then when the time to take action comes, I tend to hesitate. Not so with Kasparov! This calculated distraction is a move born of convenience and whim, rather than actual need. Kasparov attempts to orchestrate coordination from the knight's formally passive outpost. --- QUESTION: What is the point of this retreat, which leaves the a5-pawn unattended? --- ANSWER: It's the prelude to a risky pawn sacrifice. The idea is to bring the knight to c5 (as we saw earlier in the note to White's 24th move). **29.Ra1 Ne6** Fearlessness often mimics madness, though I suppose we can look at it another way, where the entrepreneurial type isn't afraid to invest in a risky market. Boy, this is an absolutist position. On the surface, it looks as if picking a fight here has the equivalent odds of success as Wile E. Coyote, handling newly-bought Acme-ordered dynamite, in preparation for one of his hare-brained schemes to blow the roadrunner to smithereens. Looking at it more deeply, it hands White all sorts of problems in what Topalov probably considered an unlosable position. Kasparov, the king of complications and calculation, has a deep, abiding belief that to defeat a world-class player, he must take chances, since it is highly unlikely he will manoeuvre himself into a bloodless, Karpovian victory, especially in a blitz game.

[Objectively, 29...Nb7 was probably safer and better, but then the knight's tour gets curtailed by 30.b4 . ]

**30.Rxa5 Nc5** Kasparov yokes opposing ideas with simultaneous attacks on e4 and b3. **31.Ng3?!**

[Topalov logically covers his critical e4-pawn, which turns out to be a fatal encumbrance, and he missed a promising idea: 31.Ra7! Nxe4+ 32.Kf3 Ng5+ *(*or *32...Nc5 33.b4 Rb7 34.Rxb7 Nxb7 35.Ke4* with a dominant position *)* 33.Ke2 Ne4 34.Nf6! Nxc3+ 35.Kd3 d5 36.Nxd5 Nxd5 37.Bxd5 Rf8 38.Ke4 Kf6 39.Bxf7 Rxf7 40.Rxf7+ Kxf7 41.Kxe5 with an extra pawn and strong winning chances. ]

**31...Nxb3 32.Ra7 Nd2 33.Ba2 Rb2** Threatening a discovery with ...Nxe4+ next. **34.Ke1 Kf8** Kasparov's king slips out of the pin. The position remains tensely balanced. **35.Nb4?**

[White should offer a repetition with 35.Ra8+ Kg7 36.Ra7 , when Black can either accept the draw or, more likely, continue to play for the full point with Bg5

37.Nb4 Nb3 . ]

**35...Nb3!?** Maintaining an initiative is a bit like riding a bicycle, in that if we slow down too much, we risk wobbling and falling. Kasparov's inclination is to keep his light-squared bishop on the board to go after Topalov's king.

[ The safer option was 35...Bxa2 36.Rxa2 Rxa2 37.Nxa2 Bf4! 38.Ke2 Bxg3 39.Kxd2 Bxh2 with an extra pawn and relatively good chances to win, since Black can produce a future passer on the kingside later on. ]

**36.Nd3 Rxg2 37.Rxf7+** We tend to spend an awful lot of time and energy thinking about what we want, yet very little once we actually achieve the object of our desires. This wins two pieces for the rook, but at exceedingly high cost, since Kasparov's rook lawn-mowers White's kingside pawns. **37...Kxf7 38.Bxb3+** A new imbalance arises: opposite-coloured bishops, which are like wooden carvings on the old sailing ships, front and rear prow, eternally facing opposite directions. In this case, I think Black benefits, since he is the one with the initiative. **38...Kg7 39.Nf1 Bf4!** QUESTION: Isn't White at least even in this ending, since Black only has rook and pawn for two knights? --- ANSWER: Normally if you get two minor pieces for only a rook and pawn, you are doing well, but this position is an exception for the following reasons: -- 1. White's h-pawn is endangered. -- 2. Black's kingside pawn majority isn't so easy to halt. -- 3. White's minor pieces lack targets. -- 4. White's king is cut off on the first rank, whereas Black's can be activated. -- 5. All of White's remaining pawns are isolated and potential targets. **40.h3** A move based on the thought: a silent person rarely gives offence.

[ 40.Nxf4? exf4 41.Bd5 Rc2 42.c4 g5 43.Nd2 g4 is hopeless for White, since he has no play, while Black mindlessly pushes his 3:1 kingside pawn majority. ]

**40...Bg3+!?** I'm not sure if this is a needless distraction or not.

[ I would just play 40...h5 straight away. ]

**41.Kd1 h5 42.Be6 Bf4** This move binds the f1-knight to movelessness. (Correct: it's not a real word.)

[ 42...g5? carelessly allows 43.Ne3 , when White escapes with a draw: Rh2 *( 43...Rg1+* lets the king off the back rank *)* 44.Nf1! Rg2 45.Bd7 etc. ]

**43.Ne1?!** A dissipation of defensive resources continues in White's camp, forcing his bishop into passive defence of the f1-knight, which hasn't a single move.

[ Tougher was 43.Nb4! Kh6 44.Nd5 Kg5 45.Ke1 Rb2 46.Bd7 , when it's not all that easy for Black to make progress. ]

**43...Rf2! 44.Bc4 g5!** Perfectly timed, now that a white knight is unable to reach f5.

**45.Be2 g4 46.Nd3 Rg2 47.hxg4** EXERCISE (planning): Come up with a plan for Black to make progress: --- ANSWER: Create the most distant possible passed pawn on the h-file. **47...h4!** Threatening ...h4-h3-h2, costing White a piece.

[ The comps prefer 47...hxg4 , but without any clear plan of how to proceed after 48.Ne1! Rg1 49.Kc2 Kf6 50.Kd3 . ]

**48.Bf3 h3! 49.Ke1 Rc2 50.Nxf4 exf4 51.Nd2?**

[ White had to try the admittedly depressing 51.c4 Rxc4 52.Nh2 and hope that his fortress holds. ]

**51...h2 52.Nb1** Oops.
[After 52.Nb1 , Topalov resigned (or likely lost on time) before Kasparov could play Rc1+ , when white pieces stumble like rats stampeding out of a burning barn. ]
[Equally hopeless was 52.Nf1 Kg6 53.c4 Kf6 , which is zugzwang. --- The end was obviously a time-pressure freakout. When I look back on some of my catastrophic time-pressure goof-ups (e.g. a clear pawn ahead versus an IM and I set up a helpmate in one on my own king!), I feel as if I set a world record for obliviousness in the face of danger. --- SUMMARY: This game is an example of how Black's piece activity can extend even into an ending, compensating for our inferior structure, with weak a- and d-pawns. ]
**0-1**

**B33**

□ **Cervera Procas,Ramon**
■ **Degraeve,Jean Marc**
Zaragoza 1998
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nf3** QUESTION: What are the differences? --- ANSWER: -- 1. On f3, the knight blocks White's f2-f4 push. -- 2. It is also closer to the enemy king (on the assumption that Black usually castles kingside), so there is greater danger of White generating an attack based on a future Ng5 lunge. **6...Bb4** The bishop constantly breaches the monastery's rule of silence. Once again, the pin is our best option. **7.Bd3** This is White's main line, where he safeguards e4.
[Other moves: -- a) 7.Bd2?! (a somewhat shady pawn sacrifice) Bxc3 8.Bxc3 Nxe4 9.Nxe5 *(*amazingly, *9.Bxe5?? Nxe5 10.Nxe5 Qa5+ 11.c3 Qxe5* , winning a piece, has been played a whopping 129 times in my database, with White scoring a typo-like 0.5% from this position, which makes me pause and ask: "That high!"*;* while after *9.Qd3 Nxc3 10.Qxc3 0-0 11.0-0-0 d5 12.Bb5 d4 13.Qc5 Qa5 14.Qc4 Be6 15.Qa4 Qxa4 16.Bxa4 f6* , White has nothing for the pawn, P. Kristensen-Be.Larsen, Hedehusene 1992 *)* 9...Nxc3 *( 9...Nxe5 10.Qd4!* saves his bacon *)* 10.Nxc6 Nxd1 (taking the c6-knight is good too) 11.Nxd8 Nxb2 12.Nxb7 Bxb7 13.Rb1 Bxg2 14.Bxg2 Rb8 and Black keeps the extra pawn, I. Fistoul-Du.Hoffmann, Naumburg 2012. ]
[b) 7.Bg5 Bxc3+ 8.bxc3 h6 9.Bh4?! *(*but after *9.Bxf6 Qxf6* , I don't see any real compensation for White's structural damage on the queenside *)* 9...g5 10.Bg3 Nxe4! , and now if White attempts to regain the lost pawn with 11.Bxe5 , Black gets a nasty lead in development after 0-0 12.Bd3 d5 and White is in deep trouble. ]
[c) 7.Bc4 (I think this move may be White's most dynamic option) 0-0

*(*if you are feeling adventurous, then you can try the somewhat greedy *7...Nxe4!? 8.Qd5 Nd6 9.Bb3 Qa5 10.0-0* , L.Lengyel-P.Horvath, Hajduszoboszlo 2001, and now after *Qxd5 11.Nxd5 Ba5 12.Rd1 Nf5 13.c3* , Komodo says White has full compensation for the pawn, but I'm not so sure - with queens off the board, I prefer Black *)* 8.0-0 Bxc3 9.bxc3 Nxe4 10.Ba3 d6 , as in Je. Bosch-I.Rogers, Den Bosch 1999. White has the bishop pair plus pressure on d6, while Black gets an extra pawn with the superior structure. I still prefer Black's side. ]

**7...d5** The same plan as last game. **8.exd5 Qxd5!** But this time I advocate taking with the queen, threatening ...e5-e4.

[QUESTION: In the previous game we went after structural damage by recapturing on d5 with our knight. What is different in this version? --- ANSWER: If 8...Nxd5 , White should probably continue in gambit fashion with 9.0-0! *(*a move made with the philosophy: in some positions, piece activity - not material or structure - gives us sustenance; I think this is superior to *9.Bd2* , which gives White a similarly prospectless position as in the last game after *Nxc3 10.bxc3 Bd6* with a pleasant edge for Black *)* 9...Nxc3 10.bxc3 Bxc3 *( 10...Bd6* is met by *11.Ng5!* , showing one of the differences to posting the knight on f3 - in this case White gets a more dangerous version of an attack than with the knight on b3 *)* 11.Rb1 *(*not *11.Ba3?* due to *Qa5! 12.Bd6 Be6* , intending to castle long next move, which will be very awkward for White's d6-bishop *)* 11...Qc7! 12.Ng5 Bb4 13.Be4 , when White's initiative is strong and probably worth more than Black's extra pawn. ]

**9.0-0!** The only move. **9...Bxc3 10.bxc3** When we deal with a possibly permanent weakness, it has a way of looking back at us accusingly. **10...Bg4**

[QUESTION: Why isn't Black winning a piece with 10...e4 - ? --- ANSWER: Twice as lowdown as a double cross is a double-double cross. The would-be shot fails to the countershot 11.Bxe4! (a shower of fragments falls from the ceiling and it becomes obvious that Black's entire construct is unstable and in danger of imminent collapse; this move is similar to when I'm in the middle of a wonderful daydream, and my wife Nancy jarringly ruins everything by ordering me to take out the trash) Qxd1 12.Bxc6+ (zwischenzug; White doesn't lose a piece after all, and in fact wins a pawn) bxc6 13.Rxd1 with an extra (albeit doubled) pawn for White, who stands better in the ending. ]

**11.Be2?!** An endgame is not what White needs in this position. Practical considerations suggest that he should avoid or at least delay such swaps until a more opportune moment.

[11 Be2 is White's main move here, yet I think it is clearly inferior to 11.c4! , as in J.Hochhecker-E.Rattinger, Latschach 2005. Black should meet this with Qd7 , and if 12.h3 Bh5 13.Bg5 then e4 14.Bxf6 Bxf3 15.gxf3 gxf6 16.Bxe4 Qxh3 17.Bxc6+ bxc6 18.Re1+ Kf8 19.Qd6+ Kg7 20.Qg3+ Qxg3+ 21.fxg3 Rab8 and I think Black stands a microbe better in the ending, since White's queenside pawns are a shade loose, although the end result should be an almost certain draw. ]

**11...Qxd1 12.Bxd1 0-0-0** QUESTION: Who stands better in this ending? ---

ANSWER: Advantage Black. White's bishop pair doesn't make up for his weak queenside pawns, mainly because his position remains quite passive. **13.Ba3 Nd5** Attacking c3 straight away. **14.Ng5** It's always the bar owner (in this case White) who incurs the cost of repair following a drunken brawl. This is a postponement, rather than a cure, to White's strategic ills.

[ Instead, 14.Nd4 Bxd1 15.Nxc6 bxc6 16.Rfxd1 Nxc3 Black wins a clean pawn; ]

[ while after 14.c4 Nc3 15.Bb2 Nxd1 16.Rfxd1 f6! , White's game is quite awful. Black's light-squared bishop is more valuable than the crappy f3-knight. ]

**14...Bxd1 15.Rfxd1 Nxc3**

[ Not 15...Rd7? which fails to 16.c4 Nb6 17.Rxd7 Kxd7 18.Nxf7 and it is Black who fights for the draw. When we love our position so much that we refuse to take action, it's as if we expect our pieces to move themselves and win the game for us. ]

**16.Nxf7 Rxd1+** The murderer's dilemma: What to do with the body?

[ 16...Nxd1 17.Nxh8 Rd2 was favourable too. ]

**17.Rxd1 Nxd1 18.Nxh8 Nc3** The knight follows his own trail, but in reverse. Now the a2-pawn falls and Black gets a new passer on the a-file. It becomes apparent that White's hoped-for initiative wilts. **19.Bb2 Nxa2 20.Nf7 Nab4 21.Nxe5 Nxe5 22.Bxe5 g6! 23.c4** How painful when we give a defence our all, and it's still not enough. Despite having regained his lost pawn, White remains busted in this ending. --- QUESTION: Why? Isn't a bishop superior to a knight when there are opposite wing majorities? --- ANSWER: In general, yes. In this instance, however, Black has multiple other factors in his favour: -- 1. An outside passed a-pawn, whereas White has yet to produce a passed pawn. -- 2. Black's more centralized king. White is forced to expend several tempi to bring his king into play. -- 3. Black's king and knight will gang up on White's overextended c-pawn. **23...Kd7 24.Kf1 Nc6 25.Bc3** Cutting off ...Ne5 and ...Na5. The trouble is White can't keep the black king out of c5. **25...Kd6 26.Ke2 Kc5 27.Kd3** EXERCISE (planning): How did Black force the win? --- ANSWER: Simplification. The pawn ending is an easy win for Black, due to his superior king position and outside passed pawn. **27...Nb4+!** The creature's teeth snap shut an inch from the victim's face. **28.Bxb4+** Radical change, by its nature, tends to threaten those in power - but not this time. Sometimes in a chess game two people may work on the same arithmetic, yet come up with different answers, although that probably wasn't the case here. White undoubtedly knew he was lost.

[ It was just as hopeless to play 28.Ke4 Kxc4 29.Bxb4 Kxb4 30.f4 a5 31.g4 a4 32.f5 gxf5+ 33.gxf5 , since Black ruins his opponent's hopes for a fair fight in the queening race with Kc5! . The problem is that if White's king goes to e5, then Black promotes with check. ]

**28...Kxb4 29.f4 h5**

[ Simplest is 29...b5! , which fills in the final gap in the puzzle. After 30.cxb5 Kxb5 , Black's outside passed pawn enables the win; for example, 31.Kd4 Kc6 32.g4 Kd6 33.h3 a5 34.Kc4 Ke6 35.Kb5 Kd5 36.Kxa5 Ke4 37.f5 gxf5 38.gxf5 Kxf5 39.Kb4 Kg5 40.Kc4 Kh4 41.Kd3 Kxh3 42.Ke2 Kg2 etc. "The new court jester

fills my hours with endless amusement," declares the king, as he indicates his e2-brother, who always seems to be one step behind. ]

**30.g3 b5!** Now he sees the winning idea. **31.cxb5 Kxb5 32.h3 Kc5 33.g4 Kd5**
[ Not 33...hxg4?? 34.hxg4 Kd5 35.Kc3 Ke4 36.f5 gxf5 37.gxf5 Kxf5 with a draw. ]

**34.gxh5**
[ Now 34.f5 fails miserably to gxf5 35.gxh5 *(* or *35.g5 h4 )* 35...Ke5 and Black's two passed pawns easily force the win. ]

**34...gxh5 35.h4 a5 36.Ke3 a4 37.Kd3 a3 38.Kc3 Ke4**
[ Black wins by a mile after 38...Ke4 39.Kb3 Kxf4 40.Kxa3 (starvation is the best of seasonings, so that even a stale crust of bread tastes wonderful) Kg3 41.Kb3 Kxh4 42.Kc3 Kg3 and the h-pawn promotes. --- SUMMARY: Remember to differentiate 6 Nf3 with ...Qxd5! and 6 Nb3 (as in Brkic-Shariyazdanov) with .. . Nxd5!. ]

30. German Bundesliga 1998

*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.c3 Bg7 12.exf5 Bxf5 13.Nc2 0-0**

Rather than begin the fight for d5 straight away, Black prefers to castle first. **14.Nce3 Be6 15.Bd3** In this version White deems a fianchetto too slow and his bishop takes direct aim at the black king. **15...f5 16.Qh5** This is White's most aggressive option.

[ Later on we look at 16.0-0 . ]

**16...e4** As pretty much always, we are prepared to give White control over f4, if in doing so we are handed control over e5. **17.Bc2 Ne7** Even though the dizzying array of options alter, our plans often remain the same. Black follows the standard plan of direct challenge to d5 whenever possible. **18.Rd1**

[ Others: -- a) 18.Bb3 is considered in the next game. ]

[ b) 18.Nf4 (White occupies the f4-hole with tempo) Bf7 (Black regains the tempo) 19.Bb3 d5 (now White's queen really is attacked) 20.Qg5 Ng6! (Black is fine in the ending) 21.Qxd8 *(* after *21.Qxf5?? Nxf4 22.Qxf4 d4! 23.Nf5 Bxb3 24.axb3 Qf6 25.g4 dxc3 26.0-0 cxb2* White is busted *)* 21...Raxd8 22.Nexd5 Nxf4 23.Nxf4 b4! (Black's favourite counterplay mechanism again) 24.Ne6 Bxe6 25.Bxe6+ 1/2-1/2. Draw agreed as White has nothing, V.Anand-V.Kramnik, Frankfurt 2000. ]

**18...Rc8** There are two ideas behind this move: 1. Black may later play ... Rc5, which not only pressures the d5-knight, it also indirectly protects Black's slightly vulnerable f5-pawn. 2. In some cases Black may engineer a pawn break on b4, after which White's c2-bishop is a problem if it's loose. This means that White is prohibited from played c3xb4.

[ The alternative 18...b4 is the main line. Play can continue 19.cxb4 *(* after *19.Nxb4 a5 20.Nbd5 Nxd5 21.Nxd5 Rb8 22.Bb3 a4 23.Bxa4 Rxb2* Black gets more than enough compensation for the pawn *)* 19...Rc8 *(* or *19...Nxd5*

*20.Nxd5 Bxb2 21.0-0 Bxd5 22.Rxd5 Be5 23.f4 exf3 24.Rxf3 Qb6+ 25.Kh1 Qxb4 26.Rd1 Qg4 27.Rxf5 Qxh5 28.Rxh5* with an even ending, M.Erdogdu-M. Zaslavsky, Rijeka 2010 *)* 20.Bb3 Ng6 21.0-0 , C.Zeng-M.Tabatabaei, Tianjin 2018. Black looks okay after Kh8 with the dual threats of ...Bxb2 and ... f5-f4. ]

**19.Bb3** White reinforces d5. **19...Ng6** Black seizes control over f4 and gets White nervous about the push ...f5-f4. **20.g3** This move hasn't been repeated, although it's Komodo 13's top choice.

[ Instead, 20.0-0 Kh8 21.f4 a5 22.a3 was H. Namyslo-T.Runting, correspondence 2001. Here Black can play the forcing b4!? 23.axb4 axb4 24.cxb4 Bxd5 25.Nxd5 Ne7 with only an edge for White. ]

**20...Be5 21.f4**

[ More accurate is 21.0-0! , but even there Black holds his own with careful play; e. g. Kh8 22.f4 exf3 23.Bc2! b4! 24.Nxf5 Bxd5 25.Rxd5 (threatening 26 Nh4!) Rf6! 26.Nh4 Kg7 27.Nxf3 bxc3 28.bxc3 Rxc3 29.Be4 Rc4 30.Ng5 Rxf1+ 31.Kxf1 Qf6+ 32.Kg2 h6 33.Qe2 Qxg5 34.Qxc4 Nf4+ 35.Kf1 Nxd5 with a likely draw. ]

**21...exf3 22.0-0 f4!** As I have often told students: if you like the warmth of a soft, cosy, protected environment, then I'm afraid the Sveshnikov is not the right opening for you. --- Black isn't going to sit around and allow White to pile up pressure on the f5-pawn. So Van Wely dissolves it, while exposing White's king a little. Black stands at least equal. **23.gxf4 Nxf4 24.Nxf4 Bxb3 25.axb3 Rxf4 26.Rxf3 Rh4!?** This tempting move may not be best.

[ 26...Rxf3 27.Qxf3 Kh8 is equal. ]

**27.Qf7+**

[ After 27.Qf5! Black stands slightly worse since he must avoid Bxh2+?? *(* or *27...Rxh2?? 28.Ng4 )* 28.Kf1! Be5 29.Ng4 Bg7 30.Rxd6! and Black is busted. ]

**27...Kh8 28.h3 b4 29.c4!?**

[ 29.Ng4! bxc3 30.bxc3! Bxc3 31.Qe6 Bg7 32.Rxd6 Qc7 33.Rd7 Qc5+ 34.Kg2 Rg8 should be okay for Black. ]

**29...Qg5+** EXERCISE (critical decision): White can play his king to f2, f1 or h1. He can also block the check with 30 Ng4. Two of the options lose, while two hold the game. Make certain you are in the favourable bracket. **30.Kh1??** ANSWER: White overestimates his own attacking prospects, while grossly underestimating Black's. Moving the king to h1 or blocking with the knight both lose, while White holds on by moving his king to either f2 or f1.

[ For example: -- a) 30.Kf2 Bd4 31.Qe6 Rg8 32.Ke2 Rh6 33.Qd5 Bxe3 34.Rxe3 and White isn't worse. ]

[ b) 30.Kf1 Rg8 31.Ng4 Bxb2 32.Qe6 a5 33.Rxd6 and White is fine. ]

[ c) 30.Ng4?? is undercut by the undermining shot Rxh3! . ]

**30...Rg8** Just like that, Black has a wicked attack. **31.Qf5 Qg7 32.c5** EXERCISE (combination alert): Find one powerful shot and White must immediately resign.

**32...dxc5** Why be satisfied with pretty good, when great is available?

[ ANSWER: The text still wins but is far less potent than 32...Bd4! (overloaded

defender; threatening ...Bxe3, destroying the defender of the g2 mating threat) 33.Ng4 dxc5 and there is no defence to the threat of . ..h7-h5!. ]

**33.Qd7 Qg6 34.Qf5 Bxb2 35.Qxg6** White's only ambition for now is to outlast Black's attack. The trouble is that Black is winning the ending. **35...Rxg6 36.Nf5 Re4 37.Rd8+ Rg8 38.Rxg8+ Kxg8 39.Nd6 Re2 40.Nc4** This blockade won't last forever. **40...Bd4 41.Rf5 Ra2!** . Black will play ... a6-a5-a4, creating two connected passed pawns and ending White's resistance.

**0-1**

**B33**

□ **Yatsishin,Ivan**
■ **Mikhaletz,Lubomir**
Lvov 1997
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.g3** White logically reinforces his control over the key e4- and d5-squares. Yet the move is too non-confrontational to bother our side much, since the bishop loses its influence on the queenside. **11...0-0 12.Bg2 Bg5** QUESTION: Won't this walk headlong into White's f2-f4 break? --- ANSWER: We want to provoke f2-f4, since ...e5xf4 then follows the principle: "Allow an opening of the position when you own the bishop pair". **13.0-0 Be6**

[The immediate 13...Ne7 is Black's main move and a reliable equalizer too. For example, 14.Nxe7+ Qxe7 15.c3 *(*or *15.c4 b4 16.Nc2 a5 17.b3 Be6 18.Re1 Rfd8 19.Ne3 a4* and Black is no worse, S.Beshukov-L.Van Wely, Moscow 2004 *)* 15...Rb8 16.Nc2 a5 17.Re1 Be6 18.Ne3 Bxe3 19.Rxe3 Rfc8 and if anyone stands better it is Black, who can play for a ...b5-b4 break, L. Ljubojevic-M. Illescas Cordoba, Linares (3rd matchgame) 1993. ]

**14.c3 Ne7** We constantly challenge the d5-outpost. **15.f4?!** Quirks in our style - and even our flaws - are also evidence of our uniqueness. It seems there are some of us who are constitutionally incapable of playing quietly. But the nature of violence is its irreversibility. Once committed, we can never return to our old life. We can follow the letter of a position's law, while simultaneously violating its spirit. I realize that f2-f4 is White's only active option, yet this impatient move is the prelude to a self-inflicted wound in his structure.

[The same applies to 15.Nc2 Nxd5 16.exd5 Bd7 17.Nb4 f5 18.f4?! , when exf4 19.gxf4 Bh6 *(*or *19...Qb6+ 20.Kh1 Bf6* , as in the main game *)* 20.Nc6 Qh4 21.Qd4 Rae8 is good for Black, and 22.Rf2 Rf6 23.Raf1 Rg6 24.a4 Rg4 25.Kh1 bxa4 26.Qxa4?? Re1 was winning in G.Carreto Nieto-L.Ibarra Chami, Mexican Championship, Mexico City 2008 ]

[White should settle for the boring 15.Nxe7+ Qxe7 16.Nc2 a5 17.a3 Rfd8 18.Re1 Qb7 , even if Black still holds a slight edge, since he owns the bishop pair and can later engineer a ...b5-b4 break, T.Davis-C.Lakdawala, San Diego (rapid) 2003. ]

**15...Bxd5!** We follow the Sveshnikov "plug d5 with a white pawn" principle. **16.exd5 Qb6+**

[Or 16...exf4 17.gxf4 Bh6 18.f5 , A.Butunoi-K.Sakai, correspondence 2003, where the players agreed a draw, although Black looks better after Bg5 , since White struggles on the weakened dark squares. ]

**17.Kh1 exf4** Inflicting due damage to White's pawns. **18.gxf4 Bf6 19.Nc2 a5** Now ...b5-b4 is just one worry for White. **20.a3 Ng6** Obviously Black is unafraid of f4-f5, since his knight is then sent straight into the e5-hole. **21.Qd2 Rfe8 22.Rae1 Nh4**

Sometimes an opponent's piece threatens nothing specific (at least for the moment!), yet we still feel the silent malice of its displeasure. Here the knight eyes the white bishop, as well as the f5-square. **23.Be4 Re7 24.Re2 Rae8 25.Rfe1** It's pretty clear that White's ambitious f2-f4?! produced less than meagre results regarding his activity level, while significantly weakening his pawns. --- QUESTION: Doesn't the presence of the opposite-coloured bishops offer White good drawing chances? --- ANSWER: Not while queens remain on the board. In fact, the opposite-coloured bishops help Black, as in often the case in the middlegame. White is in trouble for the following reasons: -- 1. He has three pawn islands to Black's two, nurses isolanis on the f- and h-files, and the d5-pawn is artificially isolated and potentially weak as well. -- 2. Black's bishop is more powerful than its counterpart. White remains weak on the dark squares, which may affect the safety of his king in the future, and meanwhile he must be on guard for ... b5-b4 ideas. **25...g6 26.Bg2!** It's a good use of energy when we make amends, rather than dwell on past mistakes. White realizes that his position has soured, and hopes for healing with simplifying exchanges along the e-file.

[QUESTION: Can White play for a kingside attack by opening lines with 26.f5 - ? --- ANSWER: White is too constrained in the middle to threaten Black on the flank. For example, after Qc5 27.fxg6 hxg6 28.Qf4 Qc4 29.Qg4 *( 29.Rf2??* loses to *Rxe4 30.Rxe4 Rxe4 31.Qxf6 Qxd5 )* 29...Kg7 , White is completely tangled up. ]

**26...Qb7**

[It was more accurate for Black to exchange rooks himself: 26...Rxe2 27.Rxe2 Rxe2 28.Qxe2 Qc5 29.Be4 Kf8 30.h3 h6 31.Kh2 g5! (weakening White further on the dark squares) 32.f5 Be5+ 33.Kh1 Kg7 and Black continues to make progress. ]

**27.Rxe7 Rxe7 28.Rxe7 Qxe7 29.Qe3** White engages reinforcements to shore up his king's defences. **29...Qb7!** It's crucial for Black to keep queens on the board, following the principle: "Opposite-coloured bishops favour the attacker". In this case White's king is clearly the less secure.

[White should hold a draw after 29...Qxe3? 30.Nxe3 . ]

**30.Qe4 Nf5** Another slight inaccuracy.

[After 30...Qc8! (preventing White's next move) 31.Ne3 Qc5 32.Ng4 *(*or *32.Bh3 b4! )* 32...Kg7 , Black has good chances to convert. ]

**31.Bh3! Ne7 32.Ne3 Kg7 33.Bg2** Going back to the long diagonal, now that Black's knight is unable to occupy f5. **33...Qb6 34.Bf3 Qa7 35.Kg2** EXERCISE (planning): How did Black make progress? --- ANSWER: Mikhaletz enlarges upon the scope of his ideas. The timing is perfect for the ...b5-b4 break. **35...b4! 36.axb4 axb4 37.cxb4** Now every white pawn on the board is an isolani.

[The queen is unable to take, since it has to protect the e3-knight, while 37.Nc4? is no good at all in view of bxc3 38.bxc3 Nf5 , and if 39.Qd3 Nh4+ 40.Kg3 Qg1+ 41.Kh3 Qf2 42.Be4 Ng2! , the interference shot forces mate. ]

**37...Bd4**

[Immediate infiltration with 37...Qa1 looks quite promising too. ]

**38.Nc4 Nf5 39.b5?!** When we are busted, it's easy to slip into a past-caring state, where we become almost numb with indifference to our fate. This is clearly unwise, akin to a man who banquets upon his final food stores in a famine-raved land, thinking: "I'm full today, so why waste energy worrying about tomorrow?"

[Eliminating the knights with 39.Bg4?! Qa2! 40.Bxf5 Qxc4 41.Bg4 Qxb4 42.b3 Qd2+ 43.Be2 Be3 44.Kf3 Bc5 doesn't resolve White's problems, since his king and his pawns are fair game to Black's queen and bishop team; note that 45.Qd3?? runs into Qe1 . ]

[Instead, 39.Qd3 was necessary. Yes, White is still in trouble, but slowing the rate of deterioration is still a small achievement. ]

**39...Qa1! 40.Qe2 Qc1!** The queen approaches with cat-soft footsteps; white pawn targets are everywhere. **41.b3** In such dreary situations, we wish we were someone else, who is somewhere else.

[ 41.b6? fails to Qxc4 42.Qxc4 Ne3+ 43.Kg3 Nxc4 44.b7 Ba7 . ]

**41...Qxf4 42.Be4** EXERCISE (combination alert): Sorrows tend to arrive for the unfortunate in clusters, almost as if the first one opens the gate for all the others. Black to play and win. --- ANSWER #1: Interference/ pin. **42...Ne3+!**

[ANSWER #2: Another way is 42...Nh4+! 43.Kh3 f5 44.Bg2 Kf8! (preventing Qe7+), when there is no defence against ... g6-g5-g4 and mates. ]

**43.Nxe3 Qxe4+ 44.Kf2 Qf4+!**

[Black wins a piece after 44...Qf4+ 45.Qf3 Bxe3+ . "This murder will set my spiritual growth back by months," bemoans the bishop. --- SUMMARY: White's set-up with g2-g3 and Bg2 fails to trouble us, since the bishop is then missing from the queenside action, while the plan of f2-f4 opens the position for our dark-squared bishop. Meanwhile, we can challenge White's control over d5 by ...Be6 and ...Ne7 with easy equality. ]

German League 1995
*[John Emms]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 0-0 12.Nc2 Bg5 13.a4 bxa4 14.Rxa4 a5 15.Bc4** White sensibly develops his light-squared bishop and gets ready to castle.
[ The alternative is 15.Bb5 . If Ne7 16.Nxe7+ Qxe7 White can try to use the pin on the a-file to get his knight to d5 by playing 17.Nb4 , but Black has more than one suitable response. For example, Bg4!? *( 17...Bh3!?* is also possible *)* 18.Qa1 Qb7!? 19.Bc6 Qb6 20.Bxa8 Qb5! 21.f3 axb4 22.fxg4 Qd3 23.Qd1 Qe3+ 24.Qe2 Qc1+ 25.Qd1 Qe3+ with perpetual check, K.Landa-L.Van Wely, German League 2004. ]
**15...Rb8** A typical Sveshnikov move, activating the rook and attacking the b2-pawn.
**16.b3**
[ 16.Ra2 is the alternative. ]
**16...Kh8 17.0-0**
[ In recent years there has been some focus on more aggressive lines for White, including the pawn sacrifice 17.Nce3 g6 18.h4!? . If Black declines the offer, White steams forward with 19 h5, so most games from here have continued Bxh4 19.g3 Bg5 20.f4 exf4 21.gxf4 Bh4+ 22.Kd2 – the king runs to the queenside

and White will try to utilize his space and open lines on the other wing, but Black's defensive resources should be sufficient. - the king runs to the queenside and White will try to utilize his space and open lines on the other wing, but Black's defensive resources should be sufficient. ]

**17...g6** Preparing ...f7-f5 and to recapture on f5 with the g-pawn.

[More recently Kramnik has played the immediate 17...f5 , and Black is fully equal after 18.exf5 Bxf5 19.Nce3 Bg6 . For example, . For example, 20.Re1 Rb7 21.Bd3 Bxd3 22.Qxd3 Bxe3 23.fxe3 Rxb3! 24.Qc4 (this fork wins material, but... ) Rb2 25.Qxc6 Qg5! (...wins it back!) 26.Nf4 *( 26.g3??* loses to *Qh5 27.Rh4 Qf3 )* 26...exf4 27.Rxf4 Rfb8 and a draw was agreed in V.Anand-V.Kramnik, Wijk aan Zee 2005. ]

**18.Qe2** Cyrus Lakdawala: 'QUESTION: What is the idea behind posting the queen on e2? --- ANSWER: It has three functions: -- 1. The queen supports e4. -- 2. With the queen on e2, White enables a future Bb5. -- 3. White clears both the back rank and d-file for the f1-rook.'

[ 18.Qd3 f5 19.Rd1 is probably more challenging. ]

**18...Bd7** A useful move, which indirectly hits the rook on a4. Cyrus Lakdawala: 'Trying to make White's a4-rook nervous about a future discovery.' **19.Rfa1** Cyrus Lakdawala: 'Lutz doesn't fear ghosts and keeps his rook sitting on a4.'

[After 19.Ra2 f5 20.f3 Bh6 21.exf5!? gxf5 22.b4 axb4 23.Ncxb4 Na5 24.Bd3 Nb3! (threatening ...Nc1, and with c5 as a potential outpost) 25.Ra7 Ra8 26.Rxa8 Qxa8 27.Kh1 Nc1 28.Qc2 Nxd3 29.Qxd3 , R.Bar-J.Lautier, Tel Aviv (simul) 1998, I would play e4! , when I like Black's bishops. ]

**19...Bh6** Now the queen can come out to the active h4 post. White's next move prevents this. **20.g3** Cyrus Lakdawala: '!?' Cyrus Lakdawala: 'We reach theory's end at this point. --- QUESTION: Why did White play this move which seems to weaken his kingside? --- ANSWER: First, he gives his king luft. Secondly, Lutz wanted to take the sting out of ...Qg5 and also prevent ...Qh4. The price he paid for this is, as you indicate, slightly weaker light squares around his king, and he also gave Black a hook to play to open the game further with ...f7-f5-f4.'

[Alternatives: -- a) 20.Nce3 f5 21.Nf1 Be6 22.R4a2 , R.Zboril-M.Pirs, correspondence 2008. At this point Black might consider fxe4 23.Qxe4 Bxd5!? 24.Qxd5 Ne7 25.Qxa5 d5 26.Bb5 Nf5 27.Qxd8 Rfxd8 28.c4 Nd4 29.Ba4 dxc4 30.bxc4 Rb4 and White's extra pawn will soon fall. ]

[b) 20.Bb5 f5 21.Bxc6 Bxc6 22.Rxa5 Rxb3 23.Qc4?! *(*better was *23.Ncb4 Bxd5 24.Nxd5 Qxa5 25.Rxa5 Rb1+ 26.Qf1 Rxf1+ 27.Kxf1 fxe4 28.Ke2 Rb8 29.Ra2* with an approximately even ending *)* and now in A. Afanasiev-P.Smirnov, Prokojevsk 1998, Black could have played 23...Bxd5! 24.Qxd5 Qb6 25.exf5 Rb1+ 26.Ne1 Rxf5 27.Ra8+ Bf8 28.Qd2 Rb2 29.Nc2 Qb3 30.Rc1 Kg8 , when he is the one applying pressure. ]

**20...f5!** Finally this lunge comes. **21.exf5?!** This is too accommodating. Cyrus Lakdawala: '!?' Cyrus Lakdawala: 'Philosophically, I just don't like this swap (although we have seen it earlier in the chapter), which violates two principles: -- 1. "Don't trade

a central pawn for a wing pawn". In this case White essentially gave away his e-pawn for Black's g-pawn. -- 2. "Don't open the position when your opponent owns the bishop pair".'

[White should seek action on the queenside with 21.b4 . ]

[I would have gone for something like 21.R4a2 fxe4 22.Qxe4 Bf5 23.Qe2 Qd7 24.Nce3 , when I slightly prefer White's central light square control over Black's kingside attacking chances. ]

**21...gxf5 22.b4** Cyrus Lakdawala: 'QUESTION: Doesn't this move rid Black of his weak a-pawn? --- ANSWER: As I mentioned earlier in the chapter, a5 and d6 may be weak, but they are not so easy for White actually to capture without offering Black serious concessions. By playing his last move, hopes to accomplish two things: create a passed b-pawn (if Black exchanges on b4 - which Kramnik doesn't!) and open the a-file for his rooks (which doesn't happen either, due to Kramnik's coming pawn sacrifice!).' **22...e4!** Now the knight is coming to e5 and Black's pieces are beginning to look menacing. Cyrus Lakdawala: '!?' Cyrus Lakdawala: 'The initiative is a commodity, to be bought, if the price is right. This ambitious move sets the precedence for further aggression and is the chess equivalent of the cowboy commanding his horse with: "Giddy-up!" Kramnik offers his a-pawn to accelerate his kingside attack by clearing the e5-square for his knight. --- QUESTION: Does Black get compensation for this venture? --- ANSWER: Natural attackers have high recidivist rates when it comes to semi-sound sacrifices. But nobody can call Kramnik - one of the greatest strategists of all time - a coffeehouse player. Being a pawn down ranks low on Black's anxiety scale, since he has very real chances of getting to White's king with his attack. If we attempt to compute long strings of variations to justify such a sacrifice, we will invariably fall short. Instead, such sacrifices are felt, more than calculated, by a gut response, otherwise known as intuition.'

[Safer was 22...axb4 23.Ncxb4 Nxb4 24.Rxb4 , when I think the game is approximately level, even if Komodo prefers White. ]

**23.bxa5?** Cyrus Lakdawala: 'White may own a passed a-pawn but, in gaining it, he sealed the a-file for his rooks.'

[In his notes to the game Kramnik prefers giving up an exchange with 23.Rxa5! Nxa5 24.Rxa5 , when at least White no longer has to worry about ...Ne5 ideas. ]

**23...Ne5 24.Rb4 Rxb4** Cyrus Lakdawala: '!' Cyrus Lakdawala: 'Kramnik takes an absolutist position, allowing White two connected passed pawns. If Black's attack stalls, he is as good as dead.'

[Kramnik wanted to keep his queen on the kingside, and therefore avoided 24...f4 25.Rxb8 , which deflects the queen to b8. ]

**25.cxb4** If White had more time these pawns on the queenside would be winners, but Kramnik is going to break through on the kingside first. Cyrus Lakdawala: '?' Cyrus Lakdawala: 'White needs piece play, not passed pawns (which don't have time to be pushed).'

[White just may survive if he revises his agenda with 25.Ncxb4! f4 *(*or *25...Nf3+ 26.Kg2 Qe8 27.Nb6 Qh5 28.h3 )* 26.Qxe4 Bf5 27.Qd4 fxg3 28.hxg3 Bg7

(threatening ...Nf3+) 29.Be2!! (...which White allows: attack and defence go to war, and it appears to the naked eye that attack gets the better of it - the reality may not be so; what terrible injustice when our hard-earned win is placed on hold) Nf3+ 30.Bxf3 Bxd4 31.cxd4 Bg6 32.Bg2 , when White's nervous king gives his bishop a dazzling smile, slaps him on the back, and tells him he will be president one day. Sometimes a fortuitous accident is of greater benefit than a meticulously detailed plan. While it's true that White sees his checking account grow rather emaciated, with only two pieces and two pawns for the queen, things have changed for the better for him. Suddenly his king is safe and he has a passed a-pawn surging down the board. Komodo slightly prefers Black, but I disagree with this assessment and think White is at least equal; Black might even risk standing worse unless he can drum up counterplay in a hurry. ]

**25...f4!** Cyrus Lakdawala: 'On one side is civilization, on the other savagery.' **26.Nd4** Cyrus Lakdawala: 'Lutz desperately attempts to cover f3.'

[ EXERCISE 7: What does Black play after 26.Qxe4 - ? ]

[ Just pushing the pawn with 26.a6 loses quickly to Bg4! 27.Qxe4 Nf3+ 28.Kg2 Ng5 ; for example, 29.Qe1 *(* if *29.Qd4+ Bg7;* or *29.Qd3 Bf5* , followed by ... Be4+ *)* 29...Bf3+ 30.Kg1 Nh3+ 31.Kf1 Qc8! and so on ]

[ while 26.Ra3 is met by Qg5! 27.Qxe4 Nxc4 28.Qxc4 Be6 , winning a piece, since 29.Rd3 fxg3 30.hxg3? Qc1+ 31.Kg2 Bh3+! 32.Kxh3 Qh1+ fatally exposes the white king. ]

**26...e3!** Black marches on! Cyrus Lakdawala: 'When a position begins to bleed, it tends to attract sharks.' **27.fxe3** Cyrus Lakdawala: 'We note the rapid decline of Lutz's once-stately edifice.' **27...f3!** Cyrus Lakdawala: 'Plunging into the belly of White's defences.' **28.Qa2 f2+ 29.Kg2**

[ Or 29.Kh1 Nxc4 30.Qxc4 Bh3 31.Nf4 Qa8+!-+ 32.Nc6 f1Q+ 33.Rxf1 Bxf1 and wins. ]

**29...Qe8!** Now all of Black's remaining pieces are participating in the attack. There is no way for White to defend successfully. Cyrus Lakdawala: 'Now White must worry about the queen swinging over to h5.' **30.Be2 Ng4** Cyrus Lakdawala: 'And now both ...Qe4+ and ...Qh5 are in the air.' **31.Bf3**

[ A sample of the horrors which await White: 31.Qd2 Qh5 32.Bxg4 Qxg4 (threatening ...Qh3+ and f2-f1Q) 33.Nf4 Bxf4 34.exf4 Qh3+ 35.Kxf2 Qxh2+ 36.Ke3 Qxg3+ 37.Ke4 (the king peers frequently through his rear-view mirror to see if he is being followed - it soon grows quite obvious that he is) Re8+ 38.Kd5 Qg8+ 39.Kxd6 Rd8 40.Kc5 Rc8+ 41.Kd6 Bh3 42.Rc1 Qd8+ 43.Ke5 (the king clings to life through a method of adhesion which is beyond the understanding of the finest medical minds of the day) Qe7+ 44.Kd5 Qb7+ 45.Rc6 Rxc6 46.Nxc6 Qd7+ and the white queen falls. "Your Grace does Us great honour to pay our humble country a visit," Black's queen says to White's kidnapped king. ]

**31...Nxe3+ 32.Nxe3 Qxe3! 33.Qxf2** Cyrus Lakdawala: '?' Cyrus Lakdawala: 'White just blundered, albeit in a losing position. In such forcing situations, we can't pick a

line with only a kernel of truth to it. It must contain the truth. --- EXERCISE (combination alert): The penultimate stage is complete, and now comes the moment to complete the job. How did Kramnik force the win? --- ANSWER: Overloaded defender/pin/weak back rank.' **33...Bh3+! 34.Kg1 Qc3** Threatening both ...Qxa1+ and ...Be3. Cyrus Lakdawala: 'Threatening the white rook as well as 35...Be3.' **35.Re1 Bd2!** White loses material;

[ for example, 35...Bd2 Cyrus Lakdawala: 'is the beautiful final step of the combination, overloading White's rook, who is unable to keep watch over both e3 and the first rank; for example,' 36.Nb5 *( 36.Re4 Qc1+;* , or *36.Rd1 Be3; 36.Re2 Qa1+* ends the game quickly. The delivery of checkmate is a weapon which only needs to be fired once. --- I very nearly put this game into 'Kramnik: Move by Move', but didn't have the room (the ruthless editorial staff of Everyman insist that my books remain under 1,000 pages!). Now I'm glad I didn't, since it fits neatly into this book. --- SUMMARY: I think 18 Qe2 is one of White's best options (for the reasons given in the first note to the game); but if we respond correctly, we should be able to generate adequate kingside chances. *)* 36...Qxf3 . Another wonderful game by Kramnik in the Sveshnikov. . Another wonderful game by Kramnik in the Sveshnikov. ]

43: Russian Championship 1995
*[Jimmy Liew]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5!?** More active than the previous game's 5...Bd6, but also more risky via this direct move order. **6.Ndb5! d6 7.Bg5 a6** The only good way to meet the twin threats of Qa4+ and Bxg7. **8.Na3 b5?!** Too ambitious. **9.Nd5 Be7!?** This is certainly consistent. **10.Bxf6 Bxf6 11.c3 Bg5!** The best try. **12.Nc2 Rb8** QUESTION: This looks terrible for Black, doesn't it? --- ANSWER: At first it might seem Black's opening is a failed one, as he has weaknesses all over the place (c4, c7 and a7). The one redeeming factor is that White has not developed his kingside and is still a couple of moves away from castling. Can Morozevich capitalize on this? **13.Bd3?! 0-0 14.0-0 Be6 15.Nce3?!** White wants to keep his rook on the fifth rank to rule out ...c6-c5 and/or ...Qa5; **15...Bxe3 16.Nxe3** So the rook has reached c5 and the c4-pawn is indefensible. The price was surrendering the b-file, where Morozevich is now able to generate active counterplay. **16...Qb6** Threatening a back rank check, which White hurries to prevent.
[ 16...Ne7 ]
**17.Bc2 b4!** Morozevich does not give White time to consolidate. At the same time he plans to increase his control of the b-file by doubling rooks. **18.Bb3?** This is not the moment to be grabbing pawns. **18...bxc3 19.bxc3 Qc5 20.Rb1 Rb5! 21.Qd3 Na5 22.Bxe6**
[ 22.Bd5 saves the queen and wins. ]
**22...fxe6** Having given his king some luft, Black is now winning, even if he didn't realize it at the time. **23.Rfd1 Rxb1?!** It can be a sobering experience analysing sharp games with modern engines, even games played by top grandmasters. Where earlier annotations attached exclamation marks, the silicon monsters calmly shake their heads. **24.Rxb1** Aseev finds the only way to stay in the game. **24...Qc6 25.Rb4 Rc8?** Imaginative, but incorrect. **26.g3??** A blunder. **26...h6??** Black reciprocates. **27.Qd1 Nb7 28.Qb1 Nc5 29.f3 Qc7 30.Kg2 Kh7** Restoring the material balance, after which the engines declare "0:00" equality. Nonetheless, Black retains practical chances as the white king is not secure and it is harder to defend than attack, especially in time trouble. **31.c4 Qa5** You don't want to trade queens when you have the initiative and your opponent's king is exposed. **32.Rb2 Rc7 33.Qc2 Nb7??** Another blunder. **34.Qd2? Qc5? 35.Rb3? Na5 36.Rd3?! Rd7 37.Qc3 Nc6**

**38.Qa3 Nb4!** Revitalizing his initiative, and with White's flag hanging. **39.Rd2 a5 40.Rd1?!** Aseev overstepped the time limit; after **40...Rb7 41.Rd2 Nc6 42.Qd3** , White is in trouble again anyway. But even at the end the engines aren't done, indicating a defence with **42...Kg8! 43.f4 exf4 44.gxf4 Rf7 45.f5 Qe5** , and if **46.Rf2 Nb4 47.Qb1** then **47...Qd4 48.fxe6 Rxf2+ 49.Kxf2 Qd2+ 50.Kf3 Nd3 51.Qg1**

[ 51.e7? Qf2+ wins the queen instead. White gets another chance on the next move. He should have played 52.Kg4! Ne5+ 53.Kh3 Qf3+ , when 54.Kh4! g5# ]

**51...Ne5+ 52.Kg3 Qd3 53.Kf4**

[ 53.e7 Kf7! 54.Qf2+ Kxe7 , claiming that White can hold this position two pawns down. That would a lot for a human to find even with an hour on the clock. ]

[ Instead, 53.Qf2 Nxc4 *( 53...Qxe4* and Black loses his bishop, as there is no good way to forge a retreat; e.g. *54.e7 Ng6 )* 54.e7! is dead level. Aseev doesn't have time to spot it: Qxe4! 55.Qf8+ Kh7 (exploiting the pin on the e5-pawn) 56.e8Q ]

■ **Shirov,Alexei**

(Game 26) Horgen 1994

*[Neil McDonald]*

**1.e4 c5 2.Nf3 Nc6**

[This game actually began with the move order 2...e6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 6.Ndb5 d6 7.Bf4 e5 8.Bg5 a6 9.Na3 b5 10.Nd5 Be7 etc. It's the identical position, but with one more move having been played by White and Black! (Bf4 then Bg5, ...e7-e6 then ...e6-e5 respectively). NOTE: When looking up games in the Sveshnikov main line in books and databases, always take account of a possible difference in move number. ]

**3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Bb7** Rather than castling, Shirov seeks immediate counterplay against the white centre. **12.Nc2 Nb8 13.a4 bxa4 14.Rxa4 Nd7 15.Rb4 Nc5** It looks as if the black pieces are well organized and causing White problems over the defence of e4. However, Kasparov found something amazing: **16.Rxb7!! Nxb7 17.b4!** White is the whole exchange down, but he has killed off any semblance of activity from Black and can proceed to create a passed pawn on the queenside. Furthermore, the black knight on b7 is uselessly placed and the a6-pawn weak. It is admittedly difficult to grasp the value of the sacrifice – after all, Shirov didn't see it coming! However, playing through this game and Anand-Van Wely below (which features a similar sacrifice) will help you to appreciate the concept. **17...Bg5 18.Na3 0-0 19.Nc4 a5 20.Bd3** White doesn't hurry to play b4-b5 as it would let the black knight out via c5. **20...axb4 21.cxb4 Qb8 22.h4!** The black bishop is made to choose between going to d8, where it blocks the only exit for the knight from b7, or else slunk back to h6, when it can no longer join the fight on the queenside. **22...Bh6 23.Ncb6 Ra2 24.0-0 Rd2 25.Qf3** Suddenly Black has to reckon with a direct attack on his king. **25...Qa7 26.Nd7 Nd8**

[ Shirov gives back the exchange to try to buy off the attack, as if 26...Ra8 27.Bc4!? intending 28 Ne7+ etc. and f7 drops. ]

**27.Nxf8 Kxf8 28.b5 Qa3 29.Qf5! Ke8**

[ Or 29...Rxd3 30.Qd7 and the threat of back rank mate decides. ]

**30.Bc4 Rc2 31.Qxh7! Rxc4 32.Qg8+ Kd7 33.Nb6+ Ke7 34.Nxc4 Qc5 35.Ra1! Qd4**

[ Or 35...Qxc4 36.Ra7+ Ke6 37.Qxd8 . ]

**36.Ra3 Bc1 37.Ne3** Black resigned as the threat of a fork on f5 or invasion on d5 is too much. A classic game with a theme that still works nowadays, as the next illustrative game shows.

[ Theory has recently favoured 10...Bg7 in this position to allow the attack on d5 by ...Ne7 without getting mated! ]

**11.Bd3 Be6 12.Qh5 Rg8 13.g3** This set-up was the subject of an excellent article by Mike Read in the ACCQ Nov.1993. **13...f4?!** In retrospect, a rather naive attempt to deal with the grip exerted by White. He is not obliged to capture on f4, which actually puts him on a roller-coaster ride to a superior position. Moves such as h3, Qf3 or even 14.Qxh7 Rg7 15.Qh4 pose some embarrassing problems for Black due to the knight on d5.

[ 13...Rg5! is now regarded (2001) as the best move in this position ]

[ with 13...Rg4!? being an option too - Runting. ]

**14.gxf4 Bg4 15.Qxh7 Rg7 16.Qh8** I thought at the time that with White's queen "forced" here and "out of play" that Black should be able to get on with things and claim his positional win quickly, viz;

[ 16.Qh6 Rg6 17.Qh8 Rh6 is drawn. Now I'm convinced that White can expect to win from here, based on his crippling pin of the bishop and dominating knight on d5. ]

**16...exf4**

[ 16...Nd4 is more realistic. ]

**17.f3**

[ Doug Hamilton found 17.Rg1! in our Vic.Ch.1994 game, and won easily after Ne5 18.Rxg4 Nxg4 19.Nxb5! ]

**17...Bxf3 18.Rf1 Ne5 19.Nxb5 Rc8□ 20.Nbc3 Qg5** The only move to get Black off the ground. **21.Bxa6 Rc5 22.Bb5+ Rxb5 23.Nxb5 Qg2 24.Nbc3 f5!** Opening the bolt hole fo the king - White needs a draw or a miracle blunder here. **25.Rf2 Qg1+ 26.Rf1 Qd4** Heading after the e-pawn, which obliges White to be near f2 for a queen swap. **27.Qh4 Be7 28.Qf2 Qxf2+ 29.Rxf2**

[ 29.Kxf2?? allows mate by Bh4# ]

**29...Bh4 30.Kf1 Bxf2 31.Kxf2 Rg2+ 32.Kf1 Ng4 33.Rb1**

[ 33.Nxf4 Ne3+ wins the rook. ]
**33...Rxh2**

Europe Echecs (Dec 97) writes that Jacqueline Roos has been playing CC for almost 50 years. Spouse, mother and grandmother of chessplayers. She began ICCF classification groups in Class II in 1983, played the French CC Championship twice (86-87 and 88-89) and reached the semifin of ICCF World Cup VI which ended last year. She also played for France in the individual and team world championships.

□ **Polgar,Sofia**
■ **Nunn,John DM**
Oviedo (rapid) 1992
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6**
[Once again we are modifying a game which took a delayed course: 2...e6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 6.Ndb5 d6 7.Bf4 e5 8.Bg5 etc. ]
**3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5**
[And here Nunn actually played 10...Bg7 (or rather 11... Bg7, to be strictly accurate) first, after which 11.c3 f5 gets us back on track. ]
**11.c3**
[This time White sets up with c2-c3, Bd3 and Qh5, which can arise via 11.Bd3 Be6 12.c3 Bg7 as well. ]
**11...Bg7**
[QUESTION: Is this move order playable for White? Why isn't the e4-pawn hanging? --- ANSWER: It's a trap! 11...fxe4? is met by 12.Bxb5! axb5 13.Nxb5 Be6 *(*not *13...Ra5?? 14.Nbc7+ Kd7 15.Qg4+* and two unfortunates resigned here, since it's mate next move *)* 14.Nbc7+ Kd7 15.Nxa8 (Black would have a nice position if he could simply recapture on a8, but this is impossible, since king and queen get forked on b6) Bxd5 16.Qxd5 f5 , and here the comp comes up with a strong idea: 17.f4! *(*only *17.b4;* and *17.Qf7+* have been played before in the database *)* 17...exf3 18.Qxf3 f4 *( 18...Qxa8 19.Qxf5+ Kc7 20.0-0* is also good for White *)* 19.Qg4+ Ke8 20.0-0-0 Be7 21.Qe6 Rf8 22.Nb6! Qxb6 23.Rxd6 Rf6 24.Qd7+ Kf7 25.Rxf6+ Kxf6 26.Qd3 , when White's rook and two pawns mean more than Black's two minor pieces, since the three connected queenside passers will win if queens come off the board. ]
**12.Bd3**
[White more often plays 12.exf5 here, which we cover in Short-Kramnik, Fressinet-Gelfand, and Anand-Leko; ]
[while 12.Nxb5!? axb5 13.Bxb5 Bd7 transposes to the next game. ]
**12...Be6 13.Qh5** We looked at this position briefly in a note to Leko-Kramnik. Let's go much deeper now. --- QUESTION: What is White's intention? --- ANSWER: White attempts to intimidate us out of castling, since doing so will be met by e4xf5, with a scary-looking attack. --- QUESTION: How do we counter White's idea? --- ANSWER: By castling anyway!
[Other moves: -- a) 13.Nxb5!? is examined in the next game. ]
[b) 13.0-0 Bxd5 14.exd5 Ne7 transposes directly to Shirov-Leko. ]
[c) 13.Nc2 Bxd5 14.exd5 Ne7 is similar, when 15.0-0 featured in Shirov-Leko as well (see the first note, with 15 Nc2), *(*while *15.a4* can be ignored with *0-0! 16.axb5 e4 17.Be2 axb5 18.Rxa8 Qxa8 19.Nb4 Rc8 20.Bxb5 Rxc3! 21.bxc3*

*Bxc3+ 22.Ke2 Bxb4 23.Qa4 Qxa4 24.Bxa4 Nxd5* , when Black has two healthy pawns for the exchange and stands no worse, P.Rubinas-V.Novikovas, correspondence 2011. *)*]

**13...0-0!** When we were kids, we became neighbourhood heroes if we actually accepted a rival's dare. --- QUESTION: Didn't you say that it was suicide to allow e4xf5 - ? --- ANSWER: I did, but in a slightly different variation (where White played 0-0 instead of c2-c3). Here Komodo basically has the position at even, while in my database White scores un unimpressive 45%. It's fully playable for our side. **14.exf5** White isn't obliged to enter our main line.

[Instead, 14.0-0 has been subject to high-level investigation in recent years; **A)** with numerous games continuing 14...f4 15.Rfd1 Rb8 , after which it all gets very complicated. *( 15...-- )*; **B)** 14...fxe4!? 15.Bxe4 f5 16.Nf4 exf4 17.Bxc6 Rc8 seems simpler, and now 18.Qe2 *(*after *18.Bb7 Rb8 19.Bxa6 Qa5 20.Bxb5 Rxb5 21.Nxb5 Qxb5 22.Rfb1 Bd5* , I prefer Black's position with the two bishops, R.Slobodjan-A. Peter, Budapest 1994 *)* 18...Be5 19.Qf3 b4! (our standard way of generating counterplay) 20.cxb4 Bxb2 21.Bd5 Qf6 22.Rad1 Rc3 23.Rd3 Bxd5 24.Qxd5+ Qf7 25.Qf3 Rfc8 26.Nb1 Rc1 27.Nd2 Rxf1+ 28.Nxf1 Be5 29.Ra3 Qc4 , when Black's active pieces balance out his dodgy pawn structure, V.Kramnik-L.Van Wely, Wijk aan Zee 2005. ]

**14...Bxd5 15.f6** All that was familiar is now not so recognizable. White threatens both f6xg7 and Qxh7 mate. But Black has everything under control. **15...e4!** We allow our g7-bishop to be taken with tempo!

[Actually, the simple 15...h6 is okay too: 16.fxg7 *( 16.Qf5 e4! 17.fxg7 Re8 18.Be2 Re5 19.Qf4 Qg5* , J.Diaz-H. Bletz, German League 1995, is similar to our main line *)* 16...Kxg7 17.Nc2 *( 17.Qf5 Qg5! 18.Qh7+? Kf6* only gets White in trouble *)* 17...Be6 *(*or *17...Qg5 18.Qxg5+ hxg5 19.Ne3 Be6 20.Be4 Rac8* with a level endgame, I. Skvira-H.Garnica, correspondence 2014 *)* 18.Ne3 *( 18.a4 b4! 19.cxb4 Rb8 20.b5 Qa5+ 21.Kf1 Nb4* gives Black excellent counterplay *)* 18...d5 19.h4 Qf6 and Black is fine, V.Anand-V.Ivanchuk, Linares 2002. ]

**16.fxg7 Re8 17.Bc2?!** Sins come in gradations. This one is slight yet significant, since the greater your wish, the greater the negative consequences if it's not granted. --- QUESTION: Why criticize this natural move? The bishop takes aim at e4, and h7 behind it? --- ANSWER: It is overly optimistic. The bishop's occupation of the c2-square, albeit in an aggressive stance, comes at too high a cost, as White's remaining knight now languishes out of play.

[Instead: -- a) 17.Qxd5? favours Black after exd3+ (this check is the difference from the "suicide" line mentioned earlier) 18.Kf1 , as White will experience great difficulty in developing his kingside; for example, Ne5 19.g3?! Rc8 20.Rd1? Rc5 21.Qg2 *(*the queen is forced to obstruct her mate, since *21.Qb7 Rc6!* , followed by ... Re7*;* and *21.Qe4 Nc4* are even worse *)* 21...Ng4! 22.h3 *( 22.Rxd3 Qe7! 23.Qf3 Ne5* wins material *)* 22...Qe7! 23.Kg1 Qe2 24.Rf1 d2 25.hxg4 d1Q and White was busted, D.Stefanovski-B.Podlesnik, Kladovo 1990. ]

[ b) 17.Be2 is the only way for White to remain even: Re5 18.Qh6 b4 19.Nc2 bxc3 20.bxc3 Qg5 21.Qxg5 Rxg5 and Black doesn't stand even an iota worse in the ending, V.Anand-L.Van Wely, Wijk aan Zee 2003. ]

**17...Re5** Protecting the bishop and centralizing the rook with gain of tempo. **18.Qh3**

[ After 18.Qh6 b4 19.cxb4 Nxb4 20.0-0 , Co.Morris-B.Kouatly, World Junior Championship, Innsbruck 1977, and now Qg5 21.Qxg5 Rxg5 22.Bb3 Bxb3 23.axb3 Rb8 , White stands clearly worse. ]

**18...b4** Our familiar ... b5-b4 break arrives, chipping away at White's central control, while increasing Black's piece activity. **19.cxb4**

[ This gives Black's knight a free jump; but 19.Nb1 bxc3 20.Nxc3 *(* or *20.bxc3 Qb6! )* 20...Nb4 , with attacks on c2, d3 and a2, is even worse. After 21.0-0-0 *(* if *21.Bb1 Nd3+;* or *21.Rc1 Bc4 )* 21...Nxa2+ 22.Nxa2 Bxa2 , White will soon be a pawn down (i.e. when g7 falls) with the far more insecure king. ]

**19...Nxb4 20.0-0 Rc8 21.Bb3**

[ Or 21.Rac1 Kxg7 *(* not *21...Nxa2??* which runs into the discovered/double attack shot *22.Bxe4!* , winning instantly *)* 22.Bb1 Rxc1 23.Rxc1 Qg5 24.Qe3 Nd3! and Black continues to exert pressure. ]

**21...Be6!** Encouraging a swap of White's most active piece.

[ Presumably Nunn felt that 21...Bxb3 22.axb3! was not as promising for Black. ]

**22.Bxe6 Rxe6 23.Qb3 Nd3** This knight is a monster, disallowing White to challenge for the c-file or place a rook on e1. **24.Nc2 d5**

[ QUESTION: Doesn't ...Rb8 win a pawn? --- ANSWER: It does, but we all tend to overbalance our decisions in favour of our individual styles. Nunn wants the initiative and is in no rush to win a pawn, which he sees as an appetizer substituting for a real meal (nobody eats a half pound of caviar for dinner). A more materialistic player would might well have gone for 24...Rb8 25.Qc3 Rxb2 . ]

**25.Nd4** This does little to allay White's concerns, since the knight is unable to sustain its blockade for long.

[ 25.Ne3 d4 26.Nf5 Nf4 is also unpleasant for White. ]

**25...Rb6 26.Qa3** The queen is out of play on a3.

[ She was better off with 26.Qd1 , although White's game looks quite miserable here as well. ]

**26...Qf6** Ejecting White's knight from its perch, while covering against Nf5. **27.Nb3 Qxg7** In a rapid game even a world-class grandmaster can be forgiven for not finding the most incisive finish, which a computer spots in an interest. In practical terms it makes sense for Black to safeguards his king against any possibility of Qf8 mate, should he forget and move the c8-rook off the back rank.

[ The comp prefers 27...Nf4! 28.Rad1 Qxg7 29.g3 Ne2+ 30.Kh1 Qg4 31.Nc1 Rh6! , when there is no remedy to the coming ...Qh3. ]

**28.Rad1**

[ 28.Rad1 is technically an error, since Black might now play Nf4! again. ]

[ The only way to interfere with Black's kingside attack is to play 28.Qe7 f5 29.Qxg7+ Kxg7 , when White will lose the endgame instead. ]

**28...Qe5 29.Nc1** Desperately attempting to eject the enemy knight from its powerful outpost. So Black takes the pawn at last, while retaining all his other advantages.
**29...Nxb2 30.Rde1**
[ 30.Rd2 Nc4 31.Qh3 f5 is also quite miserable for White. ]
**30...Rc3!** White's queen is sent to the back of the line. **31.Qa5 Nc4** This knight is as annoying for her white highness as stepping on a wad of discarded chewing gum.
**32.Qc5 Rh6** The much-anticipated segue to a direct assault on White's undefended king. **33.f4**
[ 33.h3 loses to Nd2 34.Qa5 Nf3+! . ]
**33...Qh5 34.h3 Rg6 35.Qc8+ Kg7 36.Kh2** Covering against the threat of 36... Rxh3 and mates. Unfortunately, there are even bigger concerns for White. --- EXERCISE (combination alert): The white king's defences are damp and rotting. Black has access to multiple wins. All you have to do is find one of them - or as many as you like. --- ANSWER #1: Annihilation of the defensive barrier/discovered attack.
**36...Rxg2+!** As any astute detective will tell you, if a known criminal is discovered near the scene of the crime, odds are that he is the guilty party.
[Other wins are: --- ANSWER #2: 36...Rc2! 37.Rg1 Ne3! with a double attack: White's queen hangs (by discovered attack) as well as g2. ]
[ANSWER #3: 36...Qh4 (threatening ...Qg3+ and ...Qxg2 mate) 37.Rg1 Rc2 (now threatening ... Qg3+ and ...Rxg2) 38.Re2 Rxc1! (attraction/double attack) 39.Rxc1 *(*or *39.g3 Qh5* , hitting the e2-rook *)* 39...Qxf4+ and the c1-rook falls. ]
**37.Kxg2** "And now I must away," mutters the king, who still can't get his infernally overloaded suitcase to close. **37...Ne3+** Black's rook and knight sense mucho dinero to be swiped on c8. White's queen falls next move. --- SUMMARY: 13 Qh5 is a poxy attempt to intimidate us. We should accept the dare and enter the complications with 13...0-0!.

*[John Emms]*

Kramnik,V; Tseshkovsky,V: 'Inf 51/163' **1.e4** Kramnik,V; Tseshkovsky,V Kramnik,V; Tseshkovsky,V Kramnik,V; Tseshkovsky,V: 'John Emms' **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 f5 11.Bd3** Traditionally 11 Bd3 has been the main line of the Sveshnikov, and in recent years there has been a resurgence of interest in the 11...Be6 12 0-0 variation (see below). Kramnik,V; Tseshkovsky,V: 'John Emms: 'Traditionally 11 Bd3 has been the main line of the Sveshnikov, and in recent years there has been a resurgence of interest in the 11...Be6 12 0-0 variation (see below)." **11...Be6 12.Qh5!?** This is real aggression from White. Kramnik,V; Tseshkovsky,V: 'John Emms: '!?' John Emms: 'This is real aggression from White. "

[The more restrained approach is 12.0-0 , after which Black normally eliminates the d5-knight with Kramnik,V; Tseshkovsky,V: '(John Emms) , after which Black normally eliminates the d5-knight with' Bxd5 13.exd5 Ne7 . White has a few possibilities here:

**A)** 14.Nxb5 wins a pawn, but Black gains compensation after Bg7 15.Nc3 e4 16.Bc4 Ng6 .;

**B)** 14.c4 Bg7 15.Qd2 (protecting the b2-pawn in anticipation of ...e5-e4) bxc4 16.Nxc4 0-0 is equal.;

**C)** 14.c3 is the main move. After Bg7 15.Qh5 e4 16.Bc2 0-0 17.Rae1 White's idea is to break with f2-f3. The consensus here is that Black's should play Qc8! , which both protects f5 so that ...Ng6 is possible, and also introduces the idea of ...b5-b4. For example, 18.f3 b4 19.Nb1 *(*if *19.cxb4 Bxb2 )* 19...bxc3 20.Nxc3 Bxc3 21.bxc3 Qxc3 22.Bb1 Ng6 23.Qxf5 *(*if *23.fxe4 f4! )* 23...exf3 24.Qxf3 Qxf3 25.Rxf3 Rae8 with a level ending, K. Asrian-Wang Yue, Khanty Mansiysk 2005.;

**D)** 14.-- ]

**12...Rg8!** Typically uncompromising play. Black develops his rook along the half-open g-file and attacks the g2-pawn, but leaves h7 unguarded. TIP: Rooks love open lines! Kramnik,V; Tseshkovsky,V: '!?' '!?' '!?' Kramnik,V; Tseshkovsky,V: 'John Emms: '!' John Emms: 'Typically uncompromising play. Black develops his rook along the half-open g-file and attacks the g2-pawn, but leaves h7 unguarded. TIP: Rooks love open lines!" Kramnik,V; Tseshkovsky,V: 'John Emms: '!' John Emms: 'Typically uncompromising play. Black develops his rook along the half-open g-file and attacks the g2-pawn, but leaves h7 unguarded. --- TIP: Rooks love open lines!"

[The safer approach is 12...Bg7 Kramnik,V; Tseshkovsky,V: 'John Emms' 13.0-0 f4 , followed by ...0-0 *(*but not *13...0-0?? 14.exf5 Bxd5 15.f6! . )*]

**13.0-0-0!?** White places his king into relative safety, although it doesn't look so safe

in a few moves time! Kramnik,V; Tseshkovsky,V: 'N' 'N' 'N' Kramnik,V; Tseshkovsky, V: 'John Emms: '!?' John Emms: 'White places his king into relative safety, although it doesn't look so safe in a few moves time!"

[ 13.g3 is probably a stronger move, and one line runs Kramnik,V; Tseshkovsky,V: '(John Emms) is probably a stronger move, and one line runs' Rg5 14.Qd1 *( 14.Qxh7* is very risky: after *Nd4!* a key idea for Black is ...Rg6 and ...Rh6, trapping the queen *)* 14...Bxd5 15.exd5 Ne7 16.c3 *(*if *16.Nxb5 Qb6* regains the pawn *)* 16...Bh6 with a roughly equal position. ]

Leningrad (Game 2) 1990
*[John Cox]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Nf3 Bb4 7.Bc4 0-0 8.0-0 Bxc3 9.bxc3 Nxe4 10.Ba3**

[The main alternative is 10.Re1 Nxc3 ; the knight looks to be wandering dangerously out of play but Black has a trick after 11.Qd3 in the form of d5 , when White has nothing better than 12.Qxc3 dxc4 13.Ba3 Re8 14.Nxe5 Nxe5

15.Rxe5 Rxe5 16.Qxe5 Be6 and faces a long struggle to draw. ]
[ Instead 10.Qd3 Nf6 11.Bg5 *( 11.Ba3??* runs into *e4 ,;* while *11.Qd6 Ne8* is also nothing *)* is well met by 11...h6 12.Bh4 d5 , when White can do no better than 13.Bxf6 dxc4 14.Qxd8 Nxd8 15.Bxe5 Nc6 with advantage to Black. ]

**10...d6 11.Re1** White goes to win his pawn back.

[ The other try is 11.Qe1 when it seems to me that Black could very well play the meek

**A)** instead in J.Bosch-I.Rogers, Hertogenbosch 1999, the Australian GM chose the more complicated 11...Bf5 , which is based on some sharp tactics pointed out by Rogozenko after 12.Rb1 *( 12.Rd1 Qa5 13.Bb4 Nxb4 14.cxb4 Qc7 15.Bd3 d5* was the game, when Black isn't so much better anyway after *16.c4 )* 12...Qa5 13.Nh4 Be6! 14.Bb4 *(*or *14.Qxe4 d5 )* 14...Nxb4 15.cxb4 Qc7 16.Bxe6 fxe6 17.Qxe4 Rf4! - now that was lucky!;

**B)** 11...Nf6 , since 12.Rd1 e4 13.Nd4 *(*or *13.Rxd6 Qa5 14.Bb4 Nxb4 15.cxb4 Qc7 16.Rxf6 Qxc4 17.Rf4 f5* when White's pieces are jammed quite comically out of play) *)* 13...Ne5 14.Be2 Re8 leaves White with more or less no compensation, and 15.Nb5 Nf3+ is an unkind point. ]

[ 11.Qd3 Nc5 is also fine for Black. ]

**11...Ng5**

[ 11...Bf5 12.Qd3 is undesirable for Black, who is in severe danger of getting his pieces entangled, but the text just leads to a pleasant position. ]
[ 11...Qa5 is also possible, when 12.Bxd6 Nxd6 13.Qxd6 Qxc3 14.Qd3 Qxd3 15.cxd3 is about equal. ]

**12.Nxg5 Qxg5 13.Bxd6 Bg4**

[ The obvious way to play was 13...Rd8 14.Qf3 Qf6 15.Qxf6 gxf6 16.Rad1 Bf5 when Black certainly has nothing to fear. The text is tricky (as usual with Minasian), but I'm not sure whether it was as good. ]

**14.Qc1**

[ 14.Qb1 was critical, when I'm not sure what Black meant to do: Bf3 15.Bf1 Rfc8 16.Re3 looks as though it would have been a bit awkward to meet. *(*However, *16.Qxb7* is not as good: *Qg6 17.Re3 Nd4 18.Qa6 Nxc2 19.Rxf3 Nxa1 20.Bxe5 Qxa6 21.Bxa6 Re8* is hard to judge but my feeling is that Black is better. *)*]

**14...Qxc1 15.Raxc1 Rfe8 16.Bd5**

[ This might be OK, but in playing it White needs to realize the danger he is in, which I don't think he did. 16.f4 was a sensible alternative, trading some pawns, giving the d6-bishop some elbow room and opening a path for the king. ]

**16...Be6 17.Bxc6 bxc6 18.a3?**

[ 18.Rxe5 was the only way for White to justify entering this ending. The point is Bxa2 19.Rc5 , when Rec8 is met by 20.c4 embarrassing the bishop. White would make a draw quite easily then, whereas with the text he condemns himself to a hideous struggle. It's very surprising a player of Mukhin's strength and experience allowed himself to be led into this very common type of horrible ending without a

fight. ]
**18...f6** Black is effectively a pawn up here – the c2-pawn is pretty much just in the way – and the opposite-coloured bishops aren't much of a drawing factor with rooks on the board. NOTE: This sort of ending arises often from the French, and White loses them nine times out of ten: they are deceptively unpleasant for him. Black is effectively a pawn up here – the c2-pawn is pretty much just in the way – and the opposite-coloured bishops aren't much of a drawing factor with rooks on the board. NOTE: This sort of ending arises often from the French, and White loses them nine times out of ten: they are deceptively unpleasant for him. **19.f3 Red8 20.Red1 Bc4 21.Kf2 Kf7 22.Bc5 a6 23.Rb1 Ke6 24.Ke1 Rd5 25.Rxd5 Kxd5 26.Be3 Bb5 27.Rb4 g5** Black plays this ending absolutely typically: trade one pair of rooks, put your own weak pawns on light squares and your good ones on dark squares to fight against White's bishop, get the rook in and find two targets (usually c2 and g2, although as here the ...g4-break to either weaken f3 or make the e-pawn passed is also a standard device, and mating threats are also usually a factor once Black gets in). **28.c4+** White can't bear to watch Black creeping closer without at least activating his rook. **28...Bxc4 29.Rb7 Rh8 30.Ba7 h5 31.Rb8 Rh7** Black must keep one pair of rooks; a pure bishop ending would just be drawn. **32.Rd8+ Ke6 33.Bc5 Bd5 34.c4** In principle trading pawns like this is useful, but it does let Black's rook in while still not really finding any targets for White's. **34...Bxc4 35.Rd6+ Kf5 36.Rxc6 Bb5 37.Rb6 Rc7 38.Bb4 Rc1+ 39.Kf2 Rc2+ 40.Kg1 g4 41.Rd6 gxf3 42.gxf3 Bc6 43.Rd3 h4 44.Be1 h3 45.Bd2 Bb5** After White's rook goes along the d-file, ...Ra2 wins the a-pawn and the f-pawn will follow soon enough, so White cuts short the torture. Points to Remember: 1. Black gets a good game quite easily in the opening with 6...Bb4. White can't stop ...d5 with a fine free game for Black without offering the e4-pawn and sustaining horrid weakness on the queenside. Don't bother trying to learn any of the lines; knowing the themes and doing a bit of calculation should be enough. 2. This type of ending is worth noting. Avoid it at all costs as the defender, and if you get it as Black, do not consider a draw offer and play it with enthusiasm and care. After White's rook goes along the d-file, ...Ra2 wins the a-pawn and the f-pawn will follow soon enough, so White cuts short the torture. Points to Remember: 1. □ **Kopylov,Igor**
■ **Andrianov,Nikolay**
USSR ch-17 8688 1986
*[Kopylov, Grodzensky]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Ne7** Kopylov admitted that he anticipated his opponent choosing the Chelyabinsk Variation: Andrianov had published an article on this topic. **12.Nc2 Nxd5**
[ 12...Bb7! came into consideration. ]
**13.Qxd5 Rb8 14.Nb4 Bb7 15.Qd3 0-0** In an article in 'Shakhmatny Byulleten' (1986, No.7) Andrianov and Krasenkov wrote that after this continuation Black has no serious problems and can hope for equality. Grandmaster Evgeny Sveshnikov in his monograph (1987) simply states that 'Black has a good game'. **16.Rd1N**
[ RR16.Be2 a5 17.Nd5 Bxd5 18.Qxd5 b4 19.c4 Qb6= Geller-Ivanovic, Vrsac 1987 ]
**16...a5** This activity merely plays into White's hands. Better is 16...Bg5, preparing counterplay on the kingside. **17.Nd5 b4 18.cxb4 Bxd5 19.Qxd5 Rxb4 20.b3** Intending 21 Bc4, after which White's chances of an attack - with opposite-colour bishops - will be clearly better. Therefore Black forces exchanges. **20...Rd4!? 21.Rxd4 exd4 22.Bc4 Qa8 23.Qxa8 Rxa8 24.Ke2** The resulting endgame position is advantageous to White, whose plan can be divided into three stages: tie Black down to the defence of the d4-pawn, create a passed pawn on the queenside and, finally, open the position in the centre or on the kingside. However, the opposite-colour bishops significantly hinder the realisation of this plan. TH: Another version of this game has 24 Kd2 here **24...Bd8 25.Rb1 Rb8 26.Kd3** TH: Both versions now merge. **26...Bb6 27.b4! Ba7 28.b5 Bb6 29.Rc1 Kf8 30.Bd5 Bc5 31.a4 f6 32.f4 Ke7 33.e5?!** White forces events, but the further course of the game shows the doubtfulness of this decision. **33...fxe5 34.fxe5 Rf8 35.Bf3 Rb8 36.Re1 Bb6 37.Bg4 Rb7!** Now nothing is achieved by 38 exd6+ Kxd6 39 Re6+ Kc5 40 Rc6+ Kb4, while after other continuations Black's seventh rank is defended. White has to start all

over again. **38.e6 Rc7 39.Rf1 d5! 40.Rf7+ Kd6 41.Bf5 g6** Better chances of a defence were offered by the seemingly passive 41...h6. **42.Bh3 Bc5 43.e7!** This new breakthrough involves a sacrifice of two pawns, but the White pieces become extremely active. **43...Rxe7 44.Rf6+ Ke5 45.Ra6 Kf4** Otherwise 46 g3, and the black king will not escape from the mating net without great loss of material. **46.Be6 Ke5** If 46...Kg5, then 47 g3 h5 48 h4+. **47.Bc8 Kf4 48.g3+ Kf3 49.Be6 Kg2 50.Rc6 Kxh2 51.g4! Ba7 52.b6 Bb8 53.Kxd4** At last the white king has joined the play. **53...h5 54.gxh5 gxh5 55.Kxd5 h4 56.Kc4 h3 57.Kb5 Be5 58.Kxa5 Kg3 59.Bxh3 Kxh3 60.Kb5 Bd4 61.a5 Bf2 62.Rc5!**

□ **Janosevic,Dragoljub**
■ **Jussupow,Artur**
IBM-B Amsterdam 1978
*[Cyrus Lakdawala]*

**1.e4 c5 2.Nf3 Nc6**
[For the record, 2...e6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 Nc6 6.Ndb5 d6 7.Bf4 e5 8.Bg5 was the actual route taken to reach our usual position. ]
**3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.Be2** We now come to White's lesser 11th move alternatives. The first of these, 11 Be2, mostly transposes elsewhere, and otherwise is too inconspicuous to give Black any trouble. **11...0-0 12.0-0 Bg5 13.c3** This actually transposes to 11 c3 0-0 12 Be2 Bg5 13 0-0, which figured briefly in the notes to Polgar-Kramnik.
[White's best option is probably to revert to a c2-c4 plan with 13.c4 , when b4 14.Nc2 a5 returns to the 11 c4 and 13 Be2 variation in Zhao Jun-Wei Yi. ]
**13...Ne7 14.c4** Playing first c2-c3 and then c3-c4 doesn't seem very consistent, but perhaps Janosevic felt that the 'extra' move ...Ne7, retreating away from the central dark squares, was in his favour. In any case, there is nothing much better at this point.
[We have already seen 14.Nc2 in Chapter Two; ]
[while after the compliant 14.Nxe7+ , it is White who must fight for equality; for example, Qxe7 15.Nc2 Bb7 16.Qd3 *( 16.Bf3* minimizes Black's edge *)* 16...d5! 17.exd5 Rad8 18.Ne3 e4 19.Qd4 f5 20.c4? *( 20.Bd1* was essential *)* 20...f4 and the threat of ...f4-f3 was so strong that White resigned at once in G.Roth-A. Van der Wees, correspondence 1978. ]
**14...Nxd5 15.Qxd5 Be6 16.Qd3 b4 17.Nc2 Qb6** QUESTION: How does Black stand here? --- ANSWER: We can be pleased with the result of our opening. The slightly weak d6-pawn is easily compensated for by our dark square control and White's potential bad bishop. **18.b3** QUESTION: Doesn't this allow Black a convenient ...a6-a5-a4 break? --- ANSWER: White is the one who wants to initiate the first break, with a2-a3, without allowing Black a ...b4-b3 bypass option.
[Instead, after 18.Rad1 Rfd8 19.Kh1 a5 20.Ne3!? *(*I would go into a holding pattern with *20.h3 )* 20...Bxe3 21.fxe3 a4 , White is counterplayless and can only wait to see how Black makes progress, C.Monsieux-O.Gladyszev, Belfort 2004. ]
**18...a5 19.a3!** I think this is White's only way to remain relatively even. Janosevic pre-empts any ideas of .. .a5-a4 by opening the queenside first.
[A few months earlier, E.Formanek-Y. Bleiman, Beersheba 1978, saw 19.Rfd1 Rad8!? (aggressive; Black keeps the other rook on f8, hoping to exploit the weakness of f2 with an ...f7-f5 break) 20.a3?! (underestimating Black's coming play down the f-file) *( 20.Bf3* was preferable *)* 20...f5! 21.Ne3? *(*he had to grovel with *21.Rf1 )* 21...fxe4 22.Qxe4 Rf4 23.Qc2 Rxf2! 24.Kxf2 Qxe3+ 25.Kf1 Rf8+

and White resigned, since 26.Bf3 Rxf3+ 27.gxf3 Bh3+ forces mate. ]

**19...bxa3 20.Rxa3 Rab8 21.Ne3 Qc5!**

[ QUESTION: Isn't Black clearly better if he chops on e3? --- ANSWER: Actually, I think White stands better in this case, since Black's remaining a- and d-pawns are weaker than White's b3-pawn. For example, after 21...Bxe3?! 22.Qxe3 Qxe3 23.fxe3 Rfc8 24.Rfa1 a4 25.bxa4 Bxc4 26.Bxc4 Rxc4 27.a5 , the passed a-pawn gives White winning chances; if Rxe4? 28.a6 Reb4 29.Rc3 h5 30.a7 Ra8 31.Rc7 f6 32.Kf2 , Black is almost down a rook, if not in the corporeal realm then in spirit, and will be hard pressed to hold the draw. ]

**22.Rfa1 Bd8!** Now a5 isn't so weak and the bishop can redeploy effectively on b6.

**23.Bg4** White hopes to rid himself of a potentially bad bishop too; but the cost is high if he swaps on e6, since ... f7xe6 opens the f-file and gains control over d5. **23...Bb6**

**24.R3a2** White is understandably nervous about his f2-square. **24...g6 25.Rd1 Rbd8 26.Nd5!?** It's either this move or simply wait and do nothing. **26...Bxg4**

[ Black can also play for opposite-coloured bishops with 26...Bxd5 27.Qxd5 Qb4 28.Qb5 Bc5 . Yusupov probably was worried he wouldn't have enough to win after 29.Rc1! *(* rather than *29.Rxa5? Qc3 30.Qa4 Rb8 31.Rb1? Bxf2+!;* or *29.Rxa5? Qc3 30.Qa4 Rb8 31.Qa1 Qxb3* with a clear advantage for Black *)* 29...Rb8 30.Qxb4 Bxb4 31.Bd7 . ]

**27.Nf6+ Kg7 28.Nxg4 f5 29.exf5 Rxf5** Targeting f2.

[ This is not the place for 29...gxf5? , as after 30.Ne3 f4 31.Nd5 , White controls too many light squares, his king looks safer, and his knight is at least the equal of Black's bishop. ]

**30.Qd5 Rdf8**

[ Another option was 30...Qxd5! 31.Rxd5 Bc5 32.Rxa5 Rb8 33.Rb5 Rxb5 34.cxb5 Rf8 , when Black will quickly regain the pawn with a favourable endgame. ]

EXERCISE (critical decision): Should White take the d6-pawn, or is it poisoned?

**31.Qxc5?!** If our position is in the midst of an all-hands-on-deck emergency, we can't afford a shirker within the ranks. After this move, Black obtains a slight yet nagging edge in the ending.

[ ANSWER: White should actually fall into the trap with 31.Qxd6! (when we must take radical action, it's unwise to opt for a philosophical exemption, stating: "I'm not a natural risk taker, so I will pass") Rd8 *( 31...h5 32.Qxc5 Bxc5 33.Ne3 Rxf2 34.Rxf2 Bxe3 35.Rdd2* leads to a drawn endgame, with or without rooks *)* 32.Qxd8 Bxd8 33.Rxd8 , when White has rook, knight and pawn for the queen, which the comp assesses at dead even. ]

**31...Bxc5 32.Re1**

[ White can't take the a5-pawn yet, since 32.Rxa5?? h5 33.Ne3 Rxf2 wins. ]

**32...R5f7 33.Ne3 h5 34.g3**

[ Still not 34.Rxa5?? due to Bb4 . ]

**34...Rb8 35.Rb1 Rfb7 36.Rxa5 Rxb3 37.Rxb3 Rxb3 38.Rb5 Rd3** White stands worse in this ending, since both the c4- and f2-pawns are weak, and the bishop

outguns the knight. **39.Rb7+ Kf6 40.Nd5+ Kf5!** Yusupov intends to make his king useful.

[For example, 40...Kf5 41.Ne7+ Kg4! 42.Nxg6 Kh3! 43.Kf1 Rf3 44.Rb2 Kxh2 45.Re2 e4! 46.Ke1 e3! 47.fxe3+ Kxg3 and White is in deep trouble, since the black h-pawn will probably cost him a piece. ]

**41.Kg2 Rd2 42.Rf7+ Ke4!** Black's king abandons his kingside pawns, in search of the white c4-pawn.

[He couldn't go back to g5 in any case, since 42...Kg5? runs into 43.h4+ Kh6 44.Ne7 (threatening Ng8 mate) g5 45.Rf6+ Kg7 46.hxg5 and White is clearly better. ]

**43.h4 Kd3 44.Ne7 e4 45.Kf1!**

[Not 45.Nxg6? e3 46.Nf4+ Kxc4 47.Nh3 d5 and Black's centre pawns surge, while White remains hopelessly tangled. ]

**45...Rd1+ 46.Kg2 Rd2 47.Kf1 Kxc4 48.Nxg6** Burning the enemy's harvest to starve their army is a war strategy from the Middle Ages. Black's biggest obstacle to victory is the fact that so few pawns remain on the board. **48...Bd4 49.Nf8?!**

[After 49.Rf4 d5 50.Rf5 Rd1+ 51.Kg2 , White gets excellent drawing chances. ]

**49...d5** The passed d-pawn begins its arduous journey to the promotion square. Shepherding a pawn up the board feels like guiding an old man up a mountain, where he must be supported with each laborious step. **50.Ne6 Bb6!** Cutting off a check on c7. **51.Rf4!** Now it is difficult for Black to ...d5-d4 without dropping the e-pawn. In all likelihood, White should hold the draw, but that doesn't prevent Yusupov from continuing to press. **51...Kc3 52.Rf5 Kc2**

[The hasty 52...d4?! would be met by 53.Nc5! Bxc5 54.Rxc5+ Kd3 55.Rxh5 and White draws easily with his own passed pawns. ]

**53.Ng5! Kd1 54.Nh3** By defending f2 with the knight White frees the rook from the task. Another option was to leave the knight on g5, keeping an eye on the e4-pawn, when it is not obvious how Black might make progress. **54...d4** At last.

[After 54...d4 , 55.Rxh5?? would lose at once to e3 , followed by e3-e2+ etc. ]

**55.Rb5 Bc7**

[EXERCISE (critical decision): With 55...Bc7 , Black threatens to push his e-pawn, so White has two options: 56.-- *(*place the rook behind the black pawns with *56.Rd5;* or force the black king out from d1 with *56.Rb1+* . Only one of these is sufficient. Which is it? *)*]

**56.Rb1+?** A chess game is lost when we lose cohesion, then it feels as if all our battles are skirmishes, generated by individual whims, rather than an overall plan.

[ANSWER: 56.Rd5! is the way to hold: e3 *(*if Black tries *56...d3* , then *57.Ng5!* (back to the e-pawn) *Re2 58.Nxe4! Rxe4 59.Rxd3+ Kc2 60.Rd5* draws easily *)* 57.fxe3 dxe3 58.Nf2+! (this isn't the time for White to conserve his wealth) exf2 *(*or *58...Kc1 59.Rc5+ Rc2 60.Rxc2+ Kxc2 61.Ke2 )* 59.Rxd2+ Kxd2 60.Kxf2 , -- followed by 61.Kf3 -- 62.g4 and draws. ]

**56...Kc2 57.Rb7**

[White puts up stiffer resistance with 57.Ra1 Be5 *(*not *57...Rd1+? 58.Rxd1*

*Kxd1 59.Ng5 Bxg3!? 60.Nxe4! Bxh4* , since White can give up the knight for the d-pawn, leaving Black with the wrong bishop for the h-pawn *)* 58.Ra2+ Kc3 59.Ra5 Bd6 60.Rxh5 , but Black's passed pawn is still very strong; for example, d3 61.Rd5 Be7 62.Rd7 Bf6 63.Rc7+ Kb3 64.Rf7 Bc3 65.Rd7 Kc2 66.Ng5 Re2 67.h5 Re1+ 68.Kg2 d2 and wins. ]

**57...Ba5 58.Ng5 Rd1+ 59.Kg2**

[ And not 59.Ke2?? Re1# . ]

**59...Re1!** The care and protection of the central pawns is Black's overriding concern. Now White is hard pressed to form a convincing rebuttal to his opponent's threats, since the path is cleared for the d-pawn's progress. **60.Ne6**

[ After 60.Re7 d3 , the advancing d-pawn will cost White his rook. ]

**60...Bc3** Black's king finally finds sanctuary from White's annoying rook checks. "From an early age, I realized that I am God's favourite. How else can you explain the fact that I continue to best you at every opportunity?", the bishop asks the knight. **61.Rc7 d3** Black nurses his d-pawn as tenderly as a mother would her newborn infant. **62.Nd4+ Kb2 63.Rb7+ Ka2 64.Ra7+ Kb1 65.Nb5**

[ Or 65.Rb7+ Bb2 . ]

**65...Kb2 66.Nxc3** Yusupov confronts his opponent with a set of impossible choices, whose move represents yet another dashed hope for White.

[ 66.Nd6 fails as well: Kb3! (cutting off the intended Nc4+) 67.Rb7+ Bb4 and nothing will stop the d-pawn. ]

**66...Kxc3 67.Rc7+ Kb3 68.Rd7 Kc2 69.Rc7+ Kd1 70.g4** White hopes for a distraction, so that he can push forward with his kingside agenda. Unfortunately, he lacks a key element - time. And as we all understand, there is no second place trophy in most queening races. **70...hxg4 71.h5 Ke2 72.h6 Rf1 73.Re7 Rxf2+ 74.Kg3 e3** . --- SUMMARY: 11 Be2 mostly transposes to positions we've considered elsewhere, but whether it does or doesn't, it's a passive line which doesn't bother us at all. The above game is also an example of just how powerful our "bad" dark-squared bishop can be against White's "good" knight.

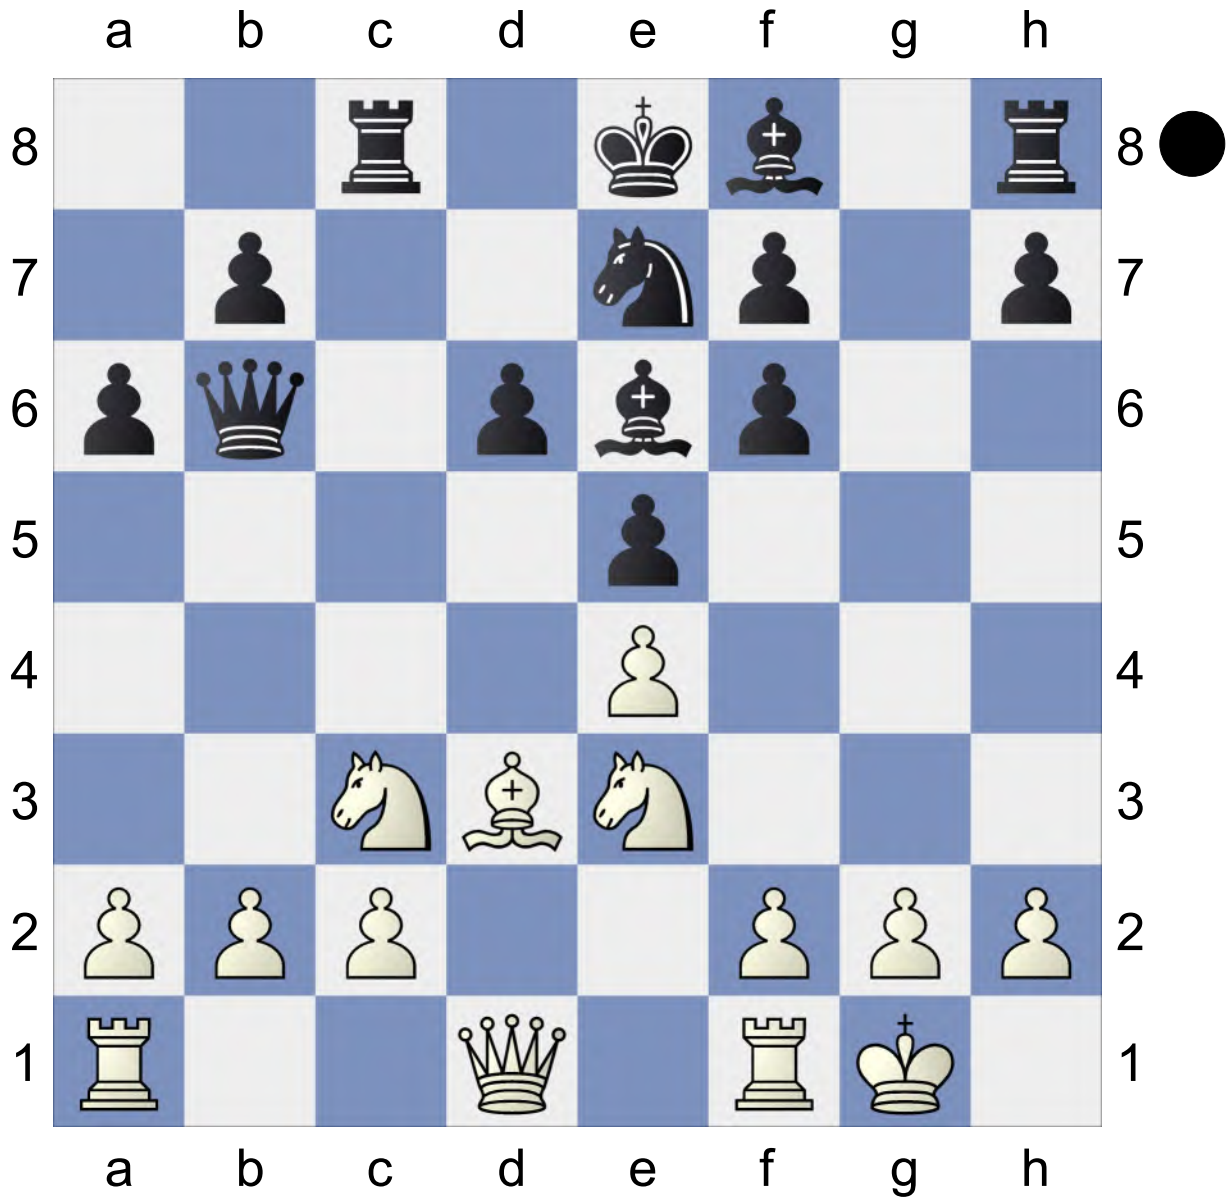
AN OPEN B-FILE FOR THE ROOK Besides the danger of the queen being trapped after capturing on b2, the (half-)open b-file may also become a liability. Take, for instance, Arakhamia-Grant-Gligoric, Moscow 1994 where a rook on the 7th rank soon proved fatal. In that dubious line of the Modern Defence, White does not even sacrifice a pawn. Let us look at a subtler example. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 9.Nc4 Rc8 10.Bxf6 gxf6 11.Bd3 Ne7 12.Ne3 Qb6 13.0-0** Diagram

(Diagram)

**13...Qxb2 14.Ncd5 Bxd5 15.exd5 Qd4** Departing the b-file. **16.Rb1** Occupying the half-open b-file anyway - a novelty at the time. **16...Rc7**
[ 16...b5 can be answered with 17.a4! , opening up the queenside for the white pieces. Compare Giri's c2-c4 in the first game. ]
**17.Qf3 Qf4 18.Qe2 e4?!**
[ 18...Bh6 is not a solution, either: 19.Nc4 Nc8 20.Rb4 gave White a clear advantage in Ghinda-Tseitlin, Pernik 1978. Note that the black queen is still not out of trouble. ]
[ A move like 18...h5 might be best, but White still has clear compensation for the pawn ]
**19.Bxa6!** Further opening the queenside and making Black suffer for not developing



his kingside. **19...bxa6 20.Rb8+ Nc8**
[ 20...Rc8 21.Rxc8+ Nxc8 22.Qxa6 Kd8 23.Rb1 is also hopeless. ]
**21.Qxa6 Kd8 22.Rfb1 Qe5 23.Rxc8+ Rxc8 24.Qa5+ Ke8 25.Qa4+ Kd8 26.Rb7**

After all, White is up a pawn, with two connected queenside passers. --- ANSWER: The comp calls it even, whereas I prefer Black, whose remaining bishop will someday rule the dark squares.'
[ 19...Bg7? 20.Qd7++- ]
**20.Qe8+=** Cyrus Lakdawala: 'Objectively this move may actually be a waste of time, since Black will gain a tempo with a future attack on the queen.'
[ ⌓20.a4 ]
**20...Kf6 21.g4?!** Cyrus Lakdawala: 'This lunge further weakens White's dark squares.'
[ Better to see to his king with 21.g3 , when matters have gotten more tolerable for White, though I would hardly describe them as utopian. ]
**21...Re7 22.Qb8** Cyrus Lakdawala: 'Attacking d6.'
[ 22.Qc6 Rc7∓ ]
**22...Ke5!** Cyrus Lakdawala: '!?' Cyrus Lakdawala: 'Erudition without a questioning mind is an empty exercise. This is a case of order and imagination naturally being at odds with each other. Our line is a lightly tethered slavering and mean-spirited pitbull, which can easily slip free of our control. We all know what we saw, even though our eyes may still not believe it. Boy, this is as strife-inciting a move, as I have ever seen. --- QUESTION: What the hell!? What is Black thinking? --- ANSWER: I'm tempted to

quote my wife Nancy and say "it's complicated," when she attempts to dodge an explanation of some brazenly outrageous, logic-defying action she took. Black's move is a wholesale rejection of White's governing premise, that the black king is actually endangered. Shockingly, it doesn't yet stray beyond the invisible frontier of playability. Sveshnikov, our founding father, may have been in spiritual communion with Steinitz when deciding upon his move.'

[ On the other hand, it's not so much that his king is unsafe on e5, rather that he missed a superior continuation: 22...Qb4! (multi-purpose: 1. covering d6 and e4; 2. menacing a future ...Qxb2; 3. pinning White's bishop) 23.Re1 *( 23.a3?! Qxb2* , White is unable to utilize his zwischenzug *24.Qxd6+?? Kg7* , since his rook and bishop hang simultaneously *)* 23...fxg4 , which favours Black. ]

**23.f4+** Cyrus Lakdawala: '!?' Cyrus Lakdawala: 'Those who live in glass houses... White's move weakens his own king more than it does his counterpart. It is made with the thought: if we are true to our natures, then trust that the outcome will generally be favourable. Reprisal in this case is an endless back and forth of tit-for-tat. --- Amazingly, Black's king is perfectly safe on f4, due to his domination of the dark squares. White, voicing a bitter grievance, views his antics as reproof and takes harsh, line-opening countermeasures.'

[ ⌓23.Bc4 Δ Qb3 Δ Qb3 Sveshnikov,E: 'Δ Qb3 Sveshnikov,Evgeny: 'Δ Qb3" ]

[ He would have been better off with 23.Be2! Bg7 24.Qb3 f4 25.Re1 . ]

**23...Kxf4** Cyrus Lakdawala: 'Believe it or not, Komodo assesses this as dead even! The game looks like a battle between Great Romantics, who had a way of entering attacking mind states which were not easy to distinguish from madness. Why is it that so many of us revere our long dead chess prophets, yet so few of us actually bother to study their games?' **24.Ke2** Cyrus Lakdawala: '?' Cyrus Lakdawala: 'This is the beginning of a plan which we chess writers euphemistically call "Losing the thread of the game". After this mistake White's attack is irredeemably a thing of the past. We have to be careful when assessing a line, not to add or subtract with mistaken assumptions or overactive imaginations. I get the feeling that White badly misevaluated his actual attacking chances. There is nothing more agonizing as when fickle Caïssa uproots our opponent's well-deserved comeuppance by granting him or her protection, in this case via Black's grip on the dark squares.'

[ The idea of a rook check on f1 is too slow. White should try 24.Qxd6+ Re5 25.Qc6 Rg8 26.Rd1 Rxg4 27.Rd4 , and here the comp adamantly claims the game is dead even after the typo-like move Ke3! . ]

**24...Ke5** Cyrus Lakdawala: 'The king's sanity was touch and go for a while. Now he takes cover, protecting d6, while evading the rook check.' **25.Rhf1**

[ Not 25.gxf5?? Bg7 and White loses heavy material. ]

**25...fxg4!-+** Cyrus Lakdawala: '!' Cyrus Lakdawala: 'The truth is as lopsided and under zero as a cheating dieter's weighing scale: White is in deep trouble. Unfortunate geometry is just something which happens to you for no apparent cause, like a sneeze when you aren't even sick or suffering from allergies. Despite Black's king sitting in the middle, to White's unending frustration it remains infuriatingly safe.'

[ Cyrus Lakdawala: 'Instead, the natural-looking' 25...f4? Cyrus Lakdawala: '??' Cyrus Lakdawala: 'runs into' 26.Rxf4! Cyrus Lakdawala: 'or'

**A)** 26...Bg7 27.Rf5+ Kd4 28.Qxd6 Qxb5+ 29.Ke1 and wins; for example, Qxb2 30.Rd1+ Kc4 31.Qc6+ Kb4 32.Qb6+ Ka4 *(* or *32...Ka3 33.Qa5# )* 33.Qa6+ Kb4 34.d6 etc.;

European Team Ch 1973
*[Nigel Davies]*

Zenón Franco: 'Bath 1973: On the Way to the - Possibly - Best Tournament of his Life: Following the loss of his world title in 1972, Spassky had a few weak tournament performances on his return to competition, starting in 1973 with a mediocre result in Tallinn (3rd out of 6 players) behind a majestic Tal and Polugaevsky. Then after scoring just 11/2/4 in a match-tournament in Moscow, he shared first place in Dortmund with Andersson and Hecht. After losing two games, this was not actually a bad result, but it was not a very good one either. --- These performances gave no hint of the fact that later in the same year 1973 Spassky would achieve one of the greatest triumphs of his career, playing some brilliant games in one of the strongest Soviet championships in history. --- The 5th European Team Championship was held in Bath, England, where he played successfully on first board for the USSR. His team (with four former World Champions, Smyslov, Tal, Petrosian and Spassky, together with a future World Champion, Karpov) easily won the event, winning all their matches. Spassky tied with Gligoric for the best score on first board. --- In this game that we shall see how Spassky seized the initiative and gained greater piece activity. The queens came off early but his advantage allowed him to reach a very favourable endgame.' **1.e4** Davies, Nigel **1...c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 h6?!** The most radical way of preventing the move Bg5 and therefore maintaining an important guardian of the d5-square. But White's reply gains the bishop pair, which is an important factor in the endgame.

Black has tried several other moves but all of them leave White in command: The most radical way of preventing the move Bg5 and therefore maintaining an important guardian of the d5-square. regaining the pawn with advantage in view of Black's weak structure.' Davies, Nigel: '**±**' Davies, Nigel: '<xml✕:en>with a clear advantage.</:en✕/xml>' Davies, Nigel: 'with a clear advantage.' ]

[ 17...Nc7 could be met simply with

**A)** although the difference in activity also makes 18.Nxf7! possible, when after Kxf7 *(*while *18...Bxf7? 19.Bxf7+ Kxf7 20.Rd7+* loses a pawn without compensation *)* 19.Rd7+ Kf6 20.Rxc7 Bxc4 21.bxc4 Rhc8 22.Rd7! White's extra pawn is doubled, but in view of White's strong bishop and rook on the seventh rank, Black's compensation is debatable. For example, Na5 *( 22...Nd4* leaves the knight more exposed, enabling White to play *23.Bd6 Ra8 24.Bxe5+! Kxe5 25.Re1+* 26 and Rxd4 *)* 23.Bd6 Ra8 24.c5 when White's extra pawn is doubled but useful. b6 is answered with 25.Bc7! .;

**B)** 18.Rhe1 , with advantage; ]

**18.g3**

[ 18.Rhe1 on account of the attack on g2 (i.e. Bxc4 and 19...Nxg2). ]

**18...Bxc4 19.Nxc4** Maric,Rudolf: '[Δ Rd7]' **19...Ne2+**

[Black tries to create a lack of coordination in White's game, seeing that 19...Ne6?! , with ideas such as Bb2, is clearly worse, 20.Rhe1 f6 21.f4 b5 22.Nd6 ]

[while 19...Ng6 allows 20.Rd7 . ]

**20.Kb2** Maric,Rudolf: '+/ -!?' '**±**!?' Maric,Rudolf: '**±**!?' '**±**!?' Zenón Franco: 'QUESTION: This move removes the king from the centre. Is it appropriate here to do the opposite, as nearly all the books tell us we should do in the endgame? --- ANSWER: I can see that you have some good books. These can be an excellent guide, but at the board you have to think "with your own little head" as Miguel Najdorf used to say. Although the king is now decentralised, it leaves the central files clear, granting greater activity to his other pieces, especially the rooks.'

[Putting the king on b2 is better than playing 20.Kd2 , when after Ned4 21.c3 Ne6 22.Rhe1 f6 23.f4 b5 24.Nd6 , having played c2-c3 White cannot use the Bb2 idea that was effective after 19...Ne6 in the note to Black's 19th move. ]

**20...b5**

[Previously Black had rejected this active move because he considered it (correctly) to be premature, but he decides to play it now, because the safer move 20...f6 would probably be answered with the unpleasant 21.c3!? , threatening Rhe1, when Black would have to play b5 anyway, in order to have the possibility of the tactical shot ...Nxc3, followed by ...b4+, regaining the piece. ]

**21.Rhe1** Zenón Franco: 'Spassky decides to include his last piece in the struggle, reckoning that after the ensuing exchanges he is bound to be left with the more active pieces.'

[The position also permitted White to gain an advantage just using the pieces already developed by playing 21.Bd6! , when gaining a fleeting material advantage with bxc4 *( 21...Rd8?* fails to the simple *22.Nxe5;* while *21...Re8 22.Na3 a6 23.c3* leaves the e2-knight in trouble *)* 22.Bxb8 c3+ is no good, since after *( 22...Nxb8 23.Rd8+ Kh7 24.Rxh8+* , followed by 25 c3, loses the e2-knight *)*

23.Kb1 Nxb8 24.Rd8+ Kh7 25.Rxh8+ Kxh8 26.Re1 Nd4 27.Rxe5 Kh7 28.Re3 White wins a second pawn, with a big advantage in the endgame. ]

**21...bxc4** Zenón Franco: 'Forced;'

[ After the alternative Maric, Rudolf: 'Nigel Davies: 'After the alternative'' After the alternative Maric, Rudolf: 'Nigel Davies: 'After the alternative'' Zenón Franco: 'On the other hand the desperado' Davies, Nigel: '<xml✕:en>After the alternative</:en✕/xml>' Davies, Nigel: 'After the alternative' 21...Nxg3 there is the powerful reply Maric,Rudolf: 'Nigel Davies: 'there is the powerful reply'' there is the powerful reply Maric,Rudolf: 'Nigel Davies: 'there is the powerful reply'' Zenón Franco: 'can be answered simply with' Davies, Nigel: '<xml✕:en>there the powerful reply</:en✕/xml>' Davies, Nigel: 'there the powerful reply' *22*.Bd6! *( 22.Nxe5* , and after *Nxe5 23.Rxe5 f6* , White has the zwischenzug *24.Bd6!* with advantage*.;* White could also seek a bigger advantage with the more complex *22.Rd6!* with the idea of *Nd4 23.Nxe5 Ngf5 24.Rd7 b4 25.Bxb4 Rxb4 26.Nxf7* , when White's advantage should be decisive *)* 22...Rd8 23.Nxe5 Nxe5 24.Bxe5 Rxd1 25.Rxd1 Ne4 26.f3 Ng5 27.f4 followed by 28 Rd7. Maric,Rudolf: '**Δ** Rd7**±** **Δ** Rd7**±** Nigel Davies: 'followed by 28 Rd7.'' Davies, Nigel: '<xml✕:en>followed by 28.<sym>R</sym>d7. </:en✕/xml>' Davies, Nigel: 'followed by 28.Rd7.' ]

[ since 21...Ned4 fails to 22.Nxe5 b4 23.Bxb4 Nxe5 *(* or *23...Rxb4 24.c3 )* 24.Rxe5 Nc6 25.Bd6! . ]

**22.Rxe2 f6 23.Re4** Maric,Rudolf: '**±**' '**±**' Maric,Rudolf: '♔' Maric,Rudolf: '**±**' '**±**' Maric, Rudolf: '♔' Zenón Franco: 'Spassky is seeking to stabilise the structure and clarify the position. At the same time, he is planning to activate this rook along the fourth rank.' **23...cxb3 24.cxb3!**

[ QUESTION: Another move away from the centre! Why not 24.axb3 - ? --- ANSWER: It is possible that there is no great difference here between the two possible ways to recapture. The basics of the position are the same in both cases. White is better because all his pieces are in play and his bishop is superior to the enemy knight. Furthermore the pawn on a7 is weak. With the text move White is planning to use the c-file which is now open. ]

**24...Kh7 25.Rc4 Rhd8**

[ 25...Nd4 fails to relieve the pressure, since after 26.Bc5 Rhc8 27.Rdc1 Black will have to play an endgame a pawn down. If Nb5 then 28.a4 . ]

**26.Rxd8 Nxd8 27.Bc5 a6** Zenón Franco: 'Advancing this pawn to a5 would leave it even more exposed.'

[ In the event of 27...Rb7 , White forces Black into passivity with 28.Ra4 Nc6 29.Ra6 Rc7 and then starts to advance his pawn majority with 30.b4 , followed by Kb3-c4, etc., with b4-b5 a constant threat. ]

**28.Kc3** Instructive use of the king. Together with his superior minor piece and queenside pawn majority, this will prove decisive. Maric,Rudolf: 'Nigel Davies: 'Instructive use of the king. Together with his superior minor piece and queenside pawn majority, this will prove decisive. '' Davies, Nigel: '<xml✕:en>. Instructive use of the king. Together with his superior minor piece and queenside pawn majority, this

will prove decisive.</: enX/xml>' Davies, Nigel: '. Instructive use of the king. Together with his superior minor piece and queenside pawn majority, this will prove decisive.' **28...Kg6 29.a4 Kf7** Zenón Franco: 'Black centralises his king, but it is too far from the queenside, specifically from his isolated pawn on a6. --- EXERCISE: Now that Spassky has improved the position of his king and started to advance his queenside majority, what do you think Spassky played in this position? --- ANSWER:' **30.Be3** Zenón Franco: 'Making way for the rook to head for the seventh rank and then harass the weak pawn on a6.' **30...Ke6 31.Rc7 Rb7 32.Rc8 Rd7**

[ The endgame after 32...Kd7 33.Ra8 Rc7+ 34.Kb2 Ne6 35.Rxa6 Nd4 36.b4 Rc2+ 37.Kb1 Rc4 38.b5 (vacating b4 for the king) is also difficult for Black; the two connected passed pawns should win. ]

**33.Bb6 Nb7 34.Ra8** The white rook has successfully inflitrated the black queenside and the a-pawn is now falling. Maric,Rudolf: '+-' '+-' Maric,Rudolf: 'Nigel Davies: 'The white rook has successfully inflitrated the black queenside and the a-pawn is now falling. '' The white rook has successfully infiltrated the black queenside and the a-pawn is now falling. The white rook has successfully inflitrated the black queenside and the a-pawn is now falling. ■ **Sveshnikov,Evgeny**
(Game 23) Budapest 1967
*[John Cox]*

I've chosen this game because we have to have one game by the man himself, and anyway it's always good to have a peek at how the truths we take for granted today were elucidated. **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 Qxf6 10.Nd5 Qd8** A comparison with the variations in the last two chapters suggests that White should be better off here. After 9 Nd5 Be7 10 Bxf6 Bxf6 we would have the same position except that Black's bishop would be on f6 rather than f8. It seems likely that Black would prefer that position, but by itself that isn't a reason to dismiss 10...Qxf6 – after all some consider 9 Nd5 less frightening than 9 Bg5, so perhaps it's an achievement for Black to force the same structure, albeit in a slightly worse version? **11.c4**
[ Reasoning along the lines of the last note, White might very well, and often does, play 11.c3 here and continue along the lines of the 9 Nd5 chapters. White can probably claim some advantage there. ]
[ One can also compare the position to another present-day main line: after 9 Bxf6 gxf6 10 Nd5 f5 Black has a pawn on f5 instead of one on g7. That has pros and cons, but one variation which is rather obviously now stronger for White (with the pawn on g7) is 11.Bxb5!? axb5 12.Nxb5 . As we will see in Chapter Six, Black's main defence to this sacrifice with the pawn on f5 is Ra4 , but here that loses instantly to 13.Nbc7+ Kd7 14.Qg4+ (this is the difference). None of Black's other

defences that I can see are improved at all by the difference in Black's pawn position, quite the contrary, so this could well be an interesting try. But the text, too, has a specific idea to exploit the difference between this position and the modern main lines, not that those existed in 1967, of course. ]

**11...Ne7**

[ As we saw in Game 12, 11 c4 is also played with the bishop on f6, but there 11... b4 is a solid and sensible reply. Here, though, 11...b4?! more or less loses to the tactical 12.Qa4 Bd7 *( 12...Ra7 13.Nc2 Bd7 14.Ncxb4 Nd4 15.Qd1* may be a lesser evil but also leaves Black much worse *)* 13.Nb5 axb5 *( 13...Rc8 14.Qxa6* is also dreadful *)* 14.Qxa8 Qxa8 15.Nc7+ Kd8 (of course with the bishop on f6 15...Ke7 16 Nxa8 Rxa8 just picks the knight up with Black material ahead) 16.Nxa8 Nd4 17.Rc1 and White should convert his material advantage. ]

[ Inviting White's a3-knight into the action with 11...bxc4 is also very unattractive, so Sveshnikov's move is probably the best that Black can do. ]

**12.Be2?!**

[ A feeble effort. To test Black's idea White really had to accept the pawn sacrifice with 12.cxb5 Nxd5 13.exd5 *( 13.Qxd5 Be6 14.Qd2 d5 15.bxa6 Bxa3 16.Bb5+ Bd7 17.Bxd7+ Qxd7 18.bxa3 dxe4 19.Qb4* was what Sveshnikov was afraid of and is also pretty strong *)* ; for example, 13...Be7 14.Bc4 0-0 *( 14...Qa5+ 15.Qd2 Qxd2+ 16.Kxd2* doesn't change much *)* 15.0-0 . This has never actually been tested as far as I know – Black can always claim some compensation in this sort of position with his kingside pawns and unopposed dark-squared bishop, but it's hard to believe that White isn't a fair bit better. ]

**12...Nxd5 13.cxd5?!**

[ An unpleasant choice for White, but I suspect that playing for a draw with 13.Qxd5 Be6 14.Qc6+ Bd7 15.Qd5 was already the best he could do. After the text Black is always likely to turn out better with the bishops and White's silly knight on a3. ]

**13...g6**

[ 13...Qh4 was another good way to play; it isn't terribly convenient for White to defend the e-pawn and Black develops very quickly; for example, 14.Qd3 Be7 15.Nc2 0-0 16.Ne3 Bd7 17.0-0 Rfc8 . ]

**14.Nc2 Bh6 15.0-0**

[ Given that White can't really contest the c-file, 15.Nb4 is a bit of a blow into the air; for example, 0-0 16.0-0 Bd7 17.Nc6 Qb6 and the invader is repelled. ]

**15...0-0 16.Qd3**

[ There was a lot to be said for 16.a4 , which at least makes use of the positive sides of White's position. White ought to be able to create enough action on the queenside to hold on then, whereas in the game a very young Andras Adorjan becomes too passive on the kingside. ]

**16...f5 17.f3**

[ White would much rather avoid this weakening of the dark squares, but Black is threatening 17...fxe4 18 Qxe4? Bf5. My computer thinks White should play the splendid 17.Ne3 f4 18.Nc2 , but I think human terror of the sort of attack White

has to face after g5 is justified; for example, 19.h3 g4 20.hxg4 Qh4 21.Qf3 Ra7 22.a4 Rg7 23.Qh3 Qxh3 24.gxh3 f3 25.Bd1 Bd2 and Black is clearly much better. If White wanted to do this sort of thing he should have left the queen on d1, when it might be possible to meet ...f4 with the immediate Bg4. ]

**17...Bd7 18.Nb4 Qc7 19.a3 Rf7 20.Kh1 Qb6 21.b3 Raf8 22.Ra2 Qd8!?**

[ Black is probing a little. The primitive 22...fxe4 23.fxe4 Rxf1+ 24.Bxf1 a5 25.Nc6 *(* and not *25.Nc2 Qf2 )* 25...Bxc6 26.dxc6 Qxc6 leads after 27.Ra1 Kh8 28.Rd1 to a position where Black will have great difficulty in converting his extra pawn. ]

**23.g3**

[ It was dangerous to take the pawn: 23.Nxa6 Qh4 *( 23...fxe4 24.Qxe4!* is not so effective because the queen can stay on the fourth rank, and so White can meet ...Bf4 and ...Qh4 with g3, thus: *Bf4 25.a4 bxa4 26.bxa4 Bf5 27.Qb4 Qh4 28.g3 )* 24.g3 *( 24.Rg1 fxe4 25.fxe4 Rf2* forces *26.Qg3* by the threat of ... Bf4, but then *Qxg3 27.hxg3 Be3* is winning with the idea of ...g5 and a rook to the h-file *)* 24...fxe4 25.Qc2 Qd8! (a superb switchback) 26.Qxe4 Qb6 27.Nb4 Bf5 28.Qh4 Qe3 gives Black a dominating position, and in fact the only way to keep playing seems to be 29.Bxb5 Bg5 30.Re2 Qxe2 31.Bxe2 Bxh4 32.gxh4 , but Black is surely winning here with reasonable care. ]

**23...fxe4 24.fxe4 Qe8**

[ A continuation of the same indirect policy. The natural 24...Qb6 was pretty strong and I don't really understand why Sveshnikov passed it by; after something like 25.Rxf7 Rxf7 26.Bf3 Be3 27.Bg2 Bd4 Black's pressure seems to be increasing steadily. ]

**25.Bf3??**

[ Losing at once. It must have looked as though 25...Bh3 was a threat, but actually White should simply have activated his other rook with 25.Rc2 , and met Bh3 with 26.Rf3! , when Black has no particular way of breaking in down the f-file, and in fact the position is about equal. Rxf3 27.Bxf3 Qf7 28.Bg2 is the point; from afar it's easy to miss that White can hold like this. ]

**25...Bh3 26.Raf2**

[ White cannot hold the f-file: 26.Rff2 Bg4 also wins material decisively at once. ]

**26...g5?!**

[ 26...Bxf1 27.Rxf1 Bc1 28.Nxa6 Bxa3 was also plenty good enough, in fact rather more effective. ]

**27.g4 Bxg4**

[ 27...Bxf1? by now would have left Black's win a really quite tricky proposition; White can blockade the light squares and it is an open question whether Black can break in at all. ]

**28.Kg2?**

[ White could actually still have offered reasonable resistance with 28.Qe2 , after which Black's win is decidedly less clear than it should have been; for example, Bc8 29.Nd3 Qd7 30.Bh5 Rxf2 31.Nxf2 . ]

**28...Qd7** Now Black has ...Bh3+ and ... g4 and the win is trivial. **29.Kg3 Bh3 30.Bh5 Rf4 31.Rxf4 gxf4+ 32.Kf3 Qg7** Points to Remember: None, really. I don't recommend dabbling with 9...Qxf6, but White players who face it can choose any of the methods suggested here according to taste.

□ **Lesson Sveshnikov The,T**
■ **Sveshnikov 9.Bxf6 gxf6 10.Nd5**
*[MH]*

B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6** We will analyze 9. Bxf6 in this lesson. **9...gxf6** 9...Qxf6 doesn't make any sense as after 10.Nd5 Qd8 Black gets a worse version of the 9.Nd5 variation. **10.Nd5** First of all, I would like to apologize in advance because in this lesson, there will be a lot of theory and a lot of variations. But what to do? The Sveshnikov is a very important variation and in this line, the price of a move is very high. Quite often both sides will have to make only moves. Of course, there are general ideas: Black is trying to push ...f5 by all means and White is trying to play c2-c3 to get the knight into the game. White will usually need also to blockade the centre while trying to use the central squares to create strategic and tactical possibilities. On the other hand, despite Black's weird pawn structure, he gets a powerful center. But frankly, all of these details won't be relevant as you will see the variations are very direct in many lines and you just need to know the theory move by move. **10...f5** This was my preferred choice when I was playing the Sveshnikov. White has plenty of replies here so let's look at them one by one. **11.g3** This is an interesting move that is currently out of fashion, Black needs to be accurate after this move. Since I don't see any advantage anyway in other lines, this is a nice weapon to throw at your opponent. **11...fxe4 12.Bg2 Bf5** This seemingly normal-looking move just protecting the pawn is bad for Black! **13.c3** White has compensation. **13...Bg7 14.Nc2** Black will not manage to keep the pawn alive. A dynamic duo of knights. **14...Bg6**
[ 14...0-0 15.Nce3 Bg6 16.h4 h6 17.h5 Bh7 18.g4 Qg5 19.Qd2 Rac8 20.Rd1 Kh8 21.Nb6 Rcd8 22.Qc2 Ne7 23.Bxe4 Bxe4 24.Qxe4 f5 25.gxf5 Nxf5

☐ **Lesson**
■ **Sveshnikov Nd5**
*[GM Ivan Cheparinov,MH]*

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5**
On of the most challenging moves, very popular lately, especially after the world championship match Carlsen-Caruana. **7...Nxd5 8.exd5 Nb8** The main move, more flexible and a little bit better in my opinion.
[ The other option is: 8...Ne7 ]
**9.a4** The most popular lately. White wants to push the a-pawn. He also secures the

a3-square for the knight, from where it can go to c4.

[ 9.Be2 a6 10.Na3 Nd7 11.Bd2 White takes control of a5 before playing Nc4. *( 11.Nc4 b5=* We simply kick out the knight with good play.*; 11.0-0 Be7= )* 11...Be7 12.Nc4 b6 An idea typical for the Najdorf. 13.0-0 0-0 14.a4 f5 *( 14...a5!? )* 15.a5 *( 15.Bb4 Qc7 16.a5 b5 17.Nd2* White wants to play on the queenside with c4, but Black can play on this flank as well. *Nc5 18.Rc1 Bd7 19.c4 Rfc8 20.cxb5 axb5 21.Nb3 Kh8=; 15.f4 Qc7* We want to keep the tension in the centre. There will be some problems with the d5-pawn for White. *16.Kh1 Bb7 17.fxe5 Nxe5 18.Nxe5 dxe5 19.c4 a5⇄* Stopping b4. The game is balanced, but with practical problems for White because Black has the dangerous plan of pushing the kingside pawns. *)* 15...b5 16.Na3 e4 17.c4 f4 We are able to immediately push the pawns, and sacrifice on b5 in return for an attack. 18.cxb5 Bh4!? *(* Also possible is *18...Ne5 )* 19.Nc2 Ne5⇄ The position is very complicated, but Black has very good chances with his attack. ]

[ 9.Be3 a6 10.Na3 Nd7 11.Qd2 f5 12.f3 *( 12.f4 Be7 13.Nc4 0-0 14.0-0-0 exf4 15.Bxf4 Nc5= )* 12...Be7 13.Nc4 b5 The Na5 invasion is not dangerous for Black in the long castle version. 14.Na5 0-0 15.Nc6 *( 15.0-0-0 Nf6⇄* doesn't change much. We will eventually kick the knight out of c6 with ...Bb7. *)* 15...Qe8 16.Bd3 Bh4+ Provoking a slight weakening to make White unable to caste short. 17.g3 Bd8 18.0-0-0 Nb6 19.Nxd8 Qxd8= ]

[ 9.Bd3 The bishop on d3 looks a little bit strange, as it comes under the ...f5-e4 idea. a6

**A)** 10.Na3 Nd7 11.0-0 Be7

**A1)** 12.Qg4 g6 13.Bh6 f5 14.Qb4 *( 14.Bxf5? Nf6-+ )* 14...Nc5 15.Be2 Bd7⇄;

**A2)** 12.Bd2 0-0 13.Nc4 f5 We go for the main plan of pushing the kingside pawns. 14.a4 e4 15.Be2 f4 16.Ra3 The black pawns can become weak in some cases, as we will see later in this course. But here we can create immediate counterplay with a quick sacrificial attack: Ne5 17.Ba5 Qd7 18.Nb6 *( 18.Nxe5 dxe5 19.d6 Qxd6 20.Qxd6 Bxd6 21.Bc4+ Kh8⇄ )* 18...Qf5!? *( 18...Qd8* is an option to make a draw: *19.Nc4= )* 19.Nxa8 f3 White is forced to sacrifice the material back. 20.gxf3 exf3 21.Rxf3 Nxf3+ 22.Bxf3 Qxf3 23.Qxf3 Rxf3 24.Re1 Kf7 25.Nb6 Bf5⩲ Black's initiative is pretty serious, despite being a pawn down. From a practical point of view, I prefer Black.;

**B)** 10.Nc3 Be7 11.0-0 0-0 12.a4 *( 12.f4 exf4 13.Bxf4 Nd7 14.Kh1 Nc5= )* 12...f5 13.f3 Nd7 14.a5 b5 15.axb6 Qxb6+ 16.Kh1 Nc5= ]

[ 9.Qf3 a6 *(*Another good option is *9...Be7 10.Qc3 Na6 11.Be3 0-0 12.Nxa7 Bg5!∞ )* 10.Qa3 *( 10.Nc3 f5⇄ )* 10...Be7 11.Bg5 The main, tactical way of playing the position. *( 11.Be2 0-0 12.c4 Nd7⇄ )* 11...Bf5!? I like this move. *(*Everybody automatically plays: *11...f6* Which is also fine for Black. *12.Bd2 0-0 )* 12.Be2 *( 12.Bxe7 Kxe7* One of the main ideas for Black in this structure is to exchange the dark-squared bishops in his own favour, and here White has actually done that

himself. Black's king will find a safe place on the kingside anyway: *13.Be2 Qb6 14.c4 Nd7 15.Nc3 a5* Establishing a typical dark-squared blockade. *16.b3 Nc5 17.0-0 Rhe8 18.Qc1 Kf8= )* 12...axb5 The situation gets forced. 13.Bxe7 Rxa3 14.Bxd8 Ra8 15.Bg5 f6 16.Bxb5+ Ke7 17.Be3 Bxc2 18.Rc1 All pretty forced. Ra5! An important intermezzo. 19.Bc4 Bg6 20.b4 *( 20.0-0 Rc8= )* 20...Ra4 21.Bd2 Nd7 *( 21...Rc8* with ...Rxc4!? ideas is good as well. *)* 22.Bb3 Rha8! A powerful exchange sacrifice. Black gets excellent light squares. 23.Ke2 Rxa2 24.Bxa2 Rxa2⩲ With a great compensation. ]

[ 9.b4 a6 *( 9...Be7 10.a4* Transpose to 9.a4Be710.b4. *)* 10.Na3 a5 11.c3 Be7

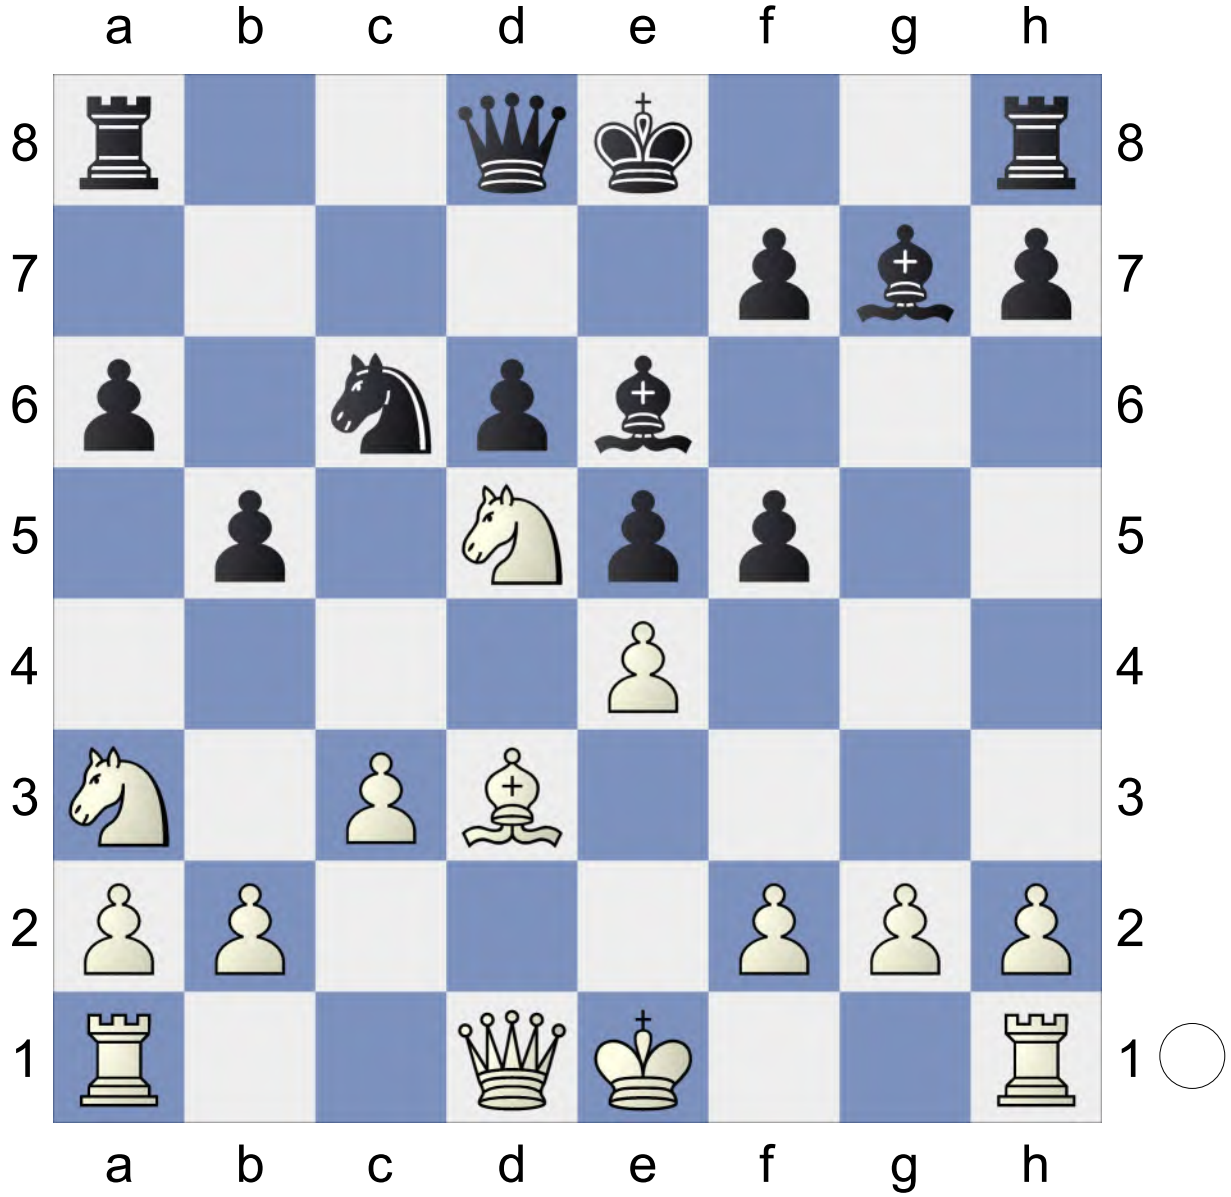
□ **Lesson Sveshnikov The,T**
■ **Sveshnikov 9.Bxf6 gxf6 10.Nd5**
*[MH]*

B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6** We will analyze 9. Bxf6 in this lesson. **9...gxf6** 9...Qxf6 doesn't make any sense as after 10.Nd5 Qd8 Black gets a worse version of the 9.Nd5 variation. **10.Nd5** First of all, I would like to apologize in advance because in this lesson, there will be a lot of theory and a lot of variations. But what to do? The Sveshnikov is a very important variation and in this

line, the price of a move is very high. Quite often both sides will have to make only moves. Of course, there are general ideas: Black is trying to push ...f5 by all means and White is trying to play c2-c3 to get the knight into the game. White will usually need also to blockade the centre while trying to use the central squares to create strategic and tactical possibilities. On the other hand, despite Black's weird pawn structure, he gets a powerful center. But frankly, all of these details won't be relevant as you will see the variations are very direct in many lines and you just need to know the theory move by move. **10...f5** This was my preferred choice when I was playing the Sveshnikov. White has plenty of replies here so let's look at them one by one. **11.c3** This move gives me mixed memories because in my first game ever in the Sveshnikov variation which I played in the last round of the U14 Soviet Championship, I was 12 at the time, and in the game, my opponent played this c3 move. **11...Bg7** This is the correct move here. **12.Bd3 Be6**



White has two options here. **13.Nxb5** -0.23/20 Strangely enough this more or less works now. **13...axb5= 14.Bxb5 Rc8** ...0-0 would now be deadly. **15.Qa4 Bd7**
[ Don't go for 15...Bxd5? 16.exd5 0-0 17.dxc6+- *( 17.Bxc6 e4+- )*]
**16.exf5** The position is equal. **16...0-0 17.0-0 e4** An extremely important move which you need to know. Now Black is at least not worse.
[ 17...Kh8 18.Qe4 Rg8 19.a4 Bh6 20.g3 Rb8 21.b4 Rg5 22.Ne3 Rc8 23.Rfd1 Bf8 24.a5 f6 25.a6 Rg7 26.Bf1 Na7 27.c4 Bc6 28.Nd5 Ba8 29.Rab1 Rb8 30.b5 Nc8 31.Qd3 Bxd5 32.Qxd5 Cheparinov,I (2555) -Halkias,S (2541) Antalya 90/(122) 2004 ]

□ **Lesson Sveshnikov The,T**
■ **Sveshnikov 9.Bxf6 gxf6 10.Nd5**
*[MH]*

B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6** We will analyze 9. Bxf6 in this lesson. **9...gxf6** 9...Qxf6 doesn't make any sense as after 10.Nd5 Qd8

Black gets a worse version of the 9. Nd5 variation. **10.Nd5** First of all, I would like to apologize in advance because in this lesson, there will be a lot of theory and a lot of variations. But what to do? The Sveshnikov is a very important variation and in this line, the price of a move is very high. Quite often both sides will have to make only moves. Of course, there are general ideas: Black is trying to push ...f5 by all means and White is trying to play c2-c3 to get the knight into the game. White will usually need also to blockade the centre while trying to use the central squares to create strategic and tactical possibilities. On the other hand, despite Black's weird pawn structure, he gets a powerful center. But frankly, all of these details won't be relevant as you will see the variations are very direct in many lines and you just need to know the theory move by move. **10...Bg7** Although not the mainline, according to modern theory this is a decent way of playing. I don't see a real advantage for White here. You need to know that this variation is much more forcing than 10...f5 and Black is basically trying to make a forced draw, therefore you really need to memorize the following variations. **11.Bd3** The main move here in this position. **11...Ne7** Since Bd3 cut the queen's access to the d5-square, this is the perfect timing to attack it with Ne7. **12.Nxe7 Qxe7** This is the position where play gets very direct. **13.0-0 0-0** It is pretty clear that sooner or later White willl try to get his knight into the game and he has two different ways to do it: c4 and c3. **14.c3** As White in my opinion, I suggest you try this move c3. Even though it is out of fashion I think it is very playable. Black is okay objectively but it is less forcing and Black will have to make some accurate moves to get there. **14...f5** Of course. **15.Nc2** Black is at a crossroad now, what to do with the center? **15...d5 16.exf5 e4 17.Be2 Rd8** Not a lot of games here at the top level, I think Black still needs to play accurately to equalize this position. **18.a4** Typical idea, weakening the queenside. **18...bxa4 19.Rxa4 Bxf5 20.Rxa6** Taking the pawn is a straightforward draw for Black. **20...Rxa6 21.Bxa6 Qg5** Prevents Qd2. **22.Qc1 Qxc1 23.Rxc1 Be6N** With f5 next, Black has enough play to steer the game into a draw. Weighted Error Value: White=0.08 (flawless) / Black=0.01 (flawless) . OK: White=3 Black=5

B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5** This is the only move that makes sense here. With this move, white gets a knight on the most active square and does not allow black to develop the dark square bishop before he plays d6. White needs to be careful not to allow black to play d5. Here d5 is not possible because white controls it with the pawn, the knight, and the queen. **6...d6** This is the only move for now. Black needs

to play d6 and not to allow white to play Nd6. After this, black will try to play a6 and b5 and expand on the queenside, removing white's knight from the b5 square. **7.a4** This is the third alternative to 7. Bg5. With this move, white wants to prevent black from playing a6 - b5. But now white loses control over the d5 square. With next sequence of moves, Black takes over the initiative. Also, it's very important to understand why 7. Bg5 is the only good move for white. On any other alternative black can easily take over control over the position. **7...a6 8.Na3 Bg4** Great move. With this precise move, Black takes over control over the light squares and the vital d5 square. **9.f3 Be6 10.Bc4**

[ 10.Be3 Nb4 11.Nc4 d5 12.Bb6 Qe7 13.exd5 Nbxd5 14.Nxd5 Nxd5 15.Bf2 Rd8 16.Qd2 Nb4 17.Qc3 Qg5 18.Rd1 Nxc2+ 19.Qxc2 Bb4+ 20.Nd2 Bf5 21.Qc1 Rc8 22.Qa1 Bc2 23.h4 Qf4 24.g3 Qxf3 De Firmian,N (2553)-Vallejo Pons,F (2662) Selfoss Milk Masters 2nd 2003 (3) 0-1 ]

☐ **Lesson Sveshnikov The,T**
■ **Sveshnikov 9.Bxf6 gxf6 10.Nd5**
*[MH]*

B33: Sicilian: Pelikan and Sveshnikov Variations **1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6** We will analyze 9. Bxf6 in this lesson. **9...gxf6** 9...Qxf6 doesn't make any sense as after 10.Nd5 Qd8 Black gets a worse version of the 9.Nd5 variation. **10.Nd5** First of all, I would like to apologize in advance because in this lesson, there will be a lot of theory and a lot of variations. But what to do? The Sveshnikov is a very important variation and in this line, the price of a move is very high. Quite often both sides will have to make only

moves. Of course, there are general ideas: Black is trying to push ...f5 by all means and White is trying to play c2-c3 to get the knight into the game. White will usually need also to blockade the centre while trying to use the central squares to create strategic and tactical possibilities. On the other hand, despite Black's weird pawn structure, he gets a powerful center. But frankly, all of these details won't be relevant as you will see the variations are very direct in many lines and you just need to know the theory move by move. **10...f5** This was my preferred choice when I was playing the Sveshnikov. White has plenty of replies here so let's look at them one by one. **11.c4** Also not a good move but was played by Hikaru Nakamura in a classical game long time ago against Boris Gelfand. **11...Qa5+** This move is much stronger, it probably even is slightly better for Black. Gelfand played 11... b4 which is also perfectly fine. **12.Qd2 Qxd2+ 13.Kxd2 Bh6+ 14.Kd1 fxe4N** Many moves are fine for Black, including 14...Kf8 .

[ 14...0-0 15.exf5 Bxf5 16.cxb5 axb5 17.Bxb5 Nd4 18.Ne7+ Kg7 19.Nxf5+ Nxf5 20.Bd3 Ne7 21.Nb5 d5 22.Ke2 e4 23.Bc2 Rab8 24.a4 f5 25.Rhd1 Kf6 26.g3 Rfc8 27.Bb3 Rc5 28.f4 Bg7 29.Rdc1 5.Be2 0-0-0 6.Be3 (2704)-Ornolfsson,M (2693) corres 1977 1-0 Rcxb5 30.axb5 Rxb5 31.Ra6+ Kf7 32.Ba2 Rxb2+ 33.Kd1 Rxh2 34.Rc7 Rxa2 35.Rxa2 Bf6 36.Ra5 Ke6 37.Ra6+ Kf7 38.Ra5 Ke6 39.Ra6+ Kf7 40.Rd7 h5 41.Rdd6 Bg7 42.Ra7 d4 43.Rd5 Bf6 44.Rxf5 5.Be2 0-0-0 6.Be3 (2704)-Ornolfsson,M (2693) corres 1977 1-0 ]

**15.cxb5 Nd4** ...axb5 would now be deadly. **16.Nc7+ Ke7 17.Nxa8**

(Diagram)

Hoping for h3. **17...Bg4+** A strong pair of Bishops. **18.Ke1 Rxa8 19.bxa6** aiming for b4. **19...d5** A very forced line. Black is a lot more active with a nice center, two powerful bishops and a strong knight on d4. Black is probably slightly better here according to the engines, in a practical game I don't think this is playable. A rather calm draw. Weighted Error Value: White=0.06 (flawless) /Black=0.04 (flawless) . Inaccurate: --- Black=1 OK: White=4 Black=6 Best: White=3 Black=1

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5

8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be3 This is rare, but not bad at all. The bishop puts some pressure on the queenside, but note that White is not yet threatening to take the pawn on a7, as we can take the piece on a7 with the rook and have ...Qa5+ available next. 10...Nd7 It is important to start with this move , as after 10...O-O ? White plays 11.a5 and you are in trouble ! 11.Qd2 After the queen move we need to react to the threat of taking on a7, as ...Qa5+ is prevented. 11...a6 12.Na3 f5 The most active approach, immediately threatening ... f4 to trap the bishop. 13.f3 0-0 14.Nc4 b6 15.Be2 This is better than 15.a5 and leads to a complicated position with about equal chances. 15...Bh4+ A concrete approach , but there is nothing wrong about a slow move like 15...Rb8 for example. 16.g3 f4 17.Bf2 Be7 And we reached an interesting position with chances for both sides.

After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana

match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. 10...0-0 11.0-0 Nd7 As mentioned several times in the lines after 9. a4: don't play ...a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to vary your play. 12.Be3 A natural move, but it does not harmonize all that well with White's queenside plans, as we will see. 12...a6 13.Na3 f5 With the bishop placed on d2 instead, now playing a5 would be possible. 14.f4 We have seen many instances of this idea throughout this chapter. White stops the black central pawns. 14...Bf6 Our usual way of handling f4 , but you may also consider the sharper 14...exf4 15.Bxf4 g5 !? here. 15.Nc4 exf4 16.Bxf4 Ne5 We reached an interesting position in which Black's chances are certainly not worse.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 The 7. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. Besides 10. Be2. 10...0-0 11.0-0 Nd7
As mentioned several times in the lines after 9. a4: don't play .. .a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to vary your play. 12.b4 This novelty was played in game 10 of the World Championship Match, deviating from 12. Bd2, which was played just 3 days earlier in game 8. Magnus did not react in the most precise way, but the game was still very complicated and unclear and ended in a draw. Black's play can be improved, as we will see shortly.An amazing fact is that at the time of writing, about 10 months after the move's debut in London, it has not ever repeated just once. It is not clear to me or other annotators why this is the case. Black seems to be alright, but there is no clear reason why White seems to have abandoned the idea after just a single outing.

12...a6 13.Na3 b6 This is the suggested improvement on Magnus Carlsen's move 13...a5. After 14.bxa5 Rxa5 15.Nc4 Ra8 16. Be3 f5 17.a5 f4 they reached a sharp battle that ended in a draw. Engines show that White should be better in these complications , but it is tough to play and the game ultimately ended in a draw. This type of play is important to understand: even if something goes slightly wrong on the queenside Black will have counterplay on the kingside and this is often easier to handle for Black. White's king is at stake and he might get nervous or make a costly mistake. Still we should try to improve with 13... b6, which slows down White first before taking further action. 14.Nc4 f5 This is Anish Giri's main line in his analysis. He states that 14...a5 should be avoided , as 15.bxa5 bxa5 16. Bd2 leaves the a-pawn too weak. I checked this a bit and agree. It is not terribly bad for Black, but still playing 14... f5 looks better. 15.f4 Giri ends his analysis at this point and does not suggest a follow-up for Black. Before I show my proposed reply I need to mention that 15. f4 looks active and logical, but he might also play something slow instead. 15...a5 I suggest to play this only now, after f4 is on the board. This makes a huge difference, as we will see. 16.bxa5 This seems less testing than 16.c3. 16...bxa5 Without f4 on the board White has a Bd2/Qe1 idea to put pressure on a5, which is not possible anymore with all the play going on in the centre. 17.Kh1 Ba6 Black is fine here, the point being the following line. 18.fxe5 Bxc4 19.Bxc4 Nxe5 20.Bb5 Bg5 Here I'd rather be Black, but objectively it might still be about equal. White is in danger of ending up with a completely useless bishop on b5, that does not help with all the play on the dark squares going on.

This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Bd2 The main line after 9. a4 Be7 is 10.Be2 O-O 11.O-O Nd7 12.Bd2 , which explains why this move has been recently introduced by Russian GM Ian Nepomniachtchi. He played it in the Zagreb Grand Chess Tour event against Fabiano Caruana , who is at home in this line from both sides of the board. 10...0-0 11.a5 This is the point of playing Bd2, here and in the line on move 12. White is now ready to retreat the knight to a3 after being attacked by ...a6. The pawn needs to be protected by the bishop first, otherwise just ...Qxa5 is the problem. This whole idea also shows why you should not play ...a6 too early after 9. a4. White is often spending time to prepare the a5 + Na3-c4 setup, so we should consider any ...a6 only until White has spend time with a move like Bd2 and/or a5. 11...a6 12.Na3 Bf5 According to GM Igor Stohl's survey in NIC Yearbook 132 this move was suggested and analysed first by Rafal Ogiewka, but the survey does not mention the publication or date. At the time of writing these lines, the move has been employed in practice already. It is a bit unusual to place the bishop on f5, but it makes a lot of sense here. We are quickly developing and prepare a swift ...Nd7 and ...Rc8 for natural development of the queenside. The bishop will often drop back to g6 later, preparing the common ...f5 push. There is an additional point of the move that we will see after White's natural reply. I should mention that Magnus did not choose the bishop move, but played 12... Nd7 and ...f5 quickly. This is also possible, but White had the better chances soon after. 13.Be2 This looks perfectly normal , but is met by a strong reply. If White plays something else , like 13.Nc4 or 13.Bb4 , we continue with a ...Nd7 and ...Rc8 based setup and

go for ...f5 later. 13...Be4 An annoying double attack on g2 and d5 ! White now needs to misplace his pieces slightly. 14.Bf3 Bg6 15.0-0 Nd7 16.Nc4 Rc8 Now coming with tempo, as the bishop is not on e2. 17.b3 f5 Black had good play in T.Kriebel-M.Dziuba, Katowice 2019.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you

might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. Besides 10. Be2. 10...0-0 11.0-0 Nd7 As mentioned several times in the lines after 9. a4: don't play .. .a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to vary your play. 12.Kh1 This has been played most often , but after Caruana played 12. Bd2 the focus shifted away from this former main line. Still this move is not bad at all and leads to complex play. Playing Kh1 shows White's intention to play f4 at some point, but still not committing to anything just yet. 12...a6 The immediate 12...f5 has been played as well , but we are following Magnus Carlsen's latest game in this line. 13.Na3 Now, after 13. Na3 Black has more than one reasonable option. Magnus has played 13...a5 14.f4 f5 against David Navara in Shamkir 2019 , but later switched to 13... Nc5. The problem in the Navara game was 15.Nb5 ! , which would have been unpleasant. See model game #1 for the rest of this game. I also checked 13...f5 and did not see a real problem , but we should stick to the World Champion's choice. 13...Nc5 Played first in the game M.Vachier Lagrave-M.Carlsen , Stavanger 2019. Magnus played the slightly less accurate 13...a5 against David Navara in Shamkir 2019; see model game #1. 14.Nc4 a5 Here we already understand the reasoning behind first playing 13... Nc5. Black first makes sure that the knight goes to c4 (not b5, as possible in the Navara game) , and only then blocks the queenside with ...a5. 15.f4 The most direct approach, played in the mentioned game between MVL and Magnus Carlsen. 15...exf4 16.Bxf4 f5 At first glance Black's position might look a bit suspect. Compared to similar scenarios we don't have active pieces on f6 and e5, like Bf6 and Ne5 or vice versa. The bishop on e7 is passive and not easily improved as it needs to cover the d6-pawn. Black has a good way to play, as demonstrated by the World Champion. 17.Bd3 Certainly not the only move for White, but others are met with the same plan that now follows. 17...b6 18.Qe2 Ba6 The point ! Black just wants to take the knight on c4, getting rid of the pressure on the d6-pawn. After that our bishop can be improved to f6 or g5. Note that after the capture on c4 the white bishop might come to b5 later, which looks very annoying at first. We have a good plan, though: just play ...Ra7-e7 to activate the rook. The bishop on b5 always looks at the e8-square, but we are able to 'play around it'. 19.Nxb6 White decides to change the course of the game by this tactic. After this we get some mass simplifications and a likely draw. If you like to avoid this you could investigate 18... Ra7 as a waiting move, playing . ..Ba6 soon after. This also looks completely fine to

me. 19...Nxd3 20.cxd3 Qxb6 21.Qxe7 Bxd3 And it fizzled out to a draw very soon in M.Vachier Lagrave-M. Carlsen, Stavanger 2019.

☐ **Sveshnikov Nd5 Sidelines**
■ **Sveshnikov Nd5 Sidelines**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11.

c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.g3 This is by far White's most popular move. If you compare it to the other continuations you will see that this is no coincidence. White does not get anywhere with a Be2-based setup and the fianchetto is the only other reasonable way to develop. On a more general note: it seems very difficult for White to make any headway with pure piece play, as we have seen in other lines. You can't generate serious pressure on the d-file and opening up the queenside with a3 leads to nothing much either. The only other way to alter the pawn structure seems to be f4, which is prepared by g3. Of course White needs to prepare this a bit more, but after 13. g3 you need to expect this to happen later. 13...a5 14.Bg2 White also plays 14.h4 here , but this we have covered via 13. h4 a5 14. g3 - (lines #25-31.) 14...Be6 15.0-0 Bg5 16.b3 Qb8 I like this interesting idea. Black intends to play ....Bd8-b6. Of course this is not the only option, a move like 16...g6 is more standard and fine as well. 17.f4 Bd8 18.Kh1 f6 This is useful to allow ...Bf7 and prevents the white f-pawn from going all the way to f6. 19.Nce3 Ra7 We need to cover d6 first with ...Rd7, then play ...Bb6 finally. I would assess this position as about equal, but it offers interesting play for sure.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In

this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Qf3 This move is seriously annoying after 12... a5, but no theoretical problem after 12... O-O. 13...Bg5 We preserve the bishop and avoid doubled f-pawns. 14.h4 This is the point of the queen sortie. White starts concrete play against the bishop. 14...Bh6 15.g4 This is a case of 'having said 'A', you need to say 'B' as well'. Black was also ready to strike with ...f5 now, so a slower move in combination with 14. h4 makes little. 15...f6 Now, here is the moment where the difference between 12... a5 and 12...

O-O becomes very relevant. If you picture this position with ...a5 being played instead of ...O-O you will spot that 16. g5 ! would be a strong move, while here this is clearly prevented and White has no direct follow-up to his pawn storm on the kingside.The play is very complex and interesting now. White has no obvious safe place for his king, which is very relevant in the long run. I'll show one line to illustrate ideas. 16.Be2 a5 17.Rd1 This is universally useful. White gets the option to take with a rook on d5 and also introduces the idea c5 into the position, trying to use the rook-queen situation on the d-file. 17...Be6 18.Qg3 Ra7 This is good move worth noting. The rook quite often gets activated in this way, being useful on the seventh rank. 19.Rg1 The point of Qg3. Now g5 is the threat. 19...g6 20.c5 This looks dangerous, but we are able to just let White take on d6 and corral that pawn. 20...a4 21.cxd6 Qa5 Black is fine in these complications. We are now threatening ...b3+ and a combination of ...Qc5/...Rd7 and ...Nd4 will regain the pawn on d6.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also

simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.h4 White stops ...Bg5 and also prepares to play g3 and Bh3 later. We are not particularly bothered by this idea, as taking on e6 is not frightening and h4 also has some downsides. It weakens the kingside and makes ideas connected to f4 tougher to play. 13...a5 14.g3 Be6 15.Bh3 One point of playing h4 is to allow this move. The most important point to remember is to not trade the light-squared bishops while the pawn structure is unchanged. It is fine for us to allow Bxe6 when ... fxe6 will patch the hole on d5, but we should never take on h3 unless we have some immediate, substantial gains. 15...a4 The most active and best continuation. 16.Bxe6 fxe6 17.Ndxb4 We are happy to see this greedy line by White. Black's initiative is now very difficult to contain. 17...Nxb4 18.Nxb4 Qb6 19.Nd3 This seems to be best by computer standards, but it has never been tried. 19...a3 You may also play 19...d5 , after which 20.cxd5 exd5 21.O-O ! dxe4 22.Nxe5 shows an important point of 19. Nd3. This line leads to mass trades and a very likely draw. It quite convincingly proves that black has no problems here. Going 19... a3 or 19...Qd4 is also possible and more combative. 20.Qe2 axb2 21.Nxb2 Ra3 Black goes ...Bd8 and ...Qa7 next. Black has very good play for the pawn.

You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look.

11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Ncxb4 Black gets great compensation after this pawn grab. The move 13.Ndxb4 amounts to the same, as we will exchange on b4 anyway, leading to the same position. 13...Nxb4 14.Nxb4 Qb6 White now has no fully satisfactory solution. Hanging on to the pawn gives Black fantastic play, but the other lines are not attractive either. 15.Qb3 That seems relatively best. White still keeps the pawn for the moment, preparing Nd5. 15...Rb8 16.Nd5 Qa5+ You may also just regain the pawn on b3, but I prefer this more active idea. 17.Qc3 Qxc3+ 18.bxc3 Rb2 White's extra pawn is not worth much, obviously. We will play ...Be6 next and get the f8-rook into play. If everything else fails you can always chop the knight on d5 to get to an opposite coloured bishops endgame that you should never lose. This approach is often your 'life insurance policy' of the bishop pair.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this

sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Be2 This modest move is one of the popular choices for White. He prepares kingside castling and sometimes Bg4 is played soon, trying to trade off this inactive piece. 13...a5 14.0-0 Bg5 This move has multiple ideas: we preserve the bishop pair, control c1, allow a capture of a knight on e3, prepare ...f5, allow the queen to move without a worry about a capture on f6. Currently the queen has no good square, but after moves like ...Be6 and ... Rb8 you can think of ...Qd7 and later even ...Bd8-b6. After 14... Bg5 White has tried mostly two ideas: to play Bg4 or to build up on the d-file with Qd3 and a rook to d1. 15.Qd3 White prepares to play a rook to d1 and then decide what to do next. The decision between the a1- and f1-rook will be quite important, of course. 15...Be6 16.Rfd1 White signals his intentions to mostly play in the centre and the queenside. Keeping the rook on a1 probably means that a playing a3 is on the agenda. 16...Rb8 This is useful, anticipating the opening of the b-file after a later ...bxa3. 17.b3 g6 A good move , just as 17...Rb7 , which prepares ... Rd7 or Qb8. Note that instead 17...Qd7 ? is bad due to 18.c5 ! dxc5 19.Qg3 ! This is

a tactical point of the Qd3/Rd1 setup. 18.a3 This is consistent with White's play, but as mentioned in similar situations I think that Black has nothing to worry about here at all. 18...bxa3 19.Rxa3 Rb7 The start of a remarkable plan. Black intends to play ... Qb8 next. This puts some pressure on b3 and prepares . .. Bd8-b6 again. Also note that c5 might be a good square for the queen, which is also in sight after ...Qb8. Black's ideas are more obvious to me than White's, therefore I'd rather play Black here. It's also useful to check the move 19...Qd7 in comparison. This also prepares ... Bd8, but it has a drawback in 20.Qg3 , after which 20...Bd8 21.c5 is throwing a spanner in the works. The idea Qg3 always should be checked when it comes with a tempo.

In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and

knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Be2 This modest move is one of the popular choices for White. He prepares kingside castling and sometimes Bg4 is played soon, trying to trade off this inactive piece. 13...a5 14.0-0 Bg5 This move has multiple ideas: we preserve the bishop pair, control c1, allow a capture of a knight on e3, prepare ...f5, allow the queen to move without a worry about a capture on f6. Currently the queen has no good square, but after moves like ...Be6 and ... Rb8 you can think of ...Qd7 and later even ...Bd8-b6. After 14... Bg5 White has tried mostly two ideas: to play Bg4 or to build up on the d-file with Qd3 and a rook to d1. 15.Qd3 White prepares to play a rook to d1 and then decide what to do next. The decision between the a1- and f1-rook will be quite important, of course. 15...Be6 16.Rad1 Using this rook probably means that White rather wants to play on the kingside, maybe making use of the f1-rook with g3 and f4. 16...g6 Against the queenside oriented plans with a3 the move ...Rb8 proved to be fine. You could also play it here, but it seems less pointed. We suspect that White is going to play on the other side of the board, so we have more urgent things to do. Playing ... g6 is a useful move anyway. It prepares ...f5 and in some cases frees up g7 for a piece. 17.g3 Bh6 A good prophylactic move. It also prepares ...Bg7 and a later ...Nd4. I also checked 17...f5 instead , which is very sharp and tough to evaluate. I concluded that the simpler 17... Bh6 is perfectly fine and I didn't want to start an analysis up to move 25. Feel free to explore yourself, it's a lot of fun. 18.f4 A premature pawn push that mostly weakens White's position. 18...exf4 19.gxf4 Bg7 20.b3 a4 Here we see an example why ...Rb8 was not as precise after Rad1 was played. The rook is perfectly placed to start play on the a-file, with a possible invasion

on a2. White can't contest this file, as the g7-bishop is covering a1. Note that White can't take the b-pawn due to ...Qb6+.

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.c4 This is the traditional main line for White, but Black does not experience any particular problems against it. This is the reason why the whole 7. Nd5 line has been a sideline for many years, only recently the new idea of playing 9. a4 has posed new problems for Black.That being said, the move 9. c4 makes a lot of sense. It gives the knight a natural square on c3 to return to and prepares the advance of the queenside majority. Black will set his kingside majority in motion as well, playing...f5 is on the agenda soon. 9...Be7 Black will play the moves ...Be7,...O-O and ...f5, but ... Nd7 and ...a6 are part of the setup as well. Black may start his play with either ...Be7, ...a6 or ...Nd7, and it will usually lead to the same thing, as

ultimately all moves mentioned above will be on board.In the 9. a4 line the move order is important, as you need to be precise with the timing of the move ...a6, here it does not matter all that much. I suggest to start with 9... Be7 and castle next, doing it in the same way as after 9. a4. After 9... Be7 White usually chooses between developing the bishop to e2 or d3, but there is the independent possibility 10. c5. 10.Be2 White develops the bishop and prepares castling. His usual plan is to answer our ...f5 push with f4, as we will see. 10...0-0 11.0-0 a6 Similarly to the comparable position with the bishop on d3 instead of e2 the move 11...f5 is less precise due to 12.c5. It's best to first send the knight back and then proceed with the standard setup. 12.Nc3 f5 White's main plan is to play f4 in such a position, fighting Black's pawn advance. Usually it is played right away, but White has also played 13.Kh1 first and continued with f4 on the next move. 13.f4 Bf6 13...Nd7 is also fine and will lead to the same position. Please note that 13. ..exf4 14.Bxf4 Qb6+ 15.Kh1 Qxb2 is a huge blunder due to 16.Na4. 14.Kh1 White can hardly do without this move. Quite often White actually starts with 13. Kh1, when 13... Bf6 14. f4 transposes. 14...Nd7 15.Qc2 g6 Black should wait until White moves the c1-bishop before he captures on f4. The move ...g6 is useful anyway and can be played first. 16.Be3 exf4 17.Bxf4 Be5 This is an important point to know. Black usually should not place the knight on e5, blocking the bishop. It is better to play the bishop to e5 and use the knight differently. It may still go to e5 AFTER the trade of bishops or find a good spot on c5. In general Black has scored well in these structures. White is still not making any substantial progress on the queenside while Black enjoys an excellent piece on e5 and good prospects on the dark squares in general.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight

away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be3 This is rare, but not bad at all. The bishop puts some pressure on the queenside, but note that White is not yet threatening to take the pawn on a7, as we can take the piece on a7 with the rook and have ...Qa5+ available next. 10...Nd7 It is important to start with this move , as after 10...O-O ? White plays 11.a5 and you are in trouble ! 11.Qd2 After the queen move we need to react to the threat of taking on a7, as ...Qa5+ is prevented. 11...a6 12.Na3 f5 The most active approach, immediately threatening ... f4 to trap the bishop. 13.f3 0-0 14.a5 This is strategically desirable for White, but falls short. 14...Bh4+ Always examine the checks ! This is very strong and gives Black a sizeable advantage. 15.g3 f4 16.Bf2 Bg5 Black has a great attack, because White's position is not at all coordinated. Here's a sample line. 17.g4 e4 18.fxe4 Nc5 And White will not survive much longer.

**B33**

Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. Besides 10. Be2. 10...0-0 11.0-0 Nd7
As mentioned several times in the lines after 9. a4: don't play .. .a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to

vary your play. 12.Bd2 The World Championship Match between defending Champion Magnus Carlsen and Fabiano Caruana started with three Rossolimo Sicilians when Caruana had White. He got absolutely nowhere, and in the 8th game he finally went for the open Sicilian. This line with 12. Bd2 was the preparation of team Caruana. White intends to play a5 next, allowing the knight tour Nb5-a3-c4. 12...a6 As mentioned before: in the 9. a4 line only play this if White has already spend a move on Bd2. Magnus actually played 12...f5 here - see model game #2 - but I'd like to suggest a different approach that was introduced later. It is quite clear that after the match the whole line was examined in detail and responses are more refined than what Carlsen was playing over the board. Of course 12... f5 is not a terrible move, but I feel my suggestion fits better with the other lines in the 9. a4 complex that I selected for the repertoire. 13.Na3 a5 We are stopping the advance a5, just like we do in other similar cases. It should be noted that 13...b6 instead is bad due to 14.a5 b5 15.c4 , and the queenside is falling apart. 14.f4 exf4
I am sticking with a familiar plan , but here the non-standard computer suggestion 14...Nb6 also deserves consideration. 15.Bxf4 Nc5 We have seen this type of position more than once in this repertoire. Here White is not yet committed to c4 with the knight, which makes a difference to the line 12. Kh1 a6 13. Na3 Nc5 14. Nc4 a5 15. f4 exf4 16. Bxf4 - line #18. 16.Nb5 From here the knight might use the d4-square, but we will see it is not such a big deal. 16...f5 Boris Gelfand played 16...Ne4 instead in a recent game (March 2019) against Gregori Oparin, but going ...f5 is more in line with other setups that we play. 17.Kh1 b6 18.Nd4 Bf6 We have seen this setup before. It turns out that Nc6 does not bother us at all. 19.Nc6 Qc7 20.c3 Bd7
Black has equal chances in a complicated position.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the

opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. Besides 10. Be2. 10...0-0 11.0-0 Nd7
As mentioned several times in the lines after 9. a4: don't play .. .a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to vary your play. 12.Bd2 The World Championship Match between defending Champion Magnus Carlsen and Fabiano Caruana started with three Rossolimo Sicilians when Caruana had White. He got absolutely nowhere, and in the 8th game he finally went for the open Sicilian. This line with 12. Bd2 was the preparation of team Caruana. White intends to play a5 next, allowing the knight tour Nb5-a3-c4. 12...a6 As mentioned before: in the 9. a4 line only play this if White has already spend a move on Bd2. Magnus actually played 12...f5 here - see model game #2 - but I'd like to suggest a different approach that was introduced later. It is quite clear that after the match the whole line was examined in detail and responses are more refined than what Carlsen was playing over the board. Of course 12... f5 is not a

terrible move, but I feel my suggestion fits better with the other lines in the 9. a4 complex that I selected for the repertoire. 13.Na3 a5 We are stopping the advance a5, just like we do in other similar cases. It should be noted that 13...b6 instead is bad due to 14.a5 b5 15.c4 , and the queenside is falling apart. 14.c3 f5 15.b4 f4 This was played in the rapid game P.Svidler-A.Grischuk, Amsterdam 2019. I think this is a very instructive moment. Black stops f4 by White and gains more space on the kingside, having an attack on White's king in mind. Svidler showed a later part of this game on video, and only mentioned that he made some mistakes in the opening. I wonder if he is already referring to this position or a later stage. I already like Black here, if only for practical reasons: it's more fun to attack the king ! 16.f3 Bh4 This is an idea worth keeping in mind. The bishop is often able to sacrifice itself with ...Bg3 and ...Qh4 next. 17.Nc4 Rf6 Instead 17...Bg3 18.hxg3 fxg3 19.Be1 just about holds for White. After the rook move we get a strong attack. I'll just show why a5 can't be taken now. 18.Nxa5 Qb6+ 19.Kh1 Rh6 This attack is already winning for Black. 20.Be1 Qd8 21.h3 Nf8 A great move ! Black might win with others as well, but this is brutal. We will play ...Bg3 next and ...Ng6-h4 and ...Qg5 will be devastating.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or

White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.c4 This is the traditional main line for White, but Black does not experience any particular problems against it. This is the reason why the whole 7. Nd5 line has been a sideline for many years, only recently the new idea of playing 9. a4 has posed new problems for Black.That being said, the move 9. c4 makes a lot of sense. It gives the knight a natural square on c3 to return to and prepares the advance of the queenside majority. Black will set his kingside majority in motion as well, playing...f5 is on the agenda soon. 9...Be7 Black will play the moves ...Be7,...O-O and ...f5, but ... Nd7 and ...a6 are part of the setup as well. Black may start his play with either ...Be7, ...a6 or ...Nd7, and it will usually lead to the same thing, as ultimately all moves mentioned above will be on board.In the 9. a4 line the move order is important, as you need to be precise with the timing of the move ...a6, here it does not matter all that much. I suggest to start with 9... Be7 and castle next, doing it in the same way as after 9. a4. After 9... Be7 White usually chooses between developing the bishop to e2 or d3, but there is the independent possibility 10. c5. 10.Bd3 Here 10.Be2 and 10.Bd3 are about equally popular. With 10. Bd3 White usually has a setup with f3 in mind, stopping Black's coming pawn duo on e5 and f5. White might also play with f4, but this plan works better with the bishop on e2 instead of d3. 10...0-0 11.0-0 a6 This is the right timing for this move. After 11...f5 White would have the irritating move 12.c5. We have seen this idea before, but here it is a bit stronger than in the earlier case, because ...f5 makes little sense in the structure after 12.c5 a6 13.Nxd6 Bxd6 14.cxd6 Qxd6. 12.Nc3 f5 13.f3 White stops the advance ...e4. White almost always plays the f-pawn here, but he has also tried slow moves like Kh1 at this point. Against this or other slowish moves we should continue with useful moves like ...Nd7, ...g6 and ... Bf6. This prepares ...e4 in the optimal way. 13...Nd7 It makes a lot of sense to play ...Bg5 against White's Bd3/f3 setup. White has excellent control over e4, so it is unlikely that Black will play ...e4 anytime soon to use the bishop on f6. Therefore trading this piece or at least activating it on g5 is useful. Now White needs to decide how to deal with Black's idea to play ...Bg5. He may play Be3, preserving the bishop on the f2-square. The alternative is to play a universally useful move like Kh1 and after ...Bg5 just accept the trade. 14.Kh1 Bg5 15.b4 This leads to a forced line that gives us good play. 15...a5 16.a3 axb4 17.Bxg5 Qxg5 18.axb4 Rxa1 19.Qxa1 Qe3 We see one key benefit of the bishop trade: the dark squares in White's camp are seriously weakened. 20.Be2 Nb8 This is very useful to remember. The knight is best on a6, trying to provoke the b-pawn to move forward. Black also has ...Qb6 to support this idea, with ...Bd7 next. Of course Black always has ...e4 on the agenda as well, largely depending on the concrete tactical implications.

**B33**

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.c4 This is the traditional main line for White, but Black does not experience any particular problems against it. This is the reason why the whole 7. Nd5 line has been a sideline for many years, only recently the new idea of playing 9. a4 has posed new problems for Black.That being said, the move 9. c4 makes a lot of sense. It gives the knight a natural square on c3 to return to and prepares the advance of the queenside majority. Black will set his kingside majority in motion as well, playing...f5 is on the agenda soon. 9...Be7 Black will play the moves ...Be7,...O-O and ...f5, but ... Nd7 and ...a6 are part of the setup as well. Black may start his play with either ...Be7, ...a6 or ...Nd7, and it will usually lead to the same thing, as ultimately all moves mentioned above will be on board.In the 9. a4 line the move order is important, as you need to be precise with the timing of the move ...a6, here it does not matter all that much. I suggest to start with 9... Be7 and castle next, doing it in the same way as after 9. a4. After 9... Be7 White usually chooses between

developing the bishop to e2 or d3, but there is the independent possibility 10. c5. 10.Bd3 Here 10.Be2 and 10.Bd3 are about equally popular. With 10. Bd3 White usually has a setup with f3 in mind, stopping Black's coming pawn duo on e5 and f5. White might also play with f4, but this plan works better with the bishop on e2 instead of d3. 10...0-0 11.0-0 a6 This is the right timing for this move. After 11...f5 White would have the irritating move 12.c5. We have seen this idea before, but here it is a bit stronger than in the earlier case, because ...f5 makes little sense in the structure after 12.c5 a6 13.Nxd6 Bxd6 14.cxd6 Qxd6. 12.Nc3 f5 13.f3 White stops the advance ...e4. White almost always plays the f-pawn here, but he has also tried slow moves like Kh1 at this point. Against this or other slowish moves we should continue with useful moves like ...Nd7, ...g6 and ... Bf6. This prepares ...e4 in the optimal way. 13...Nd7 It makes a lot of sense to play ...Bg5 against White's Bd3/f3 setup. White has excellent control over e4, so it is unlikely that Black will play ...e4 anytime soon to use the bishop on f6. Therefore trading this piece or at least activating it on g5 is useful. Now White needs to decide how to deal with Black's idea to play ...Bg5. He may play Be3, preserving the bishop on the f2-square. The alternative is to play a universally useful move like Kh1 and after ...Bg5 just accept the trade. 14.Be3 Bg5 15.Bf2 White may also play a move like 15. Qd2, but this is just a slightly worse version of the bishop trade line starting with 14. Kh1. 15...Qf6 This is the most popular move for Black. It didn't struck me as particularly logical or obvious, until I realized that it actually stops b4 for the moment. 16.Qc2 This move protects the knight on c3 and thus prepares b4. 16...Nc5 17.Be2 a5 We need to stop b4 after we decided to place the knight on c5. 18.Na4 This looks best for White. Against something slow we have useful moves like ... Bd7, ...Rae8 and ...Qh6, ultimately aiming to push ...e4 and/or attack on the kingside. 18...Nxa4 19.Qxa4 e4 Black is fine here. The position opens up and gets tactical now, so you could continue to analyse, but I decided to stop here, as it is already rather a deep line.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov: 10...Nd7 #4 (16.Q**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn’t seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek

some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2 The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...Nd7 A correspondence move but one of the most interesting orders and maybe objectively the best one. Black wants to transpose by meeting 11. Be2 with 11...Nf6! 11.a5 a6 A very concrete attempt against White's move order. It is quite unnatural, so very unlikely to face on the board unless Black has prepared it in advance. 12.Nc3!? With the idea of playing Na4+c4 next. 11...Nf6 12.Be3+- The key difference in this move order. a7 falls. 12.Na3 Nf6 The point. Black is hitting the d5-pawn, as well as threatening a potential Ne4 or Bg4. 13.Bb4 Bg4 Very concrete play again, trying to provoke new weaknesses 14.f3 Bf5 15.Nc4 Rc8 This move, putting indirect pressure on c2, is important to delay Nb6. This is one of the few occasions where I'll be offering two different lines, as I think this is one of Black's best replies and it will probably become trendy. 15...O-O 16.Nb6 Rb8 17.Bd3± Finishing development and aiming at castling. In these positions without f5, White is comfortably preparing their plan without much counterplay on Black's part. 16.Qd2 0-0 17.0-0-0 This is a good alternative for those of you who prefer to play positions more complicated than the endgame resulting from the mainline. Objectively Black is fine. However, still some moves have to be found. 17...Re8 17...Nd7 18.Qf2 Controlling the advance of the b-pawn and preparing to push our kingside. 18.Kb1 Bg6 19.Be2 An opposide-side castling position with all the pieces on the board. This position is more comfortable for White, as Black's queenside counterplay is blocked and we have more space.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov,Mainline With F4**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become

really popular. The 7.Bg5 lines are too studied and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2 The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 e4 15.Nc4 Ne5 16.Nb6 Not bringing their pawns to the center. 16...Rb8 One of the most important lines in this variation, so I'll offer two options. 17.f4 exf3 18.Bxf3 Bf6 19.c3 Blocking the diagonal for the black bishop and freeing the c2-square for our queen. 19...g5 20.g3 An important move to stop Black's kingside push. 20...Qc7 20...f4? 21.Nxc8! Qxc8 22.gxf4± with material advantage. 20...Qe8 21.Kh1 prophylaxis. 20...Nxf3 21.Qxf3 Black has too many weaknesses and very passive pieces. 21.Be2 An unnatural move. The point is to control c4 to prevent knight jumps once we trade off Black's light-squared bishop. 21. Bg2 Bd7 22.Nxd7 Qxd7 23.b3± With full control of the queenside. 21...f4 21...Bd7 22. Nxd7 Qxd7 23.Qc2± 22.gxf4 gxf4 23.Nxc8 Qc5+ 24.Kg2 Qxd5+ 25.Bf3 Nxf3 26.Rxf3 Rbxc8 27.Bxf4 With a very comfortable endgame thanks to our better structure.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov: 12...f5 13.O-O a6**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If

Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2
The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 f4 As played in correspondence chess. One of the most natural lines: Black tries to block the kingside, King's Indian style, to develop some attack by mens of a quick rook lift and a potential pawn storm. 15.Nc4 The knight is especially annoying here: if Black's d7-knight were to move, ours can jump to b6 and remove Black's c8-bishop. 15...Rf6 15...Rb8 16.Bb4 Rf6 is the same. 16.Bb4 Rh6 16...Rg6 it's not the square for the Rook. 17.Bd3± 16...Rb8 17. Re1! also transposes to the next move. 17.Re1 Another typical move in these positions. We activate another piece and allow our bishop to take part in the defense from f1. 17...Rb8 Do that Nb6 doesn't come with tempo. 18.Bd3 The point of this move is to keep an eye on the f5-square to allow our knight to jump to b6 without the black bishop reaching f5. 18...Nf6 19.Nb6 Bg4 20.f3 Bh5 21.Bf5 Black's attack has been fended off and now it's our turn with c4.

□ **Sveshnikov Nb8**
■ **Sveshnikov: 12...a6 13.O-O f4**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the

soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2
The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...f4 This doesn't make a lot of sense before a6, as now our knight can retreat to c3 and enjoy the weakening of e4. 13...Nf6?! This knight belongs to e5 once f5 has been played. 14.c4 14.Re1 a6 14...Nf6 15.Bd3! a6 15... Nxd5 16.Bc4 Be6 17.Qf3+- winning material. 16.Nc3 transposes to the mainline. 15.Nc3 Nf6 16.Bd3 Taking the key f5-square away from the black bishop 16...Qc7 17.Na4 We sacrifice the pawn to get a lot of activity 17...Nxd5 18.c4 Nf6 19.Nb6 Rb8 20.h3 THe c8-bishop is left without a good square 20...Be6 20...Kh8 21.Rc1 followed by the queenside advance. 21.Bxf4 Bxh3 22.gxh3 exf4 23.Qf3
We have total domination of this position thanks to our dynamism.

In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2
The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2
11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 f4 As played in correspondence chess. One of the most natural lines: Black tries to block the kingside, King's Indian style, to develop some attack by mens of a quick rook lift and a potential pawn storm. 15.Nc4 The knight is especially annoying here: if Black's d7-knight were to move, ours can jump to b6 and remove Black's c8-bishop. 15...Rf6 15...Rb8 16.Bb4 Rf6 is the same. 16.Bb4 Rh6 16...Rg6 it's not the square for the Rook. 17.Bd3± 16...Rb8 17. Re1! also transposes to the next move. 17.Re1 Another typical move in these positions. We activate another piece and allow our bishop to take part in the defense from f1. 17...Bf8 18.Ra3 18...Qh4? 19.Rh3 Qg5 20.Rxh6 Qxh6 21.Qd3+- Black's queenside

is frozen and their firepower in the kingside is gone. 18...Qg5 The most critical line. 19.Bf1 Adding extra protection for our king and activating our e1-rook 19.g3 Nf6 20. Bxd6 Ne4 21.Bxf8 Nxf2!! is their dream scenario. 19...Rb8 20.Rb3 b5 20...Nf6 21. Bxd6+- 21.axb6 Nxb6 22.Nd2 Rerouting the knight towards Black's new weaknesses.

□ **Sveshnikov Nd5**
■ **Sveshnikov Nd5**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5
The 7. Nd5 variation has never been considered particularly threatening for Black, but recently there have been new developments putting this line back into the limelight. Fabiano Caruana played it four times against Magnus Carlsen in the World Championship Match, showing some new ideas for White. Carlsen ultimately scored well, but he still experienced problems in these games. Black's reply is completely forced, so let's discuss the concepts of this line after the forced moves. 7...Nxd5 8.exd5 Nb8 Here Black obviously has 8... Ne7 and 8... Nb8 to choose from. Magnus has played both moves, so it is tough to make a choice here. I ultimately went for 8... Nb8, because I felt this is somewhat easier to handle, but it is largely a matter of taste. The critical line after 8...Ne7 is 9.c4 Ng6 10.Qa4 Bd7 11.Qb4 , after which Magnus has played 11...Qb8 and 11...Bf5 , which allows White to repeat with 12. Qa4 Bd7 , if he is happy with a draw. The knight on g6 often gives White the opportunity to play a quick h4, intending to push the pawn to h5 and kick the knight away. This type of game is more concrete and requires more memorization than 8... Nb8, which was a point in favour of the retreat to b8. I need to mention that this is not a passive retreat, but rather the attempt to send the knight later to the flexible d7-square. From d7 you may transfer it to the centre or kingside. Black basically all the time will play ...Be7, ...O-O and . ..f5 to expand on this side of the board, while White tries to exploit his space advantage on the queenside. The knight may transfer to f6 or even e5 later, which often happens after Black has played his e-pawn to e4 or White played f4 to trade his f-pawn for e5, freeing up this square for a black minor piece. After 8...Nb8 White's traditional main line is 9.c4 , but Caruana's choice 9.a4 has gained some momentum and needs to be checked carefully. Other moves don't pose too many problems objectively , but the moves 9.Qf3 and 9. Qd3 , both intending Qc3 and Qa3 ideas, have trick potential and the best reply should be studied. 9.a4 This is the current fashion, started by games in the Carlsen-Caruana match. White's idea is to react to a later ...a6 with Na3 and ideally get the moves a5 and Nc4 in, establishing a strong position on the queenside. This ambitious approach will often lead to sharp games, because it takes time that Black can use to bring pieces to the kingside and play for checkmate ! This type of play is often easier for Black to conduct, as your play smashing through is the end of the game. If White

wins on the queenside, it might be troublesome, but it is not a knockout and you might be able to strike back on the kingside. 9...Be7 It is important to get the move order right against 9. a4. It is especially important to not play ...a6 early on, as White is happy to play Na3, intending to play Nc4 and a5 next. This type of queenside bind is strategically very desirable for White and should be avoided. 10.Be2 This was Caruana's choice in the World Championship Match against Magnus Carlsen in two games. It always has been the most popular move at this point, but Caruana has shown some new ideas for White. Besides 10. Be2. 10...0-0 11.0-0 Nd7
As mentioned several times in the lines after 9. a4: don't play .. .a6 too early, but rather wait until White lost time to prepare the move a5, usually by playing Bd2. After 11...Nd7 the immediate 12.a5 makes little sense , as after 12...a6 the knight needs to retreat to c3, which does not fit all that well with the 9. a4 idea. I'd like to mention that instead of 11... Nd7 Black also has tried 11...f5 , and in fact this was played once by the World Champion as well. This looks like a good alternative if you want to vary your play. 12.Bd2 The World Championship Match between defending Champion Magnus Carlsen and Fabiano Caruana started with three Rossolimo Sicilians when Caruana had White. He got absolutely nowhere, and in the 8th game he finally went for the open Sicilian. This line with 12. Bd2 was the preparation of team Caruana. White intends to play a5 next, allowing the knight tour Nb5-a3-c4. 12...a6 As mentioned before: in the 9. a4 line only play this if White has already spend a move on Bd2. Magnus actually played 12...f5 here - see model game #2 - but I'd like to suggest a different approach that was introduced later. It is quite clear that after the match the whole line was examined in detail and responses are more refined than what Carlsen was playing over the board. Of course 12... f5 is not a terrible move, but I feel my suggestion fits better with the other lines in the 9. a4 complex that I selected for the repertoire. 13.Na3 a5 We are stopping the advance a5, just like we do in other similar cases. It should be noted that 13...b6 instead is bad due to 14.a5 b5 15.c4 , and the queenside is falling apart. 14.c3 f5 15.f4 exf4 16.Bxf4 Bf6 Unfortunately the setup with ...Nc5 and ...b6 does not work all that well here , because 16...Nc5 17.Be3 b6 18.Bb5 ! is annoying. After the better 16... Bf6 White has a range of moves for sure. 17.Nb5 Be5 18.Qd2 Bxf4 19.Qxf4 Ne5 With the bishops traded the knight on e5 becomes stable as a rock. Black is fine here, of course.

Of course 12... f5 is not a terrible move, but I feel my suggestion fits better with the other lines in the 9. a4 complex that I selected for the repertoire. 13.Na3 a5 We are stopping the advance a5, just like we do in other similar cases. It should be noted that 13...b6 instead is bad due to 14.a5 b5 15.c4 , and the queenside is falling apart. 14.c3 f5 15.b4 f4 This was played in the rapid game P.Svidler-A.Grischuk, Amsterdam 2019. I think this is a very instructive moment. Black stops f4 by White and gains more space on the kingside, having an attack on White's king in mind. Svidler showed a later part of this game on video, and only mentioned that he made some mistakes in the opening. I wonder if he is already referring to this position or a later stage. I already like Black here, if only for practical reasons: it's more fun to attack the king ! 16.Qc2 Nb6 An unusual square for the knight, but preparing ...Bf5 makes a lot of sense. Black has other ideas, of course. You may also play in more of a caveman style with 16... Rf6 , for example. 17.bxa5 Bf5 18.Qd1 Rxa5 Black is in good shape here. White's chances on the queenside don't look very threatening, while we have ...Rf6-g6 coming, amongst other ideas.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov: 12...f5 13.O-O a6**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn’t seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of

a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2 The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 f4 As played in correspondence chess. One of the most natural lines: Black tries to block the kingside, King's Indian style, to develop some attack by mens of a quick rook lift and a potential pawn storm. 15.Nc4 The knight is especially annoying here: if Black's d7-knight were to move, ours can jump to b6 and remove Black's c8-bishop. 15...Rf6 15...Rb8 16.Bb4 Rf6 is the same. 16.Bb4 Rh6 16...Rg6 it's not the square for the Rook. 17.Bd3± 16...Rb8 17. Re1! also transposes to the next move. 17.Re1 Another typical move in these positions. We activate another piece and allow our bishop to take part in the defense from f1. 17...Rb8 So that Nb6 doesn't come with tempo. 18.Bd3 The point of this move is to keep an eye on the f5-square to allow our knight to jump to b6 without the black bishop reaching f5. 18...Bf8 19.Bf5 19...Qc7 With the rook on h6, sending the queen away from the kingside doesn't make much sense. 20.Be6+ Kh8 21.b3± 19...Nb6 20. Bxc8 Nxc8 21.Qd3± Without the light-squared bishop, once f4 has been played Black's position is left with zero counterplay. Next we play Nd2 and c4. 19...Nf6 20.Be6+ Bxe6 20...Kh8 21. Ra3± 21.dxe6 d6 is too weak and hence, e5 too.

We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2
The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 f4 As played in correspondence chess. One of the most natural lines: Black tries to block the kingside, King's Indian style, to develop some attack by mens of a quick rook lift and a potential pawn storm. 15.Nc4 The knight is especially annoying here: if Black's d7-knight were to move, ours can jump to b6 and remove Black's c8-bishop. 15...Rf6 15...Rb8 16.Bb4 Rf6 is the same. 16.Bb4 Rh6 16...Rg6 it's not the square for the Rook. 17.Bd3± 16...Rb8 17. Re1! also transposes to the next move. 17.Re1 Another typical move in these positions. We activate another piece and allow our bishop to take part in the defense from f1. 17...Bf8 18.Ra3 18...Qh4? 19.Rh3 Qg5 20.Rxh6 Qxh6 21.Qd3+- Black's queenside is frozen and their firepower in the kingside is gone. 18...Qg5 The most critical line. 19.Bf1 Adding extra protection for our king and activating our e1-rook 19.g3 Nf6 20. Bxd6 Ne4 21.Bxf8 Nxf2!! is their dream scenario. 19...Nf6 Again, a very nice move, sacrificing the d6-pawn to get some activity. 20.Bxd6 e4 21.Bxf8 Bg4 21...Kxf8? 22.

Qd2± con idea de g3. 22.Qd4 22.Bxg7!? Bxd1 22.Bxh6 Qxh6 23.Rxd1 Kh8!= 22...Rxf8 23.Rxe4 We are sacrificing the exchange to kill Black's counterplay and pick up a second pawn. 23...Nxe4 24.Qxe4 Bf5 Objectively this position is very close to equality once our opponent has found all these moves. However, we still have lots of annoying lines. Obviously, you don't need to remember all this, as your subsequent play is quite intuitive 25.Qd4!? also gets excellent compensation. 25.Qe2 Protecting the pawn and keeping our queen close to our king. 25. Qe5!? Qh5 26.h3 Bxc2 27.Qd4 Qd1 28.Nd2∞ With an extremely complex position. As strange as it sounds, the queen on d1 is barely relevant and we are going to cause trouble with our passer and rest of the pieces. 25...Bg4 26.Qe5+- 25...Qh5 26.Qxh5 Rxh5 27.c3 Bg6 28.Nd2 White's pawn majority definitely outweighs the exchange.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov: 12...f5 13.O-O a6**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White's reply. 10.Bd2
The most accurate move order to reach the position we want. Also, it's not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition

to one of the main lines. 13...a6 14.Na3 f4 As played in correspondence chess. One of the most natural lines: Black tries to block the kingside, King's Indian style, to develop some attack by mens of a quick rook lift and a potential pawn storm. 15.Nc4 The knight is especially annoying here: if Black's d7-knight were to move, ours can jump to b6 and remove Black's c8-bishop. 15...Rf6 15...Rb8 16.Bb4 Rf6 is the same. 16.Bb4 Rh6 16...Rg6 it's not the square for the Rook. 17.Bd3± 16...Rb8 17. If 11... Bxb5 12.Qxb5+ Qd7 13.a4 Bishop pair for free and zero counterplay for our opponent. Now the knight is pointless on g6. 12.h4 Again intending to bug the knight or provoke some weakening with h5. 12...h5 13.Be3 Threatening c5 and trying to provoke a6 to exploit the weakness on b6 later on. 13.Be2 a6 14.Nc3 Be7 15.g3 b5!!= 13...a6 13...Be7 14.c5 13...b6 14.O-O-O Be7 15.Kb1 We reach a position with opposide-side castling where the black pieces struggle to come near our king and we can slowly make some progress. 14.Nc3 Be7 15.Na4 Qc7 15...Nxh4 16.Nb6 Nf5 17.Bd2 The knight on b6 is very well placed and the missing pawn is not really felt. 16.g3 0-0 Here I'll offer two options. I think this is one of Black's best variations and close to equalizing, but again these positions are more comfortable for White thanks to the pawn structure and our grip on the position. 17.Be2 The most straightforward. Black has to be really precise not to stand worse. 17...e4 A really necessary sacrifice to get some counterplay. 18.Nb6 We really should get rid of this bishop before it becomes too powerful. 18...Rae8 19.Nxd7 Qxd7 20.Bxh5 Ne5 21.Be2 Black has some compensation, but their position is harder to play.

**B33**

☐ **Sveshnikov 9. Bxf6,11. c3 and others**
■ **Sveshnikov 9. Bxf6,11. c3/others #27**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and most tactical line of the three. This in particular applies to the line 9.Bxf6 gxf6 10. Nd5 Bg7 11.Bd3 , which is the subject of the subsequent chapter. In this chapter we will examine other lines after 9.Bxf6 , most importantly 9...gxf6 10.Nd5 Bg7 11.c3 , which is the second main sub-branch of the 9. Bxf6 line, besides the 11. Bd3 line. 9...gxf6 This is forced. Black can't capture with the queen , because after 9...Qxf6 ? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 and 11.c4 are terrible for Black. A good comparison to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of this course) , in which Black has the bishop on f6, while after 9... Qxf6 ? 10. Nd5 Qd8 it is on f8 !So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. 10.Nd5 Bg7 Black has two good moves in this position, the more traditional 10... f5 and the newer move 10... Bg7, the so-called Novosibirsk variation. Both lines have some overlap, because 10. ..Bg7 does only delay ...f5 for the moment. The main difference between the two lines is how the reply 11.Bd3 is handled. In the Novosibirsk you play 11... Ne7 to get rid of the Knight immediately , an approach that is clearly not possible after 10...f5 11.Bd3 , when 11...Ne7 12.Nf6# is a bit of a problem. Instead after 10...f5 11.Bd3 , 11...Be6 is the move , which leads to completely different positions compared to the Novosibirsk. Our repertoire choice is quite easy , as the World Champion has always played 10...Bg7 , as far as I can

see. After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 11. Bd3 which we examine in the subsequent chapter. The second approach is to simply play 11.c3 , after which 11...f5 12.exf5 Bxf5 leads to a position that is often reached via 10... f5 11. c3 Bg7 12. exf5 Bxf5. This line leads to interesting play and is considered to be leading to equal chances. It is obviously a critical line for the Sveshnikov, as White can basically force you to enter it. Even going 10... Bg7 or 10... f5 is not relevant, as you have no way to avoid it in both cases. So 11. c3 f5 is clearly the main chunk of this chapter, but we will also look a rare alternatives on move 11. 11.c3 This is White's more strategic choice at this point , compared to 11.Bd3. White intends to improve the Knight as quickly as possible. 11...f5 This is a lot better than 11... Ne7. Playing ...Ne7 is much more pointed after 11. Bd3, because Black in this case immediately threatens to take on d5, forcing the pawn recapture. Therefore after 11. Bd3 Ne7 White has to take on e7, which is not the case here as the Queen is still able to take on d5. An example line would be 11...Ne7 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Ne3 , when Black is more or less busted - you can't even get in ...f5 in the first place. 12.exf5 The simplest and most popular choice for White. 12...Bxf5 13.Nc2 0-0 14.Nce3 Be6 A very natural sequence so far. White has gotten his problem piece back in the centre and now needs to make a decision how to proceed. By far White's most popular move is 15. Bd3 , but there are some offbeat tries worth checking. 15.a4 A commonly seen idea against the Sveshnikov, but it has a flaw in this position. 15...b4 Against a4 in the Sveshnikov you rarely want to allow White to capture on b5, but rather take on a4 or play ...b4. Here the latter is strong. 16.cxb4 A risky, but not clearly bad move. Black now has a whole range of interesting lines, though. 16...f5 I am recommending the most aggressive line , but something slower like 16... Rb8 is also fine. 17.Rc1 Nd4 18.Nc7 Bf7 The engines suggest this amazing move , instead of the pedestrian 18... Bb3 , which is OK as well. 19.Nxa8 f4 This is the kind of position you want to get when you play this opening. Every piece is active and the White King is still stuck in the centre. We are a Rook down, but will get a piece back... fun stuff ! You won't be surprised to learn that the comp just gives its usual 0.00, but this is clearly not a human eval ! I am going to stop here, suggesting that you look a bit more on your own if you like - it's certainly more fun to check than an endgame in the Berlin :-

☐ **Sveshnikov 9. Bxf6,11. c3 and others**
■ **Sveshnikov 9. Bxf6,11. c3/others #22**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and most tactical line of the three. This in particular applies to the line 9.Bxf6 gxf6 10. Nd5 Bg7 11.Bd3 , which is the subject of the subsequent chapter. In this chapter we

will examine other lines after 9.Bxf6 , most importantly 9...gxf6 10.Nd5 Bg7 11.c3 , which is the second main sub-branch of the 9. Bxf6 line, besides the 11. Bd3 line. 9...gxf6 This is forced. Black can't capture with the queen , because after 9...Qxf6 ? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 and 11.c4 are terrible for Black. A good comparison to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of this course) , in which Black has the bishop on f6, while after 9... Qxf6 ? 10. Nd5 Qd8 it is on f8 !So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. 10.Nd5 Bg7 Black has two good moves in this position, the more traditional 10... f5 and the newer move 10... Bg7, the so-called Novosibirsk variation. Both lines have some overlap, because 10. ..Bg7 does only delay ...f5 for the moment. The main difference between the two lines is how the reply 11.Bd3 is handled. In the Novosibirsk you play 11... Ne7 to get rid of the Knight immediately , an approach that is clearly not possible after 10...f5 11.Bd3 , when 11...Ne7 12.Nf6# is a bit of a problem. Instead after 10...f5 11.Bd3 , 11...Be6 is the move , which leads to completely different positions compared to the Novosibirsk. Our repertoire choice is quite easy , as the World Champion has always played 10...Bg7 , as far as I can see. After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 11. Bd3 which we examine in the subsequent chapter. The second approach is to simply play 11.c3 , after which 11...f5 12.exf5 Bxf5 leads to a position that is often reached via 10... f5 11. c3 Bg7 12. exf5 Bxf5. This line leads to interesting play and is considered to be leading to equal chances. It is obviously a critical line for the Sveshnikov, as White can basically force you to enter it. Even going 10... Bg7 or 10... f5 is not relevant, as you have no way to avoid it in both cases. So 11. c3 f5 is clearly the main chunk of this chapter, but we will also look a rare alternatives on move 11. 11.c3 This is White's more strategic choice at this point , compared to 11.Bd3. White intends to improve the Knight as quickly as possible. 11...f5 This is a lot better than 11... Ne7. Playing ...Ne7 is much more pointed after 11. Bd3, because Black in this case immediately threatens to take on d5, forcing the pawn recapture. Therefore after 11. Bd3 Ne7 White has to take on e7, which is not the case here as the Queen is still able to take on d5. An example line would be 11...Ne7 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Ne3 , when Black is more or less busted - you can't even get in ...f5 in the first place. 12.exf5 The simplest and most popular choice for White. 12...Bxf5 13.Nc2 0-0 14.Nce3 Be6 A very natural sequence so far. White has gotten his problem piece back in the centre and now needs to make a decision how to proceed. By far White's most popular move is 15. Bd3 , but there are some offbeat tries worth checking. 15.g3 It makes sense to control d5 via g2, but this specific move order has a flaw for White. 15...f5 16.Bg2 This is usually played now and the logical follow-up , but not that great. In fact it is better for White to play 16.Bh3 and prevent ...f4, but this would only be a somewhat inferior version of the lines examined via 11. g3. We play ...a5, ... Rb8 and ...Qd7 and have no problems. The Bishop is misplaced on h3. 16...f4 This is the issue with White's move order. The Knight now has to retreat to a passive position. Surprisingly

the f-pawn push is not played that frequently, but it is strong. 17.Nc2 Bf5 The actual point of ...f4. Now Black is even threatening ...f3 !, so White can't play a slow move like 18.O-O. 18.gxf4 exf4 19.Nxf4 White needs to take this Pawn. We had ...f3 and ...Qe7+ as the most dangerous ideas. 19...Bxc2 20.Qxc2 Rxf4 21.Bxc6 Rc8 22.Bd5+ Kh8 We have a strong play on the dark squares, with ... b4 coming next. As it happens often, engines find some defence for White (eval is 0.00) , but of course Black has the much better practical chances.

☐ **Sveshnikov 9. Bxf6,11. c3 and others**
■ **Sveshnikov 9. Bxf6,11. c3/others #18**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and most tactical line of the three. This in particular applies to the line 9.Bxf6 gxf6 10. Nd5 Bg7 11.Bd3 , which is the subject of the subsequent chapter. In this chapter we will examine other lines after 9.Bxf6 , most importantly 9...gxf6 10.Nd5 Bg7 11.c3 , which is the second main sub-branch of the 9. Bxf6 line, besides the 11. Bd3 line. 9...gxf6 This is forced. Black can't capture with the queen , because after 9...Qxf6 ? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 and 11.c4 are terrible for Black. A good comparison to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of this course) , in which Black has the bishop on f6, while after 9... Qxf6 ? 10. Nd5 Qd8 it is on f8 !So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. 10.Nd5 Bg7 Black has two good moves in this position, the more traditional 10... f5 and the newer move 10... Bg7, the so-called Novosibirsk variation. Both lines have some overlap, because 10. ..Bg7 does only delay ...f5 for the moment. The main difference between the two lines is how the reply 11.Bd3 is handled. In the Novosibirsk you play 11... Ne7 to get rid of the Knight immediately , an approach that is clearly not possible after 10...f5 11.Bd3 , when 11...Ne7 12.Nf6# is a bit of a problem. Instead after 10...f5 11.Bd3 , 11...Be6 is the move , which leads to completely different positions compared to the Novosibirsk. Our repertoire choice is quite easy , as the World Champion has always played 10...Bg7 , as far as I can see. After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 11. Bd3 which we examine in the subsequent chapter. The second approach is to simply play 11.c3 , after which 11...f5 12.exf5 Bxf5 leads to a position that is often reached via 10... f5 11. c3 Bg7 12. exf5 Bxf5. This line leads to interesting play and is considered to be leading to equal chances. It is obviously a critical line for the Sveshnikov, as White can basically force you to enter it. Even going 10... Bg7 or 10... f5 is not relevant, as you have no way to avoid it in both cases. So 11. c3 f5 is clearly the main chunk of this chapter, but we will also look a

rare alternatives on move 11. 11.c3 This is White's more strategic choice at this point , compared to 11.Bd3. White intends to improve the Knight as quickly as possible. 11...f5 This is a lot better than 11... Ne7. Playing ...Ne7 is much more pointed after 11. Bd3, because Black in this case immediately threatens to take on d5, forcing the pawn recapture. Therefore after 11. Bd3 Ne7 White has to take on e7, which is not the case here as the Queen is still able to take on d5. An example line would be 11...Ne7 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Ne3 , when Black is more or less busted - you can't even get in ...f5 in the first place. 12.Nxb5 After 10... f5 - instead of our 10... Bg7 - White has tried sacrifices on b5, and these are rather complicated. Here the sacrifice is rather easy to deal with. The coming line is long, but quite forced and leads to a good position for Black. 12...axb5 13.Bxb5 Bb7 14.Nb4 White needs to play forced moves. If Black gets to castle we are just better, as White has insufficient compensation. 14...Rc8 15.Qa4 Qd7 Black is ready to castle now. 16.Nd5 0-0 This is best, just giving up the exchange. 17.Nb6 Qe7 18.Nxc8 Rxc8 Black is a excellent shape. There is no safe place for the White King and our minor pieces are going to be more effective than White's Rooks.

**B33**

☐ **Sveshnikov 9. Bxf6,11. Bd3**
■ **Sveshnikov 9. Bxf6,11. Bd3 #26**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.Bd3 In this chapter we will examine the lines starting with this move. All other variations after 9. Bxf6 are covered in the previous chapter. After 11. Bd3 the game will become very sharp and tactical and Black needs to sacrifice pawns on a regular basis. In the main line of the 11. Bd3 complex we are three pawns down, but have great compensation !Of all the chapters in the whole course this is by far the one that requires move-by-move knowledge and precise calculation over the board. There is very little strategic content or 'plans' to guide you, it's just two sides engaging in a fight with clubs - and you better make sure to bring a huge club, meaning excellent preparation. It is definitely possible to work out some of the complications over the board, but this will be much more likely to be successful if you once had known them. It sounds odd, but it is true: study time is never wasted, even if you feel you have forgotten everything.The way to do it is to not try to remember as hard as you can, but rather think on your own and hope that you subconsciously piece it together. This works much better than sitting there and wrecking your brain to recall concrete lines.One important point that also needs to be mentioned: Black is the side on the attack after 11. Bd3. If White only has vague knowledge about the complications he is very likely just getting killed quickly. If you screw something up, it might be bad in computer terms... but you still have chances, given the enormous activity that Black usually enjoys. 11...Ne7 The only good move after 11. Bd3. The bishop move prevents ...f5 and we need to get rid of the d5-knight

right away. 12.Nxe7 White's choice is limited, because with 11... Ne7 we had threatened to take on d5. As usual it's very desirable for Black to take on d5 when White needs to recapture with a pawn. 12...Qxe7 After 12. .. Qxe7 White has two basic options. He can play c4, attacking the b5-pawn, or play c3, preparing to get the offside knight back into the game. White might play c4 or c3 right away or do it after castling kingside first. Castling is rather natural for both sides, so quite often this will be played quickly after a move of the c-pawn, for example 13.c4 f5 14.O-O O-O is just as common as 13.O-O O-O 14.c4 f5. I will examine 13.O-O O-O as the main line and then split the lines with 14.c4 or 14.c3. If White starts 13. c4, it will very likely transpose to 13. O-O O-O 14. c4, as the deviations are unattractive for White. 13.c3 is a different story. After 13...f5 the sequence 14.O-O O-O is possible and examined via 13. O-O O-O 14. c3 f5, but White often decides to not castle and then we will reach the only important independent line 13.c3 f5 14.Nc2 , when White's king will remain in the centre or castle queenside in some lines. Alright , let's check some moves to make things more concrete. 13.0-0 0-0 It's also possible to play 13...f5 first , there is no drawback to this move order. I went for 13... O-O because this way you have the rule of thumb for move 13 and 14 in this line to play ...f5 against the c-pawn moves and just castle as well if White plays O-O first. 14.c3 A more restrained way to play for White. He prepares Nc2-e3, improving the misplaced knight on a3. 14...f5 15.Nc2 d5 Always an attractive option if it works out tactically. Here it does ! 16.exf5 e4 17.Be2 Rd8 Black needs to cover d5 first. 18.a4 bxa4 As usual it is best to take this pawn. 19.Rxa4 Bxf5 20.Nd4 Bd7 Again we are able to sacrifice the a-pawn. 21.Ra5 After 21.Rxa6 Rxa6 22.Bxa6 Qg5 we retain similar compensation as examined earlier in the 20. Rxa6 line. 21...Bc8 The final important move. Now the fork on c6 is no problem anymore and we intend to play ...Rd6 next. 22.Nc6 Qc7 23.Nxd8 Qxa5 24.Nc6 Qc5 25.Qxd5 Qxd5 26.Ne7+ Kf8 27.Nxd5 Rb8 We have lost a pawn, but will get it back due to the pressure on White's queenside pawns. We are on move 27 here, so I'll cut it here. Some of these lines run very deep, because you need to prove that the opening actually works in those concrete lines. It does not mean that you need to learn all the moves up to 27 by heart. Not even professionals do that, being able to blitz out everything. But the point is that if you have seen it once or even multiple times before, you are much more likely to find it over the board, as your brain has registered patterns and ideas that will help.

**B33**

☐ **Sveshnikov 9. Bxf6,11. c3 and others**
■ **Sveshnikov 9. Bxf6,11. c3/others #35**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and

most tactical line of the three. This in particular applies to the line 9.Bxf6 gxf6 10. Nd5 Bg7 11.Bd3 , which is the subject of the subsequent chapter. In this chapter we will examine other lines after 9.Bxf6 , most importantly 9...gxf6 10.Nd5 Bg7 11.c3 , which is the second main sub-branch of the 9. Bxf6 line, besides the 11. Bd3 line. 9...gxf6 This is forced. Black can't capture with the queen , because after 9...Qxf6 ? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 and 11.c4 are terrible for Black. A good comparison to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of this course) , in which Black has the bishop on f6, while after 9... Qxf6 ? 10. Nd5 Qd8 it is on f8 !So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. 10.Nd5 Bg7 Black has two good moves in this position, the more traditional 10... f5 and the newer move 10... Bg7, the so-called Novosibirsk variation. Both lines have some overlap, because 10. ..Bg7 does only delay ...f5 for the moment. The main difference between the two lines is how the reply 11.Bd3 is handled. In the Novosibirsk you play 11... Ne7 to get rid of the Knight immediately , an approach that is clearly not possible after 10...f5 11.Bd3 , when 11...Ne7 12.Nf6# is a bit of a problem. Instead after 10...f5 11.Bd3 , 11...Be6 is the move , which leads to completely different positions compared to the Novosibirsk. Our repertoire choice is quite easy , as the World Champion has always played 10...Bg7 , as far as I can see. After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 11. Bd3 which we examine in the subsequent chapter. The second approach is to simply play 11.c3 , after which 11...f5 12.exf5 Bxf5 leads to a position that is often reached via 10... f5 11. c3 Bg7 12. exf5 Bxf5. This line leads to interesting play and is considered to be leading to equal chances. It is obviously a critical line for the Sveshnikov, as White can basically force you to enter it. Even going 10... Bg7 or 10... f5 is not relevant, as you have no way to avoid it in both cases. So 11. c3 f5 is clearly the main chunk of this chapter, but we will also look a rare alternatives on move 11. 11.c3 This is White's more strategic choice at this point , compared to 11.Bd3. White intends to improve the Knight as quickly as possible. 11...f5 This is a lot better than 11... Ne7. Playing ...Ne7 is much more pointed after 11. Bd3, because Black in this case immediately threatens to take on d5, forcing the pawn recapture. Therefore after 11. Bd3 Ne7 White has to take on e7, which is not the case here as the Queen is still able to take on d5. An example line would be 11...Ne7 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Ne3 , when Black is more or less busted - you can't even get in ...f5 in the first place. 12.exf5 The simplest and most popular choice for White. 12...Bxf5 13.Nc2 0-0 14.Nce3 Be6 A very natural sequence so far. White has gotten his problem piece back in the centre and now needs to make a decision how to proceed. By far White's most popular move is 15. Bd3 , but there are some offbeat tries worth checking. 15.Bd3 A natural and popular move, angling for piece play against the centre and Kingside, often connected with Qh5. 15...f5 After our natural move 15...f5 we have the final split in this chapter , when White now chooses between 16.O-O , 16.Qh5 and 16.Bc2. The play in similar in these lines , but we need to check some concrete lines. 16.Qh5 e4 The f5-pawn

was attacked and this gains a tempo, an easy reply. 17.Bc2 Ne7 We are fighting for control over d5 , a common theme. 17...f4 instead looks tempting , but White has 18. Bxe4 ! , when White attacks h7 with decisive effect. 18.Rd1 Nxd5 Black mostly plays 18...b4 here, an idea that we will also employ after the trade. Trading first on d5 is a bit easier to play, I think. In any case Black has no problems at all. 19.Nxd5 b4 A strong idea ! Black is happy to take on c3 next or play 20.cxb4 Bxb2 , so the only critical move could be 20.Nxb4 , but we didn't just blunder the pawn on b4. 20.Nxb4 a5 21.Nd5 Rb8 22.Bb3 a4 23.Bxa4 Rxb2 And White has to worry about equality here. Next we have ...f4 on the agenda.

**B33**

□ **Sveshnikov Ne7**
■ **Sveshnikov 8...Ne7 9.c4 10.Qa**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we fully enter the Sveshnikov/Pelikan Sicilian. In my view, this is objectively the soundest Sicilian, together with the Najdorf. 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently, this move has become really popular. The Bg5 lines are too studied, and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 8.exd5 Ne7 8...Nb4 9.c3 Na6 10.Be3 The knight is very awkward on a6 and White can go on with normal piece development. 9.c4 Ng6 Played by Carlsen in many games of the World Championship, after which this became really trendy. 10.Qa4 A very concrete move, trying to stir trouble in Black's position. Now Bd7 is forced and our queen will be really annoying on b4. 10...Bd7 11.Qb4 Qb8 If 11... Bxb5 12.Qxb5+ Qd7 13.a4 Bishop pair for free and zero counterplay for our opponent. Now the knight is pointless on g6. 12.h4 Again intending to bug the knight or provoke some weakening with h5. 12...h5 13.Be3 Threatening c5 and trying to provoke a6 to exploit the weakness on b6 later on. 13.Be2 a6 14.Nc3 Be7 15.g3 b5!!= 13...a6 13...Be7 14.c5 13...b6 14.O-O-O Be7 15.Kb1 We reach a position with opposide-side castling where the black pieces struggle to come near our king and we can slowly make some progress. 14.Nc3 Be7 15.Na4 Qc7 15...Nxh4 16.Nb6 Nf5 17.Bd2 The knight on b6 is very well placed and the missing pawn is not really felt. 16.g3 0-0 Here I'll offer two options. I think this is one of Black's best variations and close to equalizing, but again these positions are more comfortable for White thanks to the pawn structure and our grip on the position. 17.Nb6 Rae8 18.Nxd7 Qxd7 19.0-0-0 e4 20.Bd4 Bf6 21.Bh3 21.Bxf6 gxf6 22.Bh3 Qc7 23.Qc3 This position is unclear, yet playable for both sides. 21...Qc7 22.Bb6 Qb8 23.Rd2
With an extremely complex position. We enjoy the bishop pair and a very safe king. We'll try to exploit Black's weaknesses while we prepare the c5 push, as usual.

**B33**

☐ **Sveshnikov Ne7**
■ **Sveshnikov 8...Ne7 9.c4 10.Qa**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we fully enter the Sveshnikov/Pelikan Sicilian. In my view, this is objectively the soundest Sicilian, together with the Najdorf. 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently, this move has become really popular. The Bg5 lines are too studied, and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 8.exd5 Ne7 8...Nb4 9.c3 Na6 10.Be3 The knight is very awkward on a6 and White can go on with normal piece development. 9.c4 Ng6 Played by Carlsen in many games of the World Championship, after which this became really trendy. 10.Qa4 A very concrete move, trying to stir trouble in Black's position. Now Bd7 is forced and our queen will be really annoying on b4. 10...Bd7 11.Qb4 Bf5 12.h4 We want to bug the knight, as well as enable Bg5 in certain position. If our pawn reaches h5, Black could have long-term problems, since castling with our bishop on e2 is awkward due to the weakness of that h5-pawn. 12...h5 13.Bg5 We use the fact that Be7 is not possible due to the weakness on d6 and that the f6 push creates too many weaknesses. Thus we can send the black queen to a worse square with a tempo. 13...Qb8 13...f6 Too weakening 14.Be3 a6 15.Nc3 Qd7 16. a4 . 14.Be2 We go on with our development and target h5. 14...a6 Black needed to get rid of this knight to be able to continue with some normal development. 15.Nc3 Qc7 16.g3 Be7 17.Be3 e4 Black's typical plan in this position, to bring their pieces to life. We need to be careful with the light squares. 17.. .O-O 18.Bxh5 You can see here what I mentioned about the h5-pawn. 17...Nf8 Rerouting the knight to a better square, but this is too time-consuming 18.a4 Nd7 19.a5 . 18.Qa4+ 18.Rd1!? 18...Kf8 18...Bd7 19.Qb3 Bf5 Thanks to this little maneuver our queen is slightly closer to the kingside in case we need her majesty via c2 or d1. 20.O-O O-O 21.Bxh5 . If 19...f5 20.O-O-O Ne5 21.Kb1 O-O 22.Rd2 . If 21...Rc8 22.c5 . 19.0-0 Ne5 20.Rad1 Actively centralizing our rooks. The liberating c5 push is already on the cards. 20...Bg4 20...Re8 21. c5 dxc5 22.Nxe4 Bxe4 23.Qxe4 20...Rd8 21.Rd4 21.Bxg4 hxg4 22.Nxe4 Qxc4 23.Qxc4 Nxc4 24.Bf4 All our pieces are active and will quickly improve, whereas Black's army has to wait passively.

**B33**

☐ **Sveshnikov 9. Bxf6,11. Bd3**
■ **Sveshnikov 9. Bxf6,11. Bd3 #50**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.Bd3 In this chapter we will examine the lines starting with this move. All other variations after 9. Bxf6 are covered in the previous

chapter. After 11. Bd3 the game will become very sharp and tactical and Black needs to sacrifice pawns on a regular basis. In the main line of the 11. Bd3 complex we are three pawns down, but have great compensation !Of all the chapters in the whole course this is by far the one that requires move-by-move knowledge and precise calculation over the board. There is very little strategic content or 'plans' to guide you, it's just two sides engaging in a fight with clubs - and you better make sure to bring a huge club, meaning excellent preparation. It is definitely possible to work out some of the complications over the board, but this will be much more likely to be successful if you once had known them. It sounds odd, but it is true: study time is never wasted, even if you feel you have forgotten everything.The way to do it is to not try to remember as hard as you can, but rather think on your own and hope that you subconsciously piece it together. This works much better than sitting there and wrecking your brain to recall concrete lines.One important point that also needs to be mentioned: Black is the side on the attack after 11. Bd3. If White only has vague knowledge about the complications he is very likely just getting killed quickly. If you screw something up, it might be bad in computer terms... but you still have chances, given the enormous activity that Black usually enjoys. 11...Ne7 The only good move after 11. Bd3. The bishop move prevents ...f5 and we need to get rid of the d5-knight right away. 12.Nxe7 White's choice is limited, because with 11... Ne7 we had threatened to take on d5. As usual it's very desirable for Black to take on d5 when White needs to recapture with a pawn. 12...Qxe7 After 12. .. Qxe7 White has two basic options. He can play c4, attacking the b5-pawn, or play c3, preparing to get the offside knight back into the game. White might play c4 or c3 right away or do it after castling kingside first. Castling is rather natural for both sides, so quite often this will be played quickly after a move of the c-pawn, for example 13.c4 f5 14.O-O O-O is just as common as 13.O-O O-O 14.c4 f5. I will examine 13.O-O O-O as the main line and then split the lines with 14.c4 or 14.c3. If White starts 13. c4, it will very likely transpose to 13. O-O O-O 14. c4, as the deviations are unattractive for White. 13.c3 is a different story. After 13...f5 the sequence 14.O-O O-O is possible and examined via 13. O-O O-O 14. c3 f5, but White often decides to not castle and then we will reach the only important independent line 13.c3 f5 14.Nc2 , when White's king will remain in the centre or castle queenside in some lines. Alright , let's check some moves to make things more concrete. 13.0-0 0-0 It's also possible to play 13...f5 first , there is no drawback to this move order. I went for 13... O-O because this way you have the rule of thumb for move 13 and 14 in this line to play ...f5 against the c-pawn moves and just castle as well if White plays O-O first. 14.c4 f5 The best way to react to 14. c4. As usual taking on c4 is terrible, as it helps the knight far too much. 14...b4 is also a disaster , as after 15. Nc2 a5 16.Ne3 Black does not even manage to play the fundamental ...f5 break. This only leaves Black with sacrificing the b-pawn, which explains why the 14. c4 - or 13. c4 - line is the sharpest one in the main line. Black is giving away the queenside and goes All-In with his counterplay in the centre and kingside. After 14... f5 White's main lines are the queen moves to h5 and f3, but he has also tried other continuations without much success. 15.Qh5 Rb8

We would have liked to take on e4, but 15...fxe4 16.Bxe4 is a double threat on h7 and on the rook. This explains 15... Rb8 - now we are threatening to take on e4 and then play ...f5 a second time ! The move 15... Rb8 has been tested numerous times in over the board play and correspondence chess and it looks like Black is doing fine in the hair-raising complications. I need to mention that 15... Rb8 is not the only move, though. In fact only some days before these lines were written the World Champion went for a different move: he played 15... d5 !? in the Grand Swiss Isle of Man Tournament against Russian hopeful Alexey Sarana. 15... d5 is a rare move and was probably intended as a surprise, but Sarana had done his homework and blitzed out the following moves. 15...d5 16.cxd5 Qd8 17.exf5 Qxd5 18.Rad1 e4 19.Bxb5 Qxf5 20. Qxf5 Bxf5 21.Bd7 Bxd7 22.Rxd7 Bxb2 23.Nc4. Now, this sequence is in fact clearly best play after 15... d5 and the resulting position I don't want to recommend, even though Magnus played the line. Black is very close to equality, but it's a grovel and not fun at all. Magnus ultimately drew the game after some unpleasant moments. Maybe HE kept his cool, but I would have been concerned ! In any case, I don't want to play for two results just yet if a win is not among them. 16.exf5 A more or less forced decision. Otherwise we take on e4 and play ...f5 next. 16...e4 17.Rae1 We attacked both the bishop on d3 and the pawn on b2, so White needs a tactical solution. 17...Bb7 18.Qg4 Rfe8 We need to cover e4. 19.f3 A very rare move, but logical enough to check. 19...h5 19...Kh8 also looks fine , but this is a fun line. 20.Qxh5 Bd4+ 21.Kh1 exf3 The point of 19... h5. We are threatening ... fxg2#! 22.gxf3 Qxe1 23.Rxe1 Rxe1+ 24.Kg2 Rg1+ 25.Kh3 Rg7 26.f6 Bxf6 Black has a winning attack, with ...Re8-e5 or ...Re8-e3 to come.

**B33**

□ **Sveshnikov Ne7**
■ **Sveshnikov 8...Ne7 9.c4 10.Qa**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we fully enter the Sveshnikov/Pelikan Sicilian. In my view, this is objectively the soundest Sicilian, together with the Najdorf. 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently, this move has become really popular. The Bg5 lines are too studied, and White doesn’t seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 8.exd5 Ne7 8...Nb4 9.c3 Na6 10.Be3 The knight is very awkward on a6 and White can go on with normal piece development. 9.c4 Ng6 Played by Carlsen in many games of the World Championship, after which this became really trendy. 10.Qa4 A very concrete move, trying to stir trouble in Black’s position. Now Bd7 is forced and our queen will be really annoying on b4. 10...Bd7 11.Qb4 Qb8 If 11... Bxb5 12.Qxb5+ Qd7 13.a4 Bishop pair for free and zero counterplay for our opponent. Now the knight is pointless on g6. 12.h4 Again intending to bug the knight or provoke some weakening with h5. 12...h5 13.Be3 Threatening c5 and trying to

provoke a6 to exploit the weakness on b6 later on. 13.Be2 a6 14.Nc3 Be7 15.g3 b5!!= 13...a6 13...Be7 14.c5 13...b6 14.O-O-O Be7 15.Kb1 We reach a position with opposide-side castling where the black pieces struggle to come near our king and we can slowly make some progress. 14.Nc3 Be7 15.Na4 a5 Very often played in correspondence chess. However, it seems that this is far from equalizing. 16.Qb3 Nxh4 16...Bd8 17.O-O-O O-O 18.Kb1 We continue with our normal development with a very nice position. Our king is perfectly safe on b1, far from Black's pawn majority. 17.c5 dxc5 18.Rxh4 Bxh4 19.Bb5 Bxb5 20.Qxb5+ Kf8 21.Nb6 With all kinds of threats. Black is paralyzed.

**B33**

☐ **Sveshnikov Nd5 Sidelines**
■ **Sveshnikov Nd5 Sidelines**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be

able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.h4 White stops ...Bg5 and also prepares to play g3 and Bh3 later. We are not particularly bothered by this idea, as taking on e6 is not frightening and h4 also has some downsides. It weakens the kingside and makes ideas connected to f4 tougher to play. 13...a5 14.g3 Be6 15.Bh3 One point of playing h4 is to allow this move. The most important point to remember is to not trade the light-squared bishops while the pawn structure is unchanged. It is fine for us to allow Bxe6 when ... fxe6 will patch the hole on d5, but we should never take on h3 unless we have some immediate, substantial gains. 15...a4 The most active and best continuation. 16.Bxe6 fxe6 17.Ndxb4 We are happy to see this greedy line by White. Black's initiative is now very difficult to contain. 17...Nxb4 18.Nxb4 Qb6 19.Qd2 This was played in 8 of the 9 games that got this far, but now Black has a great position. 19...Be7
We are threatening ...d5 now, attacking the knight. 20.a3 Rf3 21.Rf1 White can't play 21.O-O , which shows the weaknesses introduced by h4 and g3. 21...Qb7 22.Qe2 Rb3 23.Nd3 d5 Black has an excellent position, already evaluated as winning by the engines.

White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Qa4 A very greedy move that is duly punished. 12...Bd7 13.Nxb4 This loses immediately. White can limit the damage with 13.Nb1 , but against this we are just better with normal moves like 13...a5 and ...O-O next. 13...Nd4 14.Qd1 Rb8 15.Nd3 I am showing this move, as it is met with an attractive refutation. It's also fun to check how the others fail, but I don't want to overload the course with too many less relevant lines. 15...Bg5 Threatening ...Qa5+. 16.Nc2 Rxb2 Nice one ! White gets crushed quickly now, even with mate to come after the rook capture. 17.Nxb2 Qa5+ 18.Nb4 Qxb4+ 19.Qd2 Qxd2#

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at

all levels of play. 9...Be7 10.Nxe7 This move makes an odd impression, but it is the only option that does not give Black the pair of bishops. That seems to be the only upside, though. Black has no problem at all with control over d5 and gets active play quickly. 10...Nxe7 Stronger than 10... Qxe7. Now e4 is immediately attacked and the knight supports future ...d5 and/ or ...f5 pawn breaks. 11.Bxf6 gxf6 We are now ready to play ...f5, giving us an easy and active game. 12.Qd2 A reasonable move, preparing O-O-O. I couldn't find a way to a black advantage here, but we have no problems at all. 12...Bb7 13.0-0-0 Bxe4 14.Qxd6 Qxd6 15.Rxd6 Nc6 Black is completely fine here. The only critical move is the capture on f6, otherwise we will just play ... Ke7 next and start play on the c-file afterwards. 16.Rxf6 Ke7 17.Rh6 Rac8 We have good compensation for the pawn. The engines defend this for White, but it is not fun to play.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is

the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Ncxb4 Black gets great compensation after this pawn grab. The move 13.Ndxb4 amounts to the same, as we will exchange on b4 anyway, leading to the same position. 13...Nxb4 14.Nxb4 Qb6 White now has no fully satisfactory solution. Hanging on to the pawn gives Black fantastic play, but the other lines are not attractive either. 15.Nd5 Qxb2 16.Bd3 16.Be2 is answered in the same way. 16...Bd8 Threatening ... Ba5+. Instead 16...Bg5 is also fine. 17.0-0 Be6 Black has a comfortable position. After a possible later capture on d5 the black bishop reaches a good post on b6.

There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Be2 This modest move is one of the popular choices for White. He prepares kingside castling and sometimes Bg4 is played soon, trying to trade off this inactive piece. 13...a5 14.0-0 Bg5 This move has multiple ideas: we preserve the bishop pair, control c1, allow a capture of a knight on e3, prepare ...f5, allow the queen to move

without a worry about a capture on f6. Currently the queen has no good square, but after moves like ...Be6 and ... Rb8 you can think of ...Qd7 and later even ...Bd8-b6. After 14... Bg5 White has tried mostly two ideas: to play Bg4 or to build up on the d-file with Qd3 and a rook to d1. 15.Bg4 This is a good moment to talk about what pieces to trade and under what circumstances. While you always should keep an open mind and be somewhat skeptical about 'general rules' in chess overall or in certain position types, it is still essential to know what to be skeptical about ! This is just a rephrase of 'In order to break the rules, you have to know them first.', a quote of unknown origin that I always liked.Getting back to the position type at hand. Here you don't want to trade the light-squared bishop without a pawn structure change. We are fine with White trading on e6, as this would patch the hole on d5 by moving a pawn to e6. It would be a serious strategic mistake to trade on g4 now or let White capture on c8. This way we would give up the pair of bishops with no particular compensation and make it easier for White to keep control over d5. Looking at the pawn structure, it is also apparent that White's bishop is limited by its own pawns on e4 and c4, while Black has most pawns on dark squares, as usual. This means that we usually don't want to trade this piece at all.Besides the scenario with the capture on e6 (Bxe6 answered by ...fxe6) there are cases when Black may just take a knight on d5. This becomes an option mostly when White needs to recapture with a pawn. A pawn appearing on d5 is usually good news, as the d-file is plugged and d5 can't be occupied with a piece any more. In fact this scenario is favourable for Black in many cases, in particular if you manage to start a quick play with ...f5.There are other possible trading scenarios, of course. One interesting case is a possible ...Bg5xNe3 at a later moment. I feel there is no clear rule of thumb for this trade. In some cases a White setup with knights on d5 and e3 is a case of White having a 'superfluous knight', which means he has two knights for one weak square on d5, which means that the e3-knight is basically a piece with no active role. On the other hand you might have a case where you don't quite know what to with the bishop and simply want to reduce pieces that control d5.One important point to note is that d4 is a hole for White as well. In an ideal world we manage to plant a knight on d4 against the light-squared bishop. On the other hand we should avoid a position with a sole knight on d5 and against the dark-squared bishop. This type of piece distribution is almost always bad, unless the bishop is placed on d4 or c5 and you still have some heavy pieces on the board. 15...Be6 The best reply. We are fine with White taking on e6. 16.b3 This covers c4 and allows White to play a3 without having to worry about the reply ...b3. 16...Rb8 Black is fairly flexible here, but I like this move most. We cover b6 in order to prepare ...Qd7 and the rook is well placed in case of a future a3 move by White. 17.a3 This is strategically wrong in my opinion, but it is useful to see why. I think that White probably should take on e6 soon, like we examine in the line 17. Nde3 Qd7 18.Bxe6. This is equal, but White has few active ideas anyway. We have many ideas to improve, like ...Qd7 or ...g6 and later ...f5 for a sharper approach. 17...bxa3 18.Rxa3 Qd7 19.h3 Bd8 Black is slightly more comfortable here. We

have ...Bb6 ideas and . ..g6 will threaten ...f5 soon. Of course White is not going to fall apart quickly, but we have nothing to complain about for sure.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Nxe7 This move makes an odd impression, but it is the only option that does not give Black the pair of bishops. That seems to be the only upside, though. Black has no problem at all with control over d5 and gets active play quickly. 10...Nxe7 Stronger than 10... Qxe7. Now e4 is immediately attacked and the knight supports future ...d5 and/ or ...f5 pawn breaks. 11.Bxf6 gxf6 We are now ready to play ...f5, giving us an easy and active game. 12.c4 The most ambitious and sharp move, attacking the weakened queenside and trying to make use of the offside knight on a3. 12...f5 Very instructive ! The move c4 is frequently seen in the Sveshnikov, giving Black three options. You can take on c4, play....b4 or just ignore it and allow White to take on b5. While each situation has its own specific details, there are some general considerations to take into account. First of all, it is almost never good to take on c4, allowing the knight to enter the game on c4. You should only take if you have a very concrete reason to do so, like winning material or a clear tactic. Playing ...b4 is more likely to be a good reply, trying to keep the queenside closed. Here this fails to 12...b4 13.Qa4+ , dropping the b-pawn. The third option is the most aggressive approach and quite often the most attractive. We will frequently see this idea in the line 9. Bxf6 gxf6 10. Nd5 Bg7 11. Bd3 Ne7 12. Nxe7 Qxe7, when c4 is regularly ignored and answered by ...f5. Black does not mind to give up a pawn or two on the queenside for a central pawn roller. Let's return to the game position, which features the same pawn structure as the mentioned line. 13.exf5 Nxf5 14.cxb5 Nd4 Black has good compensation for the pawn in this position. I'll show the most important line. 15.bxa6 Bxa6 16.Bxa6 Qa5+ 17.Qd2 Qxa6 We are stopping

O-O, which gives us good play. As it happens often the engines show a way for White to defend, but it is not easy at all for a human player to do the same.

This is just a rephrase of 'In order to break the rules, you have to know them first.', a quote of unknown origin that I always liked.Getting back to the position type at hand. Here you don't want to trade the light-squared bishop without a pawn structure change. We are fine with White trading on e6, as this would patch the hole on d5 by moving a pawn to e6. It would be a serious strategic mistake to trade on g4 now or let White capture on c8. This way we would give up the pair of bishops with no particular compensation and make it easier for White to keep control over d5. Looking at the pawn structure, it is also apparent that White's bishop is limited by its own pawns on e4 and c4, while Black has most pawns on dark squares, as usual. This means that we usually don't want to trade this piece at all.Besides the scenario with the capture on e6 (Bxe6 answered by ...fxe6) there are cases when Black may just take a knight on d5. This becomes an option mostly when White needs to recapture with a pawn. A pawn appearing on d5 is usually good news, as the d-file is plugged and d5 can't be occupied with a piece any more. In fact this scenario is favourable for Black in many cases, in particular if you manage to start a quick play with ...f5.There are other possible trading scenarios, of course. One interesting case is a possible ...Bg5xNe3 at a later moment. I feel there is no clear rule of thumb for this trade. In some cases a White setup with knights on d5 and e3 is a case of White having a 'superfluous

knight', which means he has two knights for one weak square on d5, which means that the e3-knight is basically a piece with no active role. On the other hand you might have a case where you don't quite know what to with the bishop and simply want to reduce pieces that control d5.One important point to note is that d4 is a hole for White as well. In an ideal world we manage to plant a knight on d4 against the light-squared bishop. On the other hand we should avoid a position with a sole knight on d5 and against the dark-squared bishop. This type of piece distribution is almost always bad, unless the bishop is placed on d4 or c5 and you still have some heavy pieces on the board. 15...Be6 The best reply. We are fine with White taking on e6. 16.b3 This covers c4 and allows White to play a3 without having to worry about the reply ...b3. 16...Rb8 Black is fairly flexible here, but I like this move most. We cover b6 in order to prepare ...Qd7 and the rook is well placed in case of a future a3 move by White. 17.Nde3 The idea of this moves becomes more apparent after the coming logical sequence. 17...Qd7 The move we prepared with ...Rb8. 18.Bxe6 fxe6 19.c5 That was the idea behind 17. Nde3, but it does not trouble us much. 19...Bxe3 This is fine now for concrete reasons. 20.Nxe3 Nd4 21.cxd6 Qxd6 We needed to take on e3 to install our knight on d4. White has a good square on c4 as well, so the position is about equal. We should play with ...a4 later to put pressure on the queenside pawns.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this

sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Be2 This modest move is one of the popular choices for White. He prepares kingside castling and sometimes Bg4 is played soon, trying to trade off this inactive piece. 13...a5 14.0-0 Bg5 This move has multiple ideas: we preserve the bishop pair, control c1, allow a capture of a knight on e3, prepare ...f5, allow the queen to move without a worry about a capture on f6. Currently the queen has no good square, but after moves like ...Be6 and ... Rb8 you can think of ...Qd7 and later even ...Bd8-b6. After 14... Bg5 White has tried mostly two ideas: to play Bg4 or to build up on the d-file with Qd3 and a rook to d1. 15.Qd3 White prepares to play a rook to d1 and then decide what to do next. The decision between the a1- and f1-rook will be quite important, of course. 15...Be6 16.Rad1 Using this rook probably means that White rather wants to play on the kingside, maybe making use of the f1-rook with g3 and f4. 16...g6 Against the queenside oriented plans with a3 the move ...Rb8 proved to be fine. You could also play it here, but it seems less pointed. We suspect that White is going to play on the other side of the board, so we have more urgent things to do.

Playing ... g6 is a useful move anyway. It prepares ...f5 and in some cases frees up g7 for a piece. 17.g3 Bh6 A good prophylactic move. It also prepares ...Bg7 and a later ...Nd4. I also checked 17...f5 instead , which is very sharp and tough to evaluate. I concluded that the simpler 17... Bh6 is perfectly fine and I didn't want to start an analysis up to move 25. Feel free to explore yourself, it's a lot of fun. 18.Nde3 White goes for direct play against d6, but we already have seen that the threat to d6 can be met actively. Of course White may also try slow moves like 18.b3 or 18.Kh1 , but you always have the choice between ...Bg7 and ...Nd4 to be very solid or to go for ...f5, sharpening up the game instantly. 18...Qb6 The standard reply, covering the pawn on d6 by tactical means. 19.Bg4 We have seen some cases of 19.Qxd6 ?? Rfd8 already , so this time I'll just give it in the text. After 19. Bg4 we have a straightforward way to prove equality. 19...Bxe3 20.Qxe3 Qxe3 21.Nxe3 Bxg4 22.Nxg4 Nd4 And Black has equalised. The position is not dead, though - there is plenty of play left. We may target the c4-pawn and play on the queenside.

example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.h4 White stops ...Bg5 and also prepares to play g3 and Bh3 later. We are not particularly bothered by this idea, as taking on e6 is not frightening and h4 also has some downsides. It weakens the kingside and makes ideas connected to f4 tougher to play. 13...a5 14.g3 Be6 15.Bg2 g6 It's also possible to play the simpler 15... Bxd5 , followed by 16... Nd4, or even 15...Nd4 immediately. It's difficult to win these kind of positions, though. Therefore I decided to cover 15... g6, keeping the tension and preparing ...Bg7 and ...f5. 16.Qd3 Bg7 17.h5 No need to be afraid here. We won't get checkmated on the h-file, because White lacks attacking pieces and we still have the g7-bishop to cover the king. 17...a4 Here's the counterplay on the queenside. Now taking the b-pawn must be critical, but it's fine for Black. If While plays something slow, we have ... Qa5-c5 as a good follow-up. 18.hxg6 hxg6 The structurally desirable move , but 18...fxg6 is playable as well , immediately opening the f-file. 19.Ncxb4 Nxb4 20.Nxb4 Rc8 Black has good play for the pawn , often deep into the endgame. It's already very deep , but I'll add some more moves to show the compensation. 21.Nd5 Qa5+ 22.Qd2 Qxd2+ 23.Kxd2 Bxd5 - White was threatening Ne7#, so no time to take on c4 - 24.cxd5 Rb8 25.Rab1 Rb4 26.b3 Rc8. Here Black's rooks are very active , for example after 27.bxa4 Rd4+ ! both rooks are invading, with ...Rc2 to come.

**B33**

☐ **Sveshnikov Ne7**
■ **Sveshnikov 8...Ne7 9.c4 10.Bd**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we fully enter the Sveshnikov/Pelikan Sicilian. In my view, this is objectively the soundest Sicilian, together with the Najdorf. 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently, this move has become really popular. The Bg5 lines are too studied, and White doesn't seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 8.exd5 Ne7 8...Nb4 9.c3 Na6 10.Be3 The knight is very awkward on a6 and White can go on with normal piece development. 9.c4 Nf5 TheColdest line, Quite forgotten in recent years. Logically, having the knight here, any black plan involving f5 is more difficult to execute. 9...a6 This move loses directly and more than 200 players have already fallen for this trap! 10.Qa4 Kd7 11.Bd3 Well, I think this position is self-explanatory. That king on d7 has taken the plunge. If îîStartFENîîr1bqkb1r/1p2nppp/p2p4/1N1Pp3/Q1P5/8/PP3PPP/R1B1KB1R b KQkq - 1 10îîEndFENîî 10...axb5 11.Qxa8 Nf5 12.cxb5 with material advantage and we continue with our development. If 11...bxc4 12.Bxc4 If îîStartFENîîr1bqkb1r/ 1p2nppp/p2p4/1N1Pp3/Q1P5/8/PP3PPP/R1B1KB1R b KQkq - 1 10îîEndFENîî 10... Bd7 11. Nxd6 10.Bd3 g6 This has recently gained some popularity. Obviously, Black's idea is to fianchetto this bishop and go for a more dynamic development. 11.0-0 a6 12.Nc3 Bg7 13.Bxf5 Strategically, this move is very tough, since we are giving up the bishop pair, apparently for free. However, we are slowly going to see how Black can't profit from them and White is going to end up having a good grip on the dark squares. 13...Bxf5 14.Be3 0-0 15.Qd2 We have simply completed our development and next we¡ll centralize our rooks. 15...Bd7 Trying to push f5, but we won't allow it. 15... Bc8 Too passive to be good 16.c5 using our development lead to open up the position. 15...Qh4 16.b3 e4 17.Bd4 Aiming at the trade of Black's bishop pair to enjoy the dark squares. 16.Ne4 Qc7 16...Bf5 17.f3 17.Qb4 Black can't defend d6.

You can't generate serious pressure on the d-file and opening up the queenside with a3 leads to nothing much either. The only other way to alter the pawn structure seems to be f4, which is prepared by g3. Of course White needs to prepare this a bit more, but after 13. g3 you need to expect this to happen later. 13...a5 14.Bg2 White also plays 14.h4 here , but this we have covered via 13. h4 a5 14. g3 - (lines #25-31.) 14...Be6 15.0-0 Bg5 16.f4 Bh6 Here White has played f4 early on, so that a ....Qb8 and ...Bd8 setup was not possible. This is no problem at all, as we have enough counterplay here as well. 17.Kh1 exf4 Keeping the tension with 17...g6 is also possible , but opening the position for the bishop pair makes some sense as well , in particular in connection with the next move. 18.gxf4 Qh4 An attractive square for the queen. 19.Qe1 White does not like to worry about the queen on h4, so this makes some sense. 19...Qxe1 20.Raxe1 g6 This is the move to 'just continue the game', but you can probably drill 20... b3 down to a forced draw if you like to do so. After 20...b3 21. axb3 Rab8 22. Re3 a4 23.bxa4 Rxb2 Black's activity gives enough play to secure equality at the end. It's a matter of taste and the specific game situation what to do here or on move 17, when you also may keep the tension by not taking on f4 in the

first place. Here after 20... g6 we are planning to play ...Bg7 and after a likely b3 by White to attack this chain with ...a4. A generally useful move to consider is ...Ra7, leaving the long diagonal in view of a possible e4-e5 and covering c7 at the same time.

■ **Sveshnikov Nd5 Sidelines**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Nxe7 This move makes an odd impression, but it is the only option that does not give Black the pair of bishops. That seems to be the only upside, though. Black has no problem at all with control over d5 and gets active play quickly. 10...Nxe7 Stronger than 10... Qxe7. Now e4 is immediately attacked and the knight supports future ...d5 and/ or ...f5 pawn breaks. 11.Bd3 d5 We usually just shamelessly copy what the World Champion plays , but here I suggest a different move. The 15-year old version of Magnus has played 11...Nd7 in this position , but the central pawn push makes a very logical impression. 12.exd5 Qxd5 Black should play this dynamic move, using the fact that White has not taken care about central control carefully. We are attacking g2 and pushing ...e4 to attack both bishops is also on. 13.f3 e4 The forcing solution , but slow moves like 13.. .Qc5 are also reasonable. 14.Bxf6 exd3 15.Bxe7 Qe6+ 16.Kf2 Qb6+ 17.Kf1 Kxe7 18.Qe1+ Be6 19.Qb4+ Ke8 20.cxd3 Rd8 Black is better here, having more than enough play for the pawn. We will play ...f6 and ...Kf7 next to fully mobilize. White has multiple problems, in particular the king on f1, but d3 and the knight on a3 make a sad impression.

**B33**

☐ **Sveshnikov Nd5 Sidelines**
■ **Sveshnikov Nd5 Sidelines**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Nxe7 This move makes an odd impression, but it is the only option that does not give Black the pair of bishops. That seems to be the only upside, though. Black has no problem at all with control over d5 and gets active play quickly. 10...Nxe7 Stronger than 10... Qxe7. Now e4 is immediately attacked and the knight supports future ...d5 and/ or ...f5 pawn breaks. 11.Bd3 d5 We usually just shamelessly copy what the World Champion plays , but here I suggest a different move. The 15-year old version of Magnus has played 11...Nd7 in this position , but the central pawn push makes a very logical impression. 12.exd5 Qxd5 Black should play this dynamic move, using the fact that White has not taken care about central control carefully. We are attacking g2 and pushing ...e4 to attack both bishops is also on. 13.Qd2 A more dynamic solution that 13.f3 , but Black is fine here as well. 13...Ne4 14.Qe3 Nxg5 15.Qxg5 Qc5 This move covers the e7-knight and prepares to castle kingside. Black can be happy about his prospects: we have the useful central pawn and White's knight is still offside on a3. White is not able to snatch the pawn on g7, but we need to check why. 16.Qxg7 Rg8 17.Qh6 White needs to have Qd2 against the check on b4, therefore h7 couldn't be taken. 17...e4
A very important intermezzo, pushing the bishop to a passive square. White can't take the pawn due to ...Qb4+ ! 18.Be2 Rxg2 Black has a clear advantage already. In addition to f2 being attacked we also threaten ...Qb4+. 19.0-0-0 Be6 This is even stronger that snatching f2. We cover c4 and thus threaten ...b4, pushing the knight back home. 20.Qxh7 Qe5 This is the point and very strong. This powerful centralization of the queen covers h8 and next ...Rc8 and ...Nf5 gives us a great attack.

**B33**

■ **Sveshnikov Nd5 Sidelines**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9. Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9. Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in the next chapter. By far the most important line besides the main line is 11.c4 , which is a popular alternative seen at all levels of play. 9...Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3.White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.Nxf6+ Maybe White thinks that trades make his game easier to conduct ? In any case we are happy to see our queen activated. 11...Qxf6 This position might also occur via 10. Nxf6+ Bxf6 11. Bxf6 Qxf6. 12.Qd5 This is a bit naive, but it is good to see how to punish this type of play. 12...Bb7 13.Rd1 0-0 No need to spend a tempo on ...Rd8. 14.Qxd6 Qf4 15.Bd3 Nd4 Black has a decisive attack already. 16.0-0 Rae8 And the coming ...Re6-g6 h6 will be devastating.

Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ...Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11... b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11.c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look.

11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Ncxb4 Black gets great compensation after this pawn grab. The move 13.Ndxb4 amounts to the same, as we will exchange on b4 anyway, leading to the same position. 13...Nxb4 14.Nxb4 Qb6 White now has no fully satisfactory solution. Hanging on to the pawn gives Black fantastic play, but the other lines are not attractive either. 15.Nd3 The greedy, but bad option. 15...Bb7 16.f3 Bh4+ Black provokes the move g3, weakening the long diagonal in the process. A coming ...f5 will be more effective this way. 17.g3 Bg5 Black has a great position for just one pawn. White's dark squares are terribly weak and castling is tough to accomplish.

**B33**

□ **Sveshnikov Nb8**
■ **Sveshnikov,Mainline With F4**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we enter the Sveshnikov Sicilian. Black weakens their pawn structure (hole in d5, backward pawn on d6) for dynamic assets (gaining tempo misplacing White's Knight, pawn breaks on d5 and f5, and often times the Bishop pair. In my view, this is objectively the soundest Sicilian, together with the Najdorf.) 6.Ndb5 d6 Virtually the only move. If Black allows Nd6 their position is a disaster. 7.Nd5 Recently this move has become really popular. The 7.Bg5 lines are too studied and White doesn’t seem to get anything out of it. Also, we are aiming again at the same structure we are going to play against other lines. 7...Nxd5 Forced. 8.exd5 Nb8 The move we are most likely to encounter on the board. We reach the typical structure in Which Black will seek some counterplay on the kingside, while we do the same on the queenside. 9.c4!? Reaching similar positions, is the most played. However, a4 has recently become very popular. 9.a4 The point of this early push is to retreat the knight to a3 in case of a6 and eventually play Nc4+a5. 9...Be7 The most flexible move, as e7 is the obvious destination for this bishop and Black is going to castle short. However, other moves like 9...Nd7 9...a6 or 9...f5 are more conditioned by White’s reply. 10.Bd2 The most accurate move order to reach the position we want. Also, it’s not as well-known as 10.Be2 , which its main drawback is 10...Nd7! This move order has barely been barely played compared to 10...O-O however, it is more accurate. 11.Bd2 11. O-O O-O 12.Bd2 a6 13.Na3 a5! reaches the position our move order is trying to avoid as in my view, Black manages to get the best version of this position. 11...Nf6! with

complicated play. 10...0-0 Not committing to anything in the queenside. 11.Be2 11.a5 is also interesting, but this order is more flexible. 11...Nd7 12.a5 With this precise order we reach this position where we have avoided the best version of the a6+a5 line. If nothing else, this will allow us get our opponents out of the book, but also, of course, we avoid Black's best line 12...f5 13.0-0 With a direct transposition to one of the main lines. 13...a6 14.Na3 e4 15.Nc4 Ne5 16.Nb6 Not bringing their pawns to the center. 16...Rb8 One of the most important lines in this variation, so I'll offer two options. 17.f4 exf3 18.Bxf3 f4 corr. Gaining some space and intending to develop the c8-bishop via f5. Again I'll offer two options for White, as I belive this line will become trendy 19.Be2 With some direct pressure on f4, as well as keeping the bishop pair 19...Bg5 19...g5 20.Nxc8! Perfect timing for this capture, after highlighting Black's light-square weaknesses. 20...Rxc8 21.b3± 20.Ra3 The last piece joins the party. This rook will be very useful both in defensive and offensive tasks 20...Qe7 21.Rc3 Bd7 22.Nxd7 Qxd7 23.Rb3 Our rook has perfect control over the third rank, stopping Black's counterplay. Next we'll slowly push our queenside and other plans include rerouting our bishop from e2 to e6 after taking on e5.

**B33**

☐ **Preview**
■ **Van Foreest,Jorden**

Name: Magnus Carlsen Age: 29 Country: Norway Seed: #1 Elo: 2872 World Ranking: #1 Previous Wijk results: 7 time winner of the A group In 2019 the World Champion asserted his dominance by winning 10 elite events, including both the World Rapid and Blitz Championships and not losing a single game in classical chess. He matched his highest ever rating and will be a strong favorite to add an 8th Wijk title to his collection. Last year, he started off with 4 draws. In round 5 he faced the young Dutch star Jorden van Foreest and was able to employ the Sveshnikov that he'd used successfully in his recent World Championship match. 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Nd5 Caruana's choice in games 8, 10 and 12 of the WC match. 7.Bg5 Carlsen faced this twice later in the tournament, against Radjabov and Giri. 7...Nxd5 There's no choice here - the threat of Nc7 must be dealt with. 8.exd5 Ne7 8...Nb8 Carlsen played this twice in the WC match, both games ending in draws. 9.c4 Ng6 10.Qa4 Threatening a nasty double check. 10...Bd7 10...Qd7 ? 11.Nc7+ ! 11.Qb4 Qb8 Carlsen deviates from his play in the WC match. 11... Bf5 12.h4 h5 13.Qa4 Bd7 14.Qb4 Bf5 15.Be3 a6 16.Nc3 Qc7 17.g3 Be7 18.f3 Nf8 19. Ne4 Nd7 20.Bd3 O-O 21.Rh2 Rac8 22.O-O-O Bg6 23.Rc2 f5 24. Nf2 Nc5 25.f4 a5 26. Qd2 e4 27.Be2 Be8 28.Kb1 Bf6 29.Re1 a4 30.Qb4 g6 31.Rd1 Ra8 And a draw was agreed in Game 12, though Black is better. 12.h4 Trying to chase the knight to an awkward square. 12...h5 13.Be3 a6 14.Nc3 f5 The pawns are looming. 15.0-0-0 Be7 16.g3 0-0 17.Be2 e4 18.Bd4 18.Bxh5 !? Ne5 19.Be2

b5 20.cxb5 axb5 Black will get some initiative but a pawn is a pawn. 18...Bf6 19.Bxf6 Rxf6 20.Qb6 20.Bxh5 Ne5 21.Be2 b5 22.cxb5 axb5 23.a3 20...Ne5 Now grabbing on h5 isn't really possible. 21.Kb1 21.Bxh5 ? Nxc4 21...Be8 22.Rd2 Nd7 23.Qd4 Qc7 24.Nd1 Ne5 25.Ne3 f4 26.gxf4 Rxf4 27.Rg1 Bg6 28.Ka1 28.Rg2 ? Nf3 ! 29. Bxf3 exf3+ 28...Raf8 28...Rxf2 This was also good but Black is in no hurry. 29.c5 Rxf2 29...dxc5 30.Qc3 Qd6 30.Qc3 Qxc5 31.Qxc5 dxc5 32.d6 Kh7 Freeing up the knight. 33.d7 Nf3 White resigned, the threats are too much. 34.d8Q Rxd8 35.Rxd8 Rxe2 36.Rf1 Rxe3 For example. After this game, the floodgates opened and Carlsen won 4 more games to finish in clear 1st place. Will he win an 8th time this year ?

**B33**

□ **Play On The Whole Board**
■ **Smeets,Jan**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 Bg5 12.Nc2 Ne7 A solid choice for Black, trying to quickly challenge White's control over d5. Nowadays 12...Rb8 is more popular and Magnus' choice nowadays. 13.Ncb4 0-0 14.a4 14.Nxe7+ Qxe7 15.Nd5 Qb7 After the coming ...Be6 White is not able to maintain the knight on d5. 14...bxa4 15.Rxa4 15.Qxa4 a5 16.Bb5 !? Nxd5 17.Nxd5 This was played in G. Kamsky-M.Carlsen, Khanty Mansyisk 2005. Black is not in bad shape, but White seems to have easier play. 15.h4 Bh6 16.Rxa4 16.Qxa4 a5 17.Bb5 Nxd5 18.Nxd5 Be6 19.Bc6 Rb8 is fine for Black. 16...a5 17.Nxe7+ Qxe7 18.Nd5 Qb7 19.b3 Kh8 Black is ready to push ...f5 now, while it is not clear what White has achieved with h4. 15...a5 It's important to cause some disruption to this powerful Nb4/d5 set-up that White has. 16.Nxe7+ 16.Bb5 Bd7 17.Nxe7+ Bxe7 18.Bxd7 axb4 leads to equality. 16...Qxe7 16...Bxe7 !? 17.Nd5 Rb8 This line looks reasonable as well, with ...Kh8, ... g6 and ...f5 being the general plan. 17.Bc4 17.Nd5 Qb7 A good square for the queen. We attack b2 and ...Bd7 comes next. 17...Bd7 18.Nd5 Qe8 Magnus: I played this move for a few reasons - it allows ...Bd8 and in the future I'd like to play ...Kh8 and ... f5 when the queen can go to g6. 19.Ra2 Bd8 Magnus: for many years I have been trying to argue that in at least some of these positions, the bishop on d8 dominates the knight on d5. The bishop protects all the knight's forward squares, and whenever the knight moves away the bishop can become active immediately. Obviously 'domination' is an exaggeration, but the point is that the two pieces keep each other in check. 19...Rc8 ? 20.Nb6 Rc7 21.Nxd7 Qxd7 22.b3 Should probably be avoided by Black. The pawn on a5 is weak and so White's pressure with the light-squared bishop might prove important this time. 20.0-0 Rc8 21.Bb3 21.b3 a4 Of course Black is happy to get rid of this liability. 21...Rb8 Magnus: this move makes sure that White cannot play Ba4 exchanging the light-squared bishops, because it would drop the b2-pawn. 22.Qc2 Kh8 23.Rfa1 Too optimistic. The a5-pawn is well protected

and the rook is clearly misplaced on a1. In fact with the bishop on b3 and the queen on c2, White lacks coordination and needs to find a plan to keep the balance. Magnus: This is consistent, but as the game continuation shows Black can now take over the initiative. 23.Ne3 Be6 24.Bd5 This is a sensible way to regroup. 24...Bb6 Black finally gets his bishop on a more active post. The position is about equal. 23. Ba4 ? This is strategically desirable, but fails due to a tactic. White's move in the game prepares Ba4. 23...Bxa4 24.Rxa4 Rxb2 That's the problem ! 25.Qxb2 Qxa4 And Black has just won a pawn. 23...f5 24.Ba4 The idea of the previous move, but now Black quickly creates counterplay. We can also check some alternatives, but they don't convince, either. 24.f3 fxe4 25.fxe4 Qg6 Again Black has taken over the initiative. 24.exf5 Bxf5 25.Qd1 Qg6 Black's play gains momentum while White's forces are stuck on the queenside. 26.Bc4 Be4 27.Bf1 ? Qf7 with a double attack on d5 and f2. 24...Bxa4 25.Rxa4 fxe4 26.R4a2 26.Rxe4 Qb5 A key point: Black has a double attack on d5 and b2. 26...Qf7 The start of an amazing manoeuvre: who could guess that the rook on b8 will get to f3 in just 3 moves! Magnus: 26...Qg6 also looks fine, with the point 27.Re1 Bb6 ! 28.Nxb6 e3 ! with a double attack on f2 and the queen on c2. But I had spotted a different idea which I couldn't take my eyes off of. 27.c4 Rb3 A typical idea by Carlsen to discover unexpected tactical resources. The rook finds the quickest way to the kingside. Magnus: I was very happy with this idea, exploiting small tactics to get my pieces into the game. 28.Re1 Bh4 29.g3 29.Re2 And although Black has several attractive continuations, White also has resources to defend. 29...e3 !? 30.f3 The only move, there was no way around it. 30. Nxe3 Rxe3 breaking through on the f-file. 31.Rxe3 Bxf2+ 30.Qxb3 Bxf2+ 31.Kh1 and here Black has multiple ways to win. The cleanest seems to be 31...Bg3 32.hxg3 Qh5+ 33.Kg1 Rf1+ 34.Kxf1 Qh1# 30...Bf2+ 31.Kh1 Rfb8 Black has strong pressure, but there is nothing clear yet. 29...Rf3 The rook has arrived near the target, a very impressive journey. 30.b3 f2 needed some help. 30.gxh4 ? Rxf2 wins for Black: 31. Qxe4 31.Qd1 Qg6+ followed by mate on g2. 31...Rf1+ 32.Kg2 Qf2+ with mate in a few moves. 30...Bd8 Magnus: Now we come back to the theme - the knight on d5 simply cannot move, because any move would allow ...Bb6. 31.Rxe4 h5 Invite everybody to the party! Black uses every imaginable force to attack - even the h-pawn. 32.Re2 32.h4 g5 ! Very powerful play. 33.hxg5 Bxg5 Now ...h4 is going to be very powerful. White only has one move to defuse this idea. 34.Qe2 h4 ?! 34... Rxb3 ! The simple answer that gives Black a clear advantage. 35.Rxa5 Rb1+ 36.Kg2 Rb2 37.Qxb2 Qf3+ 38.Kg1 Qxe4 with multiple threats: Qe1+ followed by Qxa5, Qxc4, h5-h4 etc. 35.Nf4 ! This trick keeps White in the game. Now things are not clear at all. 32.Re3 is another possible defense, but after 32...Rxe3 33.Nxe3 Bb6 Black has successfully activated his bishop. 32...h4 33.Rb2 g6 This is not just a waiting move, as we will see. 34.Kg2 This loses by force. 34.Qd2 - intending Qh6+ - 34...Kg7 35. Re3 , just trading rooks on f3, and Black has nothing concrete yet. Generally with precise moves White should be able to defend, but in a practical game it is very difficult to hold such a position. 34...hxg3 35.hxg3 Rxg3+ 36.Kf1 36.Kxg3 Qf3+ 37. Kh2 Kg7 and mate. Magnus: This was the point of 33... g6. 36.fxg3 Qf1+ 37.Kh2

Kg7 and again Rh8+ will be decisive. White can delay mate for only a couple of moves: 38.Re4 Rh8+ 39.Rh4 Bxh4 40.gxh4 Rxh4+ 41.Kg3 Rh3+ 42.Kg4 Qf3+ 43. Kg5 Rh5# 36...Qf3 37.Qe4 Qh5 38.Ne3 Bg5 39.Ke1 Rgf3 Black is a pawn up and has a deadly attack. 40.Nf1 Bc1 41.Ra2 41.Rb1 Ba3 ! ...Bb4 is going to be decisive. 41...Rxb3 42.Ng3 Qh6 43.Qg4 43.c5 Ba3 Intending to take on c5, but Black is also threatening something different. 44.cxd6 Qc1# 43...Rxg3 44.Qxg3 44.fxg3 Qh1# 44...Qh1+ 0-1 White resigns.

**B33**

☐ **Quickstarter**
■ **2...Nc6 - Sveshnikov with 8..**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70's and the 80's it gained a reputation as one of the best Sicilians for Black. It was pet line of many top class players including two World champions: Magnus Carlsen and Vladimir Kramnik who played it quite often before unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7. Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is success for Black and leads to the pawn structures which are typical for the Najdorf. The positive side for White with or the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Black here has a choice between Nb8 and Ne7. The first one had a better reputation, but the World Champion revived the whole Ne7 line. 8...Nb8 9.a4 White has two ways to solve the problem of the b5-knight, he can play 9.c4 and return the knight to c3, or play in a modern way 9.a4 and return the knight to a3 where it can reach his ideal square in this pawn structure, the c4 square. 9...Be7 Black develops his kingside first, and is not in a hurry to play a6. 10.Be2 White also develops, before pushing on the queenside with a5. 10...0-0 11.Bd2 TheCmost common move is 11.O-O but after 11...Nd7 12.Bd2 a6 13.Na3 a5 practice has shown that Black has good chances there. With this move order îîStartBracketîîBd2 before castlingîîEndBracketîî White fights against the mentioned plan îîStartBracketîîa6 followed by a5îîEndBracketîî and doesn't spoil his position. The bishop goes to d2, to guard the pawn on a5, or to attack the black pawn depending on our opponents reaction. 11...f5 Usually, the best plan for Black is to play on the kingside, and postpone playing a6 as long as possible. 12.a5 Improving on the queenside and waiting for reply. 12...Nd7 Black continues with the developing. 13.0-0 Easy move for White, finishing the development. 13...a6 If Black plays 13...Nf6 too soon, then 14.c4 is a strong reply, usually followed by Nc3

and pawn expansion on the queenside. 14.Na3 e4 Creating square for the knight. 15.Nc4 Of course, knight is on its ideal square. 15...Ne5 Black challenges it. 16.Nb6 It is too early to trade those knights. 16...Rb8 17.f4 White has to open up the position for his pieces on the kingside. 17...exf3 18.Bxf3 This position was reached via a different move order in the 8th game of the World Championship match Caruana - Carlsen, London 2018. The challenger was arguably having a winning advantage at some point which shows how tricky this position is for the Black side.

**B33**

☐ **Quickstarter**
■ **2...Nc6 - Sveshnikov with 8..**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies it gained a reputation as one of the best Sicilians for Black. It was pet line of many top class players including two World champions: Magnus Carlsen and Vladimir Kramnik who played it quite often before unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7. Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is success for Black and leads to the pawn structures which are typical for the Najdorf. The positive side for White with or the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Ng6 If Black could castle he would have a great position. 10.Qa4 Creating a deadly threats. 10...Bd7 Only move. 11.Qb4 White is annoying Black and constantly attacking some pawns. Here Black has choice between two approximately similar options: Bf5 and Qb8. 11...Qb8 Defending pawn, and keeping the option of playing f7-f5. 12.Be3 White players are automatically including h4 and h5, and only then playing Be3, but I have realized that this only helps Black to create some counter chances. White wants to play c5 on the next move if Black doesn't do anything. 12...a6 Black can hardly play without this move, 12...Be7 allows 13.c5 , so he has to include a6 first. 13.Nc3 Be7 13...f5 isn't something White should be afraid of. Move f4 is not really a threat since it gives the e4 square, and White can continue expanding on the queenside. 14.a4 and White has an easier play. 14.Na4 Going for Nb6. It is important that in many lines pawn on h4 isn't hanging. That is the difference compared to the 13. h4. 14...Qc7 Giving rook air to breathe. 15.Qb6

In general, the endgame should be favourable for White with the pawn majority on the queenside. 15...Qb8 Or 15... Qc8 is responded in the same manner. 16.Qb3 As we have seen in the Bf5 line, White queen is better played on b3 than on b4 since it participates in the defence over the third rank. In some lines playing c5 also becomes option, especially when Black pushes f5. 16...Qc7 17.Nb6 White will take the bishop on d7 and obtain the bishop pair advantage.

**B33**

☐ **Part Iv The Bishopas Monop**
■ **Petr Zvara Vs Aleksander Mis**

Good or Bad Bishop? 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 10.Nd5 Bg7 11.c3 Ne7 12.Nxe7 Qxe7 13.Nc2 Qb7 14.Bd3 f5 15.f3 f4 16.0-0 Be6 17.Qe2 0-0 18.Rfd1 Bf6 19.Nb4 Bd8 20.Bc2 Bb6+ 21.Kh1 Qe7 Sometimes it is not so easy to determine at once which Bishop is the better one. Here White decided to go for opposite Bishops with... 22.Nd5 Bxd5 23.Rxd5 ... but after... 23...Kh8 ... the half-open g-file is of more use to Black than it was to White in the former example. 24.Rad1 Bc7 Temporarily retreating. 25.b4 Too slow; 25.a4 . 25...Rg8 26.a4 bxa4 27.Bxa4 Rg6 This is Black's idea. The Rooks can be doubled on the g-file, the g6-Rook may switch to the h-file and at the same time it is defending the d6-pawn, allowing the Bishop to return to the a7-g1 diagonal. 28.c4 Bb6 29.c5 dxc5 30.Qb2 Rag8 30...cxb4 was also possible: 31.Qxe5+ 31.Rxe5 Qf6 31... Qxe5 32.Rxe5 Rag8 33.Rd2 Rc8 , and Black is simply a pawn up and clearly better. 31.R1d2 31.bxc5 was more realistic, when following 31...Bxc5 But perhaps he was afraid of 31...Rxg2 32.Qxg2 However, 32.Qxe5 ! would then have changed the picture completely 32...Rxg2 33.Kxg2 Bxc5 , when indeed Black is in the lead due to White's vulnerable King position. 32.Qxe5+ Qxe5 33.Rxe5 Be3 , surprisingly White is only slightly worse after 34.Bd7 Rxg2 35. Bg4 . 31...Qh4 32.Qxe5+ f6 33.Qa1 cxb4 The main aim: threatening 34... Qxh2+ !. 34.Bd7 Rxg2 35.Rxg2 Rxg2 0-1

☐ **Part Ii Brutal Exchange Sacs**
■ **Artyom Timofeev Vs Pavel Smi**

Another Strong Piece Disappears 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c4 b4 12.Nc2 0-0 13.Be2 a5 14.0-0 Bg5 15.Qd3 Be6 16.Rfd1 Bxd5 17.cxd5 Nb8 18.Ne3 Nd7 19.Rac1 Nc5 20.Rxc5 A less obvious sac, though it eliminates the strong Knight. There is no pawn as compensation here, only a passed d-pawn. True, the position is closed for the moment - no space or open files for the Black Rooks - but to venture this sac you need to have some grandmasterly vision, or at least be familiar with similar examples. Perhaps Timofeev was inspired by the following game: Predojevic-Roiz, Moscow 2006 20.Rxc5 !? dxc5 21.Nc4 , featuring the same sac in the same opening. Still, familiarity with the idea is no guarantee in a real game, as Marin's article in Informant 116 proves. Shortly after having studied similar exchange sacrifices to the one in this game, he failed to apply the idea in his own game against Ponomariov. What stopped him ? It left Marin wondering as well: 'I almost never miss a chance to sacrifice the exchange, even if it is half-correct.' Perhaps every now and then, materialism does prevail. 20...Bxe3 The immediate 20...dxc5 grants the Knight a terrific square, of course: 21.Nc4 . 21.Qxe3 Consistent. 21...dxc5 22.d6 Taking on c5 would increase Black's activity, whereas now the passed d-pawn limits Black's possibilities. You may remember this theme from Chess Pattern Recognition for Beginners, Chapter 10: A Central Striker! 22...Qb6 23.Bc4 Rad8 24.Qd3 Here or on the next move, d6-d7 would have been logical. 24...Kh8 25.h4 Rd7 26.Bb5 c4 Now Black creates some counterplay, though eventually it proved insufficient. 27.Qd5 Rdd8 28.Qxe5 c3 29.bxc3 f6 30.Qd5 bxc3 31.d7 a4 32.Bxa4 Qb2 33.Qc4 Rb8 34.g3 Rfd8 35.Bb3 Ra8 36.h5 h6 37.Kg2 Rf8 38.Rd3 Rad8 39.Qc5 Qe2 40.Qxf8+ Rxf8 41.d8Q Qxe4+ 42.Kh2 1-0

**B33**

☐ **Part I Edible Or Forbidden,F**
■ **Jonathan Penrose Vs Kjell Kr**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 9.Nc4 Rc8 10.Bxf6 gxf6 11.Bd3 Ne7 12.Ne3 Qb6 13.0-0 Qxb2 14.Ncd5 Bxd5 15.exd5 Qd4 Departing the b-file. 16.Rb1 Occupying the half-open b-file anyway - a novelty at the time. 16...Rc7 16...b5 can be answered with 17. a4 ! , opening up the queenside for the white pieces. Compare Giri's c4 in the first game. 17.Qf3 Qf4 18.Qe2 e4 18...Bh6 is no solution either: 19.Nc4 Nc8 20.Rb4 gave White a clear advantage in Ghinda-M.S. Tseitlin, Pernik 1978. Note that the black queen is still not out of trouble. A move like 18... h5 might be best, but White still has clear compensation for the pawn. 19.Bxa6 19.Bxa6 ! Further opening the queenside and making Black suffer for not developing his kingside. bxa6 20.Rb8+ Nc8 20...Rc8 21.Rxc8+ Nxc8 22.Qxa6 Kd8 23.Rb1 is also hopeless. 21.Qxa6 Kd8 22.Rfb1 Qe5 23. Rxc8+ Rxc8 24.Qa5+ Ke8 25. Qa4+ Kd8 26.Rb7 1-0

**B33**

☐ **Quickstarter Guide**
■ **Quickstarter Guide #08 - Sves,11. c4**

1.e4 c5 Hello and Welcome to 'Fight like Magnus: The Sicilian'! This opening course provides you with a full repertoire against 1. e4, based on the Sicilian Defense. I am a bit reluctant to write 'Defense', because in the Sicilian you don't intend to defend all that much, but rather want to 'fight fire with fire'!In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white king, which is fun to play and tricky for White to handle. If you are looking for an active and ambitious opening for Black, you are studying exactly the right course. As the title suggests our repertoire choices are based on the opening play of the current World Champion Magnus Carlsen. Through his whole career Magnus has mostly relied on two moves against 1. e4: the symmetrical 1...e5 and 1...c5 , the Sicilian. Over the years the mix between the two moves shifted back and forth. 1... c5 was a frequent choice in his younger years, but he played it less after he became World Champion in 2013. This changed in 2018, when Magnus returned to the Sicilian, making it his main weapon in his title match against Fabiano Caruana. In this match (including the tiebreak) (Magnus played seven games with the black pieces, and all of them featured the Sicilian. He managed to win the rapid game in the tiebreak after drawing all six classical time control games in the regular match.) As of today (Nov 11, 2019) Magnus Carlsen has not lost a single Sicilian in Classical time control not only since this match, but even since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but

still a very impressive run.I am mentioning non-losing streaks, but what about wins ? Magnus has won many attractive games with the Sicilian, some of which are included as model games in this course. Alright, back to our repertoire concept. I have compiled a full repertoire for Black, based on the World Champion's repertoire. This means that any major choice should be according to games that Magnus has played, showing his belief in the merit of the line. This works well with most lines, but some rarer continuations never featured in the World Champion's games, so I selected lines that matched the structure and spirit of the overall repertoire.There are some cases where I suggest to improve on Magnus' play. I only do that if thorough engine-assisted analysis suggests that my alternative is significantly better or preserves more winning chances, while being of equal quality. You have to take into account that he has played the opening not only in Classical time controls, but also in Rapid and Blitz games. It is perfectly possible that he plays a second-tier move in a Blitz game, because he does not want to show his main preparation or simply forgot the line. In those cases it makes sense to not blindly copy all moves, but see if there is room for improvement. These cases are rare, though - he knows his stuff, of course !This course consists of 12 main chapters and this 'Quickstarter Guide'. The 'Quickstarter Guide' is a selection of the 40 variations that you should learn first to get a full overview of the Sicilian. It has all the information that you need to play it in your games, as the most frequently played lines are selected. It also features extensive explanations about ideas and concepts, serving as an introduction to the typical middle games. I suggest to learn the Quickstarter Guide first, then go through the individual chapters one by one, deepening your knowledge. 2.Nf3 Nc6 3.d4 The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. The Sveshnikov has three main lines: the first one arises after 5...e5 6.Ndb5 d6 7.Nd5 , which has become fashionable in the last year. The second one is 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 , which settles Black with doubled f-pawns early on. The third option is to play 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 , after which Black plays 9...Be7 , avoiding the doubled pawns. These three main lines are covered in five chapters of this course. White also has some lines that are all sidelines for a reason, but still useful to study. In particular on the junior/amateur level it is not guaranteed that players on the white side go for the critical lines. If you study the sidelines, you will have no problems whatsoever and often Black is getting the better game early on. 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted , but there have been many other names over the years. It was first used in a top level game by World Champion Emanuel Lasker against Carl Schlechter in 1910 , but Schlechter played the uncritical 6.Nb3 and Lasker obtained a good game easily. It was quite quickly figured out that 6. Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found

some new ideas for Black. They mostly investigated 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 and 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that are still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that Black should play 8... b5, rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky.Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally) , Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018.Now, what is so great about the Sveshnikov Variation ? In the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed ? I think this actually needs to be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In this chapter we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in a dedicated chapter. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. The two other main lines of the Sveshnikov start after 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5. Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. Back to the real position: after 8...b5 Black threatens ...b4, which leaves White with the choice between 9.Nd5 , usually followed by 9...Be7 10.Bxf6 Bxf6 or 8...b5 9.Bxf6 gxf6 10.Nd5. The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game. Now , the line 8. ..b5 9.Nd5 Be7 10.Bxf6 Bxf6 is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for

White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. White also has the line 9.Bxf6 gxf6 forced , because 9...Qxf6 10.Nd5 Qd8 11.c4 is too bad 10.Nd5. In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion.Contrary to Sicilians without ...e5, Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for Checkmate ! This is an important practical consideration that often allows Black to score points from objectively dubious positions. 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9.Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in a dedicated chapter. By far the most important line besides the main line is 11. c4 , which is a popular alternative seen at all levels of play. 9.Nd5 Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3. White's problem piece is the knight on a3 and the route c2-e3 looks very natural to

improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ... Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11...b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11. c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.Ndxb4 Black gets great compensation after this pawn grab. The move 13.Ncxb4 amounts to the same, as we will exchange on b4 anyway, leading to the same position. 13...Nxb4 14.Nxb4 Qb6 White now has no fully satisfactory solution. Hanging on to the pawn gives Black fantastic play, but the other lines are not attractive either. 15.Nd3 The greedy, but bad option. 15...Bb7 16.f3 Bh4+ Black provokes the move g3, weakening the long diagonal in the process. A coming ...f5 will be more effective this way. 17.g3 Bg5 Black has a great position for just one pawn. White's dark squares are terribly weak and castling is tough to accomplish.

☐ **Quickstarter Guide**
■ **Quickstarter Guide #06 - Sves,11. c4**

1.e4 c5 Hello and Welcome to 'Fight like Magnus: The Sicilian'! This opening course provides you with a full repertoire against 1. e4, based on the Sicilian Defense. I am a bit reluctant to write 'Defense', because in the Sicilian you don't intend to defend all that much, but rather want to 'fight fire with fire'!In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white king, which is fun to play and

tricky for White to handle. If you are looking for an active and ambitious opening for Black, you are studying exactly the right course. As the title suggests our repertoire choices are based on the opening play of the current World Champion Magnus Carlsen. Through his whole career Magnus has mostly relied on two moves against 1. e4: the symmetrical 1...e5 and 1...c5 , the Sicilian. Over the years the mix between the two moves shifted back and forth. 1... c5 was a frequent choice in his younger years, but he played it less after he became World Champion in 2013. This changed in 2018, when Magnus returned to the Sicilian, making it his main weapon in his title match against Fabiano Caruana. In this match (including the tiebreak) (Magnus played seven games with the black pieces, and all of them featured the Sicilian. He managed to win the rapid game in the tiebreak after drawing all six classical time control games in the regular match.) As of today (Nov 11, 2019) Magnus Carlsen has not lost a single Sicilian in Classical time control not only since this match, but even since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run.I am mentioning non-losing streaks, but what about wins ? Magnus has won many attractive games with the Sicilian, some of which are included as model games in this course. Alright, back to our repertoire concept. I have compiled a full repertoire for Black, based on the World Champion's repertoire. This means that any major choice should be according to games that Magnus has played, showing his belief in the merit of the line. This works well with most lines, but some rarer continuations never featured in the World Champion's games, so I selected lines that matched the structure and spirit of the overall repertoire.There are some cases where I suggest to improve on Magnus' play. I only do that if thorough engine-assisted analysis suggests that my alternative is significantly better or preserves more winning chances, while being of equal quality. You have to take into account that he has played the opening not only in Classical time controls, but also in Rapid and Blitz games. It is perfectly possible that he plays a second-tier move in a Blitz game, because he does not want to show his main preparation or simply forgot the line. In those cases it makes sense to not blindly copy all moves, but see if there is room for improvement. These cases are rare, though - he knows his stuff, of course !This course consists of 12 main chapters and this 'Quickstarter Guide'. The 'Quickstarter Guide' is a selection of the 40 variations that you should learn first to get a full overview of the Sicilian. It has all the information that you need to play it in your games, as the most frequently played lines are selected. It also features extensive explanations about ideas and concepts, serving as an introduction to the typical middle games. I suggest to learn the Quickstarter Guide first, then go through the individual chapters one by one, deepening your knowledge. 2.Nf3 Nc6 3.d4
The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. The Sveshnikov has three main lines: the first one arises after 5...e5 6.Ndb5 d6 7.Nd5 , which has become fashionable in the last year. The second one is 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 , which settles Black with doubled f-pawns early on.

The third option is to play 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 , after which Black plays 9...Be7 , avoiding the doubled pawns. These three main lines are covered in five chapters of this course. White also has some lines that are all sidelines for a reason, but still useful to study. In particular on the junior/amateur level it is not guaranteed that players on the white side go for the critical lines. If you study the sidelines, you will have no problems whatsoever and often Black is getting the better game early on. 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted , but there have been many other names over the years. It was first used in a top level game by World Champion Emanuel Lasker against Carl Schlechter in 1910 , but Schlechter played the uncritical 6.Nb3 and Lasker obtained a good game easily. It was quite quickly figured out that 6. Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 and 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that are still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that Black should play 8... b5, rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky.Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally) , Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018.Now, what is so great about the Sveshnikov Variation ? In the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed ? I think this actually needs to be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In this chapter we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in a dedicated chapter. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. The two other main lines of the Sveshnikov start after 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5. Before we look at those concrete lines, I need to mention how important

the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. Back to the real position: after 8...b5 Black threatens ...b4, which leaves White with the choice between 9.Nd5 , usually followed by 9...Be7 10.Bxf6 Bxf6 or 8...b5 9.Bxf6 gxf6 10.Nd5. The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game. Now , the line 8. ..b5 9.Nd5 Be7 10.Bxf6 Bxf6 is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. White also has the line 9.Bxf6 gxf6 forced , because 9...Qxf6 10.Nd5 Qd8 11.c4 is too bad 10.Nd5. In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion.Contrary to Sicilians without ...e5, Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for Checkmate ! This is an important practical consideration that often allows Black to score points from objectively dubious positions. 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9.Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in a dedicated

chapter. By far the most important line besides the main line is 11. c4 , which is a popular alternative seen at all levels of play. 9.Nd5 Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3. White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ... Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c4 While 11. c3 is still the main line, 11. c4 has gotten more popular starting from the mid 2000s. White forces 11...b4 , closing the queenside. This is a completely different approach compared to 11. c3, when White usually goes for a quick Nc2 and a4, attacking Black's queenside formation. After 11. c4 b4 the play is rather slow. White has tried various ways to put pressure on Black , but the current theoretical status is completely satisfactory for Black. There is one move order pitfall to avoid , right on move 12. Let's have a look. 11...b4 12.Nc2 0-0 This is a very important move order finesse that took me a while to understand. Black usually plays ...a5 and ...O-O, but should you play 12... a5 or 12... O-O first ? It turns out that it is more precise to play 12...O-O , but this is not very obvious and therefore important to remember. The reason is the move 13.Qf3 , which is considerably less dangerous after 12...O-O, as we will see. If White plays a slower move , like 13.Be2 or 13.g3 , we'll just follow up with 13...a5 and protect the b4-pawn, completing the queenside setup. By the way: 12... O-O does not blunder the b-pawn, we will get excellent compensation if White elects to take it. 13.g3 This is by far White's most popular move. If you compare it to the other continuations you will see that this is no coincidence. White does not get anywhere with a Be2-based setup and the fianchetto is the only other reasonable way to develop.On a more general note: it seems very difficult for White to make any headway with pure piece play, as we have seen in other lines. You can't generate serious pressure on the d-file and opening up the queenside with a3 leads to nothing much either. The only other way to alter the pawn structure seems to be f4, which is prepared by g3. Of course White needs to prepare

this a bit more, but after 13. g3 you need to expect this to happen later. 13...a5 14.Bg2 White also plays 14.h4 here , but this we have covered via 13. h4 a5 14. g3 - (lines #25-31.) 14...Be6 15.0-0 Bg5 16.Qd3 Qb8 Again this idea to allow ...Bd8-b6. I have a soft spot for this idea, but it's good to know that Black's game is not dependent on a single line, but rather flexible. Here Black has successfully played many other moves, ranging from the simplifying 16...Bxd5 to the original 16...Nb8 , which are all playable.

As of today (Nov 11, 2019) Magnus Carlsen has not lost a single Sicilian in Classical time control not only since this match, but even since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run.I am mentioning non-losing streaks, but what about wins ? Magnus has won many attractive games with the Sicilian, some of which are included as model games in this course. Alright, back to our repertoire concept. I have compiled a full repertoire for Black, based on the World Champion's repertoire. This means that any major choice should be according to games that Magnus has played, showing his belief in the merit of the line. This works well with most lines, but some rarer continuations never featured in the World Champion's games, so I selected lines that matched the structure and spirit of the overall repertoire.There are some cases where I suggest to improve on Magnus' play. I only do that if thorough engine-

assisted analysis suggests that my alternative is significantly better or preserves more winning chances, while being of equal quality. You have to take into account that he has played the opening not only in Classical time controls, but also in Rapid and Blitz games. It is perfectly possible that he plays a second-tier move in a Blitz game, because he does not want to show his main preparation or simply forgot the line. In those cases it makes sense to not blindly copy all moves, but see if there is room for improvement. These cases are rare, though - he knows his stuff, of course !This course consists of 12 main chapters and this 'Quickstarter Guide'. The 'Quickstarter Guide' is a selection of the 40 variations that you should learn first to get a full overview of the Sicilian. It has all the information that you need to play it in your games, as the most frequently played lines are selected. It also features extensive explanations about ideas and concepts, serving as an introduction to the typical middle games. I suggest to learn the Quickstarter Guide first, then go through the individual chapters one by one, deepening your knowledge. 2.Nf3 Nc6 3.d4 The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. The Sveshnikov has three main lines: the first one arises after 5...e5 6.Ndb5 d6 7.Nd5 , which has become fashionable in the last year. The second one is 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 , which settles Black with doubled f-pawns early on. The third option is to play 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 , after which Black plays 9...Be7 , avoiding the doubled pawns. These three main lines are covered in five chapters of this course. White also has some lines that are all sidelines for a reason, but still useful to study. In particular on the junior/amateur level it is not guaranteed that players on the white side go for the critical lines. If you study the sidelines, you will have no problems whatsoever and often Black is getting the better game early on. 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted , but there have been many other names over the years. It was first used in a top level game by World Champion Emanuel Lasker against Carl Schlechter in 1910 , but Schlechter played the uncritical 6.Nb3 and Lasker obtained a good game easily. It was quite quickly figured out that 6. Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 and 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that are still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that Black should play 8... b5, rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all

students of the legendary chess trainer and author Mark Dvoretsky.Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally) , Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018.Now, what is so great about the Sveshnikov Variation ? In the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed ? I think this actually needs to be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In this chapter we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that.  After 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in a dedicated chapter. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside.  The two other main lines of the Sveshnikov start after 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5. Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black.  Back to the real position: after 8...b5 Black threatens ...b4, which leaves White with the choice between 9.Nd5 , usually followed by 9...Be7 10.Bxf6 Bxf6  or 8...b5 9.Bxf6 gxf6 10.Nd5. The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game.  Now , the line 8. ..b5 9.Nd5 Be7 10.Bxf6 Bxf6 is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. White also has the line 9.Bxf6 gxf6  forced , because 9...Qxf6 10.Nd5 Qd8 11.c4 is too bad 10.Nd5. In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. Before we continue to examine the sidelines, I'd like to mention one very important aspect of the

Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion.Contrary to Sicilians without ...e5, Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for Checkmate ! This is an important practical consideration that often allows Black to score points from objectively dubious positions. 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9.Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in a dedicated chapter. By far the most important line besides the main line is 11. c4 , which is a popular alternative seen at all levels of play. 9.Nd5 Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3. White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ... Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines. 10...Bxf6 Now White's massive main line is 11.c3 , but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn. 11.c3 This is the most popular move for White. In the first decades of the Sveshnikov it was basically the only one played, before 11. c4 gained some ground.

In this chapter we are analysing 11. c3, while other continuations after 9. Nd5, in particular the 11. c4 line, are discussed in the previous chapter.The move 11. c3 makes a very logical impression. The knight on a3 is clearly a problem piece and needs to be improved. The route via c2 is now possible and often the knight soon connects to the weak d5-square via e3 or, less often, via b4. After the knight is moved away from a3 White gains the option to play a4, attacking the extended black queenside. White's strategy in this line is usually connected with this idea, but there are other options as well. White quite frequently plays the move h4, covering the g5-square and preventing ... Bg5. This may also be the start of play on the kingside, very much depending on the concrete circumstances.Alright, what is black supposed to do ? The good news is that Black has a number of options and Magnus Carlsen has tried most of them. This is also the bad news for an author: you need to pick a line if you want to simply copy what Magnus always does. So what are the options ? First of all , there is one independent and non-transpositional line that Black has available now. He may play 11...Ne7 , and this line was used once by the World Champion in a 2019 Blitz game against Lenier Dominguez. After the usual 12.Nxf6+ gxf6 you get the same pawn structure as after 9. Bxf6, featuring the doubled f-pawns. I think this line is not bad, but it was only employed once by Magnus in a Blitz game. In more important encounters he has used more standard main lines. To understand how the main lines work it makes sense to look at how the theory developed over the course of time. In the early years of the Sveshnikov they started with 11...O-O and after 12. Nc2 played 12...Bg5. The bishop usually goes to g5, watching over the e3-square, freeing the f-pawn and allowing the queen to move without allowing Nxf6+ with doubled pawns. The drawback of 12... Bg5 is 13.a4 , when Black needs to capture with 13...bxa4. it usually a bad idea to play something like 13...Rb8 14.axb5 axb5 , when White controls the a-file and b5 is a useful target for White. After 13... bxa4 White just plays 14.Rxa4 and is happy to have a setup with Bc4 and often b3 next. This type of position is not terrible for Black, but nowadays Black tries to avoid it in view of better options. One idea is to play an early ...Rb8, so that after White pushes a4 we are able to take and immediately attack b2, making the simple recapture on a4 problematic. There are multiple ways to employ the ...Rb8 idea. You can play it right away with 11...Rb8 , or wait until White has played Nc2, so for example 11...O-O 12.Nc2 Rb8 or 11...Bg5 (as we know a generally useful move) 12.Nc2 Rb8. So essentially Black has three moves that we want to play (...O-O, ...Rb8 and ... Bg5) and he may do so in every imaginable order ! Magnus has played various orders, so we don't see a clear preference on his part. Let's work out what the difference between them is. First of all , let's look at 11...O-O 12.Nc2 Rb8. With 12... Rb8 we have defanged 13. a4, but White has the option to play 13.h4 , which stops our intended next move 13... Bg5. This is the drawback of the early ...O-O move order. So what about 11...Rb8 12.Nc2 Bg5 or 11...Bg5 12.Nc2 Rb8 ? Here the key point to study is 13.a4 bxa4 14.Ncb4 , when both 14.. .Nxb4 15.cxb4 and 15.Nxb4 lead to long , tactical lines. These lines are fine for Black , but you need to basically learn many variations beyond move 20 on a move-by-move basis. It's tough to work it out

over the board and therefore more rote memorization than anything else. If possible I'd like to avoid those lines , unless it is absolutely necessary and the alternatives are unattractive. I looked at 11...O-O 12.Nc2 Rb8 13.h4 in comparison and felt this is much easier to handle , but of course considerably less sharp and tactical. This is largely a matter of personal preference and less a matter of move/line quality. If you like to be as unpredictable as the World Champion , you may start with the line presented here to get you going and later add the other move orders that Carlsen plays as well. 11...0-0 As explained in the remarks to 11. c3, Black has a range of lines and move orders available. 11... O-O felt like the most practical choice to me. 12.Nc2 Rb8 As already explained earlier this move is played to discourage White to play a4, due to the pressure down the b-file. If you play 12...Bg5 instead you allow 13.a4 , when you have nothing better than 13...bxa4 14.Rxa4. This line is still played nowadays , but I feel it is an unnecessary concession. After 12...Rb8 the move 13.a4 is still playable , but rather harmless. The only possible issue with 12...Rb8 is the reply 13.h4 , which prevents ...Bg5. The bishop move to g5 is desirable for Black, so we need to have something prepared against the h-pawn push. Instead of 13. h4 White may also play a slower setup with 13.Be2 or 13.Bd3 , but these don't feel very challenging for Black. 13.Be2 White simply develops the bishop and prepares castling kingside. It is still very frequently played , even though 13.h4 seems more testing these days. Of course 13. Be2 is a classical and sound move, but it does not exert any direct pressure or poses concrete problems. 13...Bg5 A standard part of our setup. We clear the way for the f-pawn, are now ready to take a knight on e3 if desirable and give more flexibility for the queen. We also enable ...Ne7 to be played soon. 14.0-0 Kh8 If in doubt, play what Magnus plays ! This is not a bad general approach, but for this repertoire part of the concept, of course. The World Champion has played this twice in 2019 and had no problems at all in both games.That being said, Black has good alternatives to the king move, which does not look extremely obvious. So why did Magnus go for 14... Kh8 ? Well, in this structure there are some moves that are generally useful. Let's have a look: a ...a5 prepares ...b4 and prevents Ncb4, b ...Be6 develops, c .. .g6 prepares ...f5, d ...Ne7 to challenge the knight on d5 and e ...Kh8 is useful in any ...f5 scenario, to avoid possible checks on the a2-g8 diagonal and to clear the g-file for ideas like ...Rg8, once ...f5/exf5/...gxf5 is on the board. So why 14... Kh8 first and not one of the others ? Let's check the alternatives: First of all, 14...a5 can be answered by 15.Na3 ! , which is a bit awkward to meet , as 15...b4 16.Nb5 is annoying and 14...a5 15.Na3 ! Na7 is not ideal either. 14...Be6 is possible and not bad in my mind. One argument against it could be that you are not able to play ...Bb7 anymore, which was Carlsen's reply to Bg4 against Giri. You may also question if ...Be6 is necessary if you like to play ...f5 soon. Next we have 14...g6 , which is not as flexible as 14... Kh8. It also prepares ... f5, but is not as useful in other scenarios. Finally there is 14...Ne7 , which is the most solid move. We will see this idea after 14... Kh8 15. a3 Ne7. It is already playable in move 14 for sure, but less combative compared to 14... Kh8. Once you play ... Ne7 you focus on fighting for d5 and are less likely to mix it up with ...f5. To

sum it up, there are alternatives, and I think Carlsen went for 14... Kh8 because it is a flexible move that is not yet explored as much as the other choices. This leads us to an additional point in favour of copying the World Champion at this point. The line we are examining right now was recommended in an important repertoire book for White, written by GM John Shaw: 'Playing 1. e4 - Sicilian Main lines'. Shaw checks most of Black's alternatives on move 14, but not 14... Kh8. This makes this move more attractive for us, as White players might have studied up to this point, but likely don't know the king move if they only relied on this popular book. After 14... Kh8 we will check four options for White, illustrating the main ideas in the process. 15.Qd3 White goes for a quick play on the d-file, but we are ready for counterplay. 15...f5 This looks particularly strong at this moment , given that 16.exf5 Bxf5 looks unattractive for White. 16.Bf3 g6 17.Rfd1 a5 Now what ? We see a typical dilemma of the Sveshnikov pawn structure. It is just not possible to have a knight on d5 and apply pressure against d6 at the same time ! You can only do one at a time, but each on its own is something that Black can handle well. 18.Nde3 Bxe3 Black also has the interesting 18...f4 , but I wanted to show a strategic idea with this move. 19.Nxe3 f4 20.Nd5 Be6 Now White has a great looking knight on d5, but it actually has no square to go to ! In this position White needs to get something going on the queenside quickly, otherwise Black's play on the kingside will be tough to handle.

☐ **Quickstarter Guide**
■ **Quickstarter Guide #09 - Sves,11. c3**

1.e4 c5 Hello and Welcome to 'Fight like Magnus: The Sicilian'! This opening course provides you with a full repertoire against 1. e4, based on the Sicilian Defense. I am a bit reluctant to write 'Defense', because in the Sicilian you don't intend to defend all that much, but rather want to 'fight fire with fire'!In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white king, which is fun to play and tricky for White to handle. If you are looking for an active and ambitious opening for Black, you are studying exactly the right course. As the title suggests our repertoire choices are based on the opening play of the current World Champion Magnus Carlsen. Through his whole career Magnus has mostly relied on two moves against 1. e4: the symmetrical 1...e5 and 1...c5 , the Sicilian. Over the years the mix between the two moves shifted back and forth. 1... c5 was a frequent choice in his younger years, but he played it less after he became World Champion in 2013. This changed in 2018, when Magnus returned to the Sicilian, making it his main weapon in his title match against Fabiano Caruana. In this match (including the tiebreak) (Magnus played seven games with the black pieces, and all of them featured the Sicilian. He managed to win the rapid game in the tiebreak after drawing all six classical time

control games in the regular match.) As of today (Nov 11, 2019) Magnus Carlsen has not lost a single Sicilian in Classical time control not only since this match, but even since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run.I am mentioning non-losing streaks, but what about wins ? Magnus has won many attractive games with the Sicilian, some of which are included as model games in this course. Alright, back to our repertoire concept. I have compiled a full repertoire for Black, based on the World Champion's repertoire. This means that any major choice should be according to games that Magnus has played, showing his belief in the merit of the line. This works well with most lines, but some rarer continuations never featured in the World Champion's games, so I selected lines that matched the structure and spirit of the overall repertoire.There are some cases where I suggest to improve on Magnus' play. I only do that if thorough engine-assisted analysis suggests that my alternative is significantly better or preserves more winning chances, while being of equal quality. You have to take into account that he has played the opening not only in Classical time controls, but also in Rapid and Blitz games. It is perfectly possible that he plays a second-tier move in a Blitz game, because he does not want to show his main preparation or simply forgot the line. In those cases it makes sense to not blindly copy all moves, but see if there is room for improvement. These cases are rare, though - he knows his stuff, of course !This course consists of 12 main chapters and this 'Quickstarter Guide'. The 'Quickstarter Guide' is a selection of the 40 variations that you should learn first to get a full overview of the Sicilian. It has all the information that you need to play it in your games, as the most frequently played lines are selected. It also features extensive explanations about ideas and concepts, serving as an introduction to the typical middle games. I suggest to learn the Quickstarter Guide first, then go through the individual chapters one by one, deepening your knowledge. 2.Nf3 Nc6 3.d4 The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. The Sveshnikov has three main lines: the first one arises after 5...e5 6.Ndb5 d6 7.Nd5 , which has become fashionable in the last year. The second one is 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 , which settles Black with doubled f-pawns early on. The third option is to play 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 , after which Black plays 9...Be7 , avoiding the doubled pawns. These three main lines are covered in five chapters of this course. White also has some lines that are all sidelines for a reason, but still useful to study. In particular on the junior/amateur level it is not guaranteed that players on the white side go for the critical lines. If you study the sidelines, you will have no problems whatsoever and often Black is getting the better game early on. 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted , but there have been many other names over the years. It was first used in a top level game by World Champion Emanuel Lasker against Carl Schlechter in 1910 , but Schlechter played the uncritical 6.Nb3 and Lasker obtained a good game easily. It was quite quickly

figured out that 6. Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 and 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that are still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that Black should play 8... b5, rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky.Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally) , Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018.Now, what is so great about the Sveshnikov Variation ? In the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed ? I think this actually needs to be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In this chapter we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in a dedicated chapter. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. The two other main lines of the Sveshnikov start after 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5. Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. Back to the real position: after 8...b5 Black threatens ...b4, which leaves White with the choice between 9.Nd5 , usually followed by 9...Be7 10.Bxf6 Bxf6 or 8...b5 9.Bxf6 gxf6 10.Nd5. The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game. Now , the line 8. ..b5 9.Nd5 Be7 10.Bxf6 Bxf6 is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see

that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. White also has the line 9.Bxf6 gxf6 forced , because 9...Qxf6 10.Nd5 Qd8 11.c4 is too bad 10.Nd5. In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion.Contrary to Sicilians without ...e5, Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for Checkmate ! This is an important practical consideration that often allows Black to score points from objectively dubious positions. 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9.Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in a dedicated chapter. By far the most important line besides the main line is 11. c4 , which is a popular alternative seen at all levels of play. 9.Nd5 Be7 10.Bxf6 In my mind this is the only logical move, trying to establish control over the light squares, in particular d5. After the trade White retains three pieces that may use d5, while Black only has two to fight for this square.A downside from White's perspective is the loss of the bishop pair, which is a serious concession. Once you have given it up, you are not getting it back ! I know this sounds extremely basic, but it is a very relevant factor.In the middle game Black's dark squared bishop is a key piece. If you manage to put it to effective use, it will often be very strong, as it has no counterpart any more. You will see some examples of this theme in the 11. c4 variation, when ...Bd8-b6 is an excellent idea to keep in mind. A more common scenario is to see the bishop on the

diagonal h8-a1, for example on g7 after a later ...g6 and ...f5 is played. In some cases Black may also simply trade the bishop against a knight showing up on e3. White's problem piece is the knight on a3 and the route c2-e3 looks very natural to improve it. The trade on e3 changes the situation about the d5-square again, as both sides have a bishop and knight to control d5. Depending on the concrete circumstances Black might even be able to play d6-d5, for instance prepared by ... Be6 and ...Ne7. We will discuss more ideas for both sides in the notes to the individual lines.  10...Bxf6 Now White's massive main line is 11.c3 ,  but 11.c4 has seen a surge of popularity over the last decade. The alternatives don't convince and at best transpose to less challenging versions of the two main moves with the c-pawn.  11.c3 This is the most popular move for White. In the first decades of the Sveshnikov it was basically the only one played, before 11. c4 gained some ground. The move 11. c3 makes a very logical impression. The knight on a3 is clearly a problem piece and needs to be improved. The route via c2 is now possible and often the knight soon connects to the weak d5-square via e3 or, less often, via b4. After the knight is moved away from a3 White gains the option to play a4, attacking the extended black queenside. White's strategy in this line is usually connected with this idea, but there are other options as well. White quite frequently plays the move h4, covering the g5-square and preventing ... Bg5. This may also be the start of play on the kingside, very much depending on the concrete circumstances.Alright, what is black supposed to do ? The good news is that Black has a number of options and Magnus Carlsen has tried most of them. This is also the bad news for an author: you need to pick a line if you want to simply copy what Magnus always does.  So what are the options ? First of all , there is one independent and non-transpositional line that Black has available now. He may play 11...Ne7 , and this line was used once by the World Champion in a 2019 Blitz game against Lenier Dominguez. After the usual 12.Nxf6+ gxf6 you get the same pawn structure as after 9. Bxf6, featuring the doubled f-pawns. I think this line is not bad, but it was only employed once by Magnus in a Blitz game. In more important encounters he has used more standard main lines.  To understand how the main lines work it makes sense to look at how the theory developed over the course of time. In the early years of the Sveshnikov they started with 11...O-O and after 12.Nc2 played 12...Bg5. The bishop usually goes to g5, watching over the e3-square, freeing the f-pawn and allowing the queen to move without allowing Nxf6+ with doubled pawns. The drawback of 12... Bg5 is 13.a4 , when Black needs to capture with 13...bxa4.  it is usually a bad idea to play something like 13... Rb8 14.axb5 axb5 , when White controls the a-file and b5 is a useful target for White. After 13... bxa4 White just plays 14.Rxa4 and is happy to have a setup with Bc4 and often b3 next. This type of position is not terrible for Black, but nowadays Black tries to avoid it in view of better options. One idea is to play an early ...Rb8, so that after White pushes a4 we are able to take and immediately attack b2, making the simple recapture on a4 problematic. There are multiple ways to employ the ...Rb8 idea. You can play it right away with  11...Rb8 , or wait until White has played Nc2, so for example  11...O-O 12.Nc2 Rb8  or 11...Bg5 (as we know a

generally useful move) 12.Nc2 Rb8. So essentially Black has three moves that we want to play (...O-O, ...Rb8 and ... Bg5) and he may do so in every imaginable order ! Magnus has played various orders, so we don't see a clear preference on his part. Let's work out what the difference between them is. First of all , let's look at 11...O-O 12.Nc2 Rb8. With 12... Rb8 we have defanged 13. a4, but White has the option to play 13.h4 , which stops our intended next move 13... Bg5. This is the drawback of the early ...O-O move order. So what about 11...Rb8 12.Nc2 Bg5 or 11...Bg5 12. Nc2 Rb8 ? Here the key point to study is 13.a4 bxa4 14.Ncb4 , when both 14.. .Nxb4 15.cxb4 and 15.Nxb4 lead to long , tactical lines. These lines are fine for Black , but you need to basically learn many variations beyond move 20 on a move-by-move basis. It's tough to work it out over the board and therefore more rote memorization than anything else. If possible I'd like to avoid those lines , unless it is absolutely necessary and the alternatives are unattractive. I looked at 11...O-O 12.Nc2 Rb8 13. h4 in comparison and felt this is much easier to handle , but of course considerably less sharp and tactical. This is largely a matter of personal preference and less a matter of move/line quality. If you like to be as unpredictable as the World Champion , you may start with the line presented here to get you going and later add the other move orders that Carlsen plays as well. 11...0-0 As explained in the remarks to 11. c3, Black has a range of lines and move orders available. 11... O-O felt like the most practical choice to me. 12.Nc2 Rb8 As already explained earlier this move is played to discourage White to play a4, due to the pressure down the b-file. If you play 12... Bg5 instead you allow 13.a4 , when you have nothing better than 13...bxa4 14.Rxa4. This line is still played nowadays , but I feel it is an unnecessary concession. After 12...Rb8 the move 13.a4 is still playable , but rather harmless. The only possible issue with 12...Rb8 is the reply 13.h4 , which prevents ...Bg5. The bishop move to g5 is desirable for Black, so we need to have something prepared against the h-pawn push. Instead of 13. h4 White may also play a slower setup with 13.Be2 or 13.Bd3 , but these don't feel very challenging for Black. 13.h4 This move is regarded as the critical one against the move order 11...O-O 12. Nc2 Rb8. White stops ...Bg5 and this is no small feat. If you study the move 13. Be2 and 13. Bd3 you see that ...Bg5 and ... Ne7 is a common way for Black to continue. Now 13...Ne7 is a huge concession , as 14.Nxf6+ gxf6 changes the pawn structure in White's favour. 13...g6 It looks a bit odd at first to play ... g6 AFTER White has played h4, but we don't need to worry about the h-file here. White has no attacking pieces and the bishop defends the dark squares reliably. With 13... g6 Black intends to play ...Bg7, then proceed with the play for the d5-square with ...Ne7. The main incentive to select it for the repertoire was the game W. So-M.Carlsen, Stavanger 2019 - if in doubt, play what Magnus plays. 14.g3 Bg7 15.h5 Ne7 16.Nce3 Nxd5 17.Nxd5 This position was reached in the mentioned So-Carlsen game. Now Magnus went for 17...Be6 18.Bh3 Bxd5 19. Qxd5 b4 and later drew the game. I have to admit that I don't like this approach for Black. The resulting positions don't offer much activity and the alternative 17... Bb7 looks perfectly fine. It has been tested in many high level correspondence games and Black had no problems. 17...Bb7 Black's basic idea is to play ...Bf6-g5 and ...Rc8-c5

next, fighting for control of d5. Some sample continuations from here are examined in the dedicated chapter.

☐ **Quickstarter Guide**
■ **Quickstarter Guide Sves**

1.e4 c5 Hello and Welcome to 'Fight like Magnus: The Sicilian'! This opening course provides you with a full repertoire against 1. e4, based on the Sicilian Defense. I am a bit reluctant to write 'Defense', because in the Sicilian you don't intend to defend all that much, but rather want to 'fight fire with fire'!In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white king, which is fun to play and tricky for White to handle. If you are looking for an active and ambitious opening for Black, you are studying exactly the right course. As the title suggests our repertoire choices are based on the opening play of the current World Champion Magnus Carlsen. Through his whole career Magnus has mostly relied on two moves against 1. e4: the symmetrical 1...e5 and 1...c5 , the Sicilian. Over the years the mix between the two moves shifted back and forth. 1... c5 was a frequent choice in his younger years, but he played it less after he became World Champion in 2013. This changed in 2018, when Magnus returned to the Sicilian, making it his main weapon in his title match against Fabiano Caruana. In this match (including the tiebreak) (Magnus played seven games with the black pieces, and all of them featured the Sicilian. He managed to win the rapid game in the tiebreak after drawing all six classical time control games in the regular match.) As of today (Nov 11, 2019) Magnus Carlsen has not lost a single Sicilian in Classical time control not only since this match, but even since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run.I am mentioning non-losing streaks, but what about wins ? Magnus has won many attractive games with the Sicilian, some of which are included as model games in this course. Alright, back to our repertoire concept. I have compiled a full repertoire for Black, based on the World Champion's repertoire. This means that any major choice should be according to games that Magnus has played, showing his belief in the merit of the line. This works well with most lines, but some rarer continuations never featured in the World Champion's games, so I selected lines that matched the structure and spirit of the overall repertoire.There are some cases where I suggest to improve on Magnus' play. I only do that if thorough engine-assisted analysis suggests that my alternative is significantly better or preserves more winning chances, while being of equal quality. You have to take into account that he has played the opening not only in Classical time controls, but also in Rapid and Blitz games. It is perfectly possible that he plays a second-tier move in a Blitz game, because he does not want to show his main preparation or simply forgot the

line. In those cases it makes sense to not blindly copy all moves, but see if there is room for improvement. These cases are rare, though - he knows his stuff, of course !This course consists of 12 main chapters and this 'Quickstarter Guide'. The 'Quickstarter Guide' is a selection of the 40 variations that you should learn first to get a full overview of the Sicilian. It has all the information that you need to play it in your games, as the most frequently played lines are selected. It also features extensive explanations about ideas and concepts, serving as an introduction to the typical middle games. I suggest to learn the Quickstarter Guide first, then go through the individual chapters one by one, deepening your knowledge. 2.Nf3 Nc6 3.d4 The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. The Sveshnikov has three main lines: the first one arises after 5...e5 6.Ndb5 d6 7.Nd5 , which has become fashionable in the last year. The second one is 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 , which settles Black with doubled f-pawns early on. The third option is to play 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Nd5 , after which Black plays 9...Be7 , avoiding the doubled pawns. These three main lines are covered in five chapters of this course. White also has some lines that are all sidelines for a reason, but still useful to study. In particular on the junior/amateur level it is not guaranteed that players on the white side go for the critical lines. If you study the sidelines, you will have no problems whatsoever and often Black is getting the better game early on. 3...cxd4 4.Nxd4 Nf6 5.Nc3 e5 This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted , but there have been many other names over the years. It was first used in a top level game by World Champion Emanuel Lasker against Carl Schlechter in 1910 , but Schlechter played the uncritical 6.Nb3 and Lasker obtained a good game easily. It was quite quickly figured out that 6. Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 and 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that are still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that Black should play 8... b5, rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky.Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally) , Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov

on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018.Now, what is so great about the Sveshnikov Variation ? In the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed ? I think this actually needs to be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In this chapter we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in a dedicated chapter. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. The two other main lines of the Sveshnikov start after 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5. Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. Back to the real position: after 8...b5 Black threatens ...b4, which leaves White with the choice between 9.Nd5 , usually followed by 9...Be7 10.Bxf6 Bxf6 or 8...b5 9.Bxf6 gxf6 10.Nd5. The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game. Now , the line 8. ..b5 9.Nd5 Be7 10.Bxf6 Bxf6 is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. White also has the line 9.Bxf6 gxf6 forced , because 9...Qxf6 10.Nd5 Qd8 11.c4 is too bad 10.Nd5. In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion.Contrary to Sicilians without ...e5, Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses

due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for Checkmate ! This is an important practical consideration that often allows Black to score points from objectively dubious positions. 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5. The difference between the two options is substantial. After the immediate 9.Nd5 Black plays 9...Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop , while after 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. In this chapter we will be examining all lines after 9. Nd5 except the main line 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3 , which is examined in a dedicated chapter. By far the most important line besides the main line is 11. c4 , which is a popular alternative seen at all levels of play. 9.Nd5 Be7 10.Nxe7 This move makes an odd impression, but it is the only option that does not give Black the pair of bishops. That seems to be the only upside, though. Black has no problem at all with control over d5 and gets active play quickly. 10...Nxe7 Stronger than 10...Qxe7. Now e4 is immediately attacked and the knight supports future ...d5 and/ or ...f5 pawn breaks. 11.Bxf6 gxf6 12.c4 The most ambitious and sharp move, attacking the weakened queenside and trying to make use of the offside knight on a3. 12...f5 Very instructive ! The move c4 is frequently seen in the Sveshnikov, giving Black three options. You can take on c4, play....b4 or just ignore it and allow White to take on b5. While each situation has its own specific details, there are some general considerations to take into account.First of all, it is almost never good to take on c4, allowing the knight to enter the game on c4. You should only take if you have a very concrete reason to do so, like winning material or a clear tactic. Playing ...b4 is more likely to be a good reply, trying to keep the queenside closed. Here this fails to 12... b4 13.Qa4+ , dropping the b-pawn. The third option is the most aggressive approach and quite often the most attractive. We will frequently see this idea in the line 9. Bxf6 gxf6 10. Nd5 Bg7 11. Bd3 Ne7 12. Nxe7 Qxe7, when c4 is regularly ignored and answered by ...f5. Black does not mind to give up a pawn or two on the queenside for a central pawn roller. Let's return to the game position, which features the same pawn structure as the mentioned line. 13.exf5 Nxf5 14.cxb5 Nd4 Black has good compensation for the pawn in this position. I'll show the most important line. 15.bxa6 Bxa6 16.Bxa6 Qa5+ 17.Qd2 Qxa6 We are stopping O-O, which gives us good play. As it happens often the engines show a way for White to defend, but it is not easy at all for a human player to do the same.

☐ **Quickstarter**
■ **Pelikan Nb8**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we are playing the Pelikan Variation, which according to me, is one of the best two Sicilians, equally good with the Najdorf. 6.Ndb5 d6 The only move to keep a good game. If Black allows Nd6 the position is a mess for them. 7.Nd5 Recently has gained a lot of popularity, all those lines with 7.Bg5 have been overused and White doesn't seem to get any advantage. Apart from this, we will look for the same kind of structure for this and other variations. 7...Nxd5 8.exd5 Nb8 Probably we will find this move more often than any other over the board. This is the most common structure where Black is going to try to have some counterplay on the Kingside and we will try to have our play on the other side of the board. With 9.c4!? we would get similar positions – it is the variation with most games, however 9.a4 has gained more popularity. 9.a4 The idea of this move is to bring back our Knight to a3 if Black attacks it with …a6. Then we will continue with Nc4 and a5 in the future. 9...Be7 The most flexible move, it is evident, that Bishop was going to move to e7 and Black will castle short. However other moves such as 9...Nd7 , 9...a6 or 9... f5 have some issues to solve depending on White's move. 10.Bd2 The most precise move order to get the position we are looking for. Also it is less known than 10.Be2, the problem with 10.Be2 is 10... Nd7! 11.Bd2 Nf6! and if 10. Be2 Nd7! 11.O-O O-O 11.Bd2 a6 12.Na3 a5! which is a position we want to avoid with this order. 10...0-0 11.a5 is also very interesting, however, this move order is more flexible. 11.Be2 Nd7 12.a5 With this precise order we arrive to this position where we have avoided the a6+a5 line. This will help us to bring most of our opponents out of the book while we also get out of the best variation for Black. 12...a6 13.Na3 Nf6 A vCry interesting idea and concrete which has not been tested over the board. îîStartBracketîîit has been on correspondenceîîEndBracketîî. According to engines in depth, Black is very close to equality; however, their position is pretty uncomfortable in practice. 13.c4?! Ne4!= . 14.Bb4 b5 15.axb6!? Bb7 16.Ba5 Bxd5 17.O-O Bb7 18.c4 . We have arrived to a complex position where Black has to prove a lot and his pawn on b6 is annoying but I think the text move creates a lot of problems for Black. 15.c4 Bb7 Way better than taking directly, now White is forced to take with the Bishop on c4. 16.0-0 bxc4 17.Bxc4 Rc8 18.b3 We have arrived to a very complex position: the weakness on a6 is more evident than the weakness on d5 because takes more effort to defend it. Next step would be to bring the Knight back to e3 and both Rooks to the center.

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 After this move, we are playing the Pelikan Variation, which according to me, is one of the best two Sicilians, equally good with the Najdorf. 6.Ndb5 d6 The only move to keep a good game. If Black allows Nd6 the position is a mess for them. 7.Nd5 Recently has gained a lot of popularity, all those lines with 7.Bg5 have been overused and White doesn't seem to get any advantage. Apart from this, we will look for the same kind of structure for this and other variations. 7...Nxd5 8.exd5 Ne7 8...Nb4 9.c3 Na6 10.Be3 The knight is very awkward on a6 and White can go on with normal piece development. 9.c4 Ng6 Has been used by Carlsen multiple times in the World Championship, after which it became very popular. 10.Qa4 Very concrete move, we are tickling our opponent. They are forced to play …Bd7 and then we will place our Queen on b4, very annoying for them. 10...Bd7 11.Qb4 Bf5 12.h4 We are trying to chase out that White Knight enabling Bg5 in some positions. if they place their pawn on h5 then they will have some long-term issues without castling because the h5 pawn would be very weak for the rest of the game. 12...h5 13.Bg5 We take advantage of that Bishop, it can't be moved to e7 because of the d6 weakness. On the other hand f6 creates a lot of weaknesess. So Black will move the Queen while we have developed another piece. 13...Qb8 13...f6 Too weakening 14.Be3 a6 15.Nc3 Qd7 16.a4 . 14.Be2 We keep developing and h5 is a target now. 14...a6 They have to attack that Knight so they could develop in a normal way. 15.Nc3 Qc7 16.g3 Be7 17.Be3 e4 This is Black's usual plan in this kind of position. Black is trying to give some life to their pieces. We must be careful with White squares. 18. Rd1!? . 18.Qa4+ 18.Rd1!? 18...Kf8 18...Bd7 19.Qb3 Bf5 Thanks to this little maneuver our queen is slightly closer to the kingside in case we need her majesty via c2 or d1. 20.O-O O-O 21.Bxh5 . If 19...f5 20.O-O-O Ne5 21.Kb1 O-O 22.Rd2 . If 21...Rc8 22.c5 . 19.0-0 Ne5 20.Rad1 We activate our Rooks on the center and we will prepare c5 to have some freedom on the Queen side. 20...Bg4 20...Re8 21.c5 dxc5 22.Nxe4 Bxe4 23.Qxe4 20...Rd8 21.Rd4 21.Bxg4 hxg4 22.Nxe4 Qxc4 23.Qxc4 Nxc4 24.Bf4

All our pieces are in active positions and they will be improved very fast while Black will have a lot of passive pieces.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Ng6 If Black could castle he would have a great position. 10.Qa4 Creating a deadly threats. 10...Bd7 Only move. 11.Qb4 White is annoying Black and constantly attacking some pawns. Here Black has choice between two approximately similar options: Bf5 and Qb8. 11...Bf5 Black would like to place pawn on f5, but he needs to defend the pawn first. 12.h4 h5 Black should stop h5. 13.Bg5 Qb8 Practically the only move, 13...Be7 looks quite dubious, after 14.Bxe7 Kxe7 15.c5 Black's king is wide open. 14.Be2 White develops. 14...a6 Black must kick out this knight to include his rook and queen in the game. 15.Nc3 Qc7 16.g3 Restricting the black knight, and overprotecting the pawn on h4. 16...Be7 17.Be3 The exchange of the dark-squared bishops suits Black, and White needs this bishop. 17...Nf8 Was played in the game K.Alekseenko - Y. Kuzubov, Konya 2019. White should choose the plan with Na4, O-O and Rc1, and the move order isn't that important. 18.Na4 Nd7 19.0-0 0-0 20.Rac1 White has a slight advantage thanks to the spatial advantage on the queenside. Black still has no counterplay. Taking the pawn on h5 allows Bd3 followed by e4 and Ne5 when Black gets enough counterplay on the light squares.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Ng6 If Black could castle he would have a great position. 10.Qa4 Creating a deadly threats. 10...Bd7 Only move. 11.Qb4 White is annoying Black and constantly attacking some pawns. Here Black has choice between two approximately similar options: Bf5 and Qb8. 11...Bf5 Black would like to place pawn on f5, but he needs to defend the pawn first. 12.h4 h5 Black should stop h5. 13.Bg5 Qb8 Practically the only move, 13...Be7 looks quite dubious, after 14.Bxe7 Kxe7 15.c5 Black's king is wide open. 14.Be2 White develops. 14...a6 Black must kick out this knight to include his rook and queen in the game. 15.Nc3 Qc7 16.g3 Restricting the black knight, and overprotecting the pawn on h4. 16...Be7 17.Be3 The exchange of the dark-squared bishops suits Black, and White needs this bishop. 17...e4 Following the World Champion. Black is focused on the light squares. 18.Qa4+ We will see later, why this move is good. If 18.O-O then O-O 19.Bxh5 Ne5 Was the introduction to a horrible defeat for White in Karjakin - Carlsen, Shamkir 2019. White has to be very careful in the whole system when he grabs the pawn. 18...Bd7 19.Qb3 Black doesn't have anything better than going back to f5 with the bishop. And 19.Qd1 wins a pawn by force, but it is not the end of the world for Black. 19...O-O 20.Nxe4 Rae8 can become very messy. Black's pieces are nicely coordinated. 19...Bf5 So what is the big difference between the queen on b3 or b4? 20.0-0 0-0 20...Ne5 is too early because of 21.Qc2 when the pawn on e4 drops. 21.Bxh5 Ne5 22.Bd4 22...Nd3 doesn't come with a tempo and that is why the queen is on the b3 square. 22...Qxc4 Black regains the pawn. 23.Qxc4 Nxc4 24.Rfe1 Attacking the e4 pawn. 24...Nxb2 Black took the pawn first. 25.Reb1 Switching plans, White takes the b7 pawn, while

the other on e4, will remain weak. 25...Nd3 26.Rxb7 Bd8 27.Nd1 With Ne3 next, White has the advantage since Black's pawns are weak.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Nb8**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Black here has a choice between Nb8 and Ne7. The first one had a better reputation, but the World Champion revived the whole Ne7 line. 8...Nb8 9.a4 White has two ways to solve the problem of the b5-knight, he can play 9.c4 and return the knight to c3, or play in a modern way 9.a4 and return the knight to a3 where it can reach his ideal square in this pawn structure, the c4 square. 9...Be7 Black develops his kingside first, and is not in a hurry to play a6. 10.Be2 White also develops, before pushing on the queenside with a5. 10...0-0 11.Bd2 TheCmost common move is 11.O-O but after 11...Nd7 12.Bd2 a6 13.Na3 a5 practice has shown that Black has good chances there. With this move order îîStartBracketîîBd2 before castlingîîEndBracketîî White fights against the mentioned plan îîStartBracketîîa6 followed by a5îîEndBracketîî and doesn't spoil his position. The bishop goes to d2, to guard the pawn on a5, or to attack the black pawn depending on our opponent's reaction. 11...f5 Usually, the best plan for Black is to play on the kingside, and postpone playing a6 as long as possible. 12.a5 Improving on the queenside and waiting for reply. 12...f4 I'm not impressed by such moves, especially when White hasn't castled yet. Black does gain some space on the kingside and prevents White from playing f4, but weakens the e4 square and the light squares in general. 13.c4 White ignores opponents ideas, and continues with his plan. 13...Na6 Playing a6 only helps White's knight to reach the e4 square, so Black tries to be smart. 14.0-0 It is safe to castle now. 14...e4 Black must try this move, even if it loses. 15.Nc3 White can take the pawn. 15...f3 Black doesn't have anything better. 16.gxf3 exf3 17.Bxf3 There is no

direct way for Black to take advantage of the slightly exposed white king, so he hopes to have some positional compensation, which I don't see.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Nf5 The knight seems strange on f5 to my eyes. 10.Bd3 Developing and targeting the knight. 10...g6 Guarding the knight and preparing for bishop fianchetto. 11.0-0 a6 Black must chase the knight. 12.Nc3 Bg7 13.Bxf5 White voluntarily gives up the bishop pair, which looks like a strange decision. However, his light-squared bishop is his worst piece, while black's knight has a bright future on the d4 square. 13...Bxf5 13...gxf5 is bad from the structural point of view. After 14.f4 White is clearly better. 14.Be3 Rc8 15.Qa4+ Qd7 We were following the game P.Maghsoodloo - A.Fawzy, Sharjah 2021. 16.Rac1 Indirectly defending the c4-pawn. 16...Bd3 Doesn't win a pawn for Black. 17.Qxd7+ Kxd7 18.Rfd1 Bxc4 Loses immediately. 19.Na4 Black can't stop material losses.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation

as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Nf5 The knight seems strange on f5 to my eyes. 10.Bd3 Developing and targeting the knight. 10...g6 Guarding the knight and preparing to fianchetto the bishop. 11.0-0 Bg7 This developing move loses the d6-pawn by force. 12.Qa4 0-0 Only move. 13.Qa3 Re8 Otherwise Black is lost. 14.Bxf5 Killing the guardian. 14...Bxf5 15.Nxd6 Bf8 The point of Re8. 16.c5 Bxd6 17.cxd6 White is a pawn up, but we shouldn't stop here. 17...Qf6 Black prepares to capture the d6-pawn. 18.Be3 In the meantime, White develops and improves his pieces. 18...Red8 19.Rad1 Rxd6 20.Bc5 Rd7 21.Qe3 This allows the bishop to reach the safe square on a3. 21...b6 22.Ba3 White has a much safer king and a passed pawn which, is enough for a big advantage in this seemingly simple position.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to

retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Ng6 If Black could castle he would have a great position. 10.Qa4 Creating deadly threats. 10...Bd7 Only move. 11.Qb4 White is annoying Black and constantly attacking some pawns. Here Black has a choice between two approximately similar options: Bf5 and Qb8. 11...Bf5 Black would like to place a pawn on f5, but he needs to defend the pawn first. 12.h4 Allowing h5 seems too much. 12...Be7 13.h5 Nf4 The knight on f4 doesn't look bad, but White has a very direct play in mind. 14.Be3 Developing and preparing for queenside castling, which takes away the d3 square for the black knight. 14...a6 15.Nc3 Nd3+ Black goes for Nd3 since he might not have another chance. 16.Bxd3 Bxd3 This position was reached twice, in the games Nepomniachtchi - Dubov, World rapid Moscow 2019, and Kramnik - Roganovi, Olympiad Batumi 2018. Both times White chose 17.h6 , but it is more precise to start with castling, which doesn't allow the black bishop to retreat to the g6 square. 17.0-0-0 e4 18.h6 Leaving Black with an unpleasant choice. Sometimes, White can sacrifice an exchange on d3 to deprive Black of any counterplay on the queenside.

**B33**

□ **Nepomniachtchi,Ian**
■ **Nepomniachtchi,Ian**

Nepomniachtchi got off to a great start in the Zagreb GCT tournament (although he faded towards the end) . This game showed how dangerous he is as a 1. e4 player. 1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 Heading for the Sveshnikov. 5.Nc3 e5 6.Ndb5 d6 7.Nd5 This seems to be the new mainline nowadays, rather than 7. Bg5. 7...Nxd5 8.exd5 Nb8 8...Ne7 The other retreat is just as good. 9.a4 9.c4 The main move. 9.Bd2 Be7 10.a4 Transposed in Nepomniachtchi-Gelfand, Amsterdam blitz, 2019. 9...Be7 10.Bd2 10.Be2 Caruana played this move twice in his match with Carlsen (both draws) . O-O 11.O-O f5 11...Nd7 12.Bd2 12.b4 a6 13.Na3 a5 14.bxa5 This was Game 10 of the 2018 WC match. 12...f5 13.a5 This was Game 8 of the 2018 WC match. 12.f4 10...0-0 11.a5 a6 12.Na3 Nd7 12...Bf5 13.Be2 Be4 14.Bf3 Bxf3 15.Qxf3 Nd7 Black doesn't seem to have any problems. 13.Nc4 f5 14.Bb4 Rf6 15.Qd2 Rg6 This plan is probably premature - White has not committed his king to the kingside yet. 16.g3 e4 17.h4 b5 18.axb6 Nxb6 19.Na5 Bd7 20.0-0-0 Bf6 21.Nc6 Qe8 21...Qc7 22.h5 Rg4 23.Bh3 ? Bg5 22.Kb1 Kh8 23.h5 Rh6 24.Qe3 Na4 25.c3 Rxh5 25...Bxc6 26. dxc6 Qxc6 27.Rxd6 Qb7 It's very tough for White to survive, for example: 28. Be2 a5 29.Ba3 Nxc3+ 26.Rxh5 Qxh5 27.Be2 Qe8 28.Kc2 h6 28...Bxc6 29.dxc6 a5 30.Ba3 Qxc6 31.Rxd6 Qb7 29.Qf4 a5 30.Nxa5 Nxc3 31.bxc3 Ba4+ 32.Kb1 Bxd1 33.Bxd1 Qb5 34.Nb3 Bg5 34...Qxd5 35.Bc2 White is

in serious trouble here, his pieces are very uncoordinated. 35.Qxf5 This pawn was holding Black's position together. 35...Qf1 36.Qg4 Rf8 37.Kb2 Rxf2+ 38.Bc2 Qc4 39.Qe6 39.Qxe4 ?? This is impossible due to the pin. Qxe4 39...Bf6 40.Qxd6 Rxc2+ Gambling on the e-pawn. 40...Qe2 41.Na1 41.Kxc2 Qd3+ 42.Kb2 e3 43.Qe6 e2 44.Ka3 Bg5 45.d6 White has a pawn of his own ! 45...Qa6+ 46.Kb2 Qd3 47.d7 Kh7 48.c4 Bf6+ 49.Ka3 Qc2 50.Qxf6 The final blow, White resigned in view of: 50...gxf6 51.d8Q

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Nf5 The knight seems strange on f5 to my eyes. 10.Bd3 Developing and targeting the knight. 10...g6 Guarding the knight and preparing for bishop fianchetto. 11.0-0 a6 Black must chase the knight. 12.Nc3 Bg7 13.Bxf5 White voluntarily gives up the bishop pair, which looks like a strange decision. However, his light-squared bishop is his worst piece, while black's knight has a bright future on the d4 square. 13...Bxf5 13...gxf5 is bad from the structural point of view. After 14.f4 White is clearly better. 14.Be3 0-0 15.Qd2 Qh4 Black activates his queen, attacks pawn on c4 and stops Bh6 ideas. In case of 15... Rc8 White simply plays 16.b3 . 16.b3 e4 Black must try something, to open up his bishop from g7. 17.Bd4 Challenging the bishop. 17...Bh6 Black has to avoid the trade of the bishops, especially now when his light-squared bishop is restricted by his own pawns. 18.Qe1 White wants to play f4, and stop any kind of attacking ideas from Black. 18...Bg5 Guarding the queen. 19.Be3 Bf6 20.Rc1 Preparing for the knight maneuvre. 20...Rfe8 21.Ne2 Be5 22.f4 Qxe1

23.Rfxe1 White has better chances in the endgame thanks to the pawn majority on the queenside. Endgame with opposite-coloured bishops can be very unpleasant for Black.

**B33**

□ **Nc6 Sveshnikov**
■ **Sveshnikov Ne7**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Ne7 The modern way of playing this position. It has brought many victories to the current World Champion. It seems as if Black is on the verge of losing a pawn in this line, but somehow always manages to find some compensation for it. 9.c4 Nf5 The knight seems strange on f5 to my eyes. 10.Bd3 Developing and targeting the knight. 10...Be7 This is inferior compared to the g6 line, or the Nb8 line, because the knight simply doesn't belong on the f5 square. 11.0-0 Simple chess. 11...0-0 12.f4 The knight is in trouble already. 12...a6 13.Nc3 What else? 13...Qb6+ 14.Kh1 Ne3 Black tries to gain the bishop pair at least, but everything else is bad in his position. 15.Bxe3 Qxe3 16.f5 Is strategically very bad for Black. White has free hands on the kingside, and Black will have to give up some material by playing b5 to avoid a deadly attack.

**Overview**
*[IM Kushager Krishnater]*

Welcome to the third and final part of this series on the Open Sicilian. In this course, I will cover 2...Nc6 and sides for Black in the Open Sicilian. Concretely speaking, I will be recommending lines against the Sveshnikov Sicilian, Kalashnikov Sicilian, Accelarated Dragon, Grivas Sicilian, Nimzowitsch Sicilian the O'Kelly Sicilian. The approach in this course is to recommend principled variations against the Sveshnikov & Kalashnikov while keeping practical options against the rest. Against the most critical Sveshnikov, I recommend two setups. One with 7.Bg5 & Nd5, leading to a strategically rich game. The other approach is 7.Nd5!?, which often leads to sharp and uncompromising play. **1.e4 c5 2.Nf3** the starting point of this course. **2...Nc6**

[ 2...a6 The O'Kelly Sicilian. Black hopes for 3.d4 cxd4 4.Nxd4 e5!?. Against this, I recommend the easy-to-play and sound setup with 3.c4 Nc6 4.d4 cxd4 5.Nxd4 Nf6 6.Nc3 e5 The most critical setup. However, after 7.Nf5!? White keeps a risk-

free edge in most cases. ]
[ 2...Nf6 The Nimzowitsch Sicilian. This is a very provocative move. Black tempts us to expand with e5. 3.e5 we graciously accept the offer! Nd5 4.Nc3 We provoke ...Nxc3. This would help us obtain a huge lead in development after dxc3-Bf4. e6!? The modern way to treat this system. Black wants to undermine the center with ...d6 next. Here, I recommend 5.Ne4!? provoking . ..f5. f5 6.Nc3!? Black has more weaknesses in their camp compared to the position after 4.Nc3. White usually keeps a big advantage in this system. ]

**3.d4 cxd4 4.Nxd4** more or less the crossroad for this course. Black has four major options here. **4...Nf6**

[ 4...e5 The Kalashnikov Sicilian. This is sounder than it's reputation, often leading to strategically complicated positions. However, after 5.Nb5 followed by c4, Black needs to be extremely precise to avoid being worse strategically. d6 *( 5...a6* this old line is more or less outdated. Here, I recommend *6.Nd6+ Bxd6 7.Qxd6 Qf6 8.Qd2 Qg6 9.f3 Nge7 10.Bd3* avoiding all ... d5 tricks. White will develop with b3-Bb2 or Ba3 next. *)* 6.c4 Entering the 'Maroczy' territory. The critical position arises after Nf6 7.N5c3 Be7 8.Be2 0-0 9.0-0 Be6 10.Be3 Rc8 11.Na3!? White keeps a huge spatial edge in these lines. Blacks need to be very careful not to end up getting worse. ]

[ 4...g6 The Accelarated Dragon. Black delays ...d6 purposefully. Against this, I recommend a very fresh system with 5.Nc3 Bg7 6.Be3 Nf6 7.Nb3 avoiding all ... e6-d5 ideas. We force Black to convert to the 'Dragon' structures. 0-0 8.Qd2 d6 9.f3 with 0-0-0 & h4 coming up next. Your opponent is out of the book on move 9 in a sharp and complicated territory. I find these lines to be quite tricky for Black to handle. ]

[ 4...Qb6 The Grivas Sicilian. Black forces us to retreat with our knight. 5.Nb3 While the knight on b3 is slightly less active than it was on d4, Black's queen on b6 is quite vulnerable. White would gain a free tempo after Be3 at some point. Nf6 6.Nc3 e6 7.Bd3!? I recommend this simple system against the main line of the Grivas. White maintains flexibility between the plans of Be3-0-0 or Be3-Qe2 & 0-0-0. White usually keeps a big advantage in these variations. ]

**5.Nc3 e5 6.Ndb5 d6** The Sveshnikov Sicilian. This is perhaps the soundest Sicilian for Black strategically. Here, I recommend two interesting setups. **7.Bg5!?** This leads to a safer and strategically complicated game.

[ 7.Nd5!? The other sharper choice. Nxd5 8.exd5 Nb8 Black's most trusted defence here. *( 8...Ne7* usually leads to slightly better positions for White. My intended setup here is *9.c4 Ng6 10.Qa4 Bd7 11.Qb4 Qb8 12.h4 h5 13.Be3 a6 14.Nc3 Be7 15.Na4!?* where White keeps an easier game due to the extra space in the center. *)* 9.Qf3!? this leads to a very sharp game. The critical position arises after a6 10.Qa3 Be7 11.Bg5 f6 12.Bd2 0-0 13.Bb4 axb5 14.Qxa8 Na6 15.Bd2 Qc7 and here after 16.c3!? White won easily in 1-0 (41) Erigaisi,A (2712)-Vachier Lagrave,M (2727) Kolkata 2023. Black needs to be extremely precise to navigate these complications. ]

**7...a6 8.Na3 b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c4 b4 12.Nc2** All of this is more or less forced. Here, Black has a few choices. **12...0-0** This is the modern way of playing. Black doesn't need to spend time on playing ...a5. However, after the typical

[ 12...a5 The old main line. Here, I recommend playing 13.Qf3 Bg5 14.h4!? where the complications favor White. ]

[ 12...Rb8 can be met with the thematic 13.b3 0-0 14.h4!? restricting the bishop on f6. ]

**13.h4!? a5 14.Qf3** we reach a position where Black needs to be extremely precise to equalize comfortably. For example, the natural **14...Be6** can be met with **15.Be2 Bxd5 16.cxd5 Nd4 17.Nxd4 exd4 18.Rb1 a4 19.g3 a3 20.b3!?** where I think White keeps a risk-free edge. Black struggles to improve, while White has several ways to improve the position.

Short & Sweet: The King's Indian Attack

**1.e4 c5 2.Nf3 Nc6 3.d4 cxd4!** Now, we will take a look at the lines connected with 3... e5!. I give an exclamation mark to this move because I think that it objectively equalizes for Black. **4.Nxd4 Nf6?!** Preparing ... Ngf6. It has a serious drawback though. **5.Nc3!** White wastes a tempo but at a powerful move. Black doesn't have an easy response to White's central strike. **5...e5 6.Ndb5 d6** This doesn't work well for Black. **7.Bg5 a6 8.Na3** White develops with tempo. **8...b5 9.Nd5 Be7 10.Bxf6 Bxf6 11.c3!** Finishing development and planning to castle short.

□ **Nc6 Sveshnikov**
■ **Sveshnikov Nb8**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 The Sveshnikov variation. Since many new ideas were found in the 70ies and the 80ies, it gained a reputation as one of the best Sicilians for Black. It was a pet line of many top-class players, including two World champions: Magnus Carlsen and Vladimir Kramnik, who played it quite often before the unfortunate discovery of the Berlin defense. 6.Ndb5 d6 7.Nd5 This move was never considered critical, but the World Championship match Caruana - Carlsen from 2018 has completely changed the course of the current theory. The main problem for White is that after 7.Bg5 Black was successfully equalizing in most of the lines, so White players were somehow forced to create something new. The move 7.Nd5 gives up fight for the d5 square, which is a success for Black and leads to the pawn structures that are typical for the Najdorf. The positive side for White with the move Nd5 is that the knight from b5 doesn't have to retreat to the a3 square and quite often goes back to c3 after the pawn goes to c4. Also, Black has to decide where to place his knight. 7...Nxd5 8.exd5 Black here has a choice between Nb8 and Ne7. The first one had a better reputation, but the World Champion revived the whole Ne7 line. 8...Nb8 9.a4 White has two ways to solve the problem of the b5-knight, he can play 9.c4 and return the knight to c3, or play in a modern way 9.a4 and return the knight to a3 where it can reach his ideal square in this pawn structure, the c4 square. 9...Be7 Black develops his kingside first, and is not in a hurry to play a6. 10.Be2 White also develops, before pushing on the queenside with a5. 10...0-0 11.Bd2 TheCmost common move is 11.O-O but after 11...Nd7 12.Bd2 a6 13.Na3 a5 practice has shown that Black has good chances there. With this move order îîStartBracketîîBd2 before castlingîîEndBracketîî White fights against the mentioned plan îîStartBracketîîa6 followed by a5îîEndBracketîî and doesn't spoil his position. The bishop goes to d2, to guard the pawn on a5, or to attack the black pawn depending on our opponent's reaction. 11...f5 Usually, the best plan for Black is to play on the kingside, and postpone playing a6 as long as possible. 12.a5 Improving on the queenside and waiting for a reply. 12...f4 I'm not impressed by such moves, especially when White hasn't castled yet. Black does gain some space on the kingside and prevents White from playing f4, but weakens the e4 square and the light squares in general. 13.c4 White ignores his opponents ideas, and continues with his plan. 13...Bf5 This is very instructive line showing why the light squares are important. 14.Bg4 Trying to trade light-squared bishops to emphasize the weaknesses in the black position. 14...Bd3 Attacking the pawn and preventing White from castling. 15.Ra3 Very strong move, we don't care about one pawn. 15...Bxc4 16.Be6+ Check. 16...Kh8 17.Rh3 Suddenly White threatens mate in 2: 17...-- 18.Rxh7 Kxh7 19.Qh5 . 17...h6 The only playable way for Black to stop the mate, playing g6 is worse. 18.Na3 The knight was hanging, and it is important that White gains a tempo with this move. 18...Ba6 Only available square

for the bishop. 19.Qg4 The Queen joins the attack. Black will have big troubles defending this position.

☐ **Model Games Sveshnikov**
■ **Game #5: Cheparinov,Ivan vs. Carlsen**

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 9.Bxf6 gxf6 The dynamic recapture, and the only move. 9...Qxf6 10. Nd5 Qd8 11.c4 ! Instead 11.Bxb5 is also terrible for Black. 11...b4 12.Qa4 Bd7 13.Nb5 ! Ouch ! axb5 14.Qxa8 Qxa8 15.Nc7+ and White wins. 10.Nd5 Bg7 11.Bd3 Ne7 12.Nxe7 Qxe7 13.c4 13.O-O is the main alternative, although this often transposes to the move played in the game. O-O 14.c4 f5 ! with active counter-play for Black, as examined in the theoretical section. 13...f5 13...bxc4 14.Nxc4 and some sort of position where White imposes a bind with Ne3-d5, or Ne3-f5, is something we should definitely avoid. Therefore it's a good idea to play our dynamic ...f5 break as early as possible. 14.0-0 0-0 15.cxb5 This line gives Black good play without any particular problems to solve. There are at least two meaty alternatives for White here, one of which is 15. Qh5 Rb8 16.exf5 e4 17.Rae1 Bb7 And here White has a wide choice, as examined in the theoretical section. 15.Qf3 d5 16.cxd5 fxe4 17.Bxe4 Rb8 And Black obtains enough compensation, as examined in the course. For both of these lines I refer you to the 11. Bd3 chapter. 15...d5 This is the idea. Black forces a position where the bishop on g7 becomes active. 16.exd5 e4 17.Qe2 Rb8 This is less convincing than 17... Qb4, but Black still retains good practical chances. Black achieves good play with 17...Qb4 ! 18.Bc4 Qxb2 19.Nc2 axb5 20. Rab1 Qf6 21. Rxb5 f4 This line is mentioned in the theoretical section of the course - line #39. 18.Rab1 18.Bc4 The engines prefer this move, giving White some advantage. This is not entirely clear to me, but it is not theoretically that relevant. 17... Qb4 is our improvement earlier. 18...Rb6 Magnus goes for the rook lift, a common idea in this line. 19.Qe3 Rg6 20.Bc2 The black attack becomes very strong after this move, but it's very tough to defend this position. White has offside pieces on a3 and b1. 20. bxa6 This greedy looking move is probably best. Qh4 21.a7 Bb7 22.Bc4 Bd4 ! a nice tactical trick, that ensures the draw. 22...Be5 23.g3 Qh3 24.f4 Bc7 is also playable and avoids the immediate end of the game with the perpetual after 22.. . Bd4. The engines already calculate a forced draw from here, which is of course rather academical and not very relevant for human play. White has many ways to go wrong in the defense. 23.Qxd4 Rxg2+ = 20...Qh4 The game is a mess. Black has given away the queenside, but still has huge chances on the other side of the board. 21.b6 21.f4 ? exf3 22.Qxf3 22.Rxf3 ?? Bd4 -+ 22...Be5 23.h3 Rg3 ↑ 21.g3 This is the toughest defence. Qh3 22.f4 White needs to be able to defend on the second rank. h5 and Black's attack is still very dangerous. Instead of 22... h5 the move 22... Bd4 draws already for Black, which makes the whole line additionally unattractive for

White: Black has a draw in hand and can look for more... 21...Kh8 Magnus already had a winning shot, but misses it. 21...f4 ! 22.Qxe4 Rh6 23.h3 23.Rfd1 f5 24.Qf3 Qxh2+ 25.Kf1 Re8 and White is in a mating net. 23...Qg5 24.d6 24.Kh2 Be5 25.Qf3 Bg4 and this clearly is too much to handle. 24...Rxh3 25.b7 f3 and again Black wins. 22.Nc4 Again 22.g3 had to be played , with still sufficient chances to defend. 22...Rg8 This is good enough to win. 22...f4 23.Qxe4 Rh6 The same attacking pattern would have worked again, as on move 21. 23.g3 Qh3 24.Rfd1 24.Qd2 f4 ! White collapses on h2 now. 25.Bxe4 25.Qxf4 Rh6 -+ 25...Rh6 -+ 24...Rh6 25.Qf4 Bf6 25...a5 A very strong alternative, getting ...Ba6 on the map. This move was winning as well. 26.d6 Ba6 27.b3 e3 A cool winning shot ! 28. Qxe3 Bb7 And Black wins. 26.Ne5 26.b7 ! White would have posed more problems with 26. b7. Bxb7 27.Nd6 Rxg3+ This does the job, but the more obvious 27... Qxh2+ is not enough, surprisingly. 28.Qxg3 28.fxg3 Qxh2+ 29.Kf1 Qh1+ 30.Ke2 Rh2+ 31.Ke3 Qg2 and Black wins ! This is not at all easy to see ! 32.Nxf7+ Kg7 33.Ne5 Qxc2 34.Qxf5 Bc8 35.Qf4 Qc5+ 36.Rd4 Rh5 Ultimately White's king will fall. 28...Rg6 29.Nxb7 Be5 30. Nd8 Bxg3 31.fxg3 f4 And the attack crashes through. 26...Bxe5 27.Qxe5+ f6 28.Qf4 Rg4 29.Qc7 Rg8 30.Re1 Now Black wins quite easily. 30.Qf4 a5 The simple one. ... Ba6 is decisive. 30...Rh4 This also wins, but requires to find an amazing string of moves. 31.Qd6 Be6 !! A fantastic shot ! 31...Qxh2+ 32.Kf1 Qh1+ 33.Ke2 Qf3+ 34. Kd2 Qxf2+ This even lands Black in trouble. 35.Kc3 Rh6 36.Rbc1 and amazingly White is winning in this position ! The king will be safe on the queenside and the d- and b-pawns are terribly strong. 32.Qxe6 32.dxe6 e3 The key move of the attack. 33. fxe3 Qxh2+ 34.Kf1 Qh1+ 35.Ke2 Qg2+ 36.Kd3 Rc8 ! This is the only move that wins !! The threat is now ...Qe4+, followed by ...Rh2+. 37.gxh4 Qxc2+ 38.Kd4 Qe4# 32... Rxg3+ 33.fxg3 Qxh2+ 34.Kf1 Qh1+ 35.Ke2 Qf3+ 36.Kd2 Rh2+ 37.Kc1 Qe3+ 38.Rd2 Qxd2# 30...Qxh2+ 31.Kf1 Qh1+ 32.Ke2 Qf3+ 33.Kd2 Qxf2+ 34.Kd1 f4 35.Qc3 fxg3 36.Bxe4 Bg4+ 37.Kc1 Rc8 A good example of the type of attack that Black often manages to start in the Sveshnikov main line with 11. Bd3.

**B33**

□ **Ss Magnus Sicilian**
■ **Sveshnikov 9. Bxf6,11. c3**
Short & Sweet: The Magnus Sicilian

The move 19... Qg5 is the recommendation of both the engines and the correspondence players and looks attractive, so we'll go for it. Our threats are now ... f4 and ...Bh5. **1.e4 c5** Hello and Welcome to 'Short and Sweet: The Magnus Sicilian'! This 'Short and Sweet' opening course provides you with an overview of the Sicilian, choosing lines based on World Champion Magnus Carlsen's repertoire. In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white

king, which is fun to play and tricky for White to handle. If you are looking for an active and ambitious opening for Black, this is the right one for you. As of today (Nov 11, 2019) Magnus Carlsen has not lost a single game with the Siclian in Classical time control games since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run. I am mentioning non-losing streaks, but what about wins? Magnus has won many attractive games with the Sicilian, often going all out for an attack on the king. I hope you enjoy this overview of the Sicilian, played like Magnus does it! **2.Nf3 Nc6 3.d4**

[ The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. ]

**3...cxd4 4.Nxd4 Nf6 5.Nc3 e5**

[ This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted, but there have been many other names over the years. It was first used by World Champion Emanuel Lasker against Carl Schlechter in 1910, but Schlechter played the uncritical 5...e5 6.Nb3 and Lasker obtained a good game easily. ]

[ It was quite quickly figured out that 5...e5 6.Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. ]

[ It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 ]

[ and 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. ]

[ Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that after 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Black should play b5 , rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky. ]

[ Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally), Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018. Now, what is so great about the Sveshnikov Variation? At the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed? I think this actually needs to

be explained combining some general points and some concrete lines. After 5... e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In the first lines we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 5...e5 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in subsequent variations. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. ]

[ The two other main lines of the Sveshnikov start after 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 . Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. *(* Back to the real position: after *8...b5* Black threatens ... b4, which leaves White with the choice between *9.Nd5* , usually followed by *Be7 10.Bxf6 Bxf6;* or *8...b5 9.Bxf6 gxf6 10.Nd5* . The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game.*;* Now, the line *8...b5 9.Nd5 Be7 10.Bxf6 Bxf6* is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. *)* White also has the line 9.Bxf6 gxf6 *(* forced, because *9...Qxf6 10.Nd5 Qd8 11.c4* is too bad *)* 10.Nd5 . In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. ]

Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion. Contrary to Sicilians without ...e5 Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in

order to throw the kitchen sink towards White's king, going for checkmate! This is an important practical consideration that often allows Black to score points from objectively dubious positions. **6.Ndb5 d6 7.Bg5 a6 8.Na3 b5** After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5.

[The difference between the two options is substantial. After the immediate 8...b5 9.Nd5 Black plays Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop, ]

[while after 8...b5 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. ]

The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. **9.Bxf6**

[White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and most tactical line of the three. This in particular applies to the line 9.Bxf6 gxf6 10.Nd5 Bg7 11.Bd3 , which turns razor-sharp quickly. ]

**9...gxf6**

[This is forced. Black can't capture with the queen, because after 9...Qxf6? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 *(*and *11.c4* are terrible for Black. *)*]

A good comparision to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of the larger course), in which Black has the bishop on f6, while after 9... Qxf6? 10. Nd5 Qd8 it is on f8! So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. **10.Nd5 Bg7**

[Black has two good moves in this position, the more traditional 10...f5 and the newer move 10... Bg7, the so-called Novosibirsk variation.Our repertoire choice is quite easy, as the World Champion has always played 10... Bg7, as far as I can see. ]

[After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 10...Bg7 11.Bd3 , preventing ...f5 for the moment. Black often sacrifices pawns in this line, leading to wild, tactical positions. *(*The second option is *11.c3* , which is also sharp, but requires less radical measures than 11. Bd3. *)*]

**11.c3 f5** This is a lot better than 11... Ne7. Playing ...Ne7 is much more pointed after 11. Bd3, because Black in this case immediately threatens to take on d5, forcing the pawn recapture. Therefore after 11. Bd3 Ne7 White has to take on e7, which is not the case here as the queen is still able to take on d5.

[A sample line would be 11...Ne7 12.Nc2 Nxd5 13.Qxd5 Rb8 14.Ne3 , when Black is more or less busted - you can't even get in ...f5 in the first place. ]

**12.exf5** The simplest and most popular choice for White. Other moves in the 11. c3 variation are discussed in my larger course. **12...Bxf5 13.Nc2 0-0 14.Nce3 Be6 15.Bd3 f5 16.0-0** In some of the sharp lines White does not manage to castle, so this solid move is certainly a reasonable choice. **16...e4**

[ We usually play ...e4 in these lines in reply to Qh5, so we will choose a similar approach here. Note that 16...f4 fails to 17.Qh5 ]
[ and 16...Ne7 is refuted by 17.Nxe7+ Qxe7 18.Bxf5! , which amounts to a disaster as well. ]

**17.Nf4** The only move, otherwise we'd have ...f4 next. **17...Bf7 18.Bc2 Be5**
[ As played by Magnus Carlsen, so we'll follow the Champion's example. Black has some decent alternatives here, like 18...Qd7 ]
[ and 18...Qg5 . ]

**19.Nfd5 Qg5**
[ I suggest to play this move instead of Carlsen's 19...Kh8 . He got into some trouble against V.Topalov in Abidjan 2019. He still won this Blitz game quickly after Topalov misplayed it soon after. ]

**B33**

□ **Ss Magnus Sicilian**
■ **Sveshnikov 9. Bxf6,11. Bd3**
Short & Sweet: The Magnus Sicilian

**1.e4 c5** Hello and Welcome to 'Short and Sweet: The Magnus Sicilian'! This 'Short and Sweet' opening course provides you with an overview of the Sicilian, choosing lines based on World Champion Magnus Carlsen's repertoire. In the Sicilian Black immediately breaks the symmetry on move one, making it an ideal weapon to unbalance the game and play for a win. In the main lines of the Sveshnikov Black frequently sacrifices material to drum up an attack on the white king, which is fun to play and tricky for White to handle. If you are looking for an active and ambitious opening for Black, this is the right one for you. As of today (Nov 11, 2019) Magnus Carlsen has not lost a single game with the Siclian in Classical time control games since 2011! Admittedly, he did not play it that frequently between 2011 and 2018, but still a very impressive run. I am mentioning non-losing streaks, but what about wins? Magnus has won many attractive games with the Sicilian, often going all out for an attack on the king. I hope you enjoy this overview of the Sicilian, played like Magnus does it! **2.Nf3 Nc6 3.d4**
[ The open Sicilian will very likely always be the critical test of any Sicilian setup. Against the open Sicilian Magnus Carlsen's choice is the Sveshnikov Variation. After 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 e5 the starting position of this variation arises. ]

**3...cxd4 4.Nxd4 Nf6 5.Nc3 e5**
[ This is the starting position of the Sveshnikov. Nowadays this name of the variation is widely accepted, but there have been many other names over the years. It was first used by World Champion Emanuel Lasker against Carl Schlechter in 1910, but Schlechter played the uncritical 5...e5 6.Nb3 and Lasker obtained a good game easily. ]

[ It was quite quickly figured out that 5...e5 6.Ndb5 should be critical, and for a long while the structural weaknesses in Black's position were considered to be too severe. ]
[ It took almost 50 years to put this line back on the map, when Jorge Pelikan and Herman Pilnik found some new ideas for Black. They mostly investigated 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Be6 ]
[ and 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Bxf6 gxf6 9.Na3 d5 , lines that still seen today occasionally. So in the late 1960s the move 5... e5 would be called the start of the Lasker/Pelikan/Pilnik-Variation. ]
[ Then in the early 1970s Evgeny Sveshnikov and some fellow master players from the Russian city of Chelyabinsk discovered that after 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 Black should play b5 , rather than 8... Be6. Sveshnikov and mostly Gennadi Timoshenko used their innovation successfully and quite quickly the variation was taken up by some more Russian players, most notably the winners of the World Junior Championships Valeri Chekhov, Sergei Dolmatov and Artur Jussupow, all students of the legendary chess trainer and author Mark Dvoretsky. ]
[ Since these early days almost all of the World Champions and World Championship challengers have played the Sveshnikov (or Chelyabinsk variation, as it is often called in Russia) regularly or on occasion. We can list Kasparov, Anand (occasionally), Kramnik, Topalov, Gelfand, Caruana and of course Magnus Carlsen employing the Sveshnikov on the highest level and even during World Championship clashes, as seen in the Carlsen-Caruana Match in London 2018. Now, what is so great about the Sveshnikov Variation? At the early days of the Sveshnikov Black's weak d5-square and backward d-pawn were thought to be too much to handle - why has this assessment changed? I think this actually needs to be explained combining some general points and some concrete lines. After 5. .. e5 White needs to move the knight and concrete lines show that the only challenging move is 6. Ndb5. In the first lines we will examine why 6. Nb3, 6. Nf3 etc. at best lead to equality for White, often less than that. After 5...e5 6.Ndb5 d6 is best, after which White has the option to enter the line 7. Nd5, as examined in subsequent variations. However, after 7.Nd5 Nxd5 8.exd5 we have to state that Black's structural problems - the d5-square and the d-pawn - are already solved. Only very recently this line has seen some new ideas for White, making it more interesting for White to try. Still Black retains fair chances, usually utilizing the pawn majority on the kingside. ]
[ The two other main lines of the Sveshnikov start after 5...e5 6.Ndb5 d6 7.Bg5 a6 8.Na3 b5 . Before we look at those concrete lines, I need to mention how important the bad position of the a3-knight is. White has lost quite a bit of time already with this piece and will move it again more often than not, trying to connect it with the d5-square. All these time losses with the knight make the position viable for Black. Just imagine the knight would be on e3 instead of a3 - this would be a terrible position for Black. *(*Back to the real position: after *8...b5* Black threatens ... b4, which leaves White with the choice between *9.Nd5* , usually followed by *Be7*

*10.Bxf6 Bxf6;* or *8...b5 9.Bxf6 gxf6 10.Nd5* . The evaluation of the Sveshnikov depends on the theoretical state of the earlier mentioned 7. Nd5 and these two traditional main lines. In both lines Black gains the bishop pair, which is a great asset to have that early in the game.*;* Now, the line *8...b5 9.Nd5 Be7 10.Bxf6 Bxf6* is White's more strategic choice, trying to exploit the static advantages - control over d5, d-pawn. We will see that Black is able to fight for control over d5, but in many cases does not need to focus on that. Often ignoring the knight and starting play with ...f5 or/and even on the queenside is possible. One point to understand is that it is almost impossible for White to BOTH use the d5-square and build up pressure on the d-file. A knight on d5 plugs the d-file, so White is not just attacking d6 and wins this pawn later. In fact the 'weak' d6-pawn almost never gets lost in any Sicilian. *)* White also has the line 9.Bxf6 gxf6 *(* forced, because *9...Qxf6 10.Nd5 Qd8 11.c4* is too bad *)* 10.Nd5 . In this line the play is more dynamic, because Black will play ...f5 quickly and tries to completely take over the centre. The position opens up, which is excellent for Black's bishop pair. Quite quickly tactics will become an important factor and the knowledge of concrete lines is more essential than in any other line of this repertoire. ]

Before we continue to examine the sidelines, I'd like to mention one very important aspect of the Sveshnikov. Black very frequently will play the move .. .f5, starting play in the centre and on the kingside. Black has a central pawn majority since move 3 and ...f5 will even try to remove the e4-pawn to set the central pawn mass in motion. Contrary to Sicilians without ...e5 Black's play is mostly in the centre and on the kingside, while Black's king is perfectly safe. In lines like the Dragon or the Najdorf Black often loses due to mating attacks, which almost never happens in the Sveshnikov, quite the contrary. In some lines we have to abandon the queenside in order to throw the kitchen sink towards White's king, going for checkmate! This is an important practical consideration that often allows Black to score points from objectively dubious positions. **6.Ndb5 d6 7.Bg5 a6 8.Na3 b5** After 8... b5 Black threatens to fork the knights, so White does not have a wide range of moves. He either plays 9. Nd5 or 9. Bxf6 first, followed by 10. Nd5.

[ The difference between the two options is substantial. After the immediate 8...b5 9.Nd5 Black plays Be7 , after which 10.Bxf6 Bxf6 is the usual follow up. In this line Black is able to recapture on f6 with the bishop, ]

[ while after 8...b5 9.Bxf6 you need to capture with the pawn, doubling the f-pawns. In this doubled f-pawn structure the play is considerably sharper early on, as Black is able to play ...f5 quickly to attack White's centre. ]

The line 9. Nd5 Be7 10. Bxf6 Bxf6 is a slower, more strategic approach by White, trying to control the position, in particular the weak d5-square. **9.Bxf6**

[ White has three mainlines in the Sveshnikov: 6. Ndb5 d6 7. Nd5, 6. Ndb5 d6 7. Bg5 a6 8. Na3 b5 9. Nd5 and this one, which is by far the sharpest and most tactical line of the three. This is particular applies to the line 9.Bxf6 gxf6 10.Nd5 Bg7 11.Bd3 , which turns razor-sharp quickly. ]

**9...gxf6**

[This is forced. Black can't capture with the queen, because after 9...Qxf6? 10.Nd5 Qd8 White has many lines to give him a huge advantage. The brutal 11.Bxb5 *(*and *11.c4* are terrible for Black. *)*]

A good comparision to make: look at the very popular mainline 9. Nd5 Be7 10. Bxf6 Bxf6 (covered in 2 chapters of the larger course), in which Black has the bishop on f6, while after 9... Qxf6? 10. Nd5 Qd8 it is on f8! So long story short: take with the g-pawn and look forward to playing ...f5 even twice, if possible. **10.Nd5 Bg7**

[Black has two good moves in this position, the more traditional 10...f5 and the newer move 10... Bg7, the so-called Novosibirsk variation.Our repertoire choice is quite easy, as the World Champion has always played 10... Bg7, as far as I can see. ]

[After 10... Bg7 White has two main tries for an advantage. The first one and the sharpest line is 10...Bg7 11.Bd3 , preventing ...f5 for the moment. Black often sacrifices pawns in this line, leading to wild, tactical positions. *(*The second option is *11.c3* , which is also sharp, but requires less radical measures than 11. Bd3. *)*]

**11.Bd3** This is White's sharpest option, because by preventing ...f5 he basically forces Black into the following lines. **11...Ne7** The only good move after 11. Bd3. The bishop move prevents ...f5 and we need to get rid of the d5-knight right away.

**12.Nxe7**

[White's choice is limited, because with 11... Ne7 we had threatened to take on d5. As usual it's very desirable for Black to take on d5 when White needs to recapture with a pawn. After 12.c4 Nxd5 we would get this favourable scenario. The main course examines a few lines where this happens. ]

**12...Qxe7** After 12... Qxe7 White has two basic options. He can play c4, attacking the b5-pawn, or play c3, preparing to get the offside knight back into the game. White might play c4 or c3 right away or do it after castling kingside first.

[Castling is rather natural for both side, so quite often this will be played quickly after a move of the c-pawn, for example 12...Qxe7 13.c4 f5 14.0-0 0-0 is just as common as 13. O-O O-O 14. c4 f5. ]

[In the larger course I will examine 12...Qxe7 13.0-0 0-0 as the main line and then split the lines with 14.c4 *(*or *14.c3* . *)*]

**13.0-0 0-0 14.c4 f5**

[The best way to react to 14. c4. As usual taking on c4 is terrible, as it helps the knight far too much. 14...b4 is also a disaster, as after 15.Nc2 a5 16.Ne3 Black does not even manage to play the fundamental ...f5 break. ]

This only leaves Black with sacrificing the b-pawn, which explains why the 14. c4 - or 13. c4 - line is the sharpest one in the main line. Black is giving away the queenside and goes all-in with his counterplay in the centre and kingside. **15.Qh5 Rb8**

[We would have liked to take on e4, but 15...fxe4 16.Bxe4 is a double threat on h7 and on the rook. This explains 15... Rb8 - now we are threatening to take on e4 and then play .. .f5 a second time! ]

[The move 15... Rb8 has been tested numerous times in over the board play and correspondence chess and it looks like Black is doing fine in the hair-raising

complications. I need to mention that 15... Rb8 is not the only move, though. In fact only some days before these lines were written the World Champion went for a different move: he played 15... d5!? in the Grand Swiss Isle of Man Tournament against Russian hopeful Alexey Sarana. 15... d5 is a rare move and was probably intended as a surprise, but Sarana had done his homework and blitzed out the following moves. 15...d5 16.cxd5 Qd8 17.exf5 Qxd5 18.Rad1 e4 19.Bxb5 Qxf5 20.Qxf5 Bxf5 21.Bd7 Bxd7 22.Rxd7 Bxb2 23.Nc4 . Now, this sequence is in fact clearly best play after 15... d5 and the resulting position I don't want to recommend, even though Magnus played the line. Black is very close to equality, but it's a grovel and not fun at all. Magnus ultimately drew the game after some unpleasant moments. Maybe HE kept his cool, but I would have been concerned! ]
In any case, I don't want to play for two results just yet if a win is not among them. And we have again transposed to the main line, usually reached after 13. O-O O-O 14. c4 f5 15. Qh5 Rb8. **16.exf5** A more or less forced decision. Otherwise we take on e4 and play ...f5 next. **16...e4 17.Rae1** We attacked both the bishop on d3 and the pawn on b2, so White needs a tactical solution. **17...Bb7 18.Qg4 Rfe8** We need to cover e4. **19.cxb5 Kh8** We can't play without this king move. Our bishop was pinned and ...Rg8 is an important option to gain. **20.bxa6 Ba8** This is a good moment to take stock. Black is three pawns down, but on all other accounts things are great! The pieces are active and there are many weak pawns that we might win back soon, like b2 and a6. Remarkably the engine evaluation is 'equal' and in correspondence chess White has not won a single game out of the 43 games in my database! This is amazing and an almost sure sign that purely from an analytical point of view Black is fine. This is not so important in a practical game, of course, but assuring to know. Given the choice, I'd take Black - our play is often directed against the king, which is always attractive.
